Second regular session 2005

6 to 9 September 2005, New York

Item 2 of the provisional agenda

Financial, budgetary and administrative matters

**Annual review of the financial situation, 2004*
Report of the Administrator**

Summary

UNDP continued to be a multi-funded organization receiving donor and local contributions from Member States. There was a consistent growth in resources contributions over the past five years, from \$2.4 billion in 2000 to \$4.0 billion in 2004. UNDP was able to maintain the upward trend in its regular resources for the fourth consecutive year, with regular resource contributions in 2004 amounting to \$842 million (a 30 per cent increase) compared to \$645 million in 2000. Donor contributions to regular and other resources registered a 36 per cent growth, rising from \$2.1 billion in 2003 to \$2.8 billion in 2004. Third-party co-financing contributions received from donors (donor cost-sharing, management services agreements (MSAs), trust funds and United Nations Volunteers – UNV) increased remarkably, by 55 per cent, from \$1.2 billion in 2003 to \$1.9 billion in 2004. Local resources provided by programme countries, which represent a significant portion of total income received (29 per cent), increased by 10 per cent, from \$1.1 billion to \$1.2 billion, reflecting continued political will and support for UNDP by partner countries. The present review includes financial overview of joint programming in a separate section. Contributions received in 2004 for joint programming activities totalled \$632 million. Contributions for these funds are recorded as ‘joint programming’ (not as ‘income’) in the UNDP balance sheet.

The overall programme expenditure (including funds, \$48 million) increased to \$2.9 billion, representing a 15 per cent growth from \$2.5 billion in 2003.

Regular and other resources are not interchangeable. Regular resources constitute the bedrock of UNDP, the guarantee of its universality, neutrality and independence. Significant progress has been achieved towards securing an adequate and stable multilateral funding base. The interim target of \$800 million set for 2004 in the second MYFF was met and even exceeded. And while the overall target of \$1.1 billion set by the Executive Board for the MYFF appears within sight, and a number of donors have confirmed multi-year pledges with step increases toward the \$1.1 target, there remains an approximately \$170 million shortfall, based on current commitment levels, required to reach the Executive Board regular resource target. Continued efforts of Member States are required to increase their funding to UNDP regular resources that will ensure the critical mass of core funding. This is especially important in a context where the current upward trend in regular resources is particularly vulnerable to exchange rate fluctuations.

Elements of a decision

The Executive Board may wish to: (a) take note of documents DP/2005/33 and DP/2005/33/Add.1; (b) reiterate, as stated in its decision 2004/14, the encouragement that all Member States in a position to do so to increase regular resources funding so as to rebuild the regular resource base of UNDP; and (c) recognize that the predictability of funding is as important as the amount, since timeliness of contribution payments is essential to avoiding liquidity constraints.

* The compilation of data required to present the Executive Board with the most current information has delayed submission of the present document.

I. Introduction

1. The present report provides an overview of the financial position of UNDP at the end of 2004 and the comparative figures for the year 2003. The report contains analyses of the activities of UNDP at the aggregate level, followed in order by analyses of the financial situation of regular resources, other resources and the funds established by the General Assembly. An overview of the overall aggregates is shown in the annex to the present document. All tables in the narrative provide summary information of detailed data that can be found in the statistical addendum DP/2005/33/Add.1 to the present document.

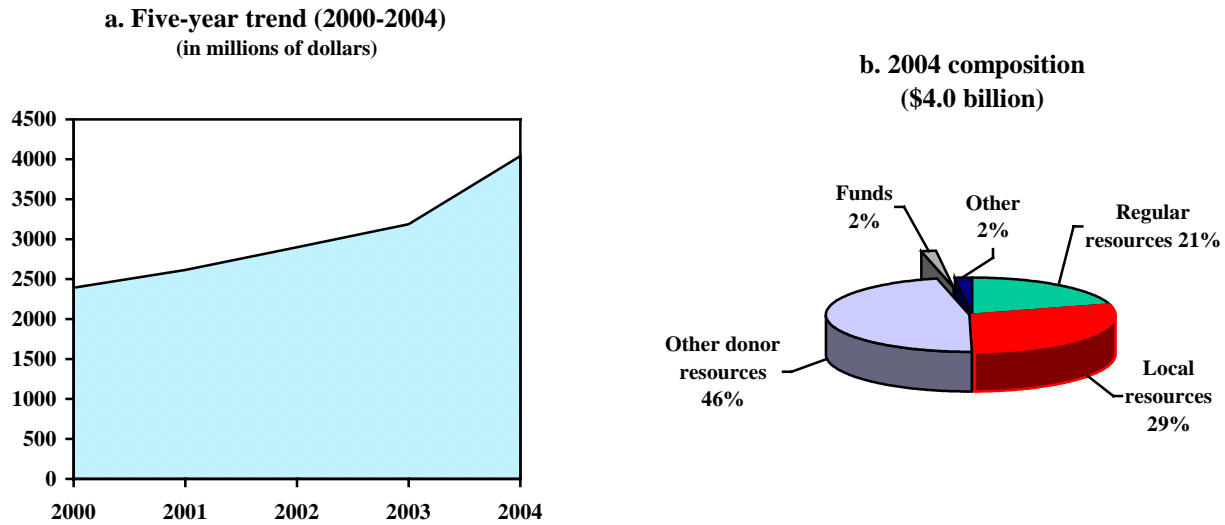

II. UNDP overall

2. The present chapter presents the financial picture reflective of UNDP operational activities at the aggregate level and the resultant unexpended balances. In addition, table 1 of the addendum continues with a summary of all activities undertaken by UNDP. Although the data are broken down by type of activity, the figures have been aggregated to facilitate an overview of the overall financial position of UNDP.

3. UNDP received a total contribution, net of interest and other income, of \$4.0 billion in 2004 (including regular resources, other resources and funds), the highest level ever, up by 27 per cent from the 2003 level of \$3.2 billion. Regular resources income increased by 9 per cent (from \$770 million in 2003 to \$842 million in 2004), continuing the upward trend that began in 2001.

4. Other resources income rose by 33 per cent (from \$2.3 billion in 2003 to \$3.1 billion in 2004). Local resources (programme countries cost-sharing contributions) also increased by a rate of 10 per cent, from \$1.1 billion in 2003 to \$1.2 billion in 2004. Total donor resources (including regular donor and other donor resources, trust funds, UNV and MSAs) registered a growth of 36 per cent, rising to \$2.8 billion in 2004. Other resources represented an important complement to the regular resource base of UNDP, permitting the strengthening of existing programmes and fostering partnerships with a range of actors, including the European Commission, regional development banks, the World Bank and the private sector.

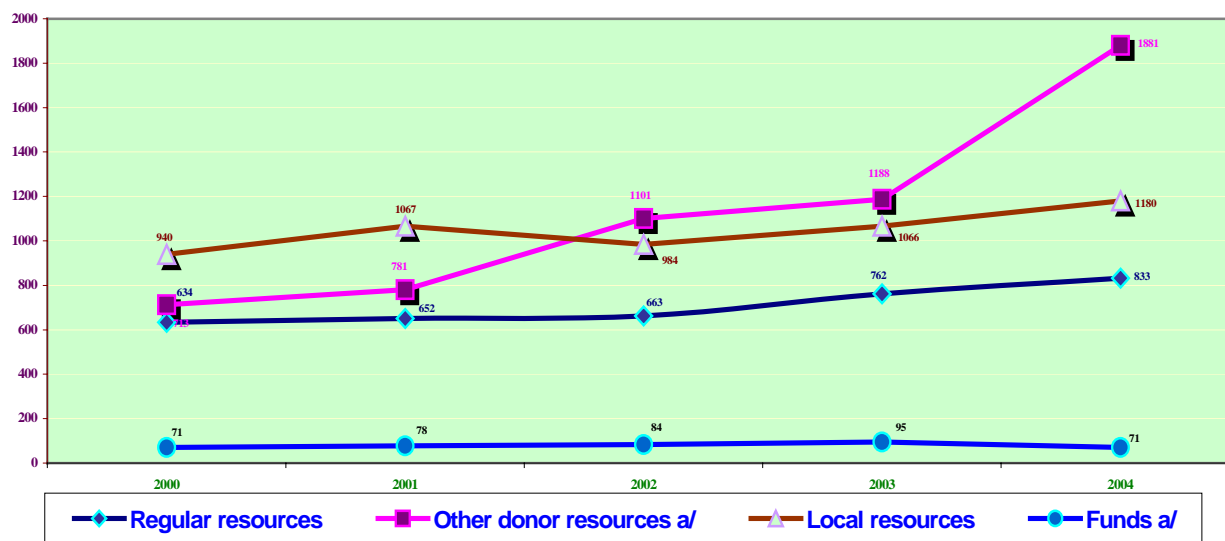

5. The thematic trust fund (TTF) instrument, introduced in late 2001, was designed as a flexible, agile co-financing modality to support development work that cannot be funded from regular resources or from other multilateral or bilateral sources. Since 2001, the number of donors contributing to the seven thematic trust funds (democratic governance, poverty reduction, information and communication technology, energy for sustainable development and environment, HIV/AIDS, Gender and crisis prevention and recovery) has increased progressively – 8 donors in 2001, 10 donors in 2002, 21 donors in 2003 and 33 donors in 2004. Overall contributions also increased by 29 per cent (from \$156.5 million in 2003 to \$202.1 million in 2004).

Figure 1. Overall contributions: five-year trend and 2004 composition

6. The MYFF has continued to provide the key framework for securing policy coherence in the country-driven demand climate of UNDP support, regardless of funding source. While overall contributions have reached \$4.0 billion mark, other resources contributions have surpassed \$3.1 billion, representing 77 per cent of total receipts in 2004. The highest increase in receipts for other resources was the increase in donor cost-sharing contributions, which was over 100 per cent.

7. Total contributions to the regular resources received during 2004, before the transfer to biennial support budget, increased by 9 per cent over the prior year, from \$770 million to \$842 million. As in the past, regular resources were received primarily from donor members of the Development Assistance Committee (DAC) of the Organisation for Economic Co-operation and Development (OECD). Regular resources contributions received from OECD/DAC countries increased by 9 per cent from \$752 million in 2003 to \$823 million in 2004. It is encouraging that 10 OECD/DAC members increased their contribution to regular resources in 2004 in local currency terms, many for the fourth consecutive year, or resumed their contributions. Three donors increased by 10 per cent or more. These positive developments in the volume of contributions to regular resources reflect the strong political endorsement by donors of the UNDP reform process and the impact the organization is having in the development outcomes in the countries it serves. As the dollar continued to weaken against the Euro and other major currencies, exchange rate fluctuations continued to affect core income positively, accounting for more than two thirds of the increase in regular income in 2004. Percentage shares and contributions of the top 15 OECD/DAC donors for selected UNDP activities are shown in table 1.

Figure 2. Overall contributions¹: five-year trend by type of resources
(in millions of dollars)

a/ In years 2000 and 2003, UNV is included under Funds. In 2004, other donor resources contain UNV.

a/ Ranked on the basis of regular resources contributions received in 2004.

b/ Prior to tax adjustments.

Note: The European Commission is a major source of other resources for UNDP, providing \$244.9 million in 2004.

¹ Net contributions, after transfer to biennial support budget (GLOC).

8. Programme countries continued to participate in UNDP activities, mainly in terms of regular resources and local resources contributions. Regular resource contributions from programme countries have started to be restored from the 2002 level of \$14 million, amounting to \$19 million in 2004. Percentage shares and values of overall contributions received from the top 5 programme countries remained at \$13 million mark as shown in table 2.

Table 2. Regular resources contributions of top five programme countries, 2001-2004
(in millions of dollars)

Percentage of total resources	2%	2%	2%	2%

Source: Table 6 and 8, DP/2005/33/Add.1

9. The aggregate programme expenditure (including funds, \$48 million) increased to \$2.9 billion, representing a 15 per cent growth from the previous year. Of the total 2004 expenditure, \$2.4 billion (83 per cent) pertained to other resources, including funds, while 17 per cent (\$483 million, inclusive of \$14 million for the support to resident coordinator system) was financed from regular resources.

Figure 3. Overall programme expenditure, 2004

10. In terms of regional coverage, 2004 had a similar distribution pattern in delivery (including programme support to the resident coordinator system) to that of 2003, as reflected in table 3 below.

Table 3. Regional distribution of programme expenditure, 2004-2003
(in millions of dollars)

	Regular resources				Other resources			
	2004	%	2003	%	2004	%	2003	%

^a Includes PAPP.

^b Includes global and interregional programme.

11. The percentage share for execution modalities breaks down as follows: national execution, the preferred modality, represents 60 per cent of the overall UNDP figure, followed by UNDP, 21 per cent, UNOPS, 10 per cent, and other agencies, including the 'big five', 7 per cent (see table 4). The growth of UNDP expenditure has been mainly in crisis countries, and this represents 70 per cent of the total UNDP delivery in 2004.

Table 4. Distribution of programme expenditure by execution modality: UNDP overall, 2004-2003
(in millions of dollars)

Executing agency	Regular resources and other resources (excluding funds)			
	2004	%	2003	%
National execution	1 750	60%	1 656	66%
UNOPS	277	10%	244	10%
"Big five" organizations ^{a/}	78	3%	55	2%
Other agencies	111	4%	71	3%

NGOs	51	2%	32	1%
Total	2 921	100%	2 498	100%

^{a/} DESA, FAO, ILO, UNESCO and UNIDO.

12. As of the end of 2004, the overall balance of unexpended resources was \$2.7 billion. The balance of regular resources at the end of 2004, net of reserve for after-service health insurance, was \$171 million. This represents 6 per cent of the overall balance. An accounting accrual of \$27 million was made in 2004 for after-service health insurance benefits. The balance of other resources increased to \$2.5 billion and its percentage share to the balance of all sources also increased to 90 per cent (87 per cent in 2003). While unexpended balances increased to \$2.5 billion during 2004, the following should be noted: (a) total expenditure of other resources also was up by 15 per cent; and (b) 40 per cent (\$1.2 billion) of the income received in 2004 was received in the last quarter of the year, hence not with sufficient time for programming and delivery to occur before the close of the financial year. The proportion of income received in the last quarter of 2004 was 22 per cent higher than that received in the last quarter of 2003. The balances of unexpended resources for the funds totalled \$83 million (\$68 million in 2003), representing 3 per cent of the overall balance.

13. In 2003, as part of the preparation for conversion from the integrated management information system to the Atlas system, UNDP performed an intensive review of transactions recorded in its multiple existing systems. As a result of that review, bad debt provision of \$9.0 million was made after ensuring that in accordance with established procedures due diligence was performed that the adequate effort had been made to recover these amounts. OAPR conducted a full review and assessed that due diligence has been performed and compliance with the financial regulations and rules. In addition, \$1.5 million was provided for depreciation of nonconvertible currencies. In 2004, the amount written off plus the adjustment for overvaluation of cash held in nonconvertible currencies totalled \$2.7 million.

III. Regular resources

14. Activities funded by regular resources are shown in tables 5, 6 and 7. The present chapter first examines income and expenditure and then focuses on the balance of unexpended resources. Compared to 2003, total 2004 income, inclusive of interest income and other income, increased by 7 per cent to \$882 million, and total 2004 expenditure increased by 12 per cent to \$836 million. The available resource balance, exclusive of operational reserves, has increased to \$171 million in 2004 (see table 5). If the reserves for after-service health insurance (\$135 million in 2004 and \$108 million in 2003) are taken into consideration, the increase in regular resource balance will be \$44 million (17 per cent).

A. Income

15. Contributions to regular resources received during 2004, before the transfer to the biennial support budget (GLOC), totalled \$842 million. Net contributions of \$833 million were mobilized in regular resources (exclusive of interest and other income) in 2004, a growth of 9 per cent over the regular resource contributions recorded in 2003. The growth rate of contributions from the top 15 OECD/DAC donors was 11 per cent, from \$727 million in 2003 to \$805 million in 2004. Non-programme countries contributed 99 per cent of total regular resources income. Contributions from programme countries amounted to \$19 million in 2004, the same level as of 2003.

Table 5. Income and expenditure for the years ended 31 December 2004 and 2003
(in millions of dollars)

	Regular resources		Change between 2004 and 2003 (percentage)
	2004	2003	%
Income			
Net contributions	833.4	762.4	9.3
Interest and other income	48.3	61.6	(21.6)
Total income	881.7	824.0	7.0
Expenditure			
Programme	468.9	398.0	17.8
Biennial support budget: net	280.9	252.2	11.4
Programme support to resident coordinator	13.6	6.4	-
Development support services and UNDP economist programme	15.4	9.0	71.1
Other expenditure	56.8	79.6	(28.6)
Total expenditure	835.6	745.2	12.0

Excess/shortfall of income over total expenditure	46.1	78.8	(41.5)
Transfer from (to) reserves and refunds to donors	(29.8)	(7.0)	-
Savings, refunds and other transfers	0.8	(1.3)	-
Balance of unexpended resources, 1 January	153.8		84.6
Balance of unexpended resources, 31 December	170.9	153.8	11.1
Operational reserve	154.0	142.0	8.4
Total months of expenditure ^a	4.9	4.8	

^aThis calculation represents the operational reserve plus balance of unexpended resources as a function of the average monthly expenditures of \$70 million in 2004 and \$62 million in 2003. The balance of \$171 million in unexpended resources is equivalent to less than 3 months of expenditure.

Source: DP/2005/33/Add.1, table 1(a)

B. Expenditure

16. Total 2004 expenditure under regular resources increased by 12 per cent, to \$836 million. The increasingly dynamic environment in which UNDP operates resulted in fluctuations within each major expenditure category. Programme expenditure, including programme support to the resident coordinator system, had increased by 19 per cent, from \$404 million to \$483 million (see table 5).

Biennial support budget

17. The net support budget expenditure of \$281 million in 2004 was 11 per cent higher than the expenditure level of 2003 (\$252 million). By appropriation group, 55 per cent of the expenditure was spent on programme support activities; 21 per cent on management and administration; and 23 per cent on support to the operational activities of the United Nations system. In total, 64 per cent of expenditure related to country offices, with the remaining 36 per cent attributed to headquarters locations, including UNV and IAPSO.

Other expenditure

18. In comparison with 2003, other expenditure has decreased by \$23 million to \$57 million in 2004. The decrease was mainly due to the fact that there were write-offs and miscellaneous provisions of \$10.5 million in 2003, compared to \$2.7 million in 2004.

19. An independent consulting actuary was engaged to carry out a valuation of post-retirement health insurance benefits as of 31 December 2003. On the basis of that study, the actuary estimated that as of 31 December 2003, the net liability for after-service health insurance benefits for all participants in UNDP was \$341 million. This amount represents the present value, which is the discounted value of all benefits, less retirement contributions to be paid in the future to all current retirees and active employees expected to retire.

20. UNDP has made an accounting accrual of \$27 million for the year ended 31 December 2004. This amount is over and above disbursements by UNDP for after-service health insurance, which are included as part of biennial support budget expenditure. The cumulative amount accrued as of 31 December 2004 is \$135 million (\$108 million at 31 December 2003). The actuarial valuation of the post-retirement health insurance benefits of UNDP and the United Nations Secretariat is carried out jointly. UNDP will carry out future valuations with the same frequency as the United Nations Secretariat.

C. Balance of unexpended resources

21. The availability of the balance of unexpended resources depends on the degree of liquidity of the net assets held. Cash and investments are the main liquid assets of UNDP. Other assets, net of liabilities, supplement investments to/from the balance of unexpended resources. Other assets include advances to country offices and to other United Nations organizations. On the liability side, unliquidated obligations and other payables represent expenditures that have been incurred but not yet disbursed.

22. At the end of 2004, UNDP held cash and investments for regular resources totalling \$272 million, excluding the operational reserve. Based on total expenditure of \$836 million during the year, the UNDP liquidity position at the end of 2004 represented working capital for approximately three months of expenditure. This represents a slight decrease in liquidity, primarily due to higher cash outflows on deliveries and the increase in the operational reserve level. A prudent level of liquidity for UNDP regular resources would be the equivalent of expenditure for three to six months, implying a total liquidity between \$200 million and \$400 million at current expenditure levels.

Table 6. Movement of liquid resources, 2004 and 2003
(in millions of dollars)

	2004	2003
Opening balance, 1 January		
Cash and investments	281.8	149.8
Income	881.7	824.0
Expenditure	(835.6)	(745.2)
Savings on obligations from prior biennium	0.8	-
Transfer from/to reserves and other transfers	(29.8)	(8.3)
Subtotal	17.1	70.5
Net change in advances made to Governments, executing agents and expenditures incurred but not yet disbursed	(27.1)	61.5
Closing balance, 31 December ^{a/}		
Cash and investments	271.8	281.8

^{a/} This balance of liquid assets is additional to investments held for the operational reserve (\$154 million in 2004, \$142 million in 2003).
Source: DP/2005/33/Add.1, table 1(a, b),

23. The \$171million balance of unexpended resources shown in table 7 represents the pool of resources available to finance UNDP activities funded by regular resources. At the current level of \$171 million, that balance represents the equivalent of less than three months' expenditure for the organization.

Table 7. Movement in the balance of unexpended resources, 2004 and 2003
(in millions of dollars)

	2004	2003
Balance as at 1 January	153.8	83.3
Total income	881.7	824.0
Total expenditure (including support costs and other expenditure)	(835.6)	(745.2)
Savings on obligations from prior biennium	0.8	-
Transfer from/to reserves and other transfers	(29.8)	(8.3)
Balance as at 31 December	170.9	153.8

Source: DP/2005/33/Add.1, table 1(a)

24. In accordance with Executive Board decision 99/9, the formula for the calculation of the level of the UNDP regular resource operational reserve was amended on the basis of documents DP/1999/5/Rev.1 and DP/1999/CRP.9/Rev.1. Based on the estimated income and expenditure data for the year 2004, the operational reserve will be adjusted upwards to a new level of \$169 million, from \$154 million, and the resulting \$15 million will be transferred from the general resources of UNDP.

IV. Other resources

25. Components in the other resources category include local resources received from programme countries, donor cost-sharing, trust funds, UNV, management services agreements (MSAs), the Junior Professional Officers (JPO) programme and the reserve for field accommodation (RFA). Overall income of other resources increased by \$752 million, from \$2.5 billion in 2003 to \$3.3 billion in 2004. Other resources contributions, net of interest and other income, received in 2004 totalled \$3.1 billion, of which 38 per cent – \$1.2 billion – accounted for local resources (46 per cent in 2003). Growth in contributions provided by OECD/DAC countries was 59 per cent, from \$569 million in 2003 to \$900 million in 2004. Overall expenditure of other resources also increased by 15 per cent (\$345 million).

26. Recent trends have shown a significant increase in other resource contributions. Other donor resources (including donor cost-sharing, trust funds, UNV and MSAs) registered a marked increase of 58 per cent, from \$1 188 million in 2003 to \$1 881 million in 2004. The following analysis looks separately at each of the main components: local resources; other donor resources (donor cost-sharing, trust funds, UNV and MSAs); the JPO programme, and others.

Figure 4. Contribution/income – other resources, 2004

(in millions of dollars)

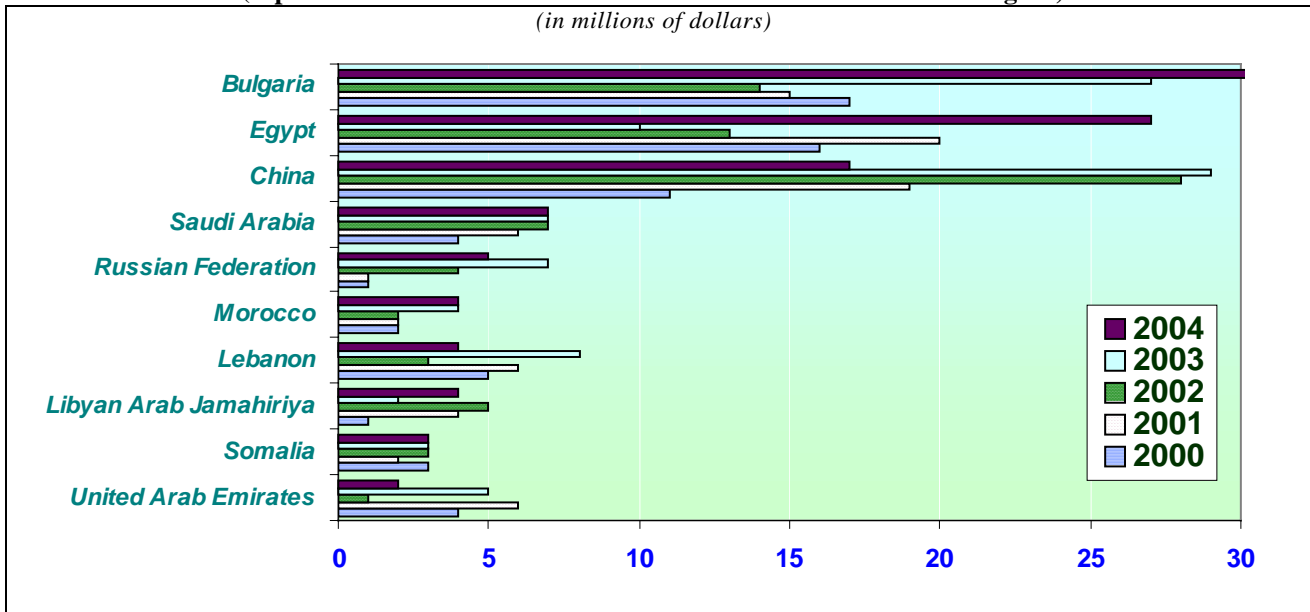

A. Local resources

Income

27. Contributions to local resources represented 37 per cent of total other resources income received in 2004. This pool of resources has increased by 10 per cent from \$1 066 billion in 2003 to \$1 180 billion in 2004. In recent years, countries from various regions other than Latin America and the Caribbean increased their participation in local resources. Among other countries, Egypt and Libyan Arab Jamahiriya recorded substantial growth in local resources contributions. The growth in Egypt was more than doubled, from \$10 million in 2003 to \$26 million in 2004. Libyan Arab Jamahiriya had an increase of 82 per cent, from \$2 million in 2003 to nearly \$4 million in 2004. Bulgaria also increased by 15 per cent in local resources contributions, from \$27 million in 2003 to \$31 million in 2004. China decreased its contributions by 41 per cent to \$17 million, although its share of participation remained significant.

Figure 5. Local resources contributions 2000-2004
(top ten countries outside the Latin America and Caribbean region)
(in millions of dollars)

28. About 77 per cent of local resources contributions came from the Governments of 10 programme countries (see figure 6). Among the top ten countries, Argentina registers the highest increase in local resources of 68 per cent from \$160 million to \$268 million. Columbia showed a decline of \$65 million, 44 per cent, from \$147 million in 2003 to \$82 million in 2004.

Figure 6. Local resources contributions, 2004
(top ten countries, all regions)
(in millions of dollars)

Expenditure

29. Total programme delivery in 2004 financed from local resources contributions was \$1 038 million. Delivery in 2003 was \$1 034 million. Countries from the Latin America and Caribbean region continued to register the major share in the delivery of both the local resources and the overall programme expenditure. In 2004, the Latin America and Caribbean region collectively represented over 31 per cent of total programme expenditure (42 per cent in 2003) and 88 per cent of total local resources expenditure (87 per cent in 2003). There was an increase in their regional delivery by 2 per cent, from \$902 million in 2003 to \$922 million in 2004. By country, Argentina registered a sharp increase of over 69 per cent (from \$134 million in 2003 to \$226 million in 2004), while the Dominican Republic, Ecuador, Guatemala, Uruguay and Venezuela likewise had two-digit increases in their expenditures. Bolivia had a decrease of 70 per cent (from \$38 million in 2003 to \$11 million in 2004).

30. It is noteworthy that seven countries outside the Latin America and Caribbean region recorded significant deliveries in local resources: Egypt – \$22 million; Bulgaria – \$21 million; China – \$19 million; the Russian Federation – \$6 million; Saudi Arabia – \$5 million; Lebanon – \$4 million; and Turkey – \$4 million. Turkey had doubled its delivery from \$2 million to \$4 million.

B. Other donor resources

Income

31. Continuing their growth trend, other donor resources, including donor cost-sharing, trust funds, UNV and MSAs, recorded growth of 55 per cent, from \$1.2 billion to \$1.9 billion in 2004. This pool of resources represented 47 per cent

of the total resources mobilized by UNDP in 2004. Figure 7 represents the top 10 donors that contributed to other donor resources in 2004.

Figure 7. Other donor resources contributions, 2004
(top ten participants)
(in millions of dollars)

Expenditure

32. Total other donor resources expenditure increased by 31 per cent from \$1 038 million in 2003 to \$1 358 million in 2004, mainly resulting from a 68 per cent growth in donor cost-sharing expenditure, from \$304 million to \$511 million. Trust funds expenditure also increased by 22 per cent, from \$601 million in 2003 to \$731 million in 2004. Income and expenditure by category under other donor resources are shown in table 8.

Table 8. Income and expenditure by category – other donor resources
(in millions of dollars)

	Donor cost-sharing	Trust funds	UNV	MSAs	Total
Income					
Contributions	742.3	1 021.7	26.1	91.3	1 881.4
Interest and other income	7.6	12.9	11.9	1.0	33.4
Total income	749.9	1 034.6	38.0	92.3	1 914.8
Expenditure					
Programme	510.5	730.8	20.3	95.5	1 357.1
Programme support	-	-	1.0	-	1.0
Total expenditure	510.5	730.8	21.3	95.5	1 358.1
Excess (shortfall) of income over expenditure	239.4	303.8	16.7	(3.2)	556.7

33. As a region, Africa registered a 33 per cent increase in delivery, from \$147 million in 2003 to \$196 million in 2004. Delivery in Asia and the Pacific, highest increase among regions, has doubled, from \$245 million in 2003 to \$519 million in 2004. Europe and the Commonwealth of Independent States region showed 8 per cent growth with a delivery of \$108 million (against

\$100 million in 2003). Latin America and the Caribbean region and the Arab States experienced decreases of 8 per cent and 27 per cent, respectively. The decrease in Arab States was due to the expiration, in November 2003, of the programme in Iraq that had been funded by the United Nations Oil-for-Food programme. In fact, other donor resources expenditures in the Arab States, exclusive of Iraq, increased slightly from 2003 to 2004.

C. Joint programming

34. In joint programming, two or more United Nations organizations and national partners work together to prepare, implement, monitor and evaluate programme activities. Contributions received under joint programming funds are not recorded as UNDP income. They are recorded under 'joint programming' in the balance sheet. In 2004, 20 donors had contributed \$632 million (20 per cent of other resources) towards joint programming activities in Iraq and Sudan. Total transfers from the United Nations Development Group Iraq Trust Fund to participating United Nations organizations for activities in Iraq amounted to \$494 million. Table 9 provides an overview of contributions made by donors, transfers to the participating United Nations organizations, and expenses incurred in connection with joint programming activities.

Table 9. Status of joint programming funds - 2004
(in millions of dollars)

Contributions			Transfers to United Nations organizations and total expenses		
Beneficiary country	Donor	Amount	Beneficiary country	Organization	Amount
Iraq	Japan	361	Iraq	UNDP	176
	European Commission	102		UNOPS	70
	United Kingdom	56		WHO	61
	Canada	38		UNICEF	56
	Italy	13		FAO	36
	Netherlands	7		UNCHS	31
	Sweden	7		UNEP	16
	United States	5		UNESCO	15
	Others	40		Others	33
Sudan	Sweden	3	Sudan	-	-
			Total expenses (AA fees and direct cost)		6
Total contributions		632	Total transfers and expenses		500
Balance of fund					132

Note: During the period of January to June 2005, contributions received from donors were \$30 million; transfers to participating United Nations organizations and total expenses were \$72 million and \$0.5 million respectively; thus, the fund balance as at 30 June 2005 was \$89 million.

D. United Nations Volunteers

35. In 2004, there were 7,300 United Nations volunteers – representing 163 nationalities – carrying out 7,772 assignments in 139 countries. The total financial magnitude of all activities amounted to \$146.7 million. Of this, some 12 per cent was covered from contributions that were made to UNV directly (Special Voluntary Fund, cost sharing, trust funds and full funding arrangements).

The remaining 88 per cent was covered by direct charges to programmes of the United Nations and other United Nations agencies, funds and programmes, including UNDP.

Table 10. Contributions and programme expenditure, 2004-2003
(in millions of dollars)

Source of fund	Contributions ^{1/}		Programme Expenditure ^{2/}	
	2004 ^{3/}	2003	2004	2003
Special Voluntary Fund	5.6	4.6	6.2	7.4
Cost sharing	1.3	1.4	1.8	1.5
Trust funds	5.0	4.2	4.3	4.5
Fully funded arrangements	10.8	4.9	5.4	5.1
Total	22.7	15.1	17.7	18.5

^{1/} Excludes resources relating to activities financed directly by the United Nations and by other United Nations agencies, funds and programmes, including UNDP (\$125.7 million).

^{2/} Excludes financial equivalent of UNV activities financed directly by United Nations and by other United Nations agencies, funds and programmes, including UNDP (\$129.0 million).

^{3/} Figures include adjustments and out-of-book entries not included in the financial statements.

36. Income relating to the Special Voluntary Fund, cost-sharing, trust funds and full funding, in 2004 was \$22.7 million, an increase of \$7.6 million compared to \$15.1 million in 2003. However, part of the income for full funding in 2004 (\$3.0 million) was related to 2003.

37. Total programme expenditure in 2004 was \$17.7 million. Although there was a decrease in expenditure of \$0.8 million compared to 2003 (\$18.5 million), the Special Voluntary Fund expenditure for 2003 included external costs of \$1.7 million. Excluding the latter amount from the 2003 expenditures, there was a total increase of approximately \$0.9 million (5.4 per cent) in 2004, mainly attributable to Special Voluntary Fund, cost sharing and full funding.

38. Opening balance of the reserve as at 1 January 2004 was \$1.2 million. In 2004, the reserve was replenished with \$0.2 million from provisions made in the pro forma cost of volunteers. Disbursements from the reserve in 2004 were \$0.2 million for medical evacuation purposes and \$0.2 million for security evacuation purposes. Balance as at 31 December 2004 was therefore \$1.0 million. The Administrator believes that maintaining the current balance is fully justified in view of the fact that costs in respect of field and inter-agency security measures are projected to increase.

E. Management services agreements

39. In 2004, donors contributed \$91 million towards MSA activities, up by \$11 million from \$80 million in 2003. Total income available for programme activity under MSAs in 2004, including interest income, amounted to \$92 million, up by 12 per cent compared to \$82 million in 2003. Table 11 shows the distribution by region of MSA expenditures for 2004 and 2003.

Table 11. MSA expenditure by region, 2004-2003
(in millions of dollars)

Region	2004	2003
Latin America and the Caribbean	74.9	37.1
Africa	6.7	30.2
Europe and the Commonwealth of Independent States	5.0	16.4
Arab States	0.8	0.4
Asia and the Pacific	3.1	22.0
Global and interregional	5.0	4.6
Total	95.5	110.7

F. The Junior Professional Officer programme

40. A total of 21 governments and one inter-governmental organization have valid agreements with UNDP for the provision of junior professional officers (JPOs). All the member states but one actively sponsored JPOs during 2004. As of 31 December 2004, UNDP administered 260 JPOs and five special assistants to the resident coordinator (SARCs) compared to 289 JPOs and 6 SARCs as at 31 December 2003. The combined number of JPOs and SARCs working with UNDP and affiliated agencies as of 31 December 2004 was 208, compared to 236 on 31 December 2003. 29 of these UNDP JPOs or SARCs served in New York and other headquarters locations, the same percentage as in 2003 (13.9 per cent). The numbers of JPOs administered on behalf of UNFPA and UNOPS were 47 and 8 respectively.

41. UNDP received a total of \$32.9 million in contributions to the JPO programme in 2004, a slight increase over the amount received in 2003 (\$32.5 million).

42. The total expenditure, including support costs, incurred during 2004 was \$29.8 million. This reflected an overall increase of 8 per cent compared to \$27.7 million in 2003. Total support cost of \$3.2 million was generated in 2004, an increase of 10 per cent compared to \$2.9 million in 2003 and \$2.6 million in 2002. The resource balance available at the end of 2004 was \$12.7 million, an increase of 32 per cent from \$9.6 million in 2003 (\$3.6 million in 2002).

G. Reserve for field accommodation

Table 12. Income and expenditure, 2004-2003

Cumulative deficit, 31 December	(2.5)	(3.0)	16.7

Source: DP/2005/33/Add.1, table 12

43. In line with Executive Board decision 96/40 of September 1996, which mandated that wherever possible UNDP should dispose of housing properties, UNDP continues to identify such assets for disposal. However, none were disposed of in 2004 as a result of unfavourable real estate market conditions; in addition, the buildings of the countries under review are situated on government properties.

44. The aggregate summary of the RFA accounts is shown in table 12. Table 12 of the addendum (DP/2005/33/Add.1) shows the RFA financial statements. The total housing assets as at 31 December 2004 were \$16.3 million, no change from 2003. The figure for office premises building assets as at 31 December 2004 also had no change from 2003 – \$26.6 million. The net amount due to UNDP regular resources decreased from \$10.3 million in 2003 to \$7.4 million in 2004. This was because the cumulative deficit in reserve had decreased from minus \$4.2 million to minus \$3.8 million and there was a continued recovery in the values of assets such as construction costs.

45. The initial provision for asset write-down of \$14.1 million was set up in 1996-1997 on the basis of management's best estimate of RFA assets impairment as at 31 December 1997. With the disposal through sale of some of the properties over the years and consequent charges to the provision, the balance as at 31 December 2004 was \$9.7 million. Available information indicates that the balance may be adjusted subsequent to review and analysis of financial data and appraisal of property to be undertaken to ascertain the current values of assets.

V. Funds administered by UNDP

46. Table 5(a) in the addendum to the present report (DP/2005/33/Add.1) provides detailed data for the two funds administered by UNDP. The results of activities undertaken in 2004 are outlined in this section.

A. The United Nations Capital Development Fund

47. Total contributions for United Nations Capital Development Fund (UNCDF) regular resources decreased by \$9.7 million, or 36 per cent, bringing the total amount received in 2004 to \$17.2 million from \$26.9 million in 2003. Contributions to other resources were \$6.3 million in 2004, down from \$10.7 million in 2003 but almost double the amount of \$ 3.4 million received in 2002.

48. In 2004, the mandate of UNCDF as a United Nations fund for investing in least developed countries (LDCs) was strongly reconfirmed in the wake of an external independent impact assessment. At the same time, the independent impact assessment concluded that there was a need for a change of business model in view of changing international trends in official development assistance. Based on a systematic review of possible options for the future business model of UNCDF, the Executive Board agreed, in its decision 2005/05, to maintain an independent UNCDF financially closely integrated into UNDP. Based on this decision, a new business plan for UNCDF (DP/2005/22) was prepared, reflecting also the mainstreaming of the UNCDF biennial budget from 2006/07 onwards into the biennial budget of UNDP.

49. In 2004, overall expenditure increased with almost \$5 million, from \$22.9 million in 2003 to \$27.6 million in 2004. Expenditure against regular resources increased to \$19.7 million, from \$17.0 million in 2003. Other resources

expenditures increased by \$1 million, from \$5.9 million in 2003 to \$6.6 million in 2004.

50. Unexpended resources at the end of 2004 totalled \$48 million, including an operational reserve of \$22.6 million.

B. The United Nations Development Fund for Women

51. In its decision 2004/10, the Executive Board approved the multi-year funding framework (MYFF) of the United Nations Development Fund for Women (UNIFEM) for the period 2004-2007. The MYFF highlights key results to be achieved to enhance development effectiveness, organizational effectiveness, and the resource base required for implementation. It positions UNIFEM to fulfil its mandate to support countries in achieving gender equality in the context of United Nations reform, the Millennium Development Goals, and changing modalities related to aid effectiveness.

52. Total contributions to UNIFEM increased significantly by \$15.2 million, or 44 per cent, from \$34.0 million in 2003 to \$49.2 million in 2004. Regular resources contributions increased from \$21.7 million to \$23.2 million. Cost-sharing and trust funds contributions have increased by 110 per cent, from \$12.3 million in 2003 to \$25.9 million in 2004.

53. Overall programme expenditure, including support costs paid to implementing agents, decreased by \$1.4 million, or 5 per cent, from \$27.0 million in 2003 to \$25.6 million in 2004. Regular resources programme expenditure decreased by \$3.6 million, or 24 per cent, from \$15.3 million in 2003, to \$11.7 million in 2004, due mainly to uncertainties in the forthcoming amount of core support. The delivery of cost sharing and sub-trust funds registered a \$2.2 million increase, or 19 per cent, from \$11.7 million in 2003 to \$13.9 million in 2004.

54. Unexpended resources at 31 December 2004 totalled \$42.9 million, an increase of \$17.8 million over the \$25.1 million total at 31 December 2003. These resources cover the unspent project budgets of \$33.4 million for 2005 and future years. The level of the operational reserve was reviewed, in accordance with Executive Board decision 97/4 of January 1997, and was increased by \$0.8 million to leave a balance of \$8.9 million at the end of 2004.

55. Moving forward, UNIFEM continues to align its programming, structure and business processes in order to enhance its effectiveness, capacity, and efficiency to achieve anticipated results. The UNIFEM Consultative Committee at its 44th Session encouraged current and future donors to devote a greater share of their contributions to UNIFEM regular resources and make commitments to multi-year funding so as to permit the organization to deliver on its MYFF.

Annex 2

Definitions

Regular resources: the resources of UNDP that are commingled and untied. These include pledges of voluntary contributions, contributions from governmental, intergovernmental or non-governmental sources and related interest earnings, and miscellaneous income.

Other resources: the resources of UNDP, other than regular resources, that are received for a specific programme purpose, consistent with the policies, aims and activities of UNDP and for the provision of management and other support services to third parties. Under this category fall cost sharing and trust funds established by the Administrator. For presentation purposes, UNV, MSAs, the reimbursable support services and other activities (the JPO programme and the RFA, among others) are included in the other resources grouping.

UNDP resources: the resources credited to the UNDP regular resources account or other resources account and, therefore, exclude resources credited to the UNDP funds account.

Biennial support budget: the budget of an organization covering programme support and management and administration of the organization.

Funds administered by UNDP: funds established by the General Assembly and administered by UNDP.

Programme support: expenditure incurred by organizational units (country offices and headquarters) whose primary functions are the development, formulation, delivery and evaluation of the programmes of the organization.

Donor resources: regular resources and other donor resources, received from all donors (other than local resources received from programme countries), including donor cost sharing, trust funds, UNV and management services agreements.

Local resources: other resources received from programme countries.

Member states: development partners, including donors and programme countries that participate in the UNDP programme.

Government contributions to local office cost (GLOC): contributions in the form of cash, or by provision in kind of specific goods, services and facilities that the host Government makes towards the expenses of maintaining the UNDP country office.

Joint programming: the collective effort through which the United Nations organizations and national partners work together to prepare, implement, monitor and evaluate the activities aimed at effectively and efficiently achieving the Millennium Development Goals and other international commitments arising from United Nations conferences, summits, conventions and human rights instruments. Through joint programming, common results and the modalities for supporting programme implementation are identified.
