OUR CHALLENGE

The design and implementation of a gender action plan for climate change policy

Proposal of technical guidelines to promote and strengthen gender approach in climate change management (Ministry of Environment and Sustainable Development)

Recommendations to incorporate the gender approach into the conceptual framework of the National Policy on Climate change

Construction of a comprehensive vision of climate change with a territorial and sectoral approach, incorporating the different dimensions of rural development and cities, so that it is low carbon, sustainable and resilient to the climate

Incorporates recommendations to encourage the adequate participation of women in the decision-making and climate change management processes
Rural women in Colombia

- Rural women in Colombia represent 21% of all women in the country. (DANE, 2014)
- Rural women in Colombia constitute 48.31% of the total rural population (UNREDD, 2018)

93% of the women who live in rural homes carry out unpaid domestic work activities, and dedicate 8 to 12 hours in such activities (ENUT, 2012 – 2013).

Extreme poverty affects 22% of households headed by women, compared to 17% of households headed by men.

- 29% of rural women have suffered physical violence from their partner, and 27.7% economic violence (ENDS, 2015)
- 7% of rural women have suffered sexual violence (ENDS, 2015)
Gender policies and architecture in Colombia

**Gender Equity for Women**: State policy by the National Council for Economic and Social Policy

**Public policy**: Law that establishes norms to favor rural women
Law 731 of 2002

**Human rights policy of the mining and energy sector**
Chapter for the Incorporation of differential and gender approach in the Human Rights Policy of the mining sector

**Presidential Council for The Equity of Women (CPEM)**
National level institution for the design, promotion and strengthening of public policies for the equity of women

**Vice-President of the republic. Strong leadership in the promotion of equity for women in public policy**
First woman vice president in the history of the country
The NDC has enabling measures and strengthened institutional capacities for its implementation with the incorporation of the gender approach in the national policy of Climate Change.

The mitigation component of the NDC has approved implementation plans in the ministries (Commerce, Industry and Tourism, Mines and Energy, Transportation, Housing, City and Territory, and Agriculture and Rural Development) with goals to 2030 and with gender considerations.

Roadmap defined for the construction and approval of the "Strategy 2050," for the management of climate change with incorporation of a gender approach, through inter-institutional coordination for compliance with the NDC by the ministries and various international cooperation programs.

The mitigation component of the NDC has quantitative commitments in mitigation of the private sector, monitored through the corporate reporting platform.
Gender integration in capacity building for the NDC 2018 - 2020

Establish a baseline of needs and progress of the ministries on gender incorporation

2030 NDC and 2050 Strategy: Technical inputs for the integration of gender and fair labor transition in the management of climate change

Design of a training program for gender integration in the management of climate change. Six ministries trained

Gender integration in Sectorial Integral Climate Change Management Plans (PIGCCS) of the ministries

Incorporation and implementation of actions on gender equality in mitigation plans of the six ministries
NDC GOVERNANCE FRAMEWORK

Climate Change National System – SISCLIMA, 2016

National Level

Intersectoral Climate change Comission (CICC)

Ministry of Agriculture (MADR) Ministry of Environment (MADS) Ministry of Finance (MHCP) Ministry of Energy (MME) Ministry of Health (MS) Ministry of International Relations (MRE), Ministry of Housing (MVCT), Ministry of Commerce (MCTI), National Unit for Risk Management (UNGRD) Adaptation Fund (FA)

Define guidelines and actions to achieve the NDC on mitigation and adaptation

Regional Level

Regional Climate Change Nodes (NRCC)

Promote and support the climate change national policies and regional/local plans

Local Level

Subnational governments

Formulate climate change management plans

National Climate Change Council

Advisory Permanent council – support the decision making processes on climate change management and articulate results with private sector, academia and the congress

Decree 298/2016

Define guidelines and actions to achieve the NDC on mitigation and adaptation
CAPACITY

ACTIONS OR OPPORTUNITY TO PROMOTE THE GENDER APPROACH IN THE ENVIRONMENTAL AND SUSTAINABLE DEVELOPMENT PORTFOLIO OF THE GOVERNMENT WITH UNDP CO

**Areas**
- BIODIVERSITY
- CLIMATE CHANGE
- ENERGY
- CHEMICALS AND CONTAMINANTS

18 PROJECTS DON'T HAVE GENDER ACTION VS 10 PROJECTS WITH GENDER PLAN, OR SUPPORT WITH ANY ACTION
New strategy to work in gender and environment issues

**PURPOSE**

- Build a country vision to address issues of gender, climate change and energy.
- Support institutions to respond to the demands of the national and international level in the face of actions on gender, climate change and energy.
- Strengthen the country's capacities in gender, climate change, energy.

**ACTORS INVOLVED**

- **GOVERNMENT**
- **INTERNATIONAL COOPERATION**
- **INTERNATIONAL ONG’s**
- **ACADEMY**

**SUGGESTED ACTIONS FOR 2019**

- Advance in the construction of the Gender Action Plan within the Climate Change Policy of Colombia.
- Build and strengthen gender capacities among the members of the group, extensive to other government entities and strategic actors.
- Advance in the construction of an information and knowledge management system that collects experiences, agreements and tools on climate change and gender.
- Accompanying the construction of the 2050 Strategy

**AGENDA 2030 and 2050**

Emphasis on SDG 5, 6,7,13,14 y 15
