The project seeks to: (i) improve the protection of viable populations of indigenous wild relatives of crops and local landraces in their natural habitats; (ii) augment the conservation of indigenous wild relatives of crops and local landraces in plant gene banks to ensure an adequate source of genetic resources for plant breeding; and (iii) increase the production, and extent of use, of local landraces in agricultural small holdings and commercial farms.

The project has been structured into three complementary components.

The first component seeks to expand the state of knowledge of agro-biodiversity, enhance the conservation of this agro-biodiversity and increase the intensity and extent of use native crops in the agricultural sector in the three project regions.
