**Project brief background**

The project is focused on supporting an improvement in the management capacity (i.e. planning tools, knowledge management, staffing, infrastructure, equipment and funding) of Gizil-Agaj to address the external threats to, and pressures on, the conservation values of the reserve complex, including pressures from building/agricultural encroachments; environmental impacts of livestock grazing/browsing; effects of illegal bird hunting; threats from inflows of pollutants; and effects of illegal fishing activities.

The project **objective** is to improve the operational effectiveness and ecosystem representation of Azerbaijan's coastal and marine protected area system with due consideration for its overall sustainability, including ecological, institutional and financial sustainability.

In order to achieve the project objective, and address the barriers, the project's intervention has been organised into two components:

**Component 1:** Enhanced management effectiveness of the Gizil-Agaj protected area and transfer it into the National park:

**Component 2:** Improved collaborative governance of, and institutional expertise in, the management of marine and coastal protected areas

Under the first component, a new administrative building has been constructed. After the establishment of Gizilagaj National Park which is one of the major project outputs, the park envisages to host tourists who will come and visit the park. In this regard, the project plans to contract a supplier company who will establish a visitor centre where the interpretative and educational materials will be installed for park visitors and local users.

**Duty station:**

Gizil-Agaj protected area (Lenkaran)

**Brief information about the center**

This center will serve as an interactive and educational venue for visitors. It will be equipped with modern equipment and stands exhibiting the brief history, flora and fauna of the Gizilagaj Protected Area. Also, tourist/local user visiting this center will have an opportunity to collect information and be acquainted with the points which can be visited through the tourism routes set by the park administration.

The area of the room in Gizilagaj administrative building allocated for this center is 41 m<sup>2</sup>. The concept design with all the measurements has been attached to this document as Annex 5.

**Latest expected completion date**

Up to 4 months after the issuance of PO
