Services offered shall be reviewed based on completeness and compliance of the quotation with the minimum specifications described above and any other annexes providing details of UNDP requirements.

The quotation that complies with all of the specifications, requirements and offers the lowest price, as well as all other evaluation criteria indicated, shall be selected. Any offer that does not meet the requirements shall be rejected.

Any discrepancy between the unit price and the total price (obtained by multiplying the unit price and quantity) shall be re-computed by UNDP. The unit price shall prevail and the total price shall be corrected. If the supplier does not accept the final price based on UNDP’s re-computation and correction of errors, its quotation will be rejected.

After UNDP has identified the lowest price offer, UNDP reserves the right to award the contract based only on the prices of the services in the event that the transportation cost (freight and insurance)
is found to be higher than UNDP's own estimated cost if sourced from its own freight forwarder and insurance provider.

At any time during the validity of the quotation, no price variation due to escalation, inflation, fluctuation in exchange rates, or any other market factors shall be accepted by UNDP after it has received the quotation. At the time of award of Contract or Purchase Order, UNDP reserves the right to vary (increase or decrease) the quantity of services and/or goods, by up to a maximum twenty-five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

Any Purchase Order that will be issued as a result of this RFQ shall be subject to the General Terms and Conditions attached hereto. The mere act of submission of a quotation implies that the vendor accepts without question the General Terms and Conditions of UNDP herein attached as Annex 3.

UNDP is not bound to accept any quotation, nor award a contract/Purchase Order, nor be responsible for any costs associated with a Supplier's preparation and submission of a quotation, regardless of the outcome or the manner of conducting the selection process.

Please be advised that UNDP's vendor protest procedure is intended to afford an opportunity to appeal for persons or firms not awarded a purchase order or contract in a competitive procurement process. In the event that you believe you have not been fairly treated, you can find detailed information about vendor protest procedures in the following link: http://www.undp.org/procurement/protest.shtml.

UNDP encourages every prospective Vendor to avoid and prevent conflicts of interest, by disclosing to UNDP if you, or any of your affiliates or personnel, were involved in the preparation of the requirements, design, specifications, cost estimates, and other information used in this RFQ.

UNDP implements a zero tolerance on fraud and other proscribed practices, and is committed to identifying and addressing all such acts and practices against UNDP, as well as third parties involved in UNDP activities. UNDP expects its suppliers to adhere to the UN Supplier Code of Conduct found in this link: http://www.un.depts/ptd/pdf/conduct_english.pdf

Thank you and we look forward to receiving your quotation.

Background

EC Clima East Pilot Project on “Ecosystem-based approaches to climate change”

The purpose of the EU funded EC Clima East Pilot Project on “Eco-system based approach to climate change” is to support the design and application of sustainable pasture management practices in the country with the overall objective of improving pasture/soil condition in the selected target zones (Ismayilli region) that would ultimately result in improved soil condition and land management practices which leads to enhanced CO2 sequestration and absorption by the grasslands. The project has three inter-related major outputs: a) conducting inventory of the pasture areas in Ismayilli to obtain a clear picture on soil/vegetation/carbon conditions; b) preparation and application of sustainable land management models across 3,000 ha of selected pasture land (including rehabilitation and restoration works); c) design and application of carbon flow monitoring mechanism to assess changes in carbon sequestration/absorption and avoided CO2 emissions overtime. All components have built-in capacity building elements targeting local government representatives responsible for land management and agricultural policy, farmers and communities, as well as civil servants in the field of environment.

Training background information

Approximately 591,100 hectares of pasture can be found in the GC: 247,300 ha of summer pastures and 343,800 ha of winter pastures. Although C emission and sequestration figures for grasslands have not yet been developed in AZ, a significant body of work worldwide makes it possible to estimate the potential (an average value under sustainable management) for C sequestration in AZ’s pasturelands. Carbon stocks vary associated with climate zone, vegetation type, soils, and management. The potential Carbon is estimated at 4,939,374 t C and 33,492,098 t C for the project rayons and GC, respectively.

Critical ecosystem services sustained by forests and pastures include: supporting (nutrient cycling, soil formation); provisioning (food, fresh water, wood, fuel); regulating (climate & flood regulation), and cultural (aesthetic, educational, recreational).

In order to continue and build on the capacity development activities UNDP will conduct trainings on carbon monitoring methodologies EC Clima East Pilot Project on “Ecosystem-based approaches to climate change”. According to the project document and approved annual work plan, the training activities will concentrate in with participation of at least 8 national carbon specialists, as well as staff members of ministry and different institutions of Azerbaijan. In addition, students from universities and representatives of the Local Executive Authorities of pilot rayon. The training will be delivered with the support of international experts on carbon protocols, GIS expert for mapping. Training will be continued with practical part and implementation of the inventory of the selected pilot area.
Objective

The objective of the training is

1) To consolidate the knowledge of the participants of the trainings. training programs to increase the capacity of local staff of the central executive authorities in sustainable management, incorporate ecosystem-based pasture management principles, carbon monitoring, carbon sequestration-oriented management based on best international practices.
