What do we mean by «sex» and «gender»?
“SEX” refers to the biological and physiological characteristics that define men and women.

“GENDER” refers to the socially constructed roles, behaviors, activities, and attributes that a given society considers appropriate for men and women.

My definition of gender is based on ________.
To put it another way:

“Male” and “female” are sex categories, while “masculine” and “feminine” are gender categories.

It was never a dress.

itwasneveradress.com
“Gender norms” — beliefs about men and women. “Gender roles” — behavior expected by the society from women and men.
• Gender equity is the process of being fair to women and men.
• To ensure fairness, strategies and measures must often be available to compensate for women’s historical and social disadvantages that prevent women and men from otherwise operating on a level playing field.
• Equity leads to equality.
Girls and women are drivers of development and critical to the success of the new global goals. SDGs + women = progress for all.

Make the SDGs matter for girls and women.

When you invest in the health, rights, and wellbeing of girls and women, there is a ripple effect and everybody wins.

Girls and women spend 90% of their earned income on their families, while men spend only 30-40%.

Female farmers having the same access to resources as men = up to 150 million fewer hungry people.

If the need for modern contraception was met...

- Unintended pregnancies down 70%
- Unsafe abortions down 74%
- Maternal deaths down 25%

Education
- Participation in labor force up
- Earning potential up

Each additional year of secondary schooling = 15-25% increase in a girl’s potential income.

Sanitation would make 1.25 billion women’s lives safer and healthier.

Who wins? Everybody.
