

Cameroon

Adopted at EB 11 in Brussels on 30 November 2018

EB.2018.21

Taking note of the presentation by the Government of Cameroun during the 11th meeting of its Executive Board (EB),

the CAFI EB,

- Recognizes the country's efforts in the NIF development process
- Encourages the Government to further intensify these efforts, including through:
 - Demonstrating willingness to undertake, endorse and enforce core reforms already underway and needed for the success of land use investments
 - Presenting a consistent vision across the main policies and measures in the different sectors to promote sustainable land allocation and use, and ties different initiatives and projects towards common objectives
- Due to the cross-sectorial character of land use reforms and investments, recalls the CAFI Declaration calling for *“high-level inter-ministerial task force under the lead of a cross-sectorial ministry or government body in charge of finance coordination and reforms will oversee the implementation of the programs.”*, and suggests the engagement of such government body in daily coordination, as well as representatives from line Ministries with the capacity to mobilize political support
