

## **Call for Renewable Energy Technology cooperation with Africa**

To whom it may concern,

Ministry of Science and Technology of China and UNDP China will jointly initiate the China-Africa Cooperation in Technology Transfer for Renewable Energy Projects, in order to promote "One Belt One Road", enhance South-South cooperation in the field of renewable energy with developing countries, and to cope with global climate change, poverty reduction and energy crisis. The project aims to promote development of China's renewable energy technology in Africa through sharing its experience in renewable energy development. It plans to use Renewable Energy Technology Transfer Centre for South-South Cooperation and China-Africa Renewable Energy Technology Transfer Union as the platform to promote China's advanced renewable energy technology and products in Africa.

Now it publicly calls for renewable energy technology, products (service) and equipment companies suitable for South-South cooperation with Africa. After expert screening by a panel including UNDP and ACCA21, certificates will be awarded and it will be included in the list of China-Africa Renewable Energy Technology Transfer Promotion. The list will be published on, Renewable Energy Technology Transfer

Center website and other media platform, to promote it to global partners in field of renewable energy. Technology on the list will be recommended to Ministry of Science and Technology, NDRC, MOFCOM, and UNDP for advice and seek support for infrastructure, hardware and software, technical training, and engineering investment.

Below are the request :

### **I. Requirements for Applicant Organisation**

1. Applicant Qualification: research institutes, universities, enterprises and individuals.
2. Scope: renewable energy technology, products (service) or equipment, etc, which are yet included in the undergoing cooperation (see Annex 1)
3. How to Apply: applicants fill in the declaration form of renewable energy technology achievements online (format can be found in Annex 2), and at the same time upload 3 to 5 photos of the technology or products (maximum: 3M per picture). Hardcopy should be sent by post to the address below after the online application is completed.
4. Submission of Materials: the application will be valid only when the required materials are submitted both online and by post by the indicated deadline.

### **II. Deadline of Application**

20 June, 2016 (subject to the online submission date and the date of mailing indicated by the postmark)

### III. How to Submit

**Submit Online:** Please submit the electronic application materials via [www.rettc.org](http://www.rettc.org)

**Submit by post:** Please mail hardcopy of the application material (2 copies) to:

No.6 ZhongGuanCun BeiErTiao, Haidian District, Beijing
