Open Government Partnership: Moldova’s 3rd National Action Plan
The Open Government Partnership is a multilateral initiative that aims to secure concrete commitments from governments to promote transparency, empower citizens, fight corruption, and harness new technologies to strengthen governance.
- Joined OGP in 2012
- Two National Action Plans implemented
- Focus on participation, innovation and transparency
Public consultations February-May 2016

Commitments for the Action Plan co-created with 3 major stakeholders:

- Open Government Working Group Moldova
  The working group was formed as a result of an open call

- Central Public Authorities
  Public authorities were asked to come up with proposals of commitments they could implement

- Civil Society at large including business sector, independent experts, etc
  Consultation through a survey
Top 5 domains to be included in the OGP National Action Plan:
- Open justice
- Public Procurement
- Transparency and transparent decision-making process
- Open Government at the local level
- Access to information
Demands from civil society:

- Increased transparency and a transparent decision making process
- Less bureaucracy through interinstitutional data exchange and interoperability
- More valuable and usable open data
- Citizen-centered public services
- Open governance at the local level
- Reforming the petitioning process by using modern technologies
COMMITMENTS PROPOSED BY CIVIL SOCIETY

- Implementation of a transactional E-procurement system and Open Contracting Data Standard
  - More data to be disclosed at all phases of public procurement
  - Intensive capacity building
- Involving civil society in the process of public procurement
  - Civil society to be able to monitor the process online and offline
- Open high value data as identified: health, education, geo-spatial data, public finance (where does my money go) and other
  - Including constant update of the existing open data sets
- Implementing electronic mechanism of interaction with central authorities such as e-petitions, e-legislation, etc.
- Good governance at the local level
  - Capacity building, access to information
- Public services digitization
  Interoperability and data exchange, public services available online
- Capacity building of public servants
- Implementation and promotion of e-Legislation system
- Implementation and promotion of e-Subsidies for agriculture system
- Improving the interaction of EO with Customs Service through an online mechanism
- Publishing more data and information online
- Involving civil society and increasing engagement with citizens
INGREDIENTS NEEDED FOR SUCCESS

- Rising awareness campaigns
- Financial support
