| Responsible GOI agencies formulate, implement and monitor integrated natural resource management policies and programmes more effectively. | 1. Number and scope of policies, plans, programmes and/or tools for sustainable/integrated water resources management that are developed/updated and adopted/implemented with support of UN agencies. | FAO will (in partnership with MOJA, DOE, MOE, FRWQ, Land Affairs Organization and Iran Meteorological Organization) assist to: 
  - Support the formulation of a national integrated programme aimed at enhancing water productivity and efficiency in water resources management. 
  - Support the development of a framework for collection and analysis of information and data regarding water availability and its use by multiple sectors in watersheds, river basins and irrigation systems – Water accounting and water auditing. 
  - Support the institutional capacity development of government and other stakeholders at country provincial and local levels to deal with governance of water resources. 
  - Help strengthen institutional capacities on reinforcing agricultural water management; develop/disseminate pro-poor tools for improved access and management of water resources for agriculture; and establish and promote FAO collaborating centres to disseminate effective methodologies, tools and products related to water resources management. 
  - Support capacity development to assess agricultural land use, cover and degradation and to analyze, and sustainably respond, to water productivity and yield gaps. 
  - Support mapping of salt affected lands and piloting integrated management practices as well as disseminating related good practices. 
  - Help with combating desertification and restoring degraded land and soil. 
  - Support reinforcement of national capacity and development of methodologies on effective drought mitigation. 
  - Help formulate a National Forestry Programme, halting deforestation, restoring degraded forests, increasing afforestation and reforestation. 
  - Support strengthened access to and utilisation of plant and animal genetic resources. 
  - Promote the conservation of mountain ecosystems and their biodiversity. 
  - Support sustainable management of marine and coastal ecosystems. 
  - Support development of a national fisheries and aquaculture strategic programme. |
| Focus areas:                   |                           |                                             |
| - sustainable water resources management, |                           |                                             |
| - sustainable land management, |                           |                                             |
| - biodiversity conservation, and |                           |                                             |
| - sustainable management of the marine and coastal environment |                           |                                             |
| also reflected in SDGs: 1, 5, 14, 15, 17 |                           |                                             |
| 2. Number and scope of policies, plans, programmes and/or models for sustainable land use planning, utilisation and management (that take into account ecological carrying capacity) that are developed/updated and adopted with support of UN agencies | 3. Number and scope of protected area management models, biodiversity conservation initiatives and/or site specific examples of sustainable development that are developed and piloted with UN agency support | |
| 4. Number and scope of regional and/or bilateral initiatives that are developed/support and in place to address drought mitigation, sand/dust storms and other regional environmental challenges with UN agency support | 5. Number and scope of marine and coastal environment sustainable management policies, strategies or programmes that are developed and implemented, with UN support | |
| 6. Number and scope of site specific examples of sustainable development that are identified and promoted with UN | | |

FAO will (in partnership with MOJA, DOE, MOE, FRWQ, Land Affairs Organization and Iran Meteorological Organization) assist to: 
- Support the formulation of a national integrated programme aimed at enhancing water productivity and efficiency in water resources management. 
- Support the development of a framework for collection and analysis of information and data regarding water availability and its use by multiple sectors in watersheds, river basins and irrigation systems – Water accounting and water auditing. 
- Support the institutional capacity development of government and other stakeholders at country provincial and local levels to deal with governance of water resources. 
- Help strengthen institutional capacities on reinforcing agricultural water management; develop/disseminate pro-poor tools for improved access and management of water resources for agriculture; and establish and promote FAO collaborating centres to disseminate effective methodologies, tools and products related to water resources management. 
- Support capacity development to assess agricultural land use, cover and degradation and to analyze, and sustainably respond, to water productivity and yield gaps. 
- Support mapping of salt affected lands and piloting integrated management practices as well as disseminating related good practices. 
- Help with combating desertification and restoring degraded land and soil. 
- Support reinforcement of national capacity and development of methodologies on effective drought mitigation. 
- Help formulate a National Forestry Programme, halting deforestation, restoring degraded forests, increasing afforestation and reforestation. 
- Support strengthened access to and utilisation of plant and animal genetic resources. 
- Promote the conservation of mountain ecosystems and their biodiversity. 
- Support sustainable management of marine and coastal ecosystems. 
- Support development of a national fisheries and aquaculture strategic programme.

### 2. HEALTH

#### 2.1: Universal Health Coverage

The health sector in Iran formulates, implements and monitors their policies and programmes more effectively, in line with promoting universal health coverage goals.

<table>
<thead>
<tr>
<th>UNDAF Outcomes and focus areas</th>
<th>Indicators of achievement</th>
<th>UN agency contributions and key GOI partners</th>
</tr>
</thead>
<tbody>
<tr>
<td>10. Number and scope of policies, plans and/or programmes for sustainable transportation management that have been developed/updated and adopted with support of UN agencies</td>
<td>- Support strengthening of the power and role of the media in raising awareness among the population and in influencing informed policies by national authorities to effectively report on Climate Change and Adaptation issues in an accessible way to the population.</td>
<td>UNICEF will (in partnership with MoH, MoE, DoE, and RC) assist to:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Scale up and mainstream climate change and environmental education issues into the national education system.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>UNHABITAT will (in partnership with Mo RUD, Transportation and Traffic Organisation, DoE, MoI and Municipalities) assist to:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Support the GOI to make contributions to the global effort to achieve the stabilisation of greenhouse gas concentrations in the atmosphere.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Support the GOI to effectively manage climate change impacts of the urban and rural development activities.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Promote and support activities related to environmentally friendly transportation policies and plans.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>WHO will (in partnership with MoHME, DoE, and Universities of Medical Science) support tackling the health impacts of air pollution risks.</td>
</tr>
</tbody>
</table>

**WHO** will (in partnership with MoHME, Universities of Medical Science, Iran health Insurance organization) assist to:

- Ensure that strategies developed for achieving universal health coverage are based on the principles of primary health care and health equity.
- Provide technical support to assess public health functions and capacity and develop new approaches that will require norms and standards for the training and licensing of health workers, the accreditation of health facilities, and the regulation of private providers and insurers.
- Support GOI to strengthen their information systems and evidence-based policy-making for guiding HTP, and provide information and evidence on health-related matters including centralized Civil Registration & Vital Statistics.
<table>
<thead>
<tr>
<th>UNDAF Outcomes and focus areas</th>
<th>Indicators of achievement</th>

</tr>
</thead>
<tbody>
<tr>
<td>Focus areas:</td>
<td></td>
<td>• Support GOI to develop, adopt or update assessment tools and plans for monitoring and evaluation of interventions regarding UHC and health financing, access to PHC and quality of care in urban settings and hospital management and accreditation.</td>
</tr>
<tr>
<td>• health systems strengthening,</td>
<td>3. Number and scope of strategies, policies and operational guides for hospital management, financing and accreditation, and human resource development that are developed/updated, adopted and/or operationalised with UN support.</td>
<td>• Support revision of the Medical Education in Health Transformation Plan of MOHME, development of an education programme for family medicine, adoption of other training curricula based on needs, and strengthening of nursing professional regulations and capacity to reduce educational and service gaps.</td>
</tr>
<tr>
<td>• the promotion of integrated people-centered health services,</td>
<td>4. Number and scope of strengthened implementation capacities for Civil Registration &amp; Vital Statistics that are developed and adopted with UN support.</td>
<td>• Support revision of policy for developing Human Resources for Health (HRH) in UHC including professional and technical training for midwives and nurses.</td>
</tr>
<tr>
<td>• improvements in the quality of care,</td>
<td>5. Number and scope of strategies, policies and plans that are developed/updated and rolled-out to strengthen regulatory mechanisms and the capacity for vaccine and medicine production by Iran FDO (including for the EDI programme) with UN support.</td>
<td>• Support strengthening of the regulating mechanisms and the capacity of Iran FDO in vaccine and medicine production, and facilitate technology transfer and exchange.</td>
</tr>
<tr>
<td>• the reform of health financing/insurance systems,</td>
<td>6. Number and scope of initiatives on public financing for mothers', children's and adolescents' wellbeing developed/enhanced and adopted and being implemented by MoHME with UN support.</td>
<td>UNICEF will (in partnership with MoHME and MoCLSW) assist to:</td>
</tr>
<tr>
<td>• improvements in health information systems,</td>
<td>7. A mechanism to organize, analyse and produce policy guides and recommendations on child health (the Child Health Observatory) is developed and operationalised with UN support.</td>
<td>• In line with the National Health Reform System, support the MoHME in their efforts in Health System Strengthening through innovative approaches to equity and evidence-based health programming and public financing for children and adolescents, with a specific focus on priority provinces.</td>
</tr>
<tr>
<td>• medical education reform,</td>
<td></td>
<td>• Support the establishment and operationalization of a mechanism (potentially called a Child Health Observatory) to absorb all the relevant data coming from the national routine system as well as other knowledge products, to analyse and to produce policy guides, recommendations.</td>
</tr>
<tr>
<td>• advanced medicine and health technology transfer,</td>
<td></td>
<td>UNFPA will (in partnership with MOHME and NOCR) assist to:</td>
</tr>
<tr>
<td>• health technology assessment</td>
<td></td>
<td>• Support the development and costing of reproductive health services package to include in the Health Transformation Plans.</td>
</tr>
<tr>
<td>• vaccine sufficiency,</td>
<td></td>
<td>• Support improvements to reporting of cause of deaths of Women in Reproductive Age (15-49) in order to contribute to the elimination of causes of preventable maternal mortalities.</td>
</tr>
<tr>
<td>• hospital management.</td>
<td></td>
<td>• Support efforts to enhance skills of costing and budgeting for RH.</td>
</tr>
<tr>
<td>Also reflected in SDGs: 1, 3, 17</td>
<td></td>
<td>• Support inclusion of RH and maternal health in UHC policies and programmes.</td>
</tr>
<tr>
<td>2.2: Prevention and control of Non-Communicable Diseases</td>
<td></td>
<td>UNDP will (in partnership with WHO) assist the Ministry of Health to lead a national process that ensures a multi-sector approach to NCDs is planned and implemented.</td>
</tr>
<tr>
<td>The health sector in Iran formulates, implements and monitors their Non-Communicable</td>
<td>1. Number and scope of multi-sectoral NCD policies, strategies and operational guidelines that are developed or up-dated, adapted and rolled-out with support of UN agencies.</td>
<td>WHO will (in partnership with MoHME, FDA and Universities of Medical Science) assist to:</td>
</tr>
<tr>
<td></td>
<td>2. Number and scope of practices that are strengthened to analyze, monitor and evaluate the implementation and effectiveness of country-led national multi-sectoral NCD.</td>
<td>• Provide technical support to national counterparts to develop a comprehensive</td>
</tr>
<tr>

</tr>
<tr>
<td><strong>Focus areas:</strong></td>
<td>3. Number and scope of policies and strategies which are strengthened / upgraded and rolled-out regarding tobacco control and prevention programmes, implementation of the WHO Framework Convention on Tobacco Control (WHO FCTC) and ratification of the Protocol to Eliminate Illicit Trade in Tobacco Products with support of UN agencies</td>
<td>Support national counterparts to develop operational guidelines and effective intervention measures, national surveillance and information systems and standardised data collection tools, to monitor exposure to NCD risk factors, NCD-specific mortality and morbidity, and the health system response to these diseases and evaluate the implementation and financial situation of NCD.</td>
</tr>
<tr>
<td></td>
<td>4. Number and scope of policies and strategies which are developed / updated, adopted and rolled-out related to addressing underlying causes of road traffic injuries, other unintentional injuries and mental health problems with UN support</td>
<td>Support national counterparts to establish/update multisectoral national policy/strategic action plan for mental health and integrate priority mental health issues in the basic health delivery package in PHC.</td>
</tr>
<tr>
<td>also reflected in SDGs: 1, 3</td>
<td></td>
<td>Support national counterparts in strengthening capacities to develop policies, programmes, and laws that are effective in addressing the underlying causes of violence, road traffic injuries and other unintentional injuries.</td>
</tr>
</tbody>
</table>

**UNICEF** will (in partnership with MoHME, MoE, IRCS, SWO, and MoI) assist to:

- Support development and implementation of successful models on Prevention of Non-Communicable Diseases through promotion of healthy life style and social health among children and adolescents in line with the MoHME's plans on prevention of NCDs.
- Support knowledge management and development of innovative approaches on early prevention of NCDs during childhood and adolescents with specific focus on promotion of physical activities and obesity prevention through communication for development approaches.
- Enhance the capacity of relevant partners to operationalize successful models on prevention of social health with specific focus on prevention of child maltreatment;
- Enhance the capacity of relevant partners to operationalize successful models on prevention of home and road injuries.

---

2.3: Prevention and control of HIV/AIDS and other Communicable Diseases

The health sector in Iran formulates, implements and monitors policies and programmes on HIV/AIDS and other

| 1. Percentage of HIV population in Iran that is aware of its HIV sero-status: | UNAIDS will (in partnership with the National AIDS Committee and its technical sub-committees, the Secretariat of the National AIDS Programme as well as its implementing partners) assist in providing support to an effective, multi-sectoral National Strategic Plan through formulation, implementation, monitoring, reporting and evaluation of the UN Joint Programme of Support on HIV, which focuses on the following product streams:
- **Fostering Innovation, Knowledge Management and Strategic Information**
- **Capacity Development and Implementation Science**
- **Advocacy and Communication** |
<p>| Baseline: 30 per cent (NSP4) | <strong>Fostering Innovation, Knowledge Management and Strategic Information</strong> |
| Target: Year 5: 90 per cent (NSP4) | <strong>Capacity Development and Implementation Science</strong> |
| 2. Percentage of HIV population that is receiving antiretroviral therapy according to national guidelines: | <strong>Advocacy and Communication</strong> |</p>

<tr>
<td>2.4: Promoting health throughout the course of life</td>
<td>1. Number and scope of the policies, strategies and/or practices that have been strengthened to improve quality of interventions to end preventable maternal and new-born death, reduce birth defects, and improve neonatal and early childhood health and development with support of UN agencies</td>
<td>WHO will (in partnership with MoHME, Ministry of Sport and Youth, Universities of Medical Science) assist to:</td>
</tr>
<tr>
<td></td>
<td>2. Number and scope of policies, programmes and/or practices that are developed/enhanced and adopted to better meet the health needs of the elderly and the disabled with support of UN agencies</td>
<td>- Provide technical support to counterparts in developing/updating or adopting policies, strategies and guidelines for safe pregnancy and delivery and support for development of training guidelines and standard operation procedures for service providers and running trainings and capacity building required.</td>
</tr>
<tr>
<td></td>
<td>3. Number and scope of policies and strategies, plans of action and guidelines that are developed/upated and adopted to promote healthy behaviours, sexual and reproductive health with support of UN agencies</td>
<td>- To monitor and evaluate improvement of maternal and neonatal health through implementation of HTP and support development of new strategies, policies and interventions required for reducing maternal, neonatal and child mortality.</td>
</tr>
<tr>
<td></td>
<td>4. Number and scope of national policies and programmes for food safety and assessing food safety risks that are developed/enhanced and adopted with the support of UN agencies</td>
<td>- Develop/update and implement policies and interventions to promote healthy behaviour, sexual and reproductive health.</td>
</tr>
<tr>
<td></td>
<td>5. Number and scope of policies and programmes developed/updated and implemented to promote food and nutritional security with UN agency support</td>
<td>- Facilitate the collection, analysis and reporting of data on health indicators of ageing populations.</td>
</tr>
<tr>
<td>Focus areas:</td>
<td></td>
<td>- Facilitate national dialogue across different disciplines, in particular on animal health, laboratory, food, chemical and radio-nuclear safety and points of entry, and providing technical assistance for capacity building to develop and implement policies and practices to control risks and reduce the burden of foodborne diseases through strengthening monitoring system, risk and communication management of food safety (including assessing risk of pesticide residues in food and vegetables).</td>
</tr>
<tr>
<td>- institutionalisation of health promotion and development,</td>
<td></td>
<td>UNFPA will (in partnership with MoHME) assist to:</td>
</tr>
<tr>
<td>- assessing and addressing the social determinants of health,</td>
<td></td>
<td>- Engage in policy dialogue, support research and evidence generation that will strengthen RH/maternal health components in Health Transformation Plans, in UHCC and other national health policies and activities.</td>
</tr>
<tr>
<td>- improving reproductive health,</td>
<td></td>

### 4. DRUG CONTROL

#### 4.1 Drug abuse prevention and treatment

Relevant GOI agencies formulate, implement and monitor drug abuse prevention and treatment policies and programmes more effectively.

**Focus areas:**
- primary prevention,
- drug treatment and rehabilitation, and
- comprehensive harm reduction

Also reflected in SDGs: 1, 3, 16, 17

1. Number and scope of GOI drug abuse prevention and treatment policies and programmes adopted, with UN agency support

2. Number and scope of drug prevention, treatment, rehabilitation, social reintegration, HIV/AIDS prevention and care, and harm reduction services for target groups that are supported by UN agencies

**UNODC** will (in partnership with Drug Control HQ and its member Organizations) assist to:
- Support GOI partners to further develop and implement comprehensive and evidence-based services on drug use prevention, treatment, rehabilitation and social integration with special emphasis on high risk groups.
- Support GOI and other partners to expand the coverage and quality of comprehensive evidenced informed public health services and programmes on HIV prevention, treatment and care.

**UNICEF** will (in partnership with MoE, BAFIA, MoSLSW, MoH and IRCS) assist to:
- Support partners in the design and implementation of effective programs for prevention of risky behaviors and substance abuse among adolescents and youth.
- Support developing evidence-based, effective and comprehensive school-based prevention programmes with a particular focus on vulnerable and at-risk populations and localities.

**WHO** will (in partnership with MoHME and Universities of Medical Science) assist to:
Support the evaluation of harm reduction programmes, help strengthen ongoing interventions and initiate new areas and methods for interventions on substance abuse based on new requirements and risks including Amphetamine-type stimulants (ATS) use.

#### 4.2: Drug supply reduction

1. Number and scope of GOI policies and/or programmes on border management, illicit drugs, precursor and

**UNODC** will (in partnership with Drug Control HQ and its member Organizations, MFA, Anti Narcotic Police, Interpol Iran, Ministry of Interior and Forensic laboratories) assist to:
### UNDAF Outcomes and focus areas

Relevant GOI agencies formulate, implement and monitor drug supply reduction policies and programmes more effectively.

**Focus areas:**
- Border management,
- Combating drug trafficking
- Regional and international drug control cooperation, and
- Alternative livelihoods

Also reflected in SDGs: 1, 3, 16, 17

### Indicators of achievement

1. Amphetamine-type stimulants (ATS) control developed or enhanced and adopted with UN support

2. Number and scope of national, regional and international initiatives and networks strengthened and implemented on illicit drug control and chemical precursors trafficking with UN agency support

3. Number and scope of measures to promote Alternative Livelihood initiatives supported by the UN

### UN agency contributions and key GOI partners

- Support the development of national capacities on border management, drugs precursors and amphetamine type stimulants control, interdiction and seizures.
- Support the development of enhanced regional and international partnerships and networking to more effectively combat organized crime in the area of illicit trafficking.
- Support the development and fostering of Alternative Livelihood programmes in drug producing areas.
