

Fishery Harbour Rehabilitation and Value Chain Development in Aden (AFH)

Last updated: October 2026

PROJECT INFORMATION

The Aden Fishery Harbour Rehabilitation and Value Chain Development in Aden Project is funded by the German Federal Ministry for Economic Cooperation and Development (BMZ), through the German Development Bank (KfW), and aims to rehabilitate the fish harbour at Hujif, to restore the minimum requirements for re-launching operations, productivity, and re-establishing effective management of the harbour.

The project contributes to the creation of employment opportunities, especially for youth and women, and to mobilising the fishery value chain.

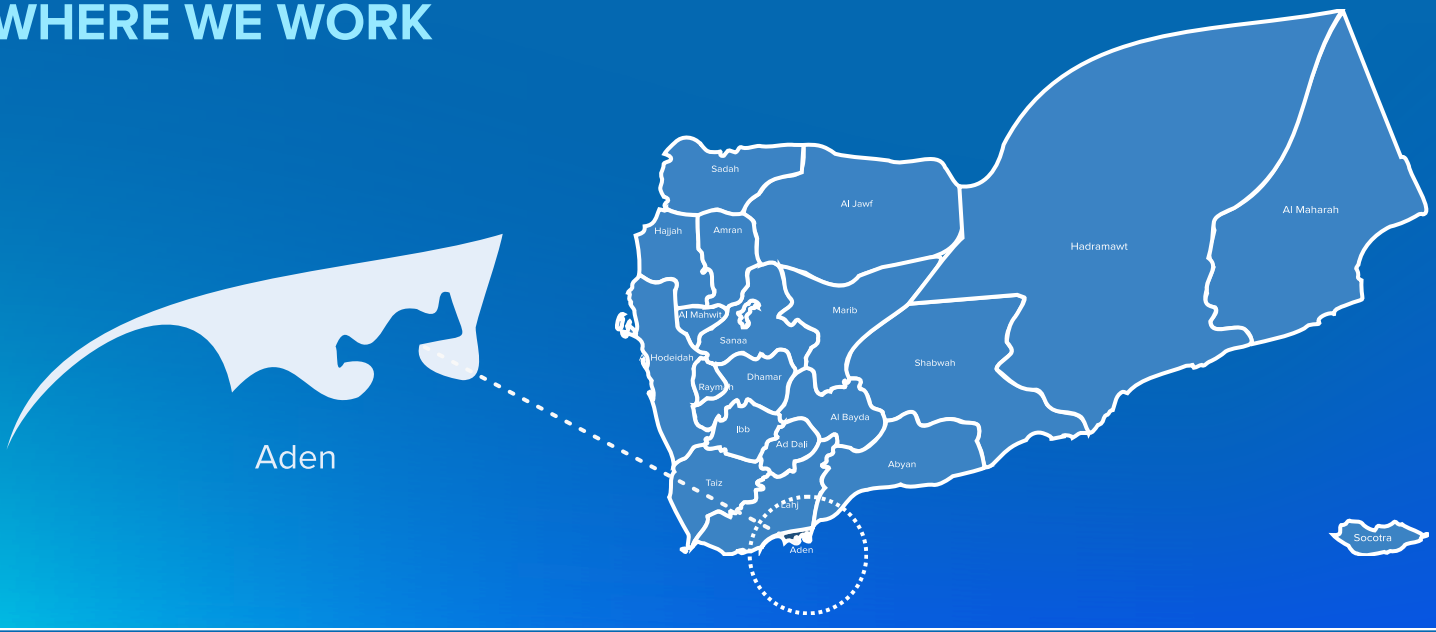

SNAPSHOT

Aden Governorate

Phase I €20 million
Phase II €15 million

January 2023 - December 2028

WHERE WE WORK

Fishery Harbour Rehabilitation and Value Chain Development in Aden (AFH)

IMPACT SO FAR

100% completion of the Administrative Building Rehabilitation.

Three key design studies completed for quay wall, dockyard landing site, and siteworks.

100% delivery completion of laboratory equipment items.

Twenty technicians from the Fish Quality Laboratory received hands-on training on new equipment.

100 people received integration, guidance, and market access sessions.

198 trained in the fishery value chain.

32 participants from harbor management, MoAIFW, and GAF engaged in a validation workshop and strategic framework preparation.

One value chain study on Yemen Fisheries Market Systems.

50 women empowered with vocational training and in-kind support to enhance income.

27 MAIF staff strengthened their capacity in statistical data analysis.

100 people accessed with vocational in-kind support to kickstart their fishery-related businesses.
