UNDP’s Climate Promise is the world’s largest offer of support to countries on NDC enhancement, currently assisting 118 countries in collaboration with 35 partners.

Climate Promise countries represent:

- 65% of the developing countries that submitted their NDCs by 31 March 2021.
- + 80% of the developing countries participating in the Leaders Summit on Climate Change 2021.
- 70% of the developing countries announcing enhanced commitments at Climate Ambition Summit 2020 on the 5th Anniversary of the Paris Agreement.

**IMPACT TO DATE**

- 65+ countries reported progress on climate data and transparency to ensure effective implementation and to inform future NDC revisions.
- 60+ countries have successfully incorporated gender into their NDC enhancement.
- 50+ countries making substantial progress to enable mobilization and allocation of public and private finance.
- 70+ countries supporting whole-of-government approaches through capacity building at national and subnational levels.
- 80+ countries engaging non-state actors and marginalized groups in NDC enhancement.
- 90+ countries reported progress on data, evidence and analysis, including assessments, baseline analyses and scenarios, target reviews and updates in priority sectors, including agriculture, energy, forestry, water, circular economy, health and other.
- 50+ countries undertaking policy and institutional reforms to support NDC revision and implementation.

The Climate Promise leverages the NDC Partnership’s coordination to strengthen the implementation of climate action. One example is with the NDC Partnership’s Climate Action Enhancement Package (CAEP), where the Climate Promise provides complimentary support on enhancement in almost all of its 65 countries, strengthening integrated support.

**LOOKING AHEAD**

- A majority of Climate Promise countries are expected to submit their NDC by June 2021, with the remaining ahead of COP26.
- 73% of countries intend to have more ambitious mitigation targets.
- 96% of countries plan to enhance adaptation ambition.
- Over 80 Climate Promise countries are linking NDCs and green recovery processes, with a focus on green jobs and social safety-nets.
