

Multi-Country Western Pacific Integrated HIV/TB Programme

2021

Key Performance Indicators

EXECUTIVE SUMMARY

A health worker from the Tonga Family Health Association conducts a test with a client for HIV. Photo: TFHA.

In 2021, the COVID-19 pandemic continued to impact the response to HIV and TB across the Western Pacific region, and threatened to derail progress that has been achieved over the past decades.

Due to the COVID pandemic, the Multi-Country Western Pacific Integrated HIV/Tuberculosis (TB) Programme encountered several challenges that hindered programme implementation. These included travel restrictions, lockdowns and border closures, as well as disruptions to supply chains of life saving medicines, and diversion of health resources in countries away from national HIV and TB programmes to the COVID-19 response.

Outreach and advocacy activities, events involving large numbers of people, and activities in the more remote, outer islands were especially affected. A major volcanic eruption in Tonga in December 2021, which caused widespread destruction, also negatively impacted implementation of the programme in 2022.

Yet, despite facing all of these hurdles, the programme and its partners managed to accelerate overall implementation across the 11 programme countries (Cook Islands, Federated State of Micronesia, Kiribati, Nauru, Niue, Palau, Republic of Marshall Islands, Samoa, Tonga, Tuvalu and Vanuatu), with no significant interruption to results. This 2021 Key Performance Indicators Report outlines these results.

During the reporting period, the United Nations Development Programme (UNDP), the principal recipient of the Global Fund grant, achieved 92 percent of overall programmatic performance indicators.

The approach of the programme, which has proven successful, remains steadfast – to scale-up and improve the delivery of HIV and TB prevention, treatment, care and support services, with a focus on marginalized populations.

For HIV, this means focusing on key populations at risk of HIV (men who have sex with men, transgender people, female sex workers, prisoners and seafarers) and their sexual partners, as well as adolescent girls and women. For TB, the programme focuses primarily on close contacts of people with TB, children, people who are immunocompromised (such as those with diabetes or people living with HIV), people experiencing homelessness and those in remote island locations.

A key element of our work is to reduce the inequalities, social exclusion, stigma and discrimination that limits access to essential health services and increases health risks.

To achieve the programme goals during the ongoing COVID-19 restrictions, innovative approaches were devised to make sure that implementation targets were reached. For example, UNDP and its implementation partners closely collaborated to adopt new ways of working that aligned with public health measures, such as running outreach activities in a one-on-one modality rather than in large groups.

To overcome travel restrictions and ensure continued technical assistance and capacity building for front-line health workers, training by international consultants and the World Health Organization shifted to being conducted through digital communication technologies instead of in-person. Through on-demand telemedicine support and webinars, health care workers, including those in hard to reach, remote islands, were able to gain access to highly specialized knowledge and education, which translated into improved care and health outcomes for their clients.

Now more than ever, the UNDP-Global Fund partnership is proving essential in the fight against HIV, TB and malaria in the Pacific. The sustained investment and partnership of the Multi-Country Western Pacific Integrated HIV/TB Programme is a demonstration of what is needed to ensure our global goals are reached, with no further ground is lost due to the COVID pandemic

REGIONAL

INDICATOR NAME	YEAR	RESULTS
IMPACT		
Percentage of men who have sex with men who are living with HIV	2021	0 / 1,039 = 0%
Percentage of transgender people who are living with HIV	2021	0 / 2,270 = 0%
Percentage of sex workers who are living with HIV	2021	0 / 1,668 = 0%
TB mortality rate per 100,000 population	2020	7 per 100,000
RR-TB and/or MDR-TB prevalence among new TB patients: Proportion of new TB cases with RR-TB and/or MDR-TB	2021	1 / 429 = 0%
OUTCOME		
Percentage of people living with HIV and on ART who are virologically suppressed	2021	36 / 63 = 57%
Percentage of men reporting the use of a condom the last time they had anal sex with a male partner	2021	922 / 1,543 = 60%
Percentage of transgender people reporting the use of a condom the last time they had sex with a partner	2021	2,004 / 2,238 = 90%
Percentage of sex workers reporting the use of a condom with their most recent client	2021	1,035 / 1,829 = 57%
Treatment success rate of RR TB and/or MDR TB. Percentage of cases with RR and/or MDR TB successfully treated	2019	5 / 5 = 100%
TB treatment coverage: Percentage of new and relapse cases that were notified and treated among the estimated number of incident TB cases in the same year (all form of TB - bacteriologically confirmed plus clinically diagnosed)	2020	774 / 1,116 = 69%
COVERAGE		
Percentage of men who have sex with men reached with HIV prevention programs - defined package of services	2021	1,600 / 9,284 = 17%
Percentage of men who have sex with men that have received an HIV test during the reporting period and know their results	2021	1,039 / 9,284 = 11%
Percentage of transgender people reached with HIV prevention programs - defined package of services	2021	2,297 / 18,569 = 12%
Percentage of transgender people that have received an HIV test during the reporting period and know their results	2021	2,270 / 18,569 = 12%
Percentage of sex workers reached with HIV prevention programs - defined package of services	2021	1,833 / 3,904 = 47%
Percentage of sex workers that have received an HIV test during the reporting period and know their results	2021	1,668 / 3,904 = 43%
Percentage of people living with HIV currently receiving antiretroviral therapy	2021	63 / 66 = 95%
Number of notified cases of all forms of TB (ie bacteriologically confirmed + clinically diagnosed), includes new and relapse cases	2021	653
Treatment success rate - all forms: Percentage of TB cases, all forms, bacteriologically confirmed plus clinically diagnosed, successfully treated (cured plus treatment completed) among all TB cases registered for treatment during a specified period, new and relapse cases	2020	644 / 774 = 83%
Number of RR-TB and/or MDR-TB that began second line treatment	2021	2
Number of TB cases with RR-TB and/or MDR-TB notified	2021	2
Number of TB cases (all forms) notified among key affected populations/ high risk groups (other than prisoners)	2021	185

Percentage of sex workers who are living with HIV	2021	0 / 361 = 0%
TB mortality rate per 100,000 population	2020	0 per 100,000
RR-TB and/or MDR-TB prevalence among new TB patients: Proportion of new TB cases with RR-TB and/or MDR-TB	2021	0 / 6 = 0%
OUTCOME		
Percentage of people living with HIV and on ART who are virologically suppressed	2021	5 / 6 = 83%
Percentage of men reporting the use of a condom the last time they had anal sex with a male partner	2021	78 / 78 = 100%
Percentage of transgender people reporting the use of a condom the last time they had sex with a partner	2021	221 / 224 = 99%
Percentage of sex workers reporting the use of a condom with their most recent client	2021	278 / 361 = 77%
Treatment success rate of RR TB and/or MDR TB. Percentage of cases with RR and/or MDR TB successfully treated	2019	0 / 0
TB treatment coverage: Percentage of new and relapse cases that were notified and treated among the estimated number of incident TB cases in the same year (all form of TB - bacteriologically confirmed plus clinically diagnosed)	2020	8 / 12 = 67%
COVERAGE		
Number of men who have sex with men reached with HIV prevention programs - defined package of services	2021	78
Number of men who have sex with men that have received an HIV test during the reporting period and know their results	2021	78
Number of transgender people reached with HIV prevention programs - defined package of services	2021	224
Number of transgender people that have received an HIV test during the reporting period and know their results	2021	224
Number of sex workers reached with HIV prevention programs - defined package of services	2021	361
Number of sex workers that have received an HIV test during the reporting period and know their results	2021	361
Percentage of people living with HIV currently receiving antiretroviral therapy	2021	6 / 6 = 100%
Number of notified cases of all forms of TB (ie bacteriologically confirmed + clinically diagnosed), includes new and relapse cases	2021	7
Treatment success rate - all forms: Percentage of TB cases, all forms, bacteriologically confirmed plus clinically diagnosed, successfully treated (cured plus treatment completed) among all TB cases registered for treatment during a specified period, new and relapse cases	2020	7 / 8 = 88%
Number of TB cases with RR-TB and/or MDR-TB notified	2021	0
Number of RR-TB and/or MDR-TB that began second line treatment	2021	0
Number of TB cases (all forms) notified among key affected populations/ high risk groups (other than prisoners)	2021	3

TUVALU

INDICATOR NAME	YEAR	RESULTS
IMPACT		
Percentage of men who have sex with men who are living with HIV	2021	0 / 2 = 0%
Percentage of transgender people who are living with HIV	2021	0 / 4 = 0%
Percentage of sex workers who are living with HIV	2021	0 / 6 = 0%
TB mortality rate per 100,000 population	2020	34 per 100,000
RR-TB and/or MDR-TB prevalence among new TB patients: Proportion of new TB cases with RR-TB and/or MDR-TB	2021	0 / 12 = 0%
OUTCOME		
Percentage of people living with HIV and on ART who are virologically suppressed	2021	0 / 1 = 0%
Percentage of men reporting the use of a condom the last time they had anal sex with a male partner	2021	1 / 2 = 50%
Percentage of transgender people reporting the use of a condom the last time they had sex with a partner	2021	4 / 4 = 100%
Percentage of sex workers reporting the use of a condom with their most recent client	2021	0 / 6 = 0%
Treatment success rate of RR TB and/or MDR TB. Percentage of cases with RR and/or MDR TB successfully treated	2019	0 / 0
TB treatment coverage: Percentage of new and relapse cases that were notified and treated among the estimated number of incident TB cases in the same year (all form of TB - bacteriologically confirmed plus clinically diagnosed)	2020	30 / 34 = 88%
COVERAGE		
Number of men who have sex with men reached with HIV prevention programs - defined package of services	2021	2
Number of men who have sex with men that have received an HIV test during the reporting period and know their results	2021	2
Number of transgender people reached with HIV prevention programs - defined package of services	2021	4
Number of transgender people that have received an HIV test during the reporting period and know their results	2021	4
Number of sex workers reached with HIV prevention programs - defined package of services	2021	6
Number of sex workers that have received an HIV test during the reporting period and know their results	2021	6
Percentage of people living with HIV currently receiving antiretroviral therapy	2021	1 / 1 = 100%
Number of notified cases of all forms of TB (ie bacteriologically confirmed + clinically diagnosed), includes new and relapse cases	2021	22
Treatment success rate - all forms: Percentage of TB cases, all forms, bacteriologically confirmed plus clinically diagnosed, successfully treated (cured plus treatment completed) among all TB cases registered for treatment during a specified period, new and relapse cases	2020	20 / 30 = 67%
Number of TB cases with RR-TB and/or MDR-TB notified	2021	1
Number of RR-TB and/or MDR-TB that began second line treatment	2021	1
Number of TB cases (all forms) notified among key affected populations/ high risk groups (other than prisoners)	2021	11
