RAPID MIND MAPPING

Rapidly map your ideas, observations or projects and uncover new perspectives and connections.

INTRODUCTION

MIND MAPPING allows you to represent ideas and organize them into a visual diagram clustered by association. Start with your main idea as the central point, then add sub-themes to branch out and connect supporting ideas, concepts, or themes.

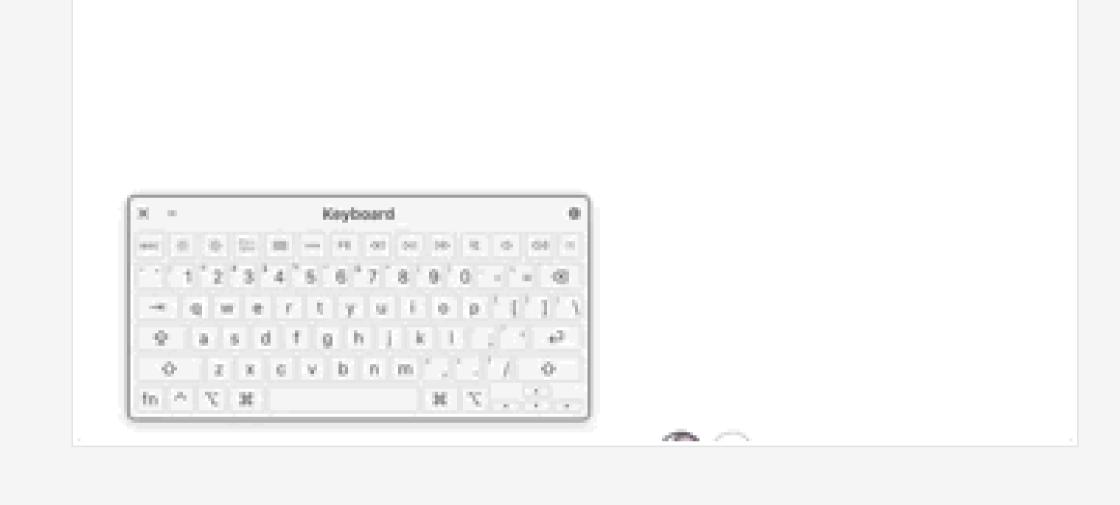

This method allows you to see a broad overview of relationships, as well as discover hidden complexities and connections to facilitate decision making, effective brainstorming, exploration, and planning.

With **Rapid Mind Mapping** in **MURAL**, you'll be able to make use of the different **zoom levels**, and get visual with color, icons, and images.

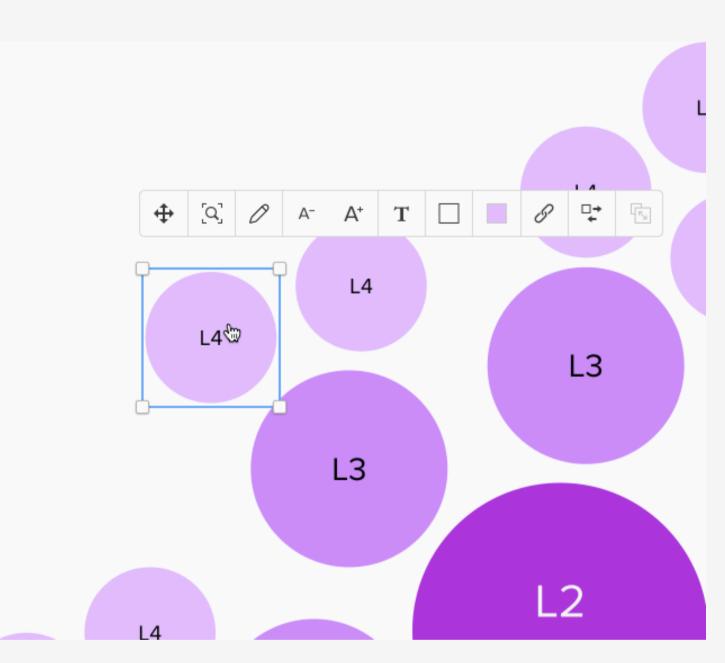

TOOL TIPS

ADD ELEMENTS

Hit the tab key to quickly duplicate sticky notes.
Use Cmd+D Ctrl+D to duplicate elements.

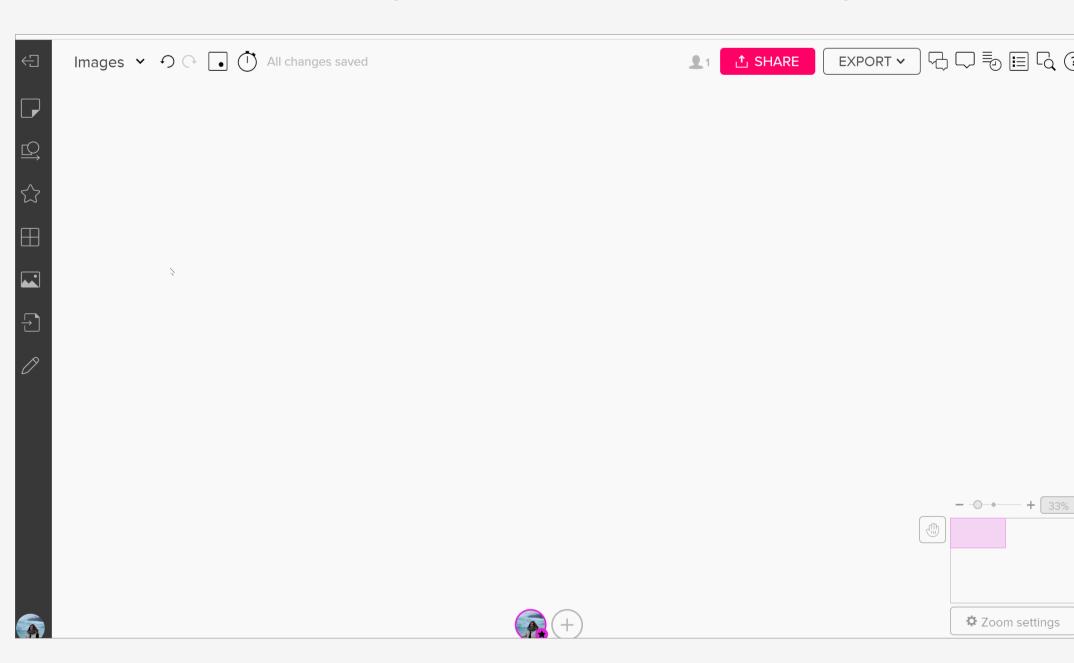

Hold down the opt key (alt key on PC) and click and drag an element to duplicate it in the desired position.

MAKE IT VISUAL

Use the panel on the left to add icons and images.
Choose objects and play with color.

Use different shades for different levels of information around one point.
