UNDP - Supporting Host Communities in Lebanon (2014 - July 2023)

In the aftermath of the Syria crisis, Lebanon continues to host more than 1.5 million displaced Syrians, the largest number of displaced population per capita in the world. The recent unfolding situation in Lebanon at the political, economic, and financial levels, as well as the impact of the COVID-19 pandemic and Beirut Blast, are increasing pressures on host communities and refugee populations residing in the country.

Data from UNDP's latest Tension Monitoring reports shows that there exists a dramatic increase in risks to social stability both at intercommunal and intracommunal levels. COVID-19 and the Beirut Blast have exacerbated the impact of the socio-economic and financial crisis in the country.

Gender disparities and unequal conditions for disadvantaged groups have increased, with women's unemployment rate increasing to almost double in light of the compounded crises.

42% (2019) ▶ **82%** (2021) Multidimensional Poverty Rate (ESCWA)

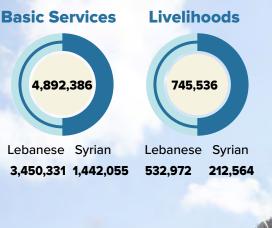

Households living in extreme poverty (ESCWA 2021)

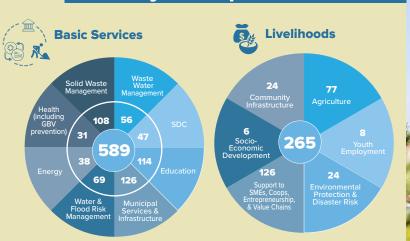

400,000 (30%)

UNDP support to host communities reached **5,637,922** of the most vulnerable people through **livelihood** and **local economic development interventions** and enhanced **basic services delivery** across Lebanon.

Mechanisms for Stability and Local Development

Projects are identified through the Mechanisms for Stability and Local Development (MSLD) process, a participatory conflict sensitive approach for mapping local priorities and triggers of instability. MSLD processes were launched in 149 communities and 12 clusters to date.

To enhance the management capacity of local authorities and increase sustainability and impact of community interventions, municipalities are provided with technical support and training on operation and management skills.

National Adaptive Response 2020-2023

Starting 2020, LHSP has adapted its strategy and reprogrammed part of its interventions to respond to the emerging priority needs, (COVID-19, Beirut Blast, economic crisis) where livelihood and environmental interventions were identified as the most relevant and urgent.

Cash for work in PPE production, agro-food production, farming, and housing restoration after the Beirut Blast generated 421,272 worker days for 10,491 workers out of which 5,071 were women (48%)

959 MSMEs, 214 Cooperatives, 40 CBOs, 17 Start-ups, and 3,099 Farmers were provided with in-kind assistance as well as 1,640 Lebanese and Syrian women were equipped with professional toolkits and capacity-building in the form of TVET to supply them with income generation opportunities.

Cash for work activities in forest management generated over 394,075 worker days for more than 9,522 workers out of which 2,332 were women (24%), in more than 100 municipalities nationwide.

Eight Government-led COVID-19 isolation centres supported

National awareness campaign on COVID-19 preventive measures disseminated to all municipalities and towns across Lebanon during the early stages of deconfinement

Strengthening Local Governance

To enhance transparency and accountability in municipal work, increase trust between citizens and municipalities, and promote good governance, 4 Unions of Municipalities including 40 Municipalities in addition to 23 Civil Society Organization across Lebanon are being capacitated on:

- Corruption Risk Factors and Management
 - Access to Information and other laws related to transparency
- Good Governance
- Promoting and strengthening the role of women in municipal work
