## Environmentally Sound Management of Persistent Organic Pollutants (POPs) in industrial and hazardous waste sectors

**20 tons of plastic packaging  
waste collected**

**18 green chemistry measures  
implemented in 9 partner  
industries**

**1 remediation plan designed  
for industrial contaminated  
site**

**Test software platform on  
equipment containing  
Ozone Depleting Substances**

**GIS database of POPs stocks**

**1 study visit**

**14 learning seminars and events with 492 participants, covering topics of:**

- Green chemistry and chemical safety
- POPs environmental impact
- Gender and chemicals nexus
- Collaboration between academia and private sector
- Remediation of industrial contaminated sites
- Disposal of plastic pesticide waste
- Media reporting on chemicals and waste
- Sampling and analysis of POPs substances
