

## RESPONDENTS' PERCEPTIONS OF THE AVAILABILITY OF REHABILITATION SERVICES IN DIFFERENT TYPES OF RESIDENTIAL SETTLEMENTS

The perception of the availability of rehabilitation services significantly depends on the type of the residential settlement

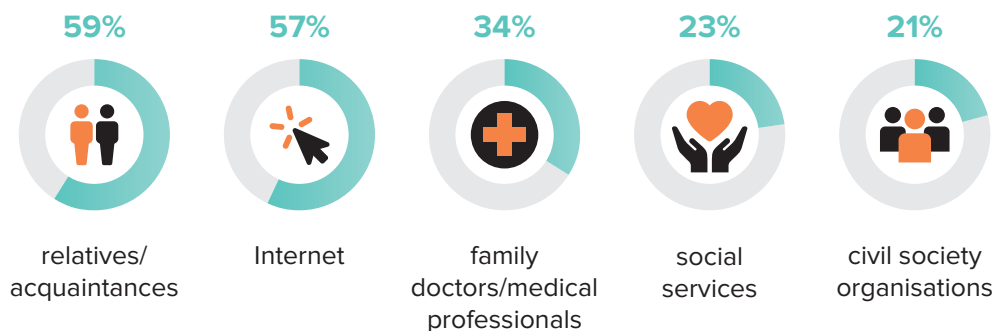

In villages, only **15%** believe that all/the majority of rehabilitation services are available, while in small towns, the figure is **9%**.

**51%** in villages and **27%** in small towns report being aware of cases where such services are entirely absent

## SOURCES OF INFORMATION ABOUT REHABILITATION SERVICES

# REHABILITATION SERVICES FOR PEOPLE WHO HAVE EXPERIENCED INJURIES, HEALTH IMPAIRMENTS, OR ILLNESSES SINCE FEBRUARY 24, 2022

OVERVIEW OF NATIONWIDE SURVEY RESULTS  
OCTOBER 2023

**Sample Size:** 2014 respondents

**Respondent Characteristics:** individuals aged 18 and above, residing in the territory controlled by Ukraine, representing all oblasts of Ukraine as of February 24, 2022, except for those temporarily occupied in 2014-2015.

**Sample Composition:** The distribution of respondents in the sample by macro-region of residence, type of residential settlement, gender, and age was benchmarked against official statistical sources. The statistical margin of error for the sample (with a 95% confidence level and a design effect of 1.1) does not exceed 2.4%.

**Survey Method:** CATI (Computer Assisted Telephone Interviews)

**Dates:** September 29 – October 9, 2023

**The survey was conducted by** the Kyiv International Institute of Sociology

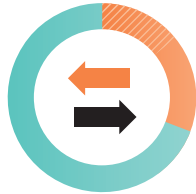

*The nationwide survey was conducted by the Kyiv International Institute of Sociology with the support of the United Nations Development Programme in Ukraine within the project "Supporting the rehabilitation of people with disabilities caused by the war" with the financial support of the governments of the Republic of Korea and Germany.*
