

2023 | RESULTS AT A GLANCE

A Malaria-Free Vanuatu, Contributing to the Good Health and Well-Being of the Population

Supporting the Vanuatu Ministry of Health's vision to reduce local transmission of malaria to zero in all provinces and achieve a 'malaria-free Vanuatu' by the end of 2023. This project is supported by the Global Fund, with UNDP as the Principal Recipient and the Ministry of Health as the Sub Recipient.

REDUCING TRANSMISSION

Long-lasting insecticide-treated net (LLINs)¹ distributed

61,286

9,143	Malampa	3,923	Shefa
23,905	Penama	6,243	Tafea
12,376	Sanma	5,696	Torba

64% of people slept under a LLIN the previous night

DIAGNOSIS AND TREATMENT

Suspected malaria cases received a parasitological test at public sector health facilities

100%

7% Annual blood examination rate

42% of malaria foci fully investigated and classified

70% of confirmed malaria cases received first-line antimalarial treatment at public sector health facilities

Annual parasite incidence over the life of the programme
