

## OUTCOME 2 INCLUSIVE PROSPERITY

By 2026, the UN, in collaboration with all relevant stakeholders, aims that people, especially the most vulnerable and marginalised, will benefit from more inclusive, and resilient, transformative, and sustainable socio-economic opportunities to reduce poverty and inequalities.

# SUPPORTING EFFECTIVENESS AND EFFICIENCY IN THE UXO SECTOR TO CONTRIBUTE TO THE ACHIEVEMENT OF SDG 18 AND SAFE PATH FORWARD III (SPF III)

Project ID: 00116549 / 00116548

## Project Summary

- Duration: 1st April 2022 - 31st December 2026
- Geographic Coverage: Nationwide
- Focus Area: Achieving SDG18 – Lives safe from UXO and implementation of Safe Path Forward III
- Responsible Partner(s): National Regulatory Authority for UXO/Mine Action Sector (NRA) and Lao National Unexploded Ordnance Programme (UXO Lao)
- Website: [www.nra.gov.la](http://www.nra.gov.la), [www.uxolao.gov.la](http://www.uxolao.gov.la)

## BACKGROUND

During the Second Indochina War (1964- 1973), more than two million tons of explosive ordnance were dropped on Lao PDR, making it,

per capita, the most heavily bombed country in the world. Today, much of the country is still contaminated with cluster sub-munitions and other Unexploded Ordnance (UXO). These kill and injure dozens of people yearly, with 20 casualties in 2022 and 47 in 2023. Their presence also negatively affects socio-economic development, by preventing safe access to agricultural land and increasing the costs of all development projects due to the necessity of expensive and time-consuming clearance of UXO from the land. In September 2016, Lao PDR launched its own national Sustainable Development Goal, SDG 18: Lives Safe from UXO, in the presence of the Prime Minister of Lao PDR and the UN Secretary General during the ASEAN Summit held in Vientiane.

The National Regulatory Authority for UXO and Mine Action Sector in Lao PDR (NRA) was established in 2005, (becoming operational in 2006) by the Government of Lao PDR with the task of coordinating and regulating the country's UXO sector, including national, commercial and humanitarian operators. The NRA leads the country's policy formulation with regards to the UXO/Mine Action sector, accredits operators, coordinates operational activities, manages information and data on UXO, and manages the quality of clearance operations in the sector.

The Government of Lao PDR established the Lao National Unexploded Ordnance Programme (UXO Lao) in 1996, with support from UNDP, UNICEF and other partners. The organisation undertakes: surveys to identify UXO contamination; clearance of land; roving tasks to respond to UXO discovery by the public; and risk education activities in affected areas. UXO Lao's national office is located in Vientiane capital, in addition to provincial offices in the nine most heavily impacted provinces of Lao PDR – Attapeu, Champasack, Huaphanh, Khammuane, Luang Prabang, Saravan, Savannakhet, Sekong and Xieng Khuang.

The NRA and UXO Lao are supervised by the Ministries of Foreign Affairs (MoFA) and Labour & Social Welfare, respectively. The Minister of MoFA is the Chairperson of the NRA Board and the UXO Sector Working Group.

# PROJECT DESCRIPTION

A woman wearing a wide-brimmed hat and a khaki uniform is operating a metal detector. She is holding the handle of the detector, which has a large circular coil at the bottom. The background is a bright blue sky with scattered white clouds. The woman is looking slightly to the right of the camera.

The project aims to strengthen development focused land clearance and other UXO activities (Victim Assistance, Explosive Ordnance Risk Reduction/Education and advocacy) in support of achieving SDG 18 and implementing government's Safe Path Forward III 2021-2030 (SPF III), a national ten-year UXO sector strategic plan. The project will focus on the realization of the the rights of communities to live and develop free from the threat of UXO.

The project will achieve this through funding high priority land release as well as providing support to the NRA to better coordinate, prioritize and monitor UXO and mine activities for a more efficient and effective sector.

# EXPECTED RESULTS

## (IMPACTS, OUTCOMES AND OUTPUTS)

The long-term impact of this project is “By 2026, people, especially the most vulnerable and marginalized, will benefit from more inclusive, resilient, transformative, and sustainable socio-economic and demographic opportunities to reduce poverty and inequalities”; the key outcomes are twofold:

- 1) More high priority land is released for socio-economic development,
- 2) Community exposure to the UXO threat is reduced and victims’ rights are met;

and the main outputs include:

- Prioritized survey and clearance enables more land to be released from UXO/mines,
- Reduced risk-taking behaviour by at-risk groups;
- Improved capacity of the NRA in setting the strategic direction of the sector, supervision (oversight, monitoring, QA), data use, resource-mobilization and sustainability,
- A stronger legislative environment to support CCM compliance and to hasten land release and other UXO services for communities.

These expected results support SDG 1: No Poverty, SDG 5: Gender Equality, SDG 8: Decent Work and Economic Growth, SDG 10: Reduced Inequalities, SDG 16: Peace, Justice and Strong Institutions, SDG 17: Partnerships for the goals and Lao PDR’s SDG 18: Lives Safe from UXO.

This project has been designed in response to the recommendations of the final evaluation of previous UXO projects supported by UNDP in the UXO sector of Lao PDR. The project is aligned with the Government of Lao PDR’s 9th National Socio-Economic Development Plan (9th NSEDP) as well as SPF III. It will contribute to progress towards achieving the national Sustainable Development Goal 18.

# PROJECT STRATEGY

- Safe Land Release - Through a combination of technical support and financing the clearance of land identified as priority development areas.
- Behaviour changes amongst at-risk groups - Supporting Explosive Ordnance Risk Education (EORE) in the sector to go beyond educational materials by supporting a review of EORE activities with the ultimate goal of behavior change in at-risk groups;
- Realisation of the rights of UXO victims, including survivors - UNDP will work with the NRA to strengthen information management on the provision of services, ultimately enabling duty bearers to better support victims of UXO.
- Enabling environment - UNDP will work to support legislation and policy work to strengthen the enabling environment for UXO/Mine action.
- Mainstreaming inclusion (including gender, disability, and ethnic considerations) and the environment - Recognizing the significant challenges in meeting CCM obligations, UNDP UXO programming will assist the sector in driving equity, reducing the environmental impact of UXO work, and improving productivity.
- Innovation - Given that national targets under the SPF II were not met, UNDP will work to promote innovation across all aspects of the sector with the view to accelerating progress towards SPF III and SDG 18 targets.

## Required Funding (2022-2026):

USD 25 million

## Resource Contribution :

(as of March 2024)

total USD 19.95 million

- Republic of Korea: USD 10.87 million
- New Zealand: USD 6.28 million
- Ireland: USD 1.05 million
- Luxembourg: USD 1 million
- Canada: USD 0.55 million
- UNDP: USD 0.2 million
