**128** kilometres of improved agricultural roads

**64,810** cubic metres of constructed and improved rainwater harvesting tanks

**5,780** hectares of improved and protected lands

**42,175** metres of constructed and improved irrigation canals

**7,781** hectares of irrigated agricultural lands

## A legacy in every bean: Preserving coffee cultivation amidst climate change in Yemen

UNDP's Food Security Response and Resilience Project (FSRRP) is enhancing climate change resilience and food security in Yemen, including for women coffee farmers like Saeeda. Funded by the World Bank, the project is helping farmers overcome water scarcity through rainwater harvesting tanks and empowering them sustain their livelihoods and preserve Yemen's coffee heritage.

Implemented in partnership with the Public Works Project (PWP), FSRRP enables farmers in the area to maintain their crops through droughts, safeguarding their cultural traditions and contributing to the sustainable future of Yemen's iconic coffee.
