Ethiopia in UNDP

Background

UNDP and the Government of Ethiopia signed a Standard Basic Assistance Agreement on the 26th February 1981.

UNDP's Country Programme is informed by the UNDP Strategic Plan and aligned with the United Nations Sustainable Development Cooperation Framework which has taken full cognizance of the national context, and the national development priorities as specified in GTP II and the Sustainable Development Goals.

UNDP supports Ethiopia's efforts towards addressing poverty reduction and sustainable human development with a focus on the following three interlinked and transformative components.

- Pillar I: Accelerating economic growth and poverty reduction
- Pillar II: Climate Change and Resilience Building
- Pillar III: Strengthening democratic governance and capacity development

UNDP is also the secretariat for the Development Partners Group which brings together key partners to foster policy dialogue and coordinate/ harmonize development support for Ethiopia.
