The ABADEI programme prioritizes interventions in four key areas of work

ABADEI is currently operating in 10 of the 34 provinces, covering 2 (Northern and Southern) of the 8 regions by restoring the basic functionality of local economies, with a network of 65 local NGOs.

**FOUR KEY AREAS**

- Provision of essential services
- Community livelihoods and local economic activities
- Disaster and climate resilient critical infrastructure
- Community planning and social cohesion

**PROGRAMME ABADEI**

ABADEI – aims to sustain essential services and address basic human needs for people of Afghanistan, enabling women and men to earn a living without being displaced, with dignity. It is directly linked to the UN Transitional Engagement Framework (TEF) for Afghanistan by working closely with other UN agencies.

The programme signifies UNDP’s prioritization towards community resilience. The word ABADEI means communities being resilient and inspirations for a better future in Pashto and Dari. ABADEI brings together UNDP, UN agencies, and non-governmental organizations to provide community-level solutions that complement the urgent humanitarian interventions in the country.
HOW ABADEI TURNS CRISIS INTO DEVELOPMENT GAINS

Soften humanitarian multipliers
People-Centred, targeted and decentralised solutions
Systemic change that is inclusive and promotes cohesion

The priority of Phase 1 is to support the delivery of essential services such as health, water and electricity in an equitable manner, while providing short-term earning opportunities, targeted basic income and safeguarding livelihoods.

The focus of Phase 2 is to expand the range of interventions to build a more integrated approach and strengthen community resilience. ABADEI combines three guiding concepts, Resilience, integration and Community engagement.

The ABADEI Strategy will be implemented in two phases: 06-12 months for the immediate first phase for preservation and safeguarding of essential services and livelihoods and a subsequent 12 - 24 months for the second phase focusing on enhancing community resilience.

EMERGENCY PHASE 1

Local socio-economic recovery
06-12 months
Basic Human Needs
Preservation and safeguarding of essential services and livelihoods

MEDIUM TERM PHASE 2

Community resilience
12-24 months
