

UNDP/GEF - The Country Programme of Albania under the Global Solar Water Heating Market Transformation and Strengthening Initiative

Project Activities during the implementation period: July 2014 – December 2017

Workshop : Energy Efficient Housing for Sustainable Development, organised in cooperation with the Ministry of Energy and Industry, Ministry of Urban Development, National Housing Agency, IFC, etc.

07-08 July 2014

Presentation of the NAMA (National Appropriate Mitigation Action), FINANCING MECHANISM FOR ENERGY EFFICIENCY IN BUILDINGS, supporting the implementation on the National Energy Efficiency Action Plan (NEEAP) in the residential, public and commercial sector.

20 November 2014

Presentation of the NAMA (National Appropriate Mitigation Action) for Replacing fossil fuels with non-hazardous waste in cement industry in Albania”.

02 March 2015

UNDP assistance and recommendations to Ministry of Energy and Industry for the RES Law and NREAP (National Renewable Energy Action Plan).

April-October 2015

Assistance for finalizing the draft RES action plan for Albania in line with the methodology of Secretariat of Energy Community;

Assistance for Amendment of the RES Law in line with the Power Sector law and the related EU directives.

Media training on Climate Change mitigation and adaptation actions

24 November 2015

TRAINING FOR ARCHITECTS: Best no-cost/low-cost energy efficiency measures to optimize the building energy consumptions in architects' building designs

15 December 2015

Training for the use of EMIS (Energy Management Information System), in collaboration with the Durres Municipality, Ministry of Energy and industry and AKBN.

17-19 Maj 2016

Empowered lives.
Resilient nations.

Capacity building through a study tour to Croatia to learn about the Croatian approach with (i) development and implementation of EMIS (Energy Management Information System) at municipal level and possible links with central level in terms of NEEAP monitoring and evaluation; and (ii) experience in establishing and implementing the financial mechanism for promotion of EE and RES related investments (Croatia EE Fund), with a view to developing a similar mechanism in Albania.

11-14 July 2016

Consultative Workshop on the development of SEA (Strategic Environment Assessment) regarding SHPP (Small Hydro Power Plant) sector in Albania

21 July 2016

Training for the Design of Solar Water Heating systems for the students of Environmental Engineering and Mechanical Engineering

04 April 2017

Empowered lives.
Resilient nations.

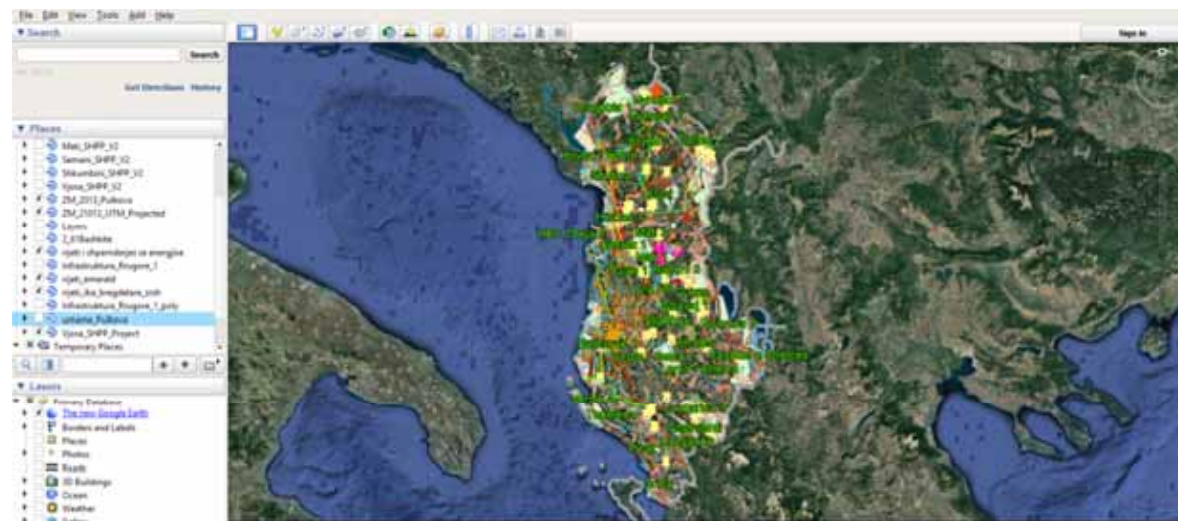

Presentation of the main findings of the Strategic Environmental Assessment (SEA) of Small Hydro Power Development Policy in Albania to Ministry of Energy and Industry

25 Apr. 2017 & 14 Dec. 2017

Empowered lives.
Resilient nations.

EE & RES TRAINING: METHODOLOGY FOR PUBLIC BUILDINGS AT DURRES MUNICIPALITY

25 May 2017

Empowered lives.
Resilient nations.

Launching Event of solar thermal system installed at the Kindergarten No.10 in Vlora and Discussion with the Youth Parliament of Vlora about Sustainable Development Goal No.13 on Climate Change

Empowered lives.
Resilient nations.

03 November 2017

Capacity building on RES systems: On-site visits, policy&investment decision framework roundtable, stakeholder meetings, Visit to Turin Politecnico University, etc. – Study Tour to Turin

21-25 November 2017
