

3RP

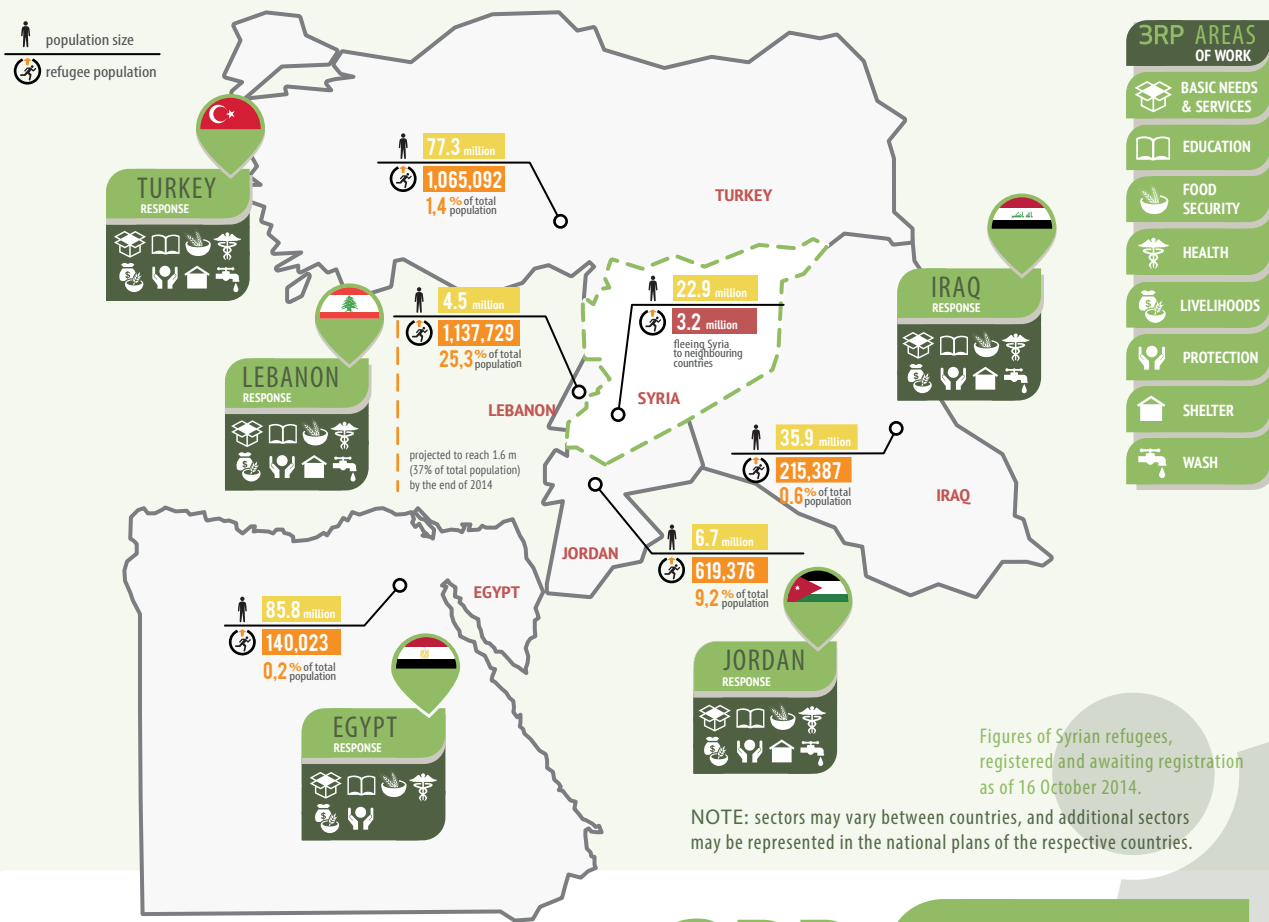

PLANNING PROCESS, PROGRAMME STRATEGY & PARTNERSHIP PLATFORM

The 3RP is a country driven, regionally coherent **planning process**. It draws together the national crisis response plans for humanitarian relief, resilience and stabilization in the five most affected neighbouring countries to Syria, namely, Lebanon, Jordan, Iraq, Turkey and Egypt, in a coordinated regional framework.

The 3RP is a **programme strategy** to respond to refugee protection and humanitarian needs, and strengthen the resilience of individuals, households, communities, and state institutions to cope with the impact of the Syria crisis on its immediate region.

The 3RP is a broad **partnership platform** for planning, advocacy, fundraising, information management and monitoring that brings together Syrian refugees; impacted communities in host countries and their governments; donors; and more than 150 national and international development and humanitarian actors in the respective countries.

The 3RP covers a two-year period, **2015-2016**.

Figures of Syrian refugees, registered and awaiting registration as of 16 October 2014.

NOTE: sectors may vary between countries, and additional sectors may be represented in the national plans of the respective countries.

3RP

TWO COMPONENTS IN A SINGLE PLAN

To enhance response effectiveness, increase cost-efficiency of interventions and promote greater accountability and consistency in delivery, the 3RP process will produce a single planning, coordination, monitoring and evaluation framework at regional level, expanding on the successful "Refugee Response Plan - RRP" model.

The plan will have two components:

REFUGEE COMPONENT

- Refugee women, girls, boys, and men fleeing the Syrian conflict have access to effective protection.
- Refugees and most vulnerable among the impacted population are provided with life-saving and immediate assistance, including in camps and host communities.
- The most vulnerable impacted communities benefit from immediate support to strengthen communal services to support community-based protection.

RESILIENCE COMPONENT

- Most vulnerable impacted households benefit from interventions that enhance their capacities and resources to cope with and recover from the crisis.
- Refugees and members of impacted communities have opportunities to progressively build self-reliance.
- The capacities of sub-national and national delivery systems are strengthened to meet the protection, assistance and social services needs of refugees and members of impacted communities.

3RP

HOW THE PLAN WORKS

AT COUNTRY LEVEL

Under the leadership of national authorities in the respective countries, and strategic guidance and coordination of UN Resident/Humanitarian Coordinators, and in close consultation with the humanitarian community, Sector Working Groups will continue to be the basis for planning and response, in alignment with priorities in the national plans, drawing on their field presence, experience, relationships with governmental partners and broad network of stakeholders.

Government institutions, donor representatives, the UN and Non-Governmental Organizations constitute the overall coordination platform at country level.

UNHCR will continue to ensure the coherence of the refugee response

in each country and provide overall leadership and coordination of the refugee dimensions of the response while UNDP will coordinate the planning and development of the resilience and stabilization dimensions in the respective countries.

AT REGIONAL LEVEL

A multi-partner 3RP Regional Steering Committee that engages key national and regional stakeholder is jointly chaired by UNDP and UNHCR. The committee guides and supports the development, implementation and reporting of the 3RP in a timely fashion, taking policy decisions in full consultation with national counterparts and UN Resident/Humanitarian Coordinators in the concerned five countries.
