

Building Resilience of Refugee Hosting Communities 2016-2017

**Ethiopia currently
hosts the second largest
number of refugees in Africa**

**Gambela Region hosts over 47%
of refugees in the country**

**The refugee number
is almost on par with the
host community population figure
making sharing of scarce
resource a point of conflict.
These youth are members of
the peace clubs to promote
dialogue between host and
refugee communities.
The peace building intervention
also targetted religious and
traditional leaders and public sector
structures**

**The government of Japan
has provided US\$1.4 million
to support this UNDP initiative**
