July 30th 2014

## Shade House Demonstration Project On-stream

One of the Demonstration Shade House in Region 5

Sector, the country and the Guyanese people”.

The project is expected to benefit 400 farmers directly by increase crop harvest and sustain 12 months of food security per year through Climate Smart Agricultural Practices Programme. Increase food security as well as household disposable income for the farmers is expected through improve knowledge on alternatives such as adaptation to climate smart technology – leading to contribution to the development of their communities and increase contribution to Agricultural GDP of the country.

With Funding from the UNDP SGP Guyana, The Guyana Agricultural Producers' Association in on-stream in its implementation of its Shade House Demonstration Project.

The main objective of this project is “to raise awareness and build capacity of civil societies their partners, to effectively respond to and integrate climate change (CC) adaptation and mitigation into relevant existing and future programs to contribute to long term sustainable development of Agriculture
