

## Joint Programme Outputs

### Output One

A national framework addressing the living conditions and access to Basic Urban Services in the Palestinian gatherings (including Adjacent Areas) developed and implemented

Includes the establishment of a national observatory that enables developing indicators, analyzing and monitoring living conditions in the gatherings and guiding policy discussions.

### Output Two

Collaborative mechanisms between Palestinian and Lebanese for improved service delivery strengthened and/or established in selected areas

Aims at promoting dialogue and communication between Palestinian refugee communities and the Lebanese local authorities in areas that include Adjacent Areas, gatherings as well as refugee camps.

### Output Three

Access and management of Basic Urban Services in the Adjacent Areas of Camps improved

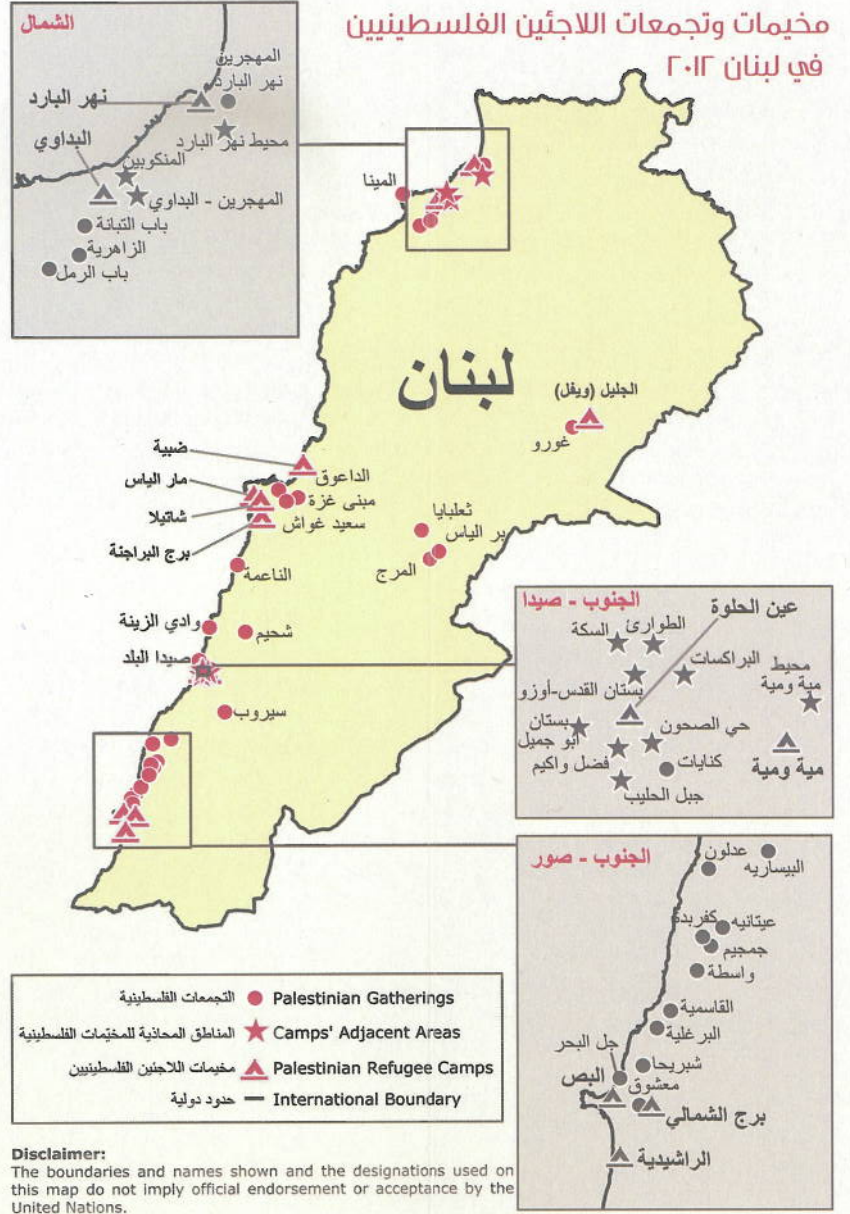

Improving access to basic urban services in the Adjacent Areas through upgrading projects, the implementation of service delivery interventions and the rehabilitation of infrastructure networks.

Selected community representatives will be trained to operate, manage and maintain implemented services and networks for the sustainability of results.

### Output Four

Selected municipalities are better equipped to engage in the improvement of living conditions within their boundaries

Support will be provided to enhance municipal competence in inclusive planning approaches which would take into consideration the gatherings and Adjacent Areas. Selected municipalities will be further assisted to produce local development plans.
