

2016 YEAR SUMMARY

EXPENDITURE

- BPRM
- Japan
- SDC
- KFW
- Netherlands

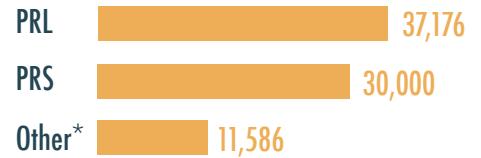

Total: 5,142,132 USD

BENEFICIARIES

In 2016, we reached **78,762** dwellers in Palestinian Gatherings across Lebanon

*SRS +Lebanese +other nationalities

Double counting across sectors is possible

BASIC URBAN SERVICES

- **53** WASH and infrastructure projects completed in **20** Gatherings

16 WATER projects

18 SEWAGE projects

17 PHYSICAL UPGRADING projects

2 ELECTRICITY projects

SHELTER

- **306** shelters rehabilitated and equipped with WASH facilities in **15** Gatherings and other localities
- **3** kindergartens, hosting **440** children in Sekke and Shabriha, rehabilitated and equipped with WASH facilities

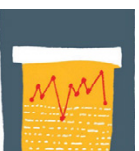

NEIGHBORHOOD IMPROVEMENT

- **400** families in the Daouk Gathering in Beirut engaged in sorting waste at source and have access to safer and more inclusive neighborhoods, including a community center and a roof garden, after participatory neighborhood upgrading plan
- **2,242** families in Kharayeb and adjacent **4** Palestinian Gatherings in Tyre engaged in sorting waste at source, as part of a comprehensive solid waste management plan
- Integrated neighborhood improvement plan launched and still ongoing in Shabriha Gathering in Tyre

WOMEN & YOUTH EMPOWERMENT

- **55** women from Tarik ElJdide and Palestinian Gatherings in Beirut participated in a four-month training on income generating activities, including food preparation, beauty care and handicrafts
- **57** women and youth in Palestinian Gatherings in Tyre trained on design and management of small business; **54** supported to expand or launch their small businesses through in-kind grants

COORDINATION AND INFORMATION SHARING

- Information sharing portal, exposing needs in Palestinian Gatherings and coordinating response, developed and to be launched in early 2017

- The Gatherings Working Group, chaired by UNDP, continue to monthly convene for strengthened coordination and planning among national and international actors

HYGIENE PROMOTION

- **19,690** household hygiene kits and **1,307** baby kits distributed to **5,500** PRS families in Gatherings across Lebanon
- **286** Palestinian, Lebanese and Syrian youth participated in eco-sports tournament to promote waste reduction and recycling in North Lebanon
- **2,500** Ramadan calendars promoting waste reduction distributed in Gatherings across Lebanon
- *“WASH-friendly school toolkit”* produced and published in partnership with UNRWA; **17** health educators of UNRWA schools in North Lebanon trained on it

WASH-FRIENDLY SCHOOL TOOLKIT

Following 9 months of joint efforts with UNRWA, UNDP presents the “WASH-friendly School Toolkit” to serve as an activity guide for all service providers aiming to transfer WASH-related life skills to children (6 to 17 years), particularly health educators and teachers in UNRWA schools.

Developed by the UNDP project in consultation with the UNRWA education and health departments and tested with 17 health educators of UNRWA schools in North Lebanon, the toolkit exposes common WASH risky behaviors and promotes green and healthy practices through classroom and extra-curricular activities to be implemented on the occasion of five WASH-related UN observances. The toolkit comprises 5 modules, each dedicated to one WASH-related observance, in addition to a user guide and a CD to access online resources.

GIRL CHILD DAY (OCTOBER 11)

Engaging boys and girls, this module helps children challenge gender discrimination and become aware of their specific needs and responsibilities. Using culturally-sensitive and age-appropriate tools, this module seizes this international occasion to discuss puberty changes with adolescents and support girls in taking care of their menstrual hygiene.

WORLD TOILET DAY (NOVEMBER 19)

This module sensitizes children on everyone’s right to access safe toilet facilities and his/her responsibility to maintain such facilities. While it focuses with young children on how to safely use toilets, this module encourages adolescents to take notice of related facilities and systems at school and in their communities and to contribute to improving them.

WORLD WATER DAY (MARCH 22)

Highlighting alarming facts related to water scarcity and pollution, this module tells children why to value water and how to conserve it and avoid its contamination. Throughout the module, children are encouraged to re-assess their daily consumption of water, inspire their families to adopt positive behaviors, and contribute to initiatives aiming to protect water sources in their communities.

WORLD HEALTH DAY (APRIL 7)

Adopting a comprehensive definition of health, this module helps teachers to sensitize children on common health hazards and diseases at the school or in the community and to support them to take part in its prevention and treatment. The module provides background information and a variety of activities to address hand washing, head lice and personal hygiene, which could be tailored by teachers to address any pressing health topic or habit.

EARTH DAY (APRIL 22)

This module stimulates children to appreciate all natural resources and encourages them to reflect on the impact of their daily behaviors on the environment. Proposed activities expose the repercussions of negative human behavior on the environment and strive to substitute it with positive action. This module gives a particular focus to waste reduction and recycling.
