

## FIVE YEAR DISTRICT DEVELOPMENT <br> PLAN 2017-2021

# Message from District Secretary/ Government Agent, mamar 

It gives me a great pleasure in releasing the Five years integrated visionary oriented District Development plan of Mannar District.

It was initiated by the District Secretariat with collaboration of respective sector heads of the Central and Northern provincial departments, retired government sector experts, other relevant agencies through the community consultation process with the coordination and technical support of UNDP Sri Lanka under EU- SDDP project. This visionary integrated district development plan was developed with a sector integrated strategy to practice result based management methodology from bottom to top level, involving all the key sectors. The plan was validated, and documented with the contribution of the District secretariat together with UNDP Sri Lanka, government sectoral departments, UN agencies, local Community Organizations and other stakeholders.

The District Secretariat of Mannar and UNDP created opportunity for consultation of all stakeholders, including the community and sector institutions, to identify problems, needs, thrust areas, outcomes, outputs and activities to fit in an agency result frame work (ARFW) to monitor their activities in a result based development process.

We are proud to produce the "Five Year Development Plan of Mannar District 2017-2022" with five-year implementation programme incorporating a wide range of activities. We are confident that, with the necessary support and funding from the government and other donor agencies, this plan will be successfully implemented for the generation of solutions to the problems of the citizen of Mannar District.

I wish to express my sincere thanks and appreciation to the Director Planning ,other Planning Staff, sector heads of Departments, Development agencies, consultants and community level participants who have actively contributed at different levels to make this plan a success. Also, I thank all those who were involved in the process, including the consultancy firm which coordinated the process, the European Union and UNDP Sri Lanka.

I am confident that this document will be of help to the development partners and stakeholders who are engaged in development programmes in the Mannar District bringing immense benefits to the community in the District. I hope that this document will serve as a foundation for development plans to be adopted in the future with improvements for the development of this District.

[^0]

I am happy to see the pioneering effort of Mannar District Secretariat to formulate the "visionary oriented District Development Plan 2017-2021", the first long term integrated development plan under the auspices of EU-SDDP Project- UNDP GLED.

The need for a comprehensive development plan for a District affected by a thirty-year conflict needs no more emphasis.

The Development Plan reflects well the efforts taken to ensure consultation and participation of all stakeholders in reaching consensus. Giving birth to a Plan of this nature and complexity is time consuming and a difficult task. It would require analysis of sectoral situations, identification of Thrust Areas, Defining Result Areas (Outcomes and Outputs) and Strategic Activities.

This inclusive participatory planning process will enhance the understanding on "Good Governance Practices in Policy and Planning" among the stakeholders, including public officials, public and political leaders.
"Good Governance- Vision for the Future", emphasizes on a balanced regional development through District Development Plans. The concept of a District Plan for Mannar District came from District Secretariat, politicians, and heads of departments, sector heads, NGOs, civil society and community members. UNDP, through its Governance for Local Economic Development (GLED) Programme has provided necessary technical and financial support and guidance to complete this plan in the highest professional manner.

I express my sincere thanks and appreciation to the Government Agent, M. Y. S. Deshapriya, Director of Planning, K. Sribaskaran, heads of departments, Northern Province officials, UNDP Sri Lanka Team with particular reference to Mr. Rajendrakumar Ganesarajah, Assistant Country Director of UNDP- Sri Lanka for their valuable advice and guidance. EU-Team of Sri Lanka, paved the way for the commencement of this task.

I also wish to thank national and provincial agencies for providing data and information, and suggestions and working with the team to produce this document.

I am confident that this plan will be of help to development partners and stakeholders who engage in rehabilitation and development programmes in the District and in bringing immense benefits to the community in the District and region. I wish that this plan will serve as the foundation for a series of five-year plans to be adopted for the development of this District raving for growth.

## M.I.M.Rafeek

Secretary, Ministry of National Policies and Economic Affairs

## Message from the United Nations Resident Coordinator/ Resident Representative UNDP - Sri Lanka

It is with great pleasure that I write this message on the District Development Plan for Mannar District, which has a vision for multiple sectors developed with the support of the European Union funded Support to District Development Programme (EU-SDDP).

Developing an integrated plan for a district requires a concerted and dedicated effort by all stakeholders to come together to collectively envision the society that we want to live in. The Sustainable Development Goals (SDGs) reiterate the need for futuristic thinking and highlights just how much more we need to do in order to achieve that future we want for the Mannar District in 5 years ahead of the 2030 Agenda. We all have a responsibility to realize this future.

As such, the United Nations Development Programme is pleased to be involved in this collaborative process of futuristic development planning to enable the achievement of sustainable human development for the people of Mannar. I believe this document is the starting point; a testament of commitment to inclusion and ownership to ensure no one is left behind.

On behalf of the UN in Sri Lanka, I would like to take this opportunity to thank the Delegation of the European Union to Sri Lanka and the Maldives, for the continued support extended by the Delegation to the UN to continue our work in strengthening government institutions and local economic development in Sri Lanka. Without this support, partnership and collaboration our critical work would not have been possible in many instances to benefit the people of this country.
I would also like to thank our Government, Provincial and District partners for continuing to support the UN's engagement at the local level. The UN in Sri Lanka remains committed to supporting the District Officials, and look forward to continuing to work closely with our government counterparts towards this end.

## Una McCauley

United Nations Resident Coordinator/ Resident Representative UNDP - Sri Lanka

## Message from the <br> Head of Cooperation of the European Union Delegation to Sri Lanka and the Maldives

The European Union Support to District Development Programme (EU-SDDP) has been one of EU's flagship programmes in the North and the East of Sri Lanka. The programme started with the aim of bridging the socio-economic gap of the North and the East Provinces with the rest of the country. Supporting sustainable regional and local development and good governance has been the underlying theme for all initiatives that have been undertaken by the six implementing partner namely UNDP, ILO, UNICEF, UNOPS, FAO and the IFC.

With the years that have passed since embarking upon this programme in 2013, substantial contribution has been made to assist the transition from post-conflict relief and reconstruction to sustainable development by supporting selected districts in North and East Sri Lanka in alignment with their Local Development Plans.

The development of the Mannar's District Development Plan is one such prime example that could be completed with the technical support of UNDP. As acknowledged by many, the quality of the first generation of District Development Plans was quite weak, as they did not articulate clear strategies and priorities. With the support of the EU-SDDP, the development of these District Plans was done by combining bottom up and top down approaches. The coming together of the grassroots, the local population, the Mannar based CBOs, CSOs on one side and on the other, service providers and public duty bearers like the District Secretariats, politicians and heads of departments, etc., has culminated in the formulation of a District Development Plan reflecting the real needs of the local territory and of its people. The story of Sri Lanka's development has been extraordinary but it is measures such as this where local population and government authorities are equal stakeholders which actually contribute to propel the country forward.

I wish the people of Mannar my very best and look forward to watching further growth and development through the implementation of the District Development Plan.

## Chapter 1

## Five Year Vision Oriented Development Plan

### 1.1 Background to the Preparation of the District Development Plan

The main purpose of having a Five-year Development Plan was to prioritize, in a concise and methodical manner, the medium-term and short term needs of the people of Mannar District and to formulate the response by the Government for the same. Mannar district is affected by the prolonged internal war for 30 years and various natural disasters that took place from time to time. Due to these factors the Natural, Human and Physical Resources in the district had been adversely impaired. The government of Sri Lanka embarked on many initiatives to re-build the District in the recent past and the district is now slowly moving towards development. However, it is very important that the district will be able to mobilize resources to invest in identified development initiatives so that it would be able to sustain this development pace. The preparation of the plan will enhance the capacity to propose, formulate and negotiate to secure adequate resources from the Government, Private sector as well as from the Development Partners and the Donor Community.

There are three specific objectives for this Plan:

1. To guide the district medium-term development aspirations over the period 2017-2021;
2. To provide district priorities for projects and programmes, as well as for budgeting for public spending; and
3. To put in place a comprehensive monitoring and evaluation system.

### 1.2 Vision, Mission and the Objective of the district secretariat

The Vision and Mission of the District Secretariat are as follows.

### 1.3 Vision

Pioneering the sustainable development process of Mannar District to upgrade the living Standard of the People

### 1.4 Mission

Coordinating and monitoring the activities of all institutions inclusive of public and private in order to improve the performance and deliver sustainable services efficiently and effectively to satisfy the aspirations of the Government and those of the public at low cost with care and caution

### 1.5 The Objective

The objectives of the District Secretariat is the co-ordination of the Government activities, carrying out the functions delegated by various legal enactments, preparation of the Socio-economic Development Projects, monitoring the implementation and ensures that the benefits are enjoyed by those concerned.

### 1.6 The Planning Process

The Results Based management principle was used for developing the Five Year Integrated Vision Oriented Multi Sectoral Divisional and District Development Plans.The reason for using the RBM as a strategy to develop the development plans was because the RBM provides a space for multi stakeholders to participate and contribute directly or indirectly to identify and also to facilitate achieving the desired results and to ensure that their processes and strategies adopted contribute in achieving them (E.g. outputs, outcomes and higher level goals or impact). The actors in turn use information and evidence on actual results that are delivered and achieved for decision making in relation to the design, resourcing and delivery of programmes and activities as well as for accountability and reporting. Further the strategy creates a common platform for various agencies to take collective decision and develop integrated sector plans. Therefore, the methodology in developing the plans followed the RBM process.

The methodology highlighted the importance of data collection, data analyses and monitoring and evaluation processes to monitor the progress of achieving the expected outcomes and societal level Impacts. Securing adequate resources for the priority areas is often a challenge for the planners. Therefore the process emphasized the Result Based Budgeting or Zero-based budgeting (ZBB) approach which supports to identify the priority areas and allow the planner to target the resources to the priority areas.

### 1.7 Overall Approach and Methodology

The following figure 1.1 below shows the overall approach and methodology that was adopted in developing the divisional and district development plans.

Figure 1.1: Overall Methodology

An institutional arrangement was set up to carry out and complete the planning process. This was needed to produce the desired output (the Plans) on time. The figure 1.2 shows the institutional arrangement that was institutionalised for formulating Five Year District Development Plans.

Figure 1.2: The institutional arrangement for producing the Five Year Development Plan

## DISTRICT ADVISORY COMMITTEE

Sector /Sub Sector Working Groups at Provincial/District
Level: -

1. Chair Person: -Sector Head(s)
2. Sector Specialists
3. DP
4. DS/ADPs
5. 
6. 

The District Advisory Committee/Working Group is a governing body responsible for producing the desired outputs (of the above-mentioned plans) within the given time frame. The Sector Working Group was responsible for producing the Plans within the given time frame.

## Identification of Sectors for Planning Process

The figure 1.3 below shows the sectors categorized according to the central bank report of Sri Lanka. The identified sectors are the contributors to Gross Domestic Production of Sri Lanka. Since these sectors finally contribute for the results delivery at the grass-root level, district level, the provincial level as well as the sustainable development of the country, the district development plans too were focussed on the same sectors.

Figure 1.3: Sector Categorization in the District Plans

## Planning Process

Results Based Planning process was carried out by using various types of tools such as, stakeholder analysis, Problem and Objective analysis and the results framework can be used as tools at each process level to build up the plans. The following figure 1.4 illustrates the process that was used.

Figure 1.4: RBM \& Tools

At the end this process a sector development framework will be developed for each subsector focusing on the "Five Year Integrated Vision".

The plans will cover non-devolved (Central) as well as devolved (Provincial) subjects and functions. This was principally due to two reasons. First is to ensure that the sectoral treatment of development needs was comprehensive and the second is to identify the interdependence and linkages necessary to make service delivery in Districts efficient and effective.

The development of the plan stems from analysing the Vision, Mission and Mandate of the
sector/sector agencies and from the needs identified through the community/stakeholders consultation process. Therefore, the planning exercise required to undertake an analysis of sectoral situations before preparing the sector results framework. The core areas of sector plans comprised of the identification of Thrust Areas, Defining Result Areas (Outcome and Outputs) and Strategic Activities based on the Problems analysis which hinders the achievement of the expected Outcomes and delivery of services (outputs) by the Sector.

### 1.8 Methodological Approach

The following figure 1.5 shows sequence of main activities which were carried out for developing a five years district development plan. The concept and planning process of the "Five Year Integrated Vision Oriented Multi Sectoral Divisional and District Development Plan' was introduced to the Divisional, District and Sector Heads including the Government Agents of the districts at a forum and elaborated the process to be followed to ensure that they buy-in to the concept and the proposed planning process. The officials welcomed the RBM methodology and the proposed process of development planning which paved the way for UNDP to provide technical and financial support to produce the plans by adopting the following process.

Figure 1.5: Step by Step Planning process/Activities

Step 1: Results Based Management Training
It is essentials to inculcate the results culture among the government entities though it is very challenging, tedious and rigorous process. Continuous capacity development activities and bilateral discussions and mobilization are essential to inculcate the RBM culture. Therefore, RBM training was provided to all government staff including sector heads and heads of departments before embarking on the planning process.

## Step 2: Review of Existing Plans and Performance of Identified Sectors

This is another vital activity need to be carried out to understand the current status of planning. One should analyse the implementation of the existing plans to understand the capacity of the government and infer if that capacity is adequate or inadequate to implement the plans that are already in place. This was carried out before starting the major planning process.

## Step 3: Stakeholder Consultation

This is a first step of the RBM planning process which identified the sector stakeholders through a consultation process. The sector staff and community/stakeholders jointly identified the targeted stakeholders to be focused by using a VENN diagram tool. The consultation process generated sufficient primary data which is needed for planning process.

Figure 1.6: Community and staff level consultation Meetings and Workshops

## Step 4: Problem Identification and Analysis

The tool of problem analysis was used for identifying the community needs and problems as well as obtaining primary data regarding the same. The needs and problems were identified through several stakeholder consultations and also validated using the other primary and secondary data collected from various sources. All the data were analysed in a participatory manner by using the problem tree tool.

## Step 5: Objective Analysis

The objective tree analyses were undertaken by using the data gathered from the problem tree analysis. The objective trees that were developed were then used to identify the sector outcomes and related outputs. The objective tree analysis also supported to define the Thrust Areas and key Results areas of sectors.

## Step 6: Developing a Results Matrix

This is a technical exercise which needs to be carried out to identify and define thrusts areas, key results areas, outcomes and outputs of each sector or agency. After outputs are identified that need to be delivered to achieve the outcomes, the strategies and activities are identified. The objective analysis provided inputs for developing sector results frameworks. It is very important to identify the outputs which need to be delivered to achieve outcomes. Outputs and outcomes are identified on the basis of controllable and contributory factors that need to be managed by the sector or agency as well as by adopting the principle of accountability and control boundaries.

## Step 7: Validation of the Result Frameworks

Once the district level sub sector results frameworks are formulated they are validated by the relevant district level sector working groups and then submitted to a wider stakeholder forum for final validation. This stakeholder forum comprised of all the stakeholders including political leadership, community leaders, NGOs etc., who were identified through the stakeholder analysis (refer step 3 above).

## Step 8: Final Five Year Vision Oriented Sector Development Plan

The final version of the sector and sub sector plans was prepared after the validation of the results frame work. The final district development plan included all comments and suggestions provided by the stakeholders.

## Step 9: Five Year Vision Oriented Multi Sectoral District and Divisional Development Plans

The Five Year Vision Oriented District Development Plan was prepared by integrating all final sector and sub sector development plans. Once the district integrated sector plan drafted, the divisional plans are developed based on the district plans.

Step 10: Final validation of Five Year Integrated Vision Oriented Multi Sectoral District Plans The Five Year Vision Oriented Multi Sectoral District Development Plan was then submitted for the higher/national level validation and review. After this validation and review, the plans and publicised and circulated among the key stakeholders by the Government Agent of the District.

## Step 11: Final Five Year Integrated Vision Oriented Multi Sectoral Provincial Plan

These Five Year District Development Plans could be used and be integrated by Provincial Councils in preparing Provincial plans. The outcomes of sub sectors of districts need to be aligned into the provincial plans so that the collective contribution to achieve the results of the Provincial as well as of the country could be ensured.

### 1.9 Conclusion

The Plans have been formulated through an inclusive and participatory consultative process involving the people of the district and the government staff with the technical assistance from local and international experts. The specific objective of the participatory approach is to provide an indepth understanding of the sector focused development problems, related priorities and to formulate appropriate strategies to contribute to the overall development goals of the district.

This RBM based planning process took much time than anticipated because the RBM and its process were new concepts for most of the government officers and there were much ambiguity in relation to its application. Secondly, the shift of their mind set from top down approach to bottom up approach with regard to problem identification, data collection and analysis, demand more time and energy. Further, bringing all relevant stakeholders together for consultations and validations was a very tedious and time consuming process. Gathering of quality base line data also took longer time than expected. However, there is no doubt that this RBM based planning process that followed would bring many benefits to the stakeholders who involved in this exercise. Improving the knowledge on RBM principles, enhanced competencies on implementing a RBM based planning process as well as being able to make a start in inculcating results culture in the public sector could be identified as main benefits. Also, the logical and results oriented thinking has now enabled the public officials to organize and plan their day to day work efficiently and to improve the quality of service delivery to the public. Further, this inclusive participatory planning process will enhance the understanding on the "Good Governance Practices in Planning" among the stakeholders including public officials, public and political leaders.

## Chapter 2

## Socio- Economic, Environmental, Human Resource and Political Situation of the Mannar District

### 2.1 Introduction

Mannar district is located in the north-western part of the Sri Lanka in Northern Province. The district covers $2,002 \mathrm{sq}$. $\mathrm{km}(1,840 \mathrm{hc}$ ) including the island of Mannar, approximately 3\% of the total land area of Sri Lanka. Mannar district has a marine coast line with a stretch of 222 km , from Theavanpiddi in the north to Mullikkulam in south. According to the statistics of Mannar district fisheries extension officers, the pre-war fisher folk population in Mannar consisted of 29,506 persons from 8,052 fishing families and 32 fishing villages, approximately $16 \%$ of the population of the district Mannar district, including the Mannar Island, is surrounded by rich fishing areas. Most productive fishing ground lie in the Palk Bay and the Gulf of Mannar. The Palk Bay and Gulf of Mannar coastal waters over continental shelf contain a variety of species of fin fish, shell fish and holothurians. Encircling the Mannar Island is a shallow continental shelf with rich fishing banks, pearl bank and prawn banks as well as an extensive area of 3,828 ha with brackish water and mangroves.

Mannar District is divided into 5 Divisional Secretariat Divisions (DS Divisions) and 153 Grama Niladhari Divisions (GN Divisions).

### 2.2 Administrative units and

## Population

Mannar District is divided into 5 Divisional Secretariat Divisions (DS Divisions), each headed by a Divisional Secretary (previously known as an Assistant Government Agent). The DS Divisions are further sub-divided into 153 Grama Niladhari Divisions (GN Divisions) as depicted below.

Table: 2.1 GN Divisions and Population in Mannar District

|  | DS Division | No. of GN <br> Divisions | No of Families | Population (2015) | Population Density <br> (per sq. km) |
| :---: | :--- | :---: | :---: | :---: | :---: |
| 1 | Madhu | 17 | 3,804 | 12,875 | 24 |
| 2 | Mannar | 49 | 19,518 | 72,228 | 333 |
| 3 | Manthai West | 36 | 7,405 | 25,920 | 39 |
| 4 | Musali | 20 | 7,820 | 29,271 | 64 |
| 5 | Nanaddan | 31 | 6,400 | 21,310 | 159 |
|  | Total | $\mathbf{1 5 3}$ | $\mathbf{4 4 , 9 4 7}$ | $\mathbf{1 6 1 , 6 0 4}$ | $\mathbf{8 1}$ |

### 2.3 Economy

Historically Mannar district is a significant landmark, to contribute for the national economy of the country. Mannar was one of the major ports and closest point providing marine link to India. The irrigation systems developed by kings of Sri Lanka and the marine infrastructure developed by Portuguese, has made the district one of the main economic hubs in the past. Also It is still one of the main paddy producing districts of Sri Lanka.

The contribution to national GDP by Mannar district is about $2.5 \%$ which grows by about $6.0 \%$ per annum. A significant contribution of over $75 \%$ of the GDP in the district derives from the primary sector which includes paddy, other field crops, livestock and fisheries. Timely rain and availability of water will be one of the main essential factors for the increased domestic production by the district, as Agriculture is still the main contributory sector. The agriculture sector employs about $46.0 \%$ of the labour force $(8.8 \%$ by the industry and $45.2 \%$ by the services sector). About $76.2 \%$ of employment has been recorded in the informal sector. Only about $30 \%$ of the population in the district has savings habits. The mean household per capita income in Mannar district is Rs 28,535 (2012/13) well below that of the national level of Rs. 45,878.

The district records about 23,338 housing units, $92.7 \%$ of household with own housing. There are about $81.5 \%$ of houses with brick/cement, $96.4 \%$ houses with cement/terrazzo/tile floors, $64.6 \%$ of houses with Tiles/Asbestos/Concreate roof. Also, there are 70.5\% of houses have electricity, $87.6 \%$ have access to safe drinking water, $79.4 \%$ of houses with pipe-borne water, $23.4 \%$ of households with own well, $63.3 \%$ of houses with separate water seal toilets and $24.1 \%$ of houses with no toilets.

## Primary (Agriculture) Sector

Agriculture is the main livelihood of about $46 \%$ of the district's population. As per the data of the Department of Census and Statistics in 2014, there were 19,050 agriculture operators in the rural agriculture sector in Mannar District. Out of these, 9,273 operators cultivate holdings with an extent of 40 p or above while 9,777 cultivate holdings less than 40 p of extent. The total land area cultivated by these operators was 34,683 acres (14,036 ha).

Main livelihood of the majority of farming population (over $90 \%$ of the farmers) was low income subsistence agriculture. Off farm employment opportunities were very rare. All these factors led to a situation of persistent abject poverty among the population of this district. According to calculations of the Department of Census and Statistics, poverty headcount ratio in 2012/13 of Mannar district was $20.1 \%$ (which was one of the highest among districts in Sri Lanka).

## Secondary (Industrial) Sector

Industrial sector is the least developed sector in Mannar district. The data of the Divisional Secretariat for the year 2015 indicates that there were 529 industries in the district with 516 small industries and 2,251 employees. About $85 \%$ of these are sole proprietorship industries. Mannar saltern is one of the main industries in Mannar district. It has a total extent of 193 acres of which 110 acres were in production up to 2010 and 73 acres have been developed after 2011, increasing the total production area up to 183 acres. The average salt production before the development activities was 4000 MT contributing $2.6 \%$ of total salt production in Sri Lanka. The present market share is about $3.5 \%$ of the total production in Sri Lanka which will increase up to $5 \%$ with the development initiatives planned for the next few years. There are few garment factories and ice making plants operating in the district as well.

## Tertiary (Service) Sector

The district possesses a small Tertiary sector. The Census on this sector indicates that there were 2,059 trade establishments and 1,593 service establishments in Mannar district in 2014. Only about $67.2 \%$ of these institutions are registered.

### 2.4 Educational Institutions

The first educational institution established in Mannar was Good Shepherd Collage, founded in 1868 (now known as St Xavier Boys School). There are many other leading schools in Mannar such as St. Xavier's Boys College, St. Xavier's Girls College, Sethyvinayagar Hindi College, Mannar Alazhar College, Mannar Museli College, Erukkalam Piddy Madya Maha Vidyalaya, Murugan Madya Maha Vidyalaya, Adampan Madya Maha Vidyalaya, Thadsanamarutha Madhu Madya Maha Vidyalaya and Vaddakandal Madya Maha Vidyalaya.

### 2.5 Natural Resources

The main natural resources of Mannar District are,

1. The forest cover, which at present is denuded below the national average;
2. Seven streams of which three are major rivers originating from adjacent Districts.
3. Two medium lagoons and two small lagoons
4. Over a 100 km long sea coast
5. Distribution of six different soil groups in the district. The dominant groups are Reddish Brown, Red Yellow lattasol, Alluvial Earth associated with Grumusol Sandy Regosols and Alkaline in the coastal area.

### 2.6 Transport Services

Thalaimannar is the terminal Railway Station in Sri Lanka connecting the main Indian railway network from Dhanushkodi in India. (Sea area is connected through ferry). The sea area of The Thalaimannar railway station is the last station on North-Western railway line. Though the air travel to Mannar is not very popular, Thalaimannar has a Naval Base and Jetty which were used to operate as one of the main passenger and goods transportation hub between India and Sri Lanka. Mannar has a great potential for economic development, if these operations recommence. There are bus services available from Mannar to major cities of Sri Lanka.

### 2.7 Main problems and challenges in the District

There are a few main issues faced by the District at present. They are:
i. High level of youth unemployment (6.4\%, general unemployment (2015) and the youth unemployment is over 55\% total unemployed population in the district);
ii. High level of Poverty ( $20.1 \%$ consisting 19,447 families) ;
iii. Increasing depletion of natural resources such as forest cover and environmental depletion;
iv. Over reliance on paddy (primary sector) and lower value addition;
v. Increased use of alcohol by youth;
vi. High level of school drop-outs; and
vii. Increased migration of productive labour to other provinces.

## Chapter 3 Sector Development Plans - Results Frameworks

The results frameworks of each of sectors are presented in separate chapters as follows.
I. Primary Sector

- Chapter 4: Crop Sector
- Chapter 5: Livestock
- Chapter 6: Fisheries
- Chapter 7: Forestry \& Environment

## II. Secondary Sector

- Chapter 8: Industries and SMEs
- Chapter 9: Tourism Sector
III. Services Sector
- Chapter 10: Education and Human Resource Development
- Chapter 11: Health Sector
- Chapter 12: Social Services - Community Infrastructure, Social Security, Welfare Services and Social Work
- Chapter 13: Local Government Services

## IV. Chapter 14: Monitoring Mechanism

## Chapter 4:

## Crop Sector

## 1. Introduction

The objective of the Government of Sri Lanka is to make agriculture one of the key pillars of development of the country whereby making Sri Lanka self-sufficient in food, ensuring healthy food production, increasing living standard of the farmer community and establishment of sustainable development of agriculture. The Central Ministry of Agriculture defined its vision as "Sustainable agriculture to ensure Food Security and prosperous Farming Community" which sets the path to achieve the above government objective. Further the Department of National Planning defined a National Agriculture policy which covers Food, Floriculture and Export Agriculture Crop Sectors and aims to achieve food and nutrition security of the country and increase employment opportunities and income and living standards of farming community through adoption of technically feasible, socially acceptable, economically viable and environmentally sustainable agricultural production technologies and marketing.

The policy statement covers the main areas of domestic food production and food security, development of floriculture and export crop sectors, food nutrition, employment opportunities and income level of farmers maintaining a sustainable environment.

Based on the policy, the main national level goals and objectives in the sector are as follows.

1. Increase domestic agricultural production to ensure food and nutrition security of the nation.
2. Promote agricultural productivity and ensure sustainable growth.
3. Maximize benefits and minimize adverse effects of globalization on domestic and export agriculture.
4. Adopt productive farming systems and improved agro-technologies with a view to reduce the unit cost of production and increase profits.
5. Apply environmental friendly techniques in agriculture.
6. Promote agro-based industries and increase employment opportunities thereof; and
7. Enhance the income and the living standard of farming community.

The above policy was strengthened by the "Wadduwe Declaration" which was signed and published at the Provincial Agriculture Ministers Conference held at the hotel "Blue Waters, Wadduwa under the patronage of Hon. Duminda Dissanayake, Minister of Agriculture.

## 2. Sustainable Development Goal - Zero Hunger

The National Agriculture Plan of the country also focuses on the above sustainable development goal. Though the country has been able to achieve the goal of Zero hunger many decades back, there are a few areas which need to be improved. These include the following.
I. Prevalence of undernourishment
II. Prevalence of moderate or severe food insecurity in the population, based on the Food Insecurity Experience Scale (FIES)
III. Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age
IV. Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)
V. Proportion of local breeds classified as being at risk, not-at-risk or at unknown level of risk of extinction

## 3. Agriculture Sector in Mannar District

The main livelihoods in this district are agriculture, fishing and animal-husbandry. Approximately 22,640 families out of 44,947 families engage in agriculture. Further $21 \%$ of people engage fishing and $5 \%$ of them involve in other occupations. About $60 \%$ of the economically active population, $45 \%$ of the labour force is engaged in agricultural activities. Mannar district has a total land area of 2,002 sq. km (which is about $3 \%$ of the land of area of the country) of which about $30 \%$ have been utilised for perennial, annual and seasonal crops. Per capita land holding is one hc compared to the national per capita of 1.5 hc . There are $23,500 \mathrm{hc}$ of paddy and $4,500 \mathrm{hc}$ of highland are available for agriculture. There are 3 major, 8 medium and 372 minor irrigation schemes and 1 river basin that irrigate the paddy fields as well as other crop fields in the district. There are six different soil groups in the district. The dominant groups are Reddish Brown, Red Yellow lattasol, Alluvial Earth associated with Grumusol Sandy Regosols and Alkaline in the coastal area.

The cultivation of field crops includes cereals, pulses, oil seeds, roots and tuber crops, low country vegetables, up country vegetables, minor
 export crops, fruits, etc.
coastal area.

## The Vision and Mission of the Agriculture sector of the district are:

## "Achieve Excellence in Agriculture for Provincial and National prosperity"

"Provide efficient and effective need based extension services to farming community and other needy people for optimum utilization of resources to achieve an equitable and sustainable agriculture development and commercial farming for sound socio-economic development of the Province"

## Objectives of Agricultural Department - Mannar District

- Promote appropriate modern and indigenous technologies among farming population to increase productivity and improve quality of produce in sustainable manner
- Introduce appropriate new crops and varieties in the district.
- Create livelihood for farming community and increase their income.
- Increase domestic agricultural production and ensure the food and nutrient security of the farming and general population.
- Encourage farming community to embark on crop production in line with national food requirement and reduce import of food items.
- Facilitate and support farming community to embark on crop production towards export market.
- Promote adoption of value added supply chains in agricultural sector.
- Promote adoption of value addition activities at cottage and agro based level.
- Promote marketing opportunities and facilitate the marketing process.
- Liaise with stakeholders in agricultural development and
 encourage public, private and farming community partnership.

## 4. Summary of the performance and Situation Analysis

### 4.1 Paddy Cultivation

Paddy is cultivated in both Maha and Yala seasons and the highest yield was recorded in Maha season. The extent and production of paddy in both seasons are demonstrated in tables below.

Table 4.1: Extent and production of Paddy cultivation during Maha season

| Year | Extent (ha) | Production (MT) |
| :---: | :---: | :---: |
| $\mathbf{2 0 0 4 / 2 0 0 5}$ | 9,529 | 38,240 |
| $\mathbf{2 0 0 5 / 2 0 0 6}$ | 9,715 | 36,584 |
| $\mathbf{2 0 0 6 / 2 0 0 7}$ | 5,668 | 20,130 |

| Year | Extent (ha) | Production (MT) |
| :---: | :---: | :---: |
| $\mathbf{2 0 0 7 / 2 0 0 8}$ | 4,894 | 9,317 |
| $\mathbf{2 0 0 8 / 2 0 0 9}$ | 5,352 | 18,758 |
| $\mathbf{2 0 0 9} / 2010$ | 8,093 | 41,755 |
| $\mathbf{2 0 1 1 / 2 0 1 2}$ | 13,416 | 61,459 |
| $\mathbf{2 0 1 2 / 2 0 1 3}$ | 15,663 | 77,975 |
| $\mathbf{2 0 1 3 / 2 0 1 4}$ | 5,313 | 25,027 |
| $\mathbf{2 0 1 4 / 2 0 1 5}$ | 17,321 | 88,661 |

Source: Department of Census and Statistics, 2015

Table 4.2: Extent and production of Paddy cultivation during Yala season

| Year | Extent (ha) | Production (MT) |
| :---: | :---: | :---: |
| $\mathbf{2 0 0 5}$ | 1,093 | 4,194 |
| 2006 | 48 | 185 |
| 2007 | 843 | 3,366 |
| 2008 | 984 | 3,626 |
| 2009 | - | - |
| 2010 | 600 | 2,240 |
| 2011 | 1,818 | 6,601 |
| 2013 | 2,248 | 12,225 |
| 2014 | 1,726 | 4,530 |
| 2015 | 2,976 | 13,236 |

Source: Department of Census and Statistics, 2015

The extent and production of paddy has increased over the past years due to availability of water and the improved yield. The above analyses reveal that the productivity of paddy cultivation in Maha is higher than the Yala season. There is a significant improvement in the extent of paddy cultivation and the yield in both the Maha and Yala seasons from 2011.

### 4.2 Other Crops

### 4.2.1. Pulses

The extent and production of pulses cultivated in Mannar are depicted in the Table below. According to the statistics, the production of green gram, black gram and cowpea has been decreased gradually but they have been increased in 2015.

Table 4.3: Extent and production of Pulses

| Crop | Green gram |  | Cowpea |  | Maize |  | Black gram |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | Extent <br> (ha) | Production <br> (MT) | Extent <br> (ha) | Production <br> (MT) | Extent <br> (ha) | Production <br> (MT) | Extent <br> (ha) | Production <br> (MT) |
| 2011 | 380 | 380 | 169 | 169 | 117 | 351 | 253 | 253 |
| 2012 | 250 | 250 | 55 | 55 | 165 | 495 | 255 | 255 |
| 2013 | 250 | 250 | 55 | 55 | 165 | 495 | 255 | 255 |
| 2014 | 195 | 195 | 80 | 80 | 128 | 256 | 219 | 219 |
| 2015 | 287 | 309 | 153 | 142 | 170 | 513 | 253 | 253 |

Source: Department of Agriculture - Extension, Mannar

### 4.2.2. Oil seeds

The extent and production of cultivated oil seeds are stated in table 3.4. Production of oil seeds has been declined during the past period.

Table 4.4: Extent and production of Oil Seeds

| Crop |  | Gingelly |  | Groundnut |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Year | Extent <br> (ha) | Production <br> (MT) | Extent <br> (ha) | Production <br> (MT) |  |
| 2011 | - | - | 433 | 644 |  |
| 2012 | 117 | 351 | 470 | 1,175 |  |
| 2013 | 117 | 351 | 470 | 1,175 |  |

### 4.2.4. Low country Vegetables

The cultivated low country vegetables in Mannar are stated in Table 4.6.
Table 4.6: Extent and production of low country Vegetables

| Crop | Ladies fingers (Okra) |  | Brinjal |  | Bitter gourd |  | Snake gourd |  | Pumpkin |  | Ash plantain |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | Ex. <br> (ha) | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) | $\begin{aligned} & \text { Ex. } \\ & \text { (ha) } \end{aligned}$ | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) |

| 2011 | 54 | 810 | 93 | 1395 | 24 | 470 | 23 | 460 | 28 | 560 | 20 | 390 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2012 | 67 | 1005 | 88 | 1760 | 32 | 320 | 20 | 400 | 49 | 980 | 52 | 1040 |
| 2013 | 67 | 1005 | 88 | 1760 | 32 | 320 | 20 | 400 | 49 | 980 | 52 | 1040 |
| 2014 | 77 | 1,095 | 113 | 1,695 | 38 | 585 | 37 | 555 | 63 | 885 | 75 | 900 |
| 2015 | 74 | 1,184 | 108 | 1,663 | 36 | 472 | 38 | 530 | 61 | 790 | 90 | 1,080 |

Source: Department of Agriculture - Extension, Mannar

The extent (hc) and production (MT) of low country vegetables have also increased over the past years due to increase in water, seeds and shifting of farmers from paddy cultivation to vegetable cultivation.

### 4.2.5 Up-country Vegetables

The extent and the production of up country vegetables cultivated in Mannar are depicted in Table below.

Table 4.7: Extent and production of up country Vegetables

| Crop | Cabbage |  | Beetroot |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Year | Ex. <br> (ha) | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) | Ex. <br> (ha) | Pro. <br> (MT) |
| 2011 | 03 | 60 | 12 | 120 | 47 | 423 |
| 2012 | 22 | 440 | 31 | 465 | 79 | 711 |
| 2013 | 25 | 500 | 31 | 465 | 79 | 711 |
| 2014 | 16 | 320 | 26 | 308 | 73 | 657 |
| 2015 | 20 | 400 | 27 | 486 | 70 | 630 |

Source: Department of Agriculture - Extension, Mannar

Maize is the major cereals cultivated in Mannar compared to Kurakkan. Green gram is the major pulse is being cultivated in Mannar compare to cowpea and black gram. Generally, the green gram has good market value compare to Cowpea. Ladies fingers, Brinjai and pumpkin are the leading vegetable crops which are being cultivated by the Mannar district.

### 4.3 Fruits

### 4.3.1 Fruits

The extent and the production of cultivated fruits in Mannar are stated in the Table below. The overall production of fruits has been declined during the past period. Pineapple and passion are introduced and these crops have performed well.

Table 4.8- Extent and production of Fruits

| Crop <br> Year | Oranges |  | Limes |  | Mangoes |  | Plantain |  | Papaw |  |

### 4.4 Employment in Agriculture Sector

Agriculture sector is one of the main sectors of employment in the district. However, the employed population of agriculture sector (Crop, Fisheries and Livestock) shows a declining trend in the recent past. The field level observations show that the people who are in the crop sector mostly migrated to other sector due to inadequate income from the crop sector in Mannar. Table 4.9 and Figure 1 present the trend of the employed population of Mannar District and the percentage distribution of employed population by major industries is presented in the graph.

Table 4.9: Percentage distribution of employed Population by major industry group

| Year | Agriculture | Industries | Service |
| :---: | :---: | :---: | :---: |
| $\mathbf{2 0 1 1}$ | 48.5 | 12.2 | 39.3 |
| $\mathbf{2 0 1 2}$ | 39.0 | 15.4 | 45.6 |
| $\mathbf{2 0 1 3}$ | 47.8 | 9.2 | 43.0 |
| $\mathbf{2 0 1 4}$ | 39.1 | 11.2 | 49.7 |
| $\mathbf{2 0 1 5}$ | 46.0 | 8.8 | 45.2 |

## 5. Problems Issues and Challenges for the Agriculture sector

According to the Department of Agriculture, Northern Province (2010), following challenges have been identified in agriculture sector.

1. Rehabilitation and revitalization will remain as the main thrust of the agriculture sector in order to enable the sector to secure a higher rate of growth and subsequently to continue its contribution to the GDP.
2. Improve the competitiveness of agricultural export commodities, in order to increase their resilience and enable them to compete efficiently in the competitive market. Despite the presence of competitors it is necessary to supply with cheaper factors of production.
3. Strengthen human and institutional development mechanism. This will involve the implementation of effective programmes in order to inculcate positive values such as being highly motivated, creative and dynamic among farmers.
4. Sustain the resource utilization-land, water and natural resources such as forest and mangroves and lagoons, for environmental safe guard.

The following challenges, problems and issues were identified in respect of the crop sub-sector of the district during the consultation process. A series of community stakeholder consultation workshops were carried out at divisional and district levels and it highlighted several interlinked issues which have impact on the crop sector development.

| Area | Problems and issues |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Crop Production Input | Low access to Land for famers and low soil fertility | Lack of funding for mechanisation \& purchase of equipment | Lack of funding for fertilizer and other yield improving inputs (E.g. Quality seeds) | Lack of access to quality seeds, pesticides and fertilizer | Lack of access to water / Poor irrigating systems in some areas |
| Farmer/s knowledge | Lack of farmer knowledge on new technology | Lack of knowledge on value addition opportunities | Lack of knowledge on crop rotation \& enhancing land productivity | Lack of capacity of farmer organizations | Lack of knowledge on use of fertilizer and pesticides |
| Farming Process | Damages by wild animals | Lack of remedies for seasonal floods and droughts | Lack of crop diversification use of new technology | Over reliance of paddy cultivation | Inadequate extension services |
| Marketing of Produce | Unstable market price for paddy | Post-harvest losses(Paddy) | Farmers inability for storing of produce | Less value addition | Lack of market linkages |

The problems and causes that hinder the achievement of sector outcomes (E.g. production and productivity) were identified through the consultation process and are discussed below.

### 5.1 Reduced and delayed supply of water

Crop failures due to insufficiency of water are the major constraint contributed for the lower production and productivity of the crop sector. As the paddy cultivation in Yala season is wholly dependent on the irrigation water farmers had been facing problems in this regard in the past. The main problems and issues identified include poor maintenance of the irrigation systems, poor water use efficiency, crop failures, flash floods and siltation. Erratic water issues and crop losses were also highlighted by the farmers. Also the failure to adhere to and implement cultivation committee decisions, poor water management practices, illicit tapping, and poor maintenance of distribution channels were also cited as the other major causes of irrigation problems.

### 5.2 Non availability of adequate quantity of quality paddy, other Field Crops seeds and planting material of fruit/horticultural crops

One of the key factors of successful cultivation of any crop is the availability of high quality seed at the appropriate time. Inadequate quantity of Quality Seeds is a recurring problem in crop farming in Mannar district. Majority of farmers do not have access to quality seeds of paddy, OFC and vegetables of desired varieties. The farmers claimed that the certified and registered seed paddy is not provided adequately by the Department of Agriculture. Fetching Poor quality seeds reduce the yield and the quality of the produce which results in fetching poor market prices and lesser revenue to the farmer. Therefore, there is an urgent need to promote self-seed production by farmers and the establishment of seed farms in the district. The analysis of the problem highlights many immediate and root causes for the non-availability of quality seed paddy and OFC seed in the district. They are:

- Reluctance of Seed paddy farmers to produce certified quality seeds
- Inadequate number of seed paddy processing centres
- Lack of Storage facilities for seed paddy

### 5.3 Degradation of soil fertility

Declining Soil Fertility and falling efficiency in use of fertilizer in paddy lands are widely reported in the district. Many reasons for the degradation of soil fertility are discussed under the problem analysis. The main factors discussed are as follows.

## - Imbalanced usage of fertilizer

This is mainly attributed to the low application of organic matter, over use of chemicals, poor land management practices and imbalanced application of nutrients. Poor soil fertility management of paddy lands is one of the major causes for low yields of paddy. The individual discussions held with the farmers revealed that the majority of them do not pay much attention to balanced use of fertilizer. The application of organic manures is either minimal or totally absent in OFC and vegetable cultivations in the district.

## - Excess use of Agro Chemical

The application of chemical fertilizers is generally erratic among the farmers. Although the application of organic matter is an important practice in soil fertility improvement, the only organic matter that the farmers use in the paddy fields is paddy straw. Application of other forms of organic manure such as green manure is not widely practiced.

Continuous use of only N.P.K. fertilizers without supplementary application of organic manures and
 plant micro nutrients seriously affects the long term productivity of the soil. Regular soil testing is important practice to observe the soil fertility levels. Fertilizer application based on soil testing will economize the fertilizer use, improve the efficiency and reduce soil toxicity. Many farmers in the district are totally unaware of Bio-fertilizers, organic farming practices and zero-budget cultivation which are widely adopted in Tamil Nadu, India.

## - Increased Salinization

One of the major reasons for salt water intrusion in paddy land was the damage of salt water exclusion bunds. Increased salinization has also been attributed to the excess use of chemicals and insufficient water supply.

### 5.4 Inappropriate land management practices

It was also revealed during the discussions with the farmers that the majority of them do not pay much attention to land levelling and good tillage practices due to financial constraints. Inadequate land levelling leads to inefficient use of irrigation water, fertilizers and pesticides. The impact of drought and floods too will be severe in improperly levelled paddy fields. Many pest and disease incidences were also reported to be high in unevenly levelled paddy lands.

### 5.5 Crop Damages

Agriculture, especially crop production, is highly dependent upon the prevailing weather conditions and therefore is extremely sensitive to climate changes. The crop production is also affected by pest and disease attacks and damages by animals. Floods and droughts had damaged the crop cultivation in Mannar district at most times as the district is a prone to floods. Drought is another factor which damages the cultivated crops. If the monsoon rains fails, the irrigation tanks fail to hold sufficient water for the paddy cultivation in the Yala season. Further, the severe droughts also cause pest outbreaks.

The damage to crops is also caused by wild elephants and other animals. Elephants in herds destroy large areas of crops which include paddy, maize and other field crops.
5.6 Lack of effort to adopt innovative methods/weak research and extension services Inadequate Research Information and weak Technology transfer systems curtail the adoption of appropriate technologies in crop farming and this has been identified as one of the problems in the Mannar crop sector. Research information on improved technologies and solutions to location specific problems on crop farming are not adequately trickling-down to the farmers as a result of the following reasons:

- Non-availability of district level research centre
- Inadequate coordination with Higher educational institutions
- Less access to the information on new technologies
- Inadequate numbers of skilled staff to implement new technologies
- Farmers' perception that adoption of new technologies is a risk

### 5.7 Unproductiveness of the Lands

The unproductiveness Land is one of the significant causes for the lesser production and productivity of Paddy lands in Mannar district. Farmers continue to cultivate unproductive lands because of the following reasons.

- Lack of planning in land use by the government and farmers
- Lack of consultation with farmers about the unproductive land
- Lack of extension services that could guide the farmers on alternative cultivation techniques and crop diversification.

### 5.8 Low Profitability of Paddy Cultivation

The profits earned from paddy farming are generally very low. The earnings from paddy cultivation are the principal source of income for vast majority of farmers. The reduction in paddy prices has a significant impact on the livelihoods of the farming community. High input cost and low market prices for crop products affect both small and large scale farmers. The reason for the low profitability from paddy and other OFC cultivation were identified through the problem analysis done with community and other stakeholders. Those are given below.

### 5.8.1. Unstable/Unfair price/ No market equilibrium for paddy

The causes for the unfair prices were described below.

## - Late price fixing practiced by Paddy Marketing Board

The guaranteed price for paddy is often gazetted very late by PBM every year. Paddy Marketing Board (PMB) does not follow a district wise cultivation calendar when fixing the purchasing price but price is fixed based on the national cultivation calendar. The harvesting period differs from district to district and therefore the farmers in some districts are force to sell their paddy at the existing lower prices. As a result, the farmers are forced sell their paddy at lower prices.

- Limited Purchase by the Government As PMB purchases limited quantity of Paddy each year, small time farmers have to sell their paddy to Private Purchasers who generally fix the price below the PMB price. This was also the reason for the unstable market equilibrium for paddy.

## - Low prices fixed by Private purchasers

No formal marketing mechanism is operating in the district, particularly in rural areas. Therefore, farmers are exploited by money lenders, brokers, mill owners, collectors and other suppliers who supply cultivation inputs on credit. Dependency on private source of credit for inputs and settlement of the same by selling farm produces is a critical issue. Due to financial constraints, the majority of farmers depend on traders, money lenders, agrochemical suppliers and intermediaries to provide credit facilities for farming inputs and repay the same by selling their products to them.

### 5.8.2. Post harvesting losses

The post-harvest system consists of a set of operations that takes place during the period from harvesting to consumption. An efficient post-harvest system aims to minimize losses and maintain the quality of the product until it reaches the final consumer. When post-harvesting losses are minimized, both food security and farmer's income are increased which that is of vital importance to small and medium scale farmers, particularly in districts such as Mannar where most of the rural population dependents on farming. From a socio-economic point of view, the implementation of an
efficient post-harvest system in any community would provide equitable benefit to all those involved in the system (Grolleaud, 2001).

The post harvesting losses seriously affect the Mannar district farmers. The post harvesting losses have an impact on the profit of the sector. The following are the reasons that were identified for high post harvesting losses in Mannar district.

## - Poor application of appropriate and traditional harvesting methods

During pre-harvest operations, use of efficient technology and input management, as well as timeliness of the activities is important. Efficient postharvest operations are imperative for improved product quality for securing better prices. In Mannar, farmers often fail to use appropriate harvesting technologies resulting in higher post harvesting loses.

## - Limited use of appropriate tools for harvesting Fruits and Vegetables

The principles of determining at which stage of maturity a fruit or vegetable should be harvested are crucial for subsequent storage, shelf life and final quality of the product. Post-harvest physiologists have generally distinguished three stages in the life span of fruits and vegetables: maturation, ripening, and senescence. Therefore, depending on the type of fruit or vegetable, appropriate tools and devices need to be used for harvesting. The harvest must be done before senescence which is the last stage, characterized by natural degradation of the fruit or vegetable. Lack of timely and proper transport system and poor packing methods are the other causes which contribute to higher post-harvest losses of fruits and vegetable. Mannar district experiences these constraints which have a great impact on the income of the farmers in the district.

## - Inadequate machinery for harvesting paddy

As most of the farmers lack inadequate capital and access to formal sources of credit, they are unable to invest in appropriate tools, devices and machinery. Therefore, they are forced to hire machinery which often fails to provide timely services. Failure to receive services on time results in higher post-harvesting loses.

## - Lack of adoption of Value added practices

Value-added agriculture entails changing a raw agricultural produces into something new through packaging, processing, cooling, drying, extracting or any other type of processing that differentiates the product from the original raw commodity. Adding value to agricultural products is vital for higher returns, enhanced market opportunities, more storage avenues and to extend the period of usage of produces. Increasingly, value-added products are coming into the local market as producers take advantage of high-demand for niche products. In Mannar district the Value addition practices are significantly low due the following reasons.
$>\quad$ Lack of technical knowhow in value addition
> Lack of network for outside markets
> Lack of attractive external markets

### 5.9 Lack of initiative to adopt innovative technologies to minimize reduce post harvesting losses for Fruit, OFC and Vegetables)

The following factors had been identified as causes for the non-adaptation of innovative methods.
$>$ Insufficient coordination between the Agricultural offices and Higher educational institutions
$>$ Limited access to the information on new technologies
$>\quad$ Inadequate number of skilled staff to implement new technologies
$>$ Farmers' unwillingness to take risks in adopt new technologies
> Non access to Agro insurance/welfare system

## 6. Strategic outcomes and future outlook

In line with the vision and mission of the crop sector of the Mannar district, this development plan identifies two thrust areas. They are;

- Production and productivity of Paddy and Other Field crops
- Profitability of crop sector

The following are the Strategic outcomes which are expected to be achieved by the crop sector.

### 6.1 Outcome 1: Increased Production and Productivity of Paddy and Other Field crops

This goal /Outcome will be achieved through the adoption of following strategies.

- Enhanced supply of Certified Seeds
- Timely supply of water in sufficient quantities
- Sustained reduction of crop damages due to Pests and Diseases outbreaks, and by animals and floods/excessive rain and drought
- Improved soil fertility
- Increased adaptation of innovative methods/Improved research and extension services
- Improved utilization of Unproductive Lands

### 6.2 Outcome 2: Increased Profitability

This Outcome will be achieved through the production of the following strategies.

- Fair /stable price for paddy other crops
- Reduced Post harvesting losses

There have been many initiatives identified under above thrust areas to be implemented in the next five year period and are being presented in forthcoming sections under results framework and the action plan.

The five year development plan aims at a higher contribution to the economy of the district by increasing the crop production and productivity. The development targets of the sector for 2021 are as follows.

|  | Indicators | Production (Mt) |  | Productivity |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} \text { Baseline } \\ 2014 \end{gathered}$ | $\begin{gathered} \text { Targets } \\ 2021 \end{gathered}$ | $\begin{gathered} \text { Baseline } \\ 2014 \end{gathered}$ | $\begin{aligned} & \text { Targets } \\ & 2021 \end{aligned}$ |
| 1 | Employment in the Crop sector | 46\% | 40\% | - | - |
| 2 | Paddy Production - Maha | 86,125 | 101,700 | 5.0 | 5.4 |
| 3 | Paddy Production - Yala | 9,067 | 17,960 | 5.0 | 5.4 |
| 4 | Maize Production (Mt) | 498 | 763 | 3.0 | 3.5 |
| 5 | Ground Nut Production (Mt) | 724 | 623 | 3.0 | 3.5 |

|  | Indicators | Production (Mt) |  | Productivity |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} \text { Baseline } \\ 2014 \end{gathered}$ | Targets 2021 | $\begin{aligned} & \text { Baseline } \\ & 2014 \end{aligned}$ | Targets 2021 |
| 6 | Chilli Production (Mt) | 520 | 775 | 1.5 | 2.0 |
| 7 | Green Gram Production (Mt) | 310 | 460 | 1.0 | 1.5 |
| 8 | Cowpea Production (Mt) | 175 | 310 | 0.9 | 1.3 |
| 9 | Red Onion Production (Mt) | 900 | 1,100 |  |  |
| 10 | Black Gram Production (Mt) | 132 | 370 | 1.0 | 1.4 |
| 11 | Mango Production (Mt) | 30 | 237 | 19.5 | 20.0 |
| 12 | Papaya Production (Mt) | 1.005 | 2,575 | 39.0 | 39.5 |
| 13 | Banana Production (Mt) | 500 | 2,090 | 41.0 | 41.5 |

## Chapter 5

## Livestock Sub-sector

## 1. Introduction

Sri Lanka still imports about $55 \%$ of milk and dairy requirement of the country. It needs a much bigger and faster growth liberating its potential to be able to self-sufficient in dairy and meat production in Sri Lanka. Of the total milk that is available, the volume of milk entering the formal milk market in 2014 was around 418.9 million litters and the rest is channelled via informal routes and also consumed domestically. Imports of milk and milk products also have shown a growth in the past few years.

Livestock sub-sector is the second most widespread (next to Crop sub-sector) livelihood activity in the Mannar district. Dairy farming has been a practice from pre historic era in the Mannar district and dairy animals have performed multiple functions of producing milk for household consumption, males as a media of transportation and dung as organic fertilizer and fuel. They may act as a capital reserve and provide employment to help farmers over lean periods, and provide an additional source of income as well as a source for nutrition. There are 13,902 poultry farmers, 4,691 cattle farmers and 9 collection centres, one value added production centres operate in the district and produce about 11,100 litres of fresh milk daily. They are small herds of less than ten heads and kept on a small extent of about one to two acres. The livestock in improved pastures is not a common practice in the district but are mostly fed by free grazing. Livestock activities in the district have not been properly integrated with other agriculture activities (crop cultivation etc.) resulting into accruing limited benefits and pattern of conflicting land use. It is one of the major employments for rural people in the district and provides a continuous flow of income. Milk is also a 'cash crop' for smallholders.

## 2. Vision and Mission

The Vision and Mission of the Livestock sector of the district are:
"Contributing national goal of self -sufficiency in livestock production while enhancing living standards of the livestock farming community in Northern Province."
"To provide physical, financial and technical inputs while regulating the usage of available resources to promote modernised and commercialized animal husbandry system among the farming community, fairly and equitable manner to reach selfsufficiency in Livestock production in Northern Province"

## 3. Situation Analysis and Review of Present Performance

There is a good potential of improving livestock in the district as there are a large number of families engaged in farming and there exists a large extent of natural grassland (about $20 \%$ of the total land) that could be transformed into productive pastures. If proper knowledge and productive (highbreed) animals (Cattle, buffalo, goat and poultry) and are provided to the farmers, the potential of the district for an effective and efficient livestock sector could be liberated to a greater extent.

Livestock Farming is a significant and popular economic activity in the district although it has not been developed up to its full potential. Rearing of neat cattle, buffalos and poultry farming are the main forms of livestock farming.

Table 5.1 Livestock Population in Mannar District

| Type | No. of Animals <br> $\mathbf{2 0 1 4}$ | No. of Animals |
| :--- | :---: | :---: |
|  | $\mathbf{2 0 1 5}$ |  |
| Cattle | 41,779 | 45,159 |
| Buffalos | 1,805 | 2,835 |
| Goat | 13,108 | 21,206 |
| Chicken | 113,156 | 492,584 |
| Swine | 200 | 309 |
| Duck | 685 | 1,355 |

Source: Livestock Statistical Bulletin, Department of Animal Production \& Health

There are 3 chilling plants in the district with a capacity of 7,700 litters per day. These chilling plants have collected $1,640,605$ litters out of total milk production of $3,471,000$ litters during 2015. The buffalo milk production was 58,143 litters in 2015. The analysis of cow population in Mannar district is presented below.

Table 5.2: The Livestock Population - Neat Cattle and Buffaloes

| Year | Neat Cattle |  |  |  |  | Buffaloes |  |  |  |  |  |

Source: Department of Animal Production \& Health
The Dairy industry plays a dominant role in Mannar District though the district contributes only about $1 \%$ to the National Production. However, the average producer price for cow's milk has been reported as at the peak during the past few years. Similarly, Mannar has been noted as one of the districts having a higher goat population ${ }^{1}$.

The statistics of the Department of Animal Production and Health, Sri Lanka reveals that there has been a significant growth in the livestock population and production in Mannar District since 2002. The annual livestock population in the district is shown in the Table below.

Table 5.3: The Livestock Population - Goats and Poultry

| Year | Goats |  | Poultry |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | He | She | Cock Bird | Laying Hen | Hen | Chick | Broilers |
| 2011 | 5,277 | 15,929 | 67,998 | 140,930 | 85,617 | 108,072 | 89,967 |

| 2015 | 5,771 | 13,444 | 25,432 | 35,068 | 19,296 | 49,265 | 30,080 |

Source: Department of Animal Production \& Health

Poultry industry has shown a significant economic activity in Sri Lanka during the past decade. The poultry population has grown to 20.08 million in 2014 while the per capita consumption of chicken meat and egg had changed from 100 g and 38 eggs in 1980 to 7.19 kg and 107.9 eggs in 2014. The poultry production is in private hands with forward contracts for input supplying and marketing mainly in small scale broiler production. Therefore, small scale rural farmers get their inputs at doorstep and have to market their products at pre agreed price. The consumption needs of poultry products are mainly supplied by domestic enterprises ${ }^{2}$.

[^1]
## 4. Problems, Issues and Challenges

The main problems, issues and challenges faced by the livestock sector are summarized below:

| Area | Problems, issues and challenges |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Farm Input | Inadequate High rate of <br> availability of high farm animal <br> breed cows to meet  <br> farmer demand mortality | Low productivity of dairy farm units and low yield of daily milk | High price of livestock feed \& veterinary drugs | Depletion of fodder lands |
| Farmers/ farmer knowledge | Lack of knowledge on environmental friendly management of livestock farm waste and on new techniques among the farmers |  | Labour problems <br> (Livestock is less attractive for the youth) |  |
| Marketing | Low level of consumption of animal protein / Low level of fresh milk consumption by the people in the district | Weak collection mechanism of Milk | Inadequate milk marketing Facilities | Low quality of marketed Milk |

### 4.1 Low productivity of Dairy farm units and low yield of daily milk

The low productivity or yield per cow is the significant issue which prevents the sector to sustain and provide adequate income to the farmers. The milk production and productivity continue to decrease and is one of the main areas that should be addressed.

The following factors have been identified as causes for the lower productivity/yield.

## Inadequate availability of high breed cows

Ninety percent (90\%) of the cows consist of indigenous cattle that give an average yield of 0.5 to 3.5 litters per day. Their Lactation period varies from 1 to 7 months and the dry period (no milk yield) extends from 4 to 7 months. These are the two important reasons for the low productivity of milk in the district. The annual increase in the milk production is due to the increase of cattle population but not due to the increase in productivity of the animals.

High rate of animal mortality
Insufficient ambulatory and veterinary services in the remote areas and lack staff in the Department of Animal Health and Production are the main reasons for the high mortality of cattle and poultry. Non-availability of medicine and drugs for animals in the vicinity, high prices of medicine, scarcity of water and long periods of drought also contribute towards high levels of animal mortality in the district. Other dominant factor that contributes to lower productivity is the inability of poor farmers to afford the medicine prescribed for animals and thus resorting to traditional methods.

## Inadequacy of veterinary services

Veterinary services in Sri Lanka include treatment and control of animal diseases as well as advisory services in animal management, breeding, artificial insemination and supply of planting materials of pasture and occasionally provision of livestock breeding animals. Provision of such services through government Veterinary Surgeons (VS) have become increasingly difficult and in many situations, farmers complain that they are not receiving quality services, particularly at required times.

## High cost of animal feeds and Depletion of grassland

Animal feed available in the district includes natural pasture, fodder and paddy stubbles which are of low quality in terms of protein content and digestibility. During the dry season there is severe shortage of pasture and fodder in the district leading to drastic drop in the volume of milk production. While the local cattle sustain to certain extent on available pasture and other forages, the high yielding cross bred and pure breed cows find it difficult to cope with the situation. They have to be maintained by feeding compounded feed in the absence of quality pasture. But the farmers cannot feed their animals with concentrates to meet the nutritional requirement of cows due to high cost of such feeds. This results in the decline in milk yield and the farmer's profitability.

Farmers' lack of knowledge on new technologies and environmental friendly management practices in handling livestock farm waste.
The practical application of modern as well as locally available low cost and environmental friendly technologies are not common among

the farmers, mainly due to lack of technical know-how resulting from weak extension services, poor linkages with farmers, inadequate farmer training facilities and lack of research.

### 4.2 Low income and profitability

Following factors have contributed towards the low farmer income and profitability from the livestock activities.

## Less value addition adopted by farmers

The livestock famers mostly prefer to sell milk in raw form do not engage in value adding activities.

## Low level of consumption of animal protein and fresh milk by the people in the district

It is commonly accepted that the general public are not aware that the locally produced fresh liquid milk is more nutritious and much safe than other forms of milk (E.g. milk powder). Another reason for low consumption of fresh milk is the inadequate hygienic methods adopted during milking and subsequent handling of the product and lack of any enforced quality assurance procedures. These factors have influenced the consumer to lose confidence in locally produced fresh milk. The lower level of milk consumption has also led to the prevalence of malnutrition in the district.

## Inadequacy of milk marketing Facilities

It is estimated that only half of the milk production is collected by the formal marketing agents such as MILCO, Nestle Lanka, CIC and other private companies due to the inadequate milk collection network, non-availability of chilling plants and other infrastructure facilities.

## Lack of commercialization and modernization

The poultry industry in the district is slowly getting shifted from the subsistence backyard system to commercial scale poultry farming. The poultry industry in the district, broiler sector in particular has shown a prominent growth due to the active participation of private sector and the increase in local demand for poultry products (meat and egg) in the district.

Goat husbandry is practiced extensively in the country, especially in the dry and intermediate zones as a traditional form of livestock production (Department of Census and Statistics, 2010). The goat population in Mannar has not changed from 2013 to 2014. The goat farming in the district is aimed at meeting the demand for meat in the district. However, the swine industry in the district is not prominent due to religious and environmental restrictions.

## 5. Strategic Outcomes and Future Outlook

To address the above problems, issues and challenges, the livestock sub-sector has identified many strategic initiatives under the following thrust areas.

1. Dairy Production and Productivity
2. Meat and Egg Production
3. Value Addition and Marketing
4. Enabling Environment for Livestock Development

There are many initiatives been identified under the above thrust areas to be implemented in the next five year period and are presented in this results framework and the action plan.

The Five Year Development Plan aims at a higher contribution to the economy of the district by increasing the livestock production and higher employment in the livestock sector. The development targets of the sector for 2021 are as follows:

|  | Indicators | Baseline <br> 2015 | Targets <br> 2021 |
| :--- | :--- | :---: | :---: |
| 1 | Annual milk production - Neat Cattle (Million Litres ) | 2.78 | 4.5 |
| 2 | Annual milk production - Buffalo (Million Litres ) | 0.047 | 0.1 |
| 3 | \% of upgraded (high-breed) cows as \% of total cow <br> population | $5 \%$ | $30 \%$ |
| 4 | Formal milk collection (Mn Litres) | 2.35 | 3.8 |
| 5 | Number of milk collection centres | 10 | 30 |
| 6 | Annual egg production (No.) | $1,926,835$ | $3,000,000$ |
| 7 | Beef Production (Kg) | 831,835 | $1,500,000$ |
| 8 | Chicken Production (Kg) | $1,145,735$ | $2,500,000$ |

## Chapter 6

## Fisheries Sub-Sector in Mannar District

## 1. Introduction

Presently, the Fisheries Industry is very important economic activity in Sri Lanka. This sector contributes to $1.2 \%$ of the national GDP, $72 \%$ of animal protein intake of the population and provides direct and indirect employment for 2.4 million. Annual fish production in Sri Lanka in 2015 was 520,190 Mts of which $67,300 \mathrm{Mts}$ were from inland fishery sector. There had been a decline in inland fish production in 2015 compared to the previous year which driven by high water levels in major reservoirs that reduced the fish netting areas during in 2015 and the lower quantum of fingerlings released to tanks in 2014. Sri Lanka plans to increase the nutrition intake and to maintain a protein requirement through a per capita fish consumption of 22 Kg per year. To achieve this target, the Ministry of Fisheries and Aquatic Resources Development has targeted at increasing the national fish production up to 685,700 Mt by 2017. Table below indicates the amount of Fish Production in Sri Lanka.

Table 6.1: Fish Production in Sri Lanka

|  |  | MT '000 <br> Cub-Sector |  | $\mathbf{2 0 1 4}$ |
| :---: | :---: | :---: | :---: | :---: |
| Change (\%) |  |  |  |  |

Source: Central Bank - Annual Report: 2015

Fisheries sector in Sri Lanka is made up of two main components namely (a) marine fisheries (86\%), and (b) inland fisheries and aquaculture (14\%). The total fish requirement is fulfilled by three main sources, namely, (a) Marine fish - $81 \%$, (b) inland fish - $11 \%$, and imported processed fish - $8 \%$.

Further, export earnings from fish products also declined by 32.9 per cent to Rs. 22,130 million consequent to the ban on exports of fisheries products to the European Union (EU) from Sri Lanka. In the meantime, imports of canned fish increased significantly by 150.2 per cent to 49,016 MT in 2015 from 19,591 MT in 2014 partly due to the reduction in Special Commodity Levy (SCL) from Rs. 1 02 per kg to Rs. 50 per kg.

Per-capita fish consumption to maintain reasonable level of nutrition is estimated as 22 kg per year or 60.3 g/day (WHO). Per capita fish consumption in Sri Lanka in 2015 was $16.3 \mathrm{~kg} /$ year or $44.6 \mathrm{~g} /$ day. Only 1.8 $\mathrm{kg} /$ year or $4.9 \mathrm{~g} /$ day of this amount came from fresh water fish.

## 2. National Policy Objectives:

- Improvement of nutritional status and food security of the people by increasing the national fish production
- Minimization of post-harvest losses and improvement of quality and safety of Fishery products to acceptable standards
- Increase employment opportunities in fisheries and related industries and Improve the socio-economic status of the fisher community
- Increase foreign exchange earnings from non-traditional fishery product exports
- Conservation of the aquatic environment to ensure the sustainability of the fish and aquatic resources

## 3. Fisheries sub-sector in Mannar District

Mannar district being a coastal district possesses good potential for marine fishery. Presently there is about 9,414 (2015) active fishermen are engaged in marine fishing. There are about 37,697 persons are dependent on income from marine fishing. As the Mannar district is an agricultural district, it has large number of major, medium and small tanks. The ancient port in Mannar which needs to be developed is also a positive factor for the development of fishery activities in the district. Mannar district has 162 Kms of coastal line. There is water bodies
 expanding into 116 sq . km in the district also the Aruvi Aru River is one of the largest rivers in Sri

Lanka which runs through the district. There are 11,600 hc of reservoirs, 1,261 hc of Mangroves, 5,179 hc of salt Marshes and 3,828 hc of Lagoons for inland fisheries production in Mannar District. Table 6.2 indicates the details of water bodies in Mannar District.

Table 6.2: Details of Water Bodies in Mannar District

|  | Type of Reservoir | No. |
| :--- | :--- | :---: |
| $\mathbf{1}$ | Major Reservoirs | 3 |
| $\mathbf{2}$ | Medium Reservoirs | 8 |
| $\mathbf{3}$ | Minor | 372 |
| $\mathbf{4}$ | Total Water area utilized (hc) | 6,360 |
| $\mathbf{5}$ | Number of landing sites | 383 |

## 4. Vision and Mission

The Vision and Mission of the Fisheries sector of the district are:
"Sri Lanka to be the leader of conservation and sustainable utilization of Fisheries and aquatic resources in the South Asian region"
"Managing the utilization of fisheries and aquatic resources for the benefit of the present and future generation"

## 5. Present Performance

Mannar district produces about $3 \%(13,981 \mathrm{Mt}$ of $520,190 \mathrm{Mt}$ in 2015) of total fish production of the country. The annual production of Inland fisheries in the district for the past three years is tabulated below.

The details of fish production in Mannar district during last five years are depicted in Table below.
Table 6.3: Fresh and Dry Fish production for last five years

| Year | Fresh <br> Production <br> (MT) | Dry Fish <br> Production <br> (MT) | Total <br> (MT) |
| :---: | :---: | :---: | :---: |
| $\mathbf{2 0 1 1}$ | 11,158 | 749 | 11,907 |
| $\mathbf{2 0 1 2}$ | 12,813 | 538 | 13,351 |
| 2013 | 17,131 | 1,249 | 18,380 |
| 2014 | 25,938 | 7,780 | 33,718 |
| 2015 | 13,509 | 472 | 13,981 |

Source: Department of Fisheries \& Aquatic

Resources Development, Mannar

The district employs about 9,414 active fishermen in the district in the year 2015. There are about 40 fisheries CBO with 10,146 members and 3,456 operating fishing crafts (2015). There are 5 ice plants in the district with a production capacity of 50 Mt per day. The break-down of fisheries sector population and the number of number of fishing boats operate in the district are presented below in Table 6.4.

Table 6.4: Fishing population data for last five years

| Year | Fishing Families | Fishing Population | Active Fisherman |
| :---: | :---: | :---: | :---: |
|  | 8,686 | 33,257 |  |
| $\mathbf{2 0 1 2}$ | 9,129 | 33,953 | 8,923 |
| $\mathbf{2 0 1 3}$ | 9,303 | 37,158 | 8,993 |
| $\mathbf{2 0 1 4}$ | 11,079 | 40,286 | 10,801 |
| $\mathbf{2 0 1 5}$ | 9,452 | 37,697 | 9,414 |

Source: Department of Fisheries \& Aquatic Resources Development, Mannar

The above data reveals that there had been no major improvement in fishing population or the active fishermen in the past few years. Table 6.5 presents Fish Production by each boat categories for the last 5 years.

Table 6.5: Fish production by each boat categories for last five years

| Year | In Board Engines Fishing <br> Crafts | Out Board Engines <br> Fishing Crafts | Non-Mechanized <br> Fishing Crafts |

## 6. Problems, Issues and Challenges

The main problems, issues and challenges faced by the inland fisheries sector are presented below:

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Inland <br> Fishery Inputs | Insufficient fish stock in tanks | Insufficient supply of fingerlings | Low production of ornamental fish and fish tanks | Not very many fish varieties | Depletion of fish feed in the reservoirs/ tanks |
| Maine <br> Fishery Inputs | High cost of operation - High cost of boats and fishing gear | Lack of trained fishermen | Lack of infrastructure for safe and effective fishing | Foreigners <br> Fishing in Sri Lankan waters | Use of prohibited fishing methods by fishermen |
| Farmers/ farmer knowledge | Lack of knowledge on modern technology / Lack of usage of modern equipment | Lack of knowledge on reducing postharvest losses | Irregular fishing practices | Lack of knowledge on Ornamental fish farming | Lack of disaster management plans and preparedness |
| Marketing | Limited market for fresh water fish / Ornamental fish | Lack with | networking an and export markets | Lack of cold storages facilities | Low level of value added processing |

The main areas of problems and challenges are discussed below.
i. Limited Access to fishing inputs and Limited fishing boats in operation Decreased fish production (marine and Inland)
There is limited access to inputs for fish production and insufficient multi day boats for deep sea fishing. Majority of the fishermen are engaged in offshore fishing. The existing multiday boards are not well equipped and do not have adequate space for storage. The fishermen are of the view that the cost of fibre glass boxes is too high and they expect the Fibre glass boxes need to be subsidized. Further, the sufficient access need to be provided for ice and fibre glass boxes, the sector would be able to reduce the post-harvest losses by $30 \%$. This has resulted in lower production of marine and inland fish.

Table 6.7: Operating Marine Fishing Boats in Mannar District - 2015

| year | IMUL | 1Day | OFRP | MTRB | NTRB | NBSB | Total Boats |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2015 | 9 | 93 | 2,288 | 310 | 742 | 14 | 3,456 |

Source: Department of Fisheries \& Aquatic Resources Development, Mannar

Key: IMUL - Inboard Multi-day Boats, IDAY - Inboard Single-day Boats, OFRP - Out-board engine Fiberglass Reinforced Plastic Boats, MTRB - Motorized Traditional Boats, NTRB - Non-motorized Traditional Boats, NBSB - Beach Seine Crafts

The figure below illustrates the fishing boat data 2015.

The above graph indicates that the number of fishing boats is increasing. Inadequate IMULs and MTRPs is one of the main reasons for reduced individual fish production. At the same time marine fishing population is also not increasing result in a reduction in individual fish production.

Lack of awareness of the benefits of deep sea fishing among investors, lack of access to information on weather condition (Climate Change), lack of knowledge on new technologies for fishing (GPS, etc.) and increased illegal fishing activities are major reasons for the stagnant engagement in deep sea fishing and lower fish production.

Also, there is a need for a
 concerted public relations political and practical campaign to educate people about the sustainable used of this natural resource. Literature has been produced but needs disseminating.

## ii. Insufficient Market Facilities \& Value Addition

The size of the market has greater impact on the livelihood of fishing communities in Mannar district. The reason/causes for the Insufficient Market Facilities \& Value Addition in the district are as follows.

- Lack of awareness on Mannar as a supplier of ornamental fish among the exporters
- Lack of awareness and understanding on fishing industry among the local community and fishermen /lack of interest on fishing industry/value addition process among fishermen
- Inadequate market linkages between the fishing societies/local fishermen and exporters
- Lack of access to market and price information for the fishermen (Lagoon fish and Ornamental fish)
- Lack of access to information on exports, export markets and export opportunities to local fishermen
- Inadequate usage of appropriate post-harvest technology
iii. Low Aquaculture production (Coastal Aquaculture and Mari-culture)

The reasons for low production of aquaculture are:

- Low preference (choices) for Coastal Aquaculture Products among the Mannar households
- Insufficient production of Aqua-culture Fish and other Seeds (non-edible)
- Low production of edible Coastal Aquaculture Products
- Insufficient production of Juveniles for Coastal Aquaculture
iv. Low infrastructure facilities for fishing

There is lack of infrastructure for fishing in Mannar district. The major difficulties are follows.

- Lack of Landing sites
- Lack of access roads
- Lack of service centres, rest rooms, light houses
- Lack of offices, boats for staff, other facilities for staff (life jackets etc.) and no training centre/lack of training facilities

## 7. Strategic Outcomes and Future Outlook

Following strategies have been identified to develop the inland fisheries sector by addressing the above challenges, issues and problems under the following thrust areas.

1. Deep Sea and Inland Fish Production
2. Post-harvest Losses and Value Addition
3. Marketing of Fish

The main strategies and initiatives identified are as follows.

- Increase deep sea fish production;
- Increase fish production in minor perennial reservoirs
 and seasonal tanks through culture based fisheries;
- Increase supply of fish seed for stock enhancement by rehabilitating Government centres and establishing mini nurseries to be operated by Community-based Organizations (CBOs);
- Improved adoption of community based fisheries management practices in perennial reservoirs;
- Promote the efficient collection of catch statistics from perennial reservoirs;
- Promote carp culture in estate tanks; and
- Undertake aquaculture research \& development in collaboration with research agencies.

The Five Year Development Plan aims at a higher contribution in terms of fish production and employment. The main targets of the sector for 2021 are as follows:

|  | Indicators | Baseline | Targets |
| :---: | :--- | :---: | :---: |
| 1 | Employment in the sub-sector - Marine | 2015 | 2021 |
| 2 | Employment in the sub-sector - Aqua Culture | 9,414 | 12,000 |
| 3 | Annual deep fish production (Mt) | 1,200 | 6,000 |
| 4 | Annual Aqua Culture fish production (Mt) | 19,390 | 30,000 |
| 5 | Average supply of fingerlings (per annum) | 1,750 | 20,000 |
| 6 | District contribution to the national inland fish production | 3.0 Mn | 10.0 Mn |

## Chapter 7

## Environment and Forestry

## 1. Introduction

Mannar District is located in the north west of Sri Lanka in the Northern Province. The Gulf of Mannar is a large shallow bay forming part of the Laccadive Sea in the Indian Ocean. It lies between the south eastern tip of India and the west coast of Sri Lanka, in the Coromandel Coast Region. Forest and range lands cover about 169,000 hc of the land area. A chain of low islands and reefs known as Ramsethu, also called Adam's Bridge, which includes Mannar Island, separates the Gulf of Mannar from Palk Bay, which lies to the north between India and Sri Lanka. The estuaries of Thamirabarani River of South India and the Malvathu Oya (Malvathu River) of Sri Lanka drain into the Gulf.

## 2. Vision and Mission

The Vision and Mission of the Environment Sector of the district are:
"Conserve the Nature through Public Participation"
"Protection of Wetland for the Richness of Biodiversity"

## 3. Conservation

## Marine Sanctuary

Located on the south eastern tip of the subcontinent, the Gulf of Mannar is known to harbour over 3,600 species of flora and fauna, making it one of the richest coastal regions in Asia. 117 hard coral species have been recorded in the Gulf of Mannar. Sea turtles are frequent visitors to the gulf as are sharks, dugongs, and dolphins. However, the combined effects of 47 villages, with a total
population of around 50,000 have meant that overharvesting of marine species has become a problem. Fish catches have declined, as have pearl oyster, gorgonian coral, and acorn worm populations. Local fishermen rely on the reef to feed their families, but destructive fishing methods combined with the stress of pollution and coral mining have meant both near shore and offshore catches decreased. Endangered species have dolphins, dugongs, whales and sea cucumbers. In 1986, a group of 21 islets lying off the Tamil Nadu coast between Thoothukudi and Dhanushkodi were declared the Gulf of Mannar Marine National Park. The park and its 10 km buffer zone were declared a Biosphere Reserve in 1989.

## Protected Areas

The Gulf of Mannar Biosphere Reserve covers an area of $10,500 \mathrm{~km}^{2}$ of ocean,
 islands and the adjoining coastline. The islets and coastal buffer zone includes beaches, estuaries, and tropical dry broadleaf forests, while the marine environments include seaweed communities, sea grass communities, coral reefs, salt marshes and mangrove forests.

## 4. Natural Forest Cover and Biodiversity

## Forest Cover

The total forest cover in Mannar District is 123,740 ha and categorized mainly into Dry Monsoon Forest ( 104,888 ha), Riverine Dry Forest ( 568 ha), Mangroves (1486 ha) and Sparse Forest ( 16,797 ha). On land, there are a number of baobab trees, natives of East Africa, the seeds of which were either brought to Sri Lanka by Arab traders, or drifted there on ocean currents. Also known as the Bottle tree and the Monkey-bread tree, the baobab has an enormous, bulbous trunk, usually hollow and sometimes with a reservoir of water. The trunk has wrinkled bark like an elephant's skin and is capped with a small crown of spindly root-like branches, with few leaves. Radiocarbon dating has proved that the baobab tree is the longest-lived species on earth, sometimes surviving for more than a thousand years.

## Wetlands

Giant's tank is a significant wetland and it is within a declared sanctuary, mainly because of the migrating water-birds that are found there. Giant's Tank and the other smaller tanks support a range of aquatic vegetation, including reeds and water hyacinth, which grow in profusion in some areas, significantly reducing the quantity of water retained. The tanks also support a range of aquatic fauna including fish, amphibians, birds and insects, and there are active fisheries in the larger tanks. Species include those that occur naturally in the rivers and streams farther inland, plus introduced species such as tilapia and carp. Madhu Road Sanctuary is a much larger protected area about 30 km north-east of the Murunkkan wellfield, inhabited by a variety of Sri Lanka's more notable species, including elephants, leopards and a variety of primates.

## Coastal Habitats

The shallow coastal waters around Mannar Island support a small fishery and there are interesting coral reef habitats in certain areas, most notably the Adam's Bridge series of patch reefs and sandbanks at the north-western end of the island, which lead towards the south- eastern coast of India. None of the areas on or around the island are designated or protected however, so it can be
assumed that there are no especially important species or habitats.

## 5. Fauna and flora

The Mannar district features some exotic fauna and flora. The dugong, a marine mammal and distant relative of the elephant, lives in the shallow waters off the coast feeding on sea grasses. Dugongs probably gave rise to the mermaid legend, due to their vaguely human appearance while bobbing in the water with just their heads exposed, and tendency to suckle their young on the surface, holding them with their flippers in the manner of a woman with her baby. Sightings by European sailors of dugongs in the Gulf of Mannar in the 16th and 17th centuries no doubt strengthened the already widespread mermaid legend in the West.

## Situation Analysis and challenges to forest and natural resources in the District

From the stakeholder consultations held on the above, the main concerns emanated were sub optimal management of waste, natural resource degradation, deforestation, and environmental pollution. Due to economic pressures placed on land including agriculture and infrastructure development, the forest land area is being decreased and wetlands are being increasingly used to dump waste. Due to this improper disposal of waste into the forest and wetlands both the surface and ground water is getting polluted. In addition to the above, gravel mining in forested areas is being practiced illegally. River sand is also being extracted beyond sustainable levels with special reference to the sand dunes in Mannar Island.

## 6. Future Outlook

Sustainable natural resources management which is the ultimate objective of this exercise is the management of forests according to the principles of sustainable development. It has to keep the balance between three pillars; ecological, economic and socio-cultural. Successful institutionalization of sustainable forest management will provide integrated benefits to all, ranging from safeguarding local livelihoods to protecting the biodiversity and ecosystems provided by forests, reducing rural poverty and mitigating some of the effects of climate change. This is well portrayed in the Sustainable Development Goals for which Sri Lanka too has been subscribed.

The Goal 15 of the SDG deals with protecting, restoring and promoting sustainable use of terrestrial ecosystems, sustainably managing forests, combating desertification and halting and reversing land degradation and halting biodiversity loss. According to the National Forest Policy of Sri Lanka (1995), all forest areas are to be managed in a sustainable manner in order to ensure the continued existence of important ecosystems and flow of forest products and services. It also recognizes and respects the traditional rights, cultural values and religious beliefs of people living in and adjacent to forest areas. There are adequate provisions for collaborative management of protected areas and for benefits sharing.

## National Action Plan for Haritha Lanka Programme

The above Action Plan which was developed by National Council for Sustainable Development in 2009 places emphasis on the fact that Island's limited land resources should be used optimally. Mission 2 of this Action Plan is focused on saving the fauna, flora and ecosystems. Among its main strategies the following can be highlighted;

- Strengthen policy, legal and institutional framework for biodiversity conservation, including information sharing \& networking aspects.
- Establish optimum Protected Area network and ensure recovery of important threatened species.
- Conserve and sustainable use flora and fauna outside the protected area network.
- Establish biodiversity conservation financing mechanisms through biodiversity valuation and economics of conservation.
- Wise use of genetic resources for agriculture in sustainable manner.
- Limit access to genetic resources.
- Preserve traditional knowledge and practices relevant to biodiversity conservation.
- Integrate and promote research and development on bio-diversity conservation in all sectors.
- Facilitate sustainable use of biodiversity through benefit sharing mechanisms.
- Integrate agenda on biodiversity into education and agendas of other related sectors.

## Intended Nationally Determined Contributions (INDCs) of Sri Lanka

Forests has been overwhelmingly acknowledged as fundamentally important for efforts to combat climate change threat by curbing the increasing trend of average surface temperature. The vital role that trees play in removing carbon from air through a process referred to as carbon sequestration has now been recognized globally as a potent way to remove rapidly increasing atmospheric carbon. The Intergovernmental Panel on Climate Change (IPCC) estimated that deforestation and forest degradation account for $12 \%$ of earth's human induced carbon emission which is more emissions that the entire global transportation put together. Therefore as per the outcome of the $19^{\text {th }}$ Conference of Parties (COP 19) in Warsaw in 2013, all Parties were invited to prepare Intended Nationally Determined Contributions (INDCs). An important area of this is
 Mitigation of Climate Change which is reducing the GHG emissions against the Business-As- Usual Scenarios in the sectors of Energy, Transportation, Industry, Waste and Forestry. Under the Forestry Sector the following direct and
indirect influences in reducing the GHG emissions has been identified which deals with increasing forest cover in the country up to health level and manage deforestation. The proposed actions are shown below.

- Increase forest cover of the country from 29\% to 32\% by 2030
- Improvement of the quality of growing stock of national forests and plantations
- Restoration of degraded forests and hilltops (shrubs, grasslands and state lands)
- Increase river basin management for major rivers of Sri Lanka
- Forestation of underutilized private lands and marginal tea lands
- Urban forestry (tree planting along roadsides, temple lands, schools and other government lands)
- Establishment/ reactivating of National Forest Monitoring System
- Promote private and public sector companies for investment in environmental conservation projects through CSR programs

This Five Year Development Plan focuses on improving the environmental aspects and to improve the environmental resources in the district. A summary of expected outcomes and respective targets of the sector for 2021 is presented below.

|  | Indicators | Baseline <br> 2014 | Targets <br> 2021 |
| :---: | :--- | :---: | :---: |
| 1 | Forest cover | $30 \%$ | $35 \%$ |
| 2 | Sustained Reduction in environmental <br> pollution (level of pollution) | $50 \%$ | $10 \%$ |
| 3. | Reduction in forests opened for agricultural <br> purposes | TBD <br> (Forest Dept.) | $10 \%$ improvement from <br> the base line (2015) |
| 4. | Reduction in polluted wet-land (Extent of <br> wet-land polluted, excluding seasonal wet- <br> land) | TBD | $10 \%$ improvement from <br> the base line (2015) |
| 5.Reduction in river sand extraction and <br> excavation | 22,470 | $10 \%$ reduction YoY <br> 13,200 |  |
| 6.Improved conservation of river basins and <br> river bank | Zero illegal activities in <br> river \& river reservations <br> by 2021 |  |  |

## SECTOR: Forestry and Environment

## Chapter 8

Industry and SME Sector

## 1. Introduction

SMEs play a vital role in almost all the economies in the World, but especially in the developing economies like Sri Lanka as they help to mitigate discrepancies-between the rich and the poor. They contribute largely to the GDP by participating in the mainstream economy, becoming a source of income to a substantial portion of the population by providing decent jobs. On the other hand, SMEs serve as a nursery for larger enterprises in the future, as most of large enterprises today, were originated as SMEs in the past. Currently, Sri Lanka doesn't have a generally accepted criterion for SMEs, instead different agencies use different criteria based on their objectives hence there is no consistency among them. Identifying SMEs on commonly acceptable criteria is a long felt need of the country and number of forums was organized and different surveys were conducted by different agencies towards achieving this objective. Most of the developed and developing countries consider the economic sectors separately for identifying SMEs as their turnover varies across different sectors.

The Listing of operation of the Economic Census conducted in 2013/14 provided a strong basis to define SMEs scientifically which may be acceptable to all the agencies. Turnover, value of assets and number of persons engaged were identified as key variables in defining SMEs and listing forms were designed encompassing those variables.

## 2. Vision and Mission

The Vision and Mission of Industry sub-sector of the district are:
"A vibrant and sustainable industrial and business sector promoting regional economic growth".
"Facilitate and create an environment for sustainable development of the industrial and business sector through investment promotion, small and medium enterprise development and enhancement of tourism, thereby providing decent employment opportunities and income".

## 3. Performance in the Industrial Sector

The industrial sector is the least developed sector in Mannar and contributes only about $0.4 \%$ of total industrial establishments of the country. The establishment density is 2.2 per sq. km which is also very low compared to the national level of 15.5 per Sq. km. According to the Island wide Census of Economic Activities conducted by the Department of Census and Statistics in 2014 there were 4,481 non-agricultural establishments in Mannar district and the total persons engaged in these establishments was 8,277 ( $8.3 \%$ of the population). About $85 \%$ of these establishments are sole proprietorships and only $67.2 \%$ are registered. There are 760 industries engaged in manufacturing with 1,349 employees while 748 persons are engaged in accommodation, food and beverages services with about 735 establishments. There are only a few large scale establishments in the district. They are; Ilmenite, salt and cement related raw material extraction operations. About 95.2\% of the total non-agricultural industries are micro level ones while there were $4.5 \%$ and $0.3 \%$ of them are small and medium level industries respectively. Of the total persons $(8,277)$ engaged, there are $73.8 \%$ engaged in micro level industries, $17.4 \%$ are engaged in small scale industries, $4.0 \%$ are engaged in medium scale industries and $4.8 \%$ are engaged in large industries. Also, only about 11.2\% of the employed population in the district is engaged in the industry sector (Agriculture $39.1 \%$ and $49.7 \%$ ). As a result, the district has only a little contribution to its economy from the industrial activities.

Table 8.1: Non-Agricultural activities in a District: Sector Distribution of Establishments

| Sector | No. of Establishments | Persons engaged |
| :--- | :---: | :---: |
| Urban | 1,258 | 2,656 |
| Rural | 3,223 | 5,621 |
| District | 4,481 | 8,277 |

Mannar stands at rank 24 in Services sector.

## Division wise performance

Almost all the industries in Mannar district are located in the Mannar Town DS Division.

## 4. Problems, Issues and Challenges

There are no data pertaining to the industries and SMEs in Mannar district to review the performance of the sector. This is a major hindrance to the analysis of the present situation of the Tourism sector in the district. However, the main problems, issues and challenges faced by the industries and SME sub-sector as revealed by stakeholder consultations are presented below.

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Inputs for industrial production | Lack of land and land ownership | Weak <br> Infrastructure Facilities / Roads | Lack of utility services (electricity, water, communication) | Lack of Skilled Labour/lack of required skills | Shortage of Inputs/ Problem of procuring raw materials |
| Enabling Environment | Lack of protection in local industries | Weak government Policies for industries | Less support from govt./line agencies (E.g. One-stop centre) | Less access to seed capital | Lack of opportunities for training \& exposure |
| Technology and knowhow | Lack of investments for industries \& new technology | Less adoption of new technology/ difficulties of accessibility | Weak <br> entrepreneurial culture | Lack of use of technology for marketing and market intelligence | High cost of new technology |
| Marketing of products | Lack of market linkages | Lower demand from the district as well as adjoining centres | Lack of market information system | Low preference for local products | Weak market facilitation |

Key problems and challenges in the Industrial \& SME sector are discussed below.

## 1. Unfavourable Environment for establishment /promotion Industries/SME

The stakeholders of the sector highlighted that there are no SME friendly laws and regulations and contract enforcement to strengthen the legal environment for SMEs which can protect the Industries. The service delivery of the government industries in the district is poor and do not deliver quality service to the Industrial/ SME communities. The people who are interested in starting a SME should visit various institutions to get required documents spending lot of their time, energy and money to get advice from the government authorities to start a SME. There is no one stop service centre for the Industrial sector.

## 2. Inadequate Inputs for industrial production

The necessary infrastructure and utility facilities (lack of utility services such as electricity, water, and communication) are not readily available to establish or expand the industrial sector. There are issues in Land allocation and in obtaining Environmental Impact Assessment documents.

## 3. Limited access to finances

There is no easy and affordable access to finances/seed capital to SMEs. The Banks, financial institutions and leasing companies are not scaling up special lending window and have no special SME desks to facilitate access to credit in the district. Also the financial institutions are not scaling-up concessionary bank loan schemes for Women and Youth entrepreneurs. Therefore, fewer women and youth are involved in small and medium industries. They mostly involved in a very small scale (micro) economic activities to ensure their basic livelihood needs. Recently, there had been some investments in the tourism sector and agriculture related industries but still, the agricultural and the
tourism sectors need new investments.

## 4. Limited Market opportunities and lack of promotion for local products

Information regarding markets, product quality, packaging and branding, required by the SMEs to access local and global market is very limited in Mannar district. Promoting business linkages between large enterprises and SMEs and facilitating buyer-seller meetings, buy-back schemes and sub-contracting arrangements to ensure assured market for SMEs are not available in the district due to non-existence of lead industrial institution(s) in the district. Mannar district has lots of places of tourist attraction. Road side marketing can also give an opportunity to market Mannar branded products. But there is no such expanded Road marketing outlets in places where tourists and public are visiting frequently to help SMEs to market their products.

## 5. Technology and know-how

Lack of access to appropriate and affordable modern technologies by the entrepreneurs is another major constraint that the district facings at present. This is due to lack of capital and lack of information related to modern and affordable technology. Also, since the cost of new technology is also very high, accessing modern technology is a crucial issue for SMEs. There are no initiatives to acquire technologies by the establishment of a Technology Transfer and Development Fund (TTDF) with appropriate incentives to support the acquisition and adoption of modern, clean technology for SMEs. Further, there in is no strong network, platform and links between SMEs and technology providers in the district. Other main challenge in the district is the lack of training avenues for the youth.

## 6. Absence of entrepreneurial Culture and Skills

Other main challenge facing in the district is the lack of entrepreneurial Culture and Skills. There are limited avenues for building skills, entrepreneurial spirit and culture, improve mind set (risk taking attitude) and institutional capacity. There are no special programs to develop entrepreneurship among the Women and Youth and strengthen the institutional capacities of training institutions.

## 5. Strategic outcomes and future outlook

The five year development plan aims at a higher contribution for the district from the industrial sector. The development targets of the sector for 2021 are as follows:

\left.|  | Indicators | Baseline | Targets |
| :--- | :--- | :---: | :---: |
| 2014 |  |  |  |$\right)$| 2021 |  |  |
| :---: | :---: | :---: |
| 1 | Employment in Industrial sector | 8,277 |

## SECTOR: Industries

## SUB SECTOR: Small and Medium Industries

## THRUST AREA - I: Improved Market

## Chapter 9

## Tourism Sub-Sector

## 1. Introduction

Global tourism rebounded strongly in the recent past with international tourist arrivals growing 4.4 per cent in 2015 to a total of 1,184 million, up from 1,134 million in 2014 . The highest growth of 5.0 per cent of all regions was recorded from Europe in 2015. Sri Lanka Tourism also surged to a new height with a record arrival of $1,798,380$ in 2015, transcending the past year's arrivals of $1,527,153$ representing a growth of $17.8 \%$. The foreign exchange earnings too have increased by 27.72 per cent from Rs. 317,479 million (US \$ 2,431.1 million) in 2014 to Rs. 405,492 million (US $\$ 2,980.6$ million) in 2015. Due to the increase in number of the arrivals, tourism was able to upgrade its rank as the third largest foreign exchange earner for the national economy in 2015 followed by remittances immigrant workforce and earning from exports of Textiles and Garments. The share of foreign exchange earnings from tourism amounted to 12.4 per cent of the total foreign exchange earned in $2015^{3}$.

Mannar district too could play a major role in tourism industry in Sri Lanka as it has very many tourist attractions. These include, Mannar Fort, Ketheeswaram Temple, Arippu Fort, Keeri Beacha

[^2]and Madu Church as well as Giant Tank Sanctuary. The tourism sector in the Mannar district is yet to liberate its full tourism potential. There are not many tourism related businesses such as hotels, restaurants, guide services and transport services etc. operating in the district. Moreover, there are not many people who are engaged or trained to serve in the tourism sector as well as there are no processes that have been institutionalized to capture data relating tourist arrivals, income from tourism related activities to the local economy. There are both local and foreign tourists visit Mannar district but there are no official data published in relation to tourist arrivals to the district.

However, based on the discussions held with the sector officials, the following have been identified as problems, issues and challenges in relation to the development of the tourism sector in the district.

## 2. Problems, Issues and Challenges

There are no data pertaining to the tourism in Mannar district to review the performance of the sector. This is a major hindrance to the analysis of the present situation of the Tourism sector in the district. However, the main problems, issues and challenges faced by the tourism sub-sector as revealed by stakeholder consultations are presented below.

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Inputs for Tourism development | Lack of land and land ownership for tourism infrastructure | Weak Infrastructure Facilities / Roads for historical attractions | Lack of utility services (electricity, water, communication) \& Govt. support | Lack of Skilled Labour/lack of required skills | Lack of sound supply chain for tourism related Inputs |

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Enabling Environment | Lack of support for tourism sector entrepreneurs | Weak government Policies for tourism | Lack of support from govt./line agencies (E.g. One-stop centre) | Lack of access to capital funding | Lack of opportunities for training \& exposure |
| Technology and knowhow | Lack of investments in tourism sector in the district | Less adoption of new technology/ difficulties of accessibility | Weak entrepreneurial culture for tourism | Lack of use of technology for marketing and market intelligence | High level of investment needed for tourism infrastructure |
| Marketing of Tourism products | Lack of market linkages and lack of tourism products | Lack of understanding on proper marketing of tourism products | Lack of market information system | Low preference for tourism sector in the district | Weak facilitation for promotion of tourism products |

More pertinent problems and issues in relation to the development of the tourism sector in Mannar district are discussed below.

### 1.1 Lack of medical/health facilities in the district

The Hospitals in the district lack adequate emergency, accident and trauma management facilities or lack sufficiently equipped theatres to perform urgent operations and treat the local and foreign tourists.

With the development of Hotels and increased tourism activities of adventures nature (water sports, diving etc.) would increase the demand for health and medical needs due to accidents and injuries. Right now the Mannar Hospital is the nearest medical facility for the towns and cities of Mannar district.

### 1.2 Poor coordination is also observed between the Northern Provincial Council and the Central Authorities.

1.3 Lack of access to Land - Land allocation and lack of required extent of land for hoteliers, encroachment of land by people in the area influence negatively for the development of the tourism sector in the district.
1.4 Lack of Human resources - There are inadequate skilled and competent human resources in the district. Also there are no opportunities for developing the human resources for the tourism sector in the district.

### 1.5 Lack of administrative structure for Tourism development in Mannar and Northern Province.

Other difficulty faced by the industry is the need of coordination with agencies of the Central Government for obtaining funds for developing places of tourist attractions and providing information to tourists or tour facilitators. Poor Access (Inter \& Intra) roads for tourist destinations, frequent interruptions to power supply and high cost of power supply, scarcity of skilled and professional staff, problems on waste disposal, lack of access to safe drinking
water are also affects negatively for the tourism development. Lack of training facilities in the district is also a bottleneck in developing the human resources for the tourism industry.

Reduction of the arrival of migrant birds also has made an impact on the tourist activities associated with the area and will also threatens the potential and emerging eco- tourism activities in the area. Environmental pollution especially pollution of beaches is another factor that contribute negatively for the development of tourism in the district.

Accordingly, this plan for the next five years focusses in developing the tourism sector in the district in terms of increased tourist arrivals, increased tourism income and increased contribution to the local economy from tourism by addressing the above issues, problems and challenges. As there is tremendous opportunity for the economic development of the district, this Five Year Development Plan has identified many initiatives ${ }^{4}$ for the development of the Tourism sector and are presented below.

- Transform Mannar District into an attractive, eco-sensitive and unique tourist destination enabling self-determined cultural development in the district (Awareness to the villagers who protest / discourage tourists arrivals to their areas)
- Develop tourism related urban infrastructure - undertaking the big-ticket items as a platform for tourism development (Improvement of access roads to the attractive places / places of interest, improvement of other infrastructure facilities at the tourist hot-spots etc.)
- Increase tourism-related business development and employment - developing specific sectors of the economy that can be interlinked with the tourism sector (e.g. food, handicrafts, transport, IT, business)
- Attract new and emerging tourist groups to Mannar - increasing market share of tourism through developing new tourism products
- Enhance industry professionalism through tourist information, accommodation and services - maximising local revenue of tourism investments (Training of youth for tourism related job opportunities, accommodation facilities etc.)
- Provision of land for tourism development related activities

## 3. Strategic outcomes and future outlook

The five year development plan aims at a higher contribution for the district from the tourism sector. The strategic outcomes and respective targets of the sector for 2021 are presented below.

|  | Indicator | Baseline | Targets |
| :--- | :--- | :---: | :---: |
| 1 | Tourist arrivals (Foreign \& Local) | 2014 | TBD |
| $\mathbf{2}$ | No. of large and middle level tourism related business <br> establishments | 5 fold increase |  |
| 3 | No. of small and micro level tourism related business <br> establishments | TBD | 5 fold increase |
| 4 | Value from tourism in the district (Rs Mn) | TBD | 5 fold increase |
| 5 | No. of new tourism related businesses commenced (per <br> annum) | TBD | 5 fold increase |
| 6. | No. of employees engaged on the tourism sector | TBD | 5 fold increase |

## Chapter 10

## Education and Human Resource Development

## Primary and Secondary Education

## 1. Introduction

The Government of Sri Lanka is committed to achieving the targets identified by the Sustainable Development Goals in relation to access to education. These goals include the following.

1. Increased proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics,
2. Increased proportion of children under 5 years of age who are developmentally on track in health, learning and psychosocial wellbeing,
3. Increased participation rate in
 organized learning (one year before the official primary entry age),
4. Increased participation rate of youth and adults in formal and non-formal education and training,
5. Increased proportion of youth and adults with information and communications technology (ICT) skills,
6. Improvement in parity indices (female/male, rural/urban, bottom/top wealth quintile and others such as disability status, indigenous peoples and conflict-affected, as data become available),
7. Increased percentage of population in a given age group achieving at least a fixed level of proficiency in functional (a) literacy and (b) numeracy skills, and
8. Increased proportion of schools with access to: (a) electricity; (b) the Internet for pedagogical purposes; (c) computers for pedagogical purposes; (d) adapted infrastructure and materials for students with disabilities; (e) basic drinking water; (f) single-sex basic sanitation facilities; and (g) basic handwashing facilities (as per the WASH indicator definitions).

## 2. Access to Education - Mannar District

There are about 32,000 pupils studying in 141 schools in Mannar district. There are 131 AB schools, 251 C schools, 35 type 2 schools and 68 type 3 schools. Of the total 141 schools that are functioning, there are 5 national schools. There are 10 schools in urban areas and 131 schools in Pradeshiya Sabha areas, one Sinhala medium, 8 Tamil and English medium and the rest are Tamil medium schools. There are 31 schools in difficulty areas and 52 schools in very difficult areas. There are 66 schools with Grade 1 to 5,5 Schools with Grade 1 to 8,35 Schools with Grade 1 to 11 , 33 schools with Grade 1 to 13 and 15 schools with Grade 6 to 13 in the district. Of the 33 schools with Grade 12 to 13 , there are only 13 Schools with both Science and Math streams. About $49.4 \%$ of advanced level students follow the art stream, $19.7 \%$ follow the commerce stream and $11 \%$ of them follow science stream, $5.8 \%$ follow math stream and . There are 2,162 teachers in the district, of them 242 are untrained teachers and 18 of them are teacher trainees (2016). There are 644 graduate teachers. Overall student - teacher ratio in the district is 15 .

Mannar District divided into 2 education zones as follows.
i. Mannar Zone has 90 schools, 21 described in the 'difficult' category and 22 in the 'very difficult'. The children are given a government funded free morning meal as this is the only meal they may get in a day. The teachers have to support the parents as well as the children. The survival rate between grades $1-11$ is $40.2 \%$.

ii. Madhu Zone has 52 schools 10 described in the 'difficult' category and 30 in the 'very difficult'. Overall there is a $10 \%$ drop out, although this has fallen from $20 \%$ in the recent past. There are many schools with no access to drinking water in this zone.

## 3. Vision \& Mission - Primary and Secondary Education

The Vision and Mission of the Education sector of the district are:
"Towards forming knowledge, competent and quality based community"
"We provide guidance, facilities, services and educate all children and implement national education policy"

## 4. Student Performance

The level of student performance in Mannar district is below par in relation to the national averages. The performance by the Northern Province students in Math, Science and English at the grade 8 level, as per the assessments conducted by the Ministry of Education in 2012 is as follows.

Table 10.5: Indicators of Education performance - 2012

|  | Mathematics |  | Science |  | English |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 35.7 | 41.8 | 18.3 | 24.3 | 13.3 | 15.0 |

Table 10.6: Indicators of education performance - 2016

|  |  | Description |
| :---: | :--- | :---: |
| 1 | Average pass rate - Ordinary level - Madhu Zone | $42.95 \%$ |
| 2 | Average pass rate - Ordinary level - Mannar Zone | $69.69 \%$ |
| 3 | Average pass rate - A/L - Madhu Zone | $60.55 \%$ |
| 4 | Average pass rate - A/L - Mannar Zone | $64.83 \%$ |
| 5 | Average pass rate - Grade 5 Scholarship | $79 \%$ |
| 6 | Computer literacy in the district - Students \& teachers (Approx.) | $70 \%$ |
| 7 | Use of internet in the district schools | $60 \%$ |
| 8 | Use of e-mail in the district schools | $60 \%$ |

Based on the discussions held with the sector officials, the following have been identified as problems, issues and challenges faced by the education sector in the district.

Table 10.7: Performance at Grade 5 Scholarship Examination - 2015

| No. | Zone | No. of Students Sat | No. of Students Pass | No. of Students Pass |
| :---: | :---: | :---: | :---: | :---: |
| 1 | Mannar Zone | 1,630 | 146 | 8.96 |
| 2 | Madhu Zone | 483 | 14 | 2.90 |
| 3 | Total | 2,113 | 160 | 7.57 |

Source: Office of the Zonal Director of Education, Mannar

There are about 7\% of the students passed scholarship exam in Mannar. When compared with results of education Zones, the Madhu zone shows poor performance (approximately 3\% pass rate).

Table 10.8: G.C.E. (O/L) Results - 2016

| No. | Zone | No. of Students Sat | No. of Students Pass | $\%$ |
| :---: | :---: | :---: | :---: | :---: |
| 1 | Mannar | 1,323 | 1,007 | $76.1 \%$ |
| 2 | Madhu | 312 | 134 | $42.9 \%$ |
| 3 | Total | 1,633 | 1,141 | $69.8 \%$ |

Source: Office of the Zonal Director of Education, Mannar

Table 10.9: G.C.E. A/L Results - 2015

| No. | Zone | Type of Subject Division | No. of Students Sat | No. of Students Pass | \% |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Mannar | Arts | 552 | 398 | 72.1 |
|  |  | Commerce | 262 | 175 | 66.8 |
|  |  | Bio Science | 188 | 84 | 44.7 |
|  |  | Mathematics | 88 | 40 | 45.5 |
|  |  | Technology | - | - | - |
| Sub Total |  |  | 1,090 | 697 | 63.9 |
| 2 | Madhu | Arts | 89 | 62 | 69.7 |
|  |  | Commerce | 19 | 14 | 73.7 |
|  |  | Bio Science | 7 | 4 | 57.1 |
|  |  | Mathematics | 5 | 0 | 0 |
|  |  | Technology | - | - | - |
| Sub Total |  |  | 120 | 80 | 66.6 |
| Grand Total |  |  | 1,210 | 777 | 64.2 |

Source: Office of the Zonal Director of Education, Mannar

The above statistic shows approximately $64.2 \%$ pass the G.C.E (A/L).

Table 10.10: Students qualifying for Advance Level in the District

| No. | Year | $\begin{gathered} \text { Year } \\ 1-5 \end{gathered}$ | $\begin{aligned} & \text { Year } \\ & \text { 6-11 } \end{aligned}$ | $\begin{gathered} \text { Year } \\ \text { 12-13 } \end{gathered}$ | Total | Students Ratio Qualifying for Advance Level |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2011 | 11,683 | 13,490 | 3,354 | 28,527 | 11.8\% |
| 2 | 2012 | 11,522 | 13,743 | 3,176 | 28,441 | 11.2\% |
| 3 | 2013 | 12,033 | 13,853 | 3,430 | 29,316 | 11.7\% |
| 4 | 2014 | 12,018 | 14,125 | 3,240 | 29,338 | 11.0\% |
| 5 | 2015 | 12,023 | 14,138 | 3,436 | 29,597 | 11.6\% |

Source: Office of the Zonal Director of Education, Mannar

Approximately $70 \%$ students passed the G.C.E (O/L) in 2015. About $25 \%$ of students drop out from G.C.E. (O/L) stage and are not eligible to study G.C.E. (A/L). The national level pass rate is $81 \%$.

## Overall Students Dropouts

The following Table 6.11 shows the dropouts statistic of Mannar District

Table 10.11: School dropout in the District

| No. | Year | Grade <br> $1-5$ | Grade <br> 6 | Grade <br> 7 | Grade <br> 8 | Grade <br> 9 | Grade <br> 10 | Grade <br> 11 | Total |

## 5. Vocational Training Education

Every DS division has a Vocational Training Centre where generally 19 different courses are offered for a period of 6 months on a full time basis. These courses include; Radio/TV equipment repairing, industrial electrical, refrigeration and air conditioning, automobile mechanism, motor cycle and three wheeler mechanic, mechanism, computer numerical controller, beautician and hair stylist, National Diploma in Communication Technology (NCCIT - National Certificate in IT), carpentry, masonry, aluminium fabrication, outreach mechanic, farm equipment repairer, plumber, welder and quantity surveying.

Table 10.12: Distribution of Student Population in Mannar Technical College - 2015

| No. | Name of Course | No. of Enrolment in 2015 | Passed the Exam | Drop Outs |
| :---: | :---: | :---: | :---: | :---: |

| 5 | Construction Site Supervisor | 29 | 26 | 03 |

Source: Technical College, Mannar

## 6. Vision and Mission

The Vision and Mission of Education sub-sector of the district are:
"Creating a resourceful, energetic and competent society with excellent knowledge, skills and attitude.

Through formal, non-formal \& informal education programmes creating a rationalistic, resourceful society, glittering in culture, abiding by the values of morality which can encounter the changes and achieve employability of the modern world."

## 7. Problems, Issues and Challenges of the education sector in Mannar

The main problems, issues and challenges faced by the education sector are presented below:

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Access to education | Shortage of teachers \& trained teachers | Shortage of teachers for Math, Science and English | Shortage of space at the schools with higher demand from community | Lack of access road (Poor quality roads, bridges) | Lack of transport facilities |

| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Learning |  |  |  |  |  |
| Environment - | Lack of child <br> friendly <br> Infrastructure <br> environment <br> at schools | Outdated <br> school <br> infrastructure | Lack of focus on <br> learning <br> environment by <br> the authorities | Less access to <br> funding for <br> capital works | Lack of access <br> to utilities <br> (WASH |
| facilities, |  |  |  |  |  |

Key problems and challenges are discussed below.

### 7.1. Primary and Secondary Education-Access, Participation and Performance

Universal access to education is providing the opportunity for education to all people irrespective of their social background, gender and ethnicity, physical and mental disabilities. Most are children from the poorest families, rural areas, children with disabilities, or children who have to work to help their families are not participating in the school education. The following are causes for low access, low participating and low performance by students in Mannar district.

## - Quality of Education and performance are not up to the potential level

The reasons poor performance are less-adoption of child friendly approach CFA) at schools/poor child friendly school environment, unawareness on CFA among Principals and Techers and unavailability of friendly learning opportunities / Child Friendly classroom in the schools. Most of the schools in rural areas of Mannar district do not have adequate subject matter teachers (E.g. English, Science and mathematics). The teaching methodology followed by teachers need to be improved and teachers do not possess multi-level teaching capacity, and lack experience in positive class room management. Further rural schools are experiencing inadequate resources compare to urban areas' schools.

## - Low Access and participation

The social factors such as domestic violence, poverty, malnutrition, child Labour, families which have migrated mothers, early marriages are the social issues that affect adversely on the access to education and participation. These reasons have also increased the absenteeism and low attendance which eventually cause children dropping-outs from the school. Besides these, the inadequate transport facilities to the rural areas affect the access to schools.

The inadequate water and sanitation facilities (WASH) have also impacted on the low attendance and dropouts of children. Especially, Female children drop out is more as there is no
adequate sanitation facilities for female children in some of the schools.

## Poor Institutional arrangements

There are some schools without adequate teaching staff. (Please refer Table 3 above) Also the zonal education offices reported that they have inadequate staff in their offices. The shortage of learning facilities and infrastructure, lack of skill development opportunities for teachers and staff are reason for inefficient service delivery of the zonal office and schools. Political influence on staff transfers also causes to loose subject matter staffs form the schools which are situated in the rural areas of Mannar district.

Further, there is no effective data based monitoring system prevailing within the education sector to monitor the staff performance.

## - Lack of Multi Sectoral /agencies inclusive development activities

There is weak-coordination existing among various stakeholders connected to formal education. The school development societies and school attendance societies are not functioning well in some areas of Mannar district.

### 7.2. Vocational Training - Access, Participation and Performance

The social perception about the skilled labour workers, poverty and ignorance of the benefit of the vocational Training are the major reasons for poor access and participation of non-formal education. Other causes for

- Less Enrolment for VTC

Unawareness about the benefit of Vocational Education among students and social status are preventing to access to vocational education in Mannar district.

## - Absence of School Level System in VT

Most of the schools have inadequate staff to give proper career guidance to the students and have inadequate facilities to provide VT to students at school level.

- Less Awareness on VT
- Affordability of cost of vocational Training

Most of the government technical colleges have subsidy system for vulnerable students but the availability of system is not known by most of the youth who are unable to afford for the vocational studies.

## - Influence of Private Sector

The attractive promotional activities by private vocational institutions draw students who can afford for the studies which can be obtain from government technical institutions.

- Unavailability of attractive /stereotype VT and technical collage curriculum which is not suitable job market
- Lack of Coordination between Stakeholders and among T government technical intuitions

## 8. Future Outlook

This five year plan therefore focusses on the development of the education sector in the district in terms of increased access to education, increased student performance leading to increased employability by addressing the above issues, problems and challenges.

In line with national targets of the education sector, Mannar district too is planning to achieve the following targets in the next five years.
i. Ensuring the access to education for all the children in the age of compulsory education and increasing the percentage of participation in the G.C.E. (O/L) by $10 \%$ (National level from $85 \%$ to $95 \%$ ).
ii. Increasing the percentage of passing the G.C.E. (O/L) examination by $18 \%$ from $80 \%$ to $98 \%$. (National level improved from $61 \%$ to $75 \%$ ).
iii. Increase the pass rate of subjects of mathematics, Science and English (At present, 35.7\% Females and $41.8 \%$ Males for Mathematics, $18.3 \%$ of females and $24.3 \%$ males for Science and $13.3 \%$ of females and $15.0 \%$ males for English, in Northern province, at grade 8).
iv. Increasing the percentage of passing the G.C.E. (A/L) by $21 \%$ from $64.2 \%$ to $85 \%$. (National levels - Science Stream from $50 \%$ to $53 \%$, Commerce Stream from $51 \%$ to $60 \%$ and Arts Stream from $59 \%$ to $63 \%$ ).
v. Increasing the G.C.E. (A/L) Participation by $8 \%$ to $20 \%$ (National levels from $21 \%$ to $40 \%$ in Science and Technology Stream and $27 \%$ to $35 \%$ in $1 \%$ to $40 \%$ in Commerce Stream, effecting a Structural change in the Arts Stream.
vi. Increasing the percentage of teachers with professional qualifications from $81 \%$ to $90 \%$
vii. Increasing Students' IT literacy from $35 \%$ to $75 \%$ and the percentage of teachers with IT skills from $30 \%$ to $75 \%$.
viii. Laying the foundation for 1,000 students leaving schools after G.C.E. (O/L) and (A/L) annually, to obtain National Vocational Qualifications, at school level.
ix. Ensuring trilingual learning opportunities at all schools as the basis of promoting social reconciliation.
x. Broadening opportunities for Sports, Aesthetic activities and Co-curricular activities at all schools as the basis of producing a student generation with good personality and physical fitness.

The five year development plan aims at a higher performance for district from the education sector. The strategic outcomes and respective targets of the sector for 2021 are tabulated below.

|  | Indicator | Baseline <br> 2015 | Target <br> 2021 |
| :---: | :--- | :---: | :---: |
| 1 | Access to education for all the children | 55 | 95 |
| 2 | Teachers with needed professional qualifications (\%) | 81 | 90 |
| 3 | Students achieved all competency levels (\%) | 86 | 98 |
| 4 | Student performance -Student passed in the national standard <br> examination - Grade 5 (\%) | 8 | 65 |
| 5 | Students qualified for 0/L (Grade 10 \& 11) (\%) | 80 | 98 |
| 6 | Students qualified for University/tertiary education <br> - Pass rate in A/L (\%) | 64.2 | 85 |

## Chapter 11

## Health Services in Mannar District

## 1. Introduction

The health system in the district serves about 163,000 of its population. It has widely spread health facilities providing a better access to the health services. Though there are issues relating to accessing surgical related services, the health system in the district provides a fairly good health services to its clients.

## Health Infrastructure in the district

There is one District General Hospital in the Mannar district with 331 beds. It deals with approximately 152,700 outpatients and about 25,250 inpatients (2014) per year. Most of the visits to the clinics are for medical, diabetic, dental and maternity/baby care. In the territories, there are 4 Type B divisional hospitals, 6 Type C divisional hospitals, 8 primary care units in the District.

Curative healthcare services are delivered through 11 curative healthcare institutions. These institutions deliver curative health care services through OPD, inwards medical, surgical paediatric, acute mental services and dental services.

Preventive healthcare services are delivered through 5 MOH divisions. These MOHs provide Maternal \& Child healthcare services, prevention and controlling of communicable diseases and noncommunicable diseases, dental health services and community mental health services.

## 2. Vision and Mission

The Vision and Mission of Health sector of the district are:
"Healthier District that contributes to the economical, physical, mental, social and spiritual wellbeing of the nation.
"To provide efficient and effective quality healthcare services to the people of Mannar district through healthcare institutions by implementing the strategies formulated by national and provincial health Ministries"

## 3. Health Sector Performance

The health sector performance of the district is tabulated below.

Table 11.3: MCH Performance in the District

| Indicator | National | 2015 | 2014 | 2013 | 2012 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| No. of Live Births | - | 1,825 | 1,684 | 1,664 | 1,483 |
| Crude Birth Rate | 17.6 | 11.29 | 10.44 | 11 | 9.35 |

Source: Office of the Regional Director of Health Services, Mannar

The prevalence of concurrent, acute and chronic mal-nutrition is also common in the district, affecting education of children and the productive capacity of the people. Malnutrition of children below 2 years in Mannar is $12.9 \%$ which is better than the national average of $18.1 \%$. Most common causes of hospital deaths in Mannar are: acute myocardial infection, heart diseases, pneumonia, hypertension diseases, heart failures, cerebrovascular diseases, asthma, renal failure and intracranial injuries.

## Maternal Health Care

Sri Lanka has an exemplary record in maternal and health care. However, the principle factors associated with high mortality remain as lack of education, malnutrition, lower family income, lack of access to safe drinking water and sanitation facilities, lack of focus on sanitation practices, poor access to health care in rural and remote areas and inequality. The common denominator is poverty and disparity. Comparatively, the children born to educated mothers are healthier while higher child
 mortality is recorded among the poorest families. The health sector promote the better sanitation and hygienic practices, improved access to safe drinking water, gender equality and health education
to improve the maternal and child health in the district. Crude death rate in Mannar is 0.8 (2015).

## Child Health in Mannar

There is a special baby care unit and a mother and baby unit at Mannar General with a paediatric unit. Infant mortality rate and under 5 mortality rate for Mannar were 8.77 and 0.71 respectively (2015). Immunization overage for BCG \& MMR is $100 \%$ in the district.

The Physical Health issues include less understanding and practice of breast feeding failure, under nutrition, anaemia, asthma, thalassemia and children with special needs.

## Mental Health

Mental health issues include traumatic complaints due to stress and child abuse; physical, sexual and negligence.

## Diabetes

A study in 2005/06 revealed that the prevalence of diabetes in Sri Lanka was about $20 \%$ of adults which is very high compared to other countries. In USA, it is only $8.3 \%$. There is clear evidence from scientific studies that diabetes is reversible with lifestyle modification and in extreme cases with medication.

Poisoning from pesticide exposure is also another health related hazard in the district. This could be addressed by raising awareness and popularizing organic farming among farmers.

## Cardiac Health

Around 3-4 new patients are coming into care per week with coronary artery disease. The risk factors recorded are high blood pressure, smoking, diabetes, high cholesterol, age and family health. There are very limited treatment facilities for cardiac
 available in the district. Rheumatic heart disease is also recorded in the district. Most of them were from the rural areas with low socio economic status. Congenital heart disease occurs in babies and children and is related to consanguinity, old and diseased parents, malnourishment and other environmental factors.

## Mental Health Issues

Many factors contribute for poor mental health, but factors such as poverty, family conflict, divorce, migration of mothers for overseas work are the main contributory factors for mental health issues in the district. For young people the over emphasis on studies and lack of physical exercises and relaxation has been the main contributory factors.

## Road Traffic Accidents (RTA)

There is an increasing trend in road traffic accidents in the Mannar district at present. Injuries sustained due to RTAs could lead to disabilities or /and death. Fractures, bleeding on the brain and tissue injuries may not just take a long time to heal, but ultimately be fatal. The key factor in relation to RTA is that they are preventable but due to negligence and carelessness the number of accidents in the district is rising. In Sri Lanka there were 2,515 fatal accidents and 5,529 major accidents recorded in 2010. The government spends Rs.6,000 million a year treating the victims of RTAs. Most common reasons for accidents on the road were; poor educational status, low monthly income.

Most of the victims were unskilled or unemployed, those under the influence of alcohol and driving without helmets. Motorbikes accounted for majority of the accidents.

## Access to Health Services

Access to hospitals in rural areas is very difficult because of the state of the roads. The challenge in rural areas is that the local people without improved livelihoods and income cannot access proper nutrition resulting in neglected health care of themselves and their families.

## 4. Main issues, problems and challenges

The following is a summary of the main health issues in Mannar District

- Inadequate access to health care services
- High malnutrition and severe malnutrition of children under 5 in remote areas
- High prevalence of Anaemia among pregnant mothers
- High prevalence of Dengue
- High incidences of teenage pregnancies
- Inadequate basic emergency obstetric care services
- Lack of comprehensive emergency obstetric care services at the periphery of Mannar District
- Inadequate access to community based mental health services
- Inadequate access to dental health care
- Other problems relating to access to health care services and precipitation - Low socio economic status, low levels of awareness on health, sanitation and hygiene and families that are suffering disruption.

There are many other health related factors which are common to other districts too are influencing the health status of the people in Mannar district. These are discussed below.

### 1.1 Increased communicable diseases.

Health services are provided through the Public Health Inspectors and Supervising Public Health Inspectors. Dental Health services are provided through the Dental surgeons and dental therapists. Even though the district has the preventive health care system it faces challenges and difficulties to control communicable disease such as water borne diseases, dengue, Leptospirosis, STD/AIDs cases and Vaccine preventable diseases. The following are the main causes for the increase in communicable diseases.

- Unhealthy living environment
- Increased vectors population
- Lack of awareness on personal hygiene and sanitation
- Unhealthy food
- Ineffective compliance to health related laws, rules and regulation - E.g. for preventing pollution, selling unhygienic food etc.

### 1.2 Increase in non-communicable diseases

The major causes for the increase of non-communicable disease are:

- Increased consumption of unhealthy food
- Environmental pollution
- Increased road accident and serious injuries
- Unhealthy lifestyle
- Unawareness of the causes of the diseases

### 1.3 Increased Maternal and Infant mortality

There are higher incidences of Maternal and Infant Mortality cases in the Mannar district. The main causes for this are as follows.

- Inadequate access to health care services
- High malnutrition and severe malnutrition of children under 5 in remote areas
- High prevalence of Anaemia among pregnant mothers
- High incidences of teenage pregnancies
- High incidences of home deliveries
- Inadequate basic emergency obstetric care services at the periphery of Mannar District

### 1.4 Un-conducive institutional environment

The prevailing institutional environment is another reason which prevents the efficient provision of preventive health service in the district. The reasons for the un-conducive institutional environment are:

- Poor performance of staff
- Lack of Infrastructure facilities
- Lack of good governance practices

## 2. Curative services

### 2.1 Western medicine

Curative services provide through Teaching, Base, District, Peripheral, Rural hospitals and CD, MH and CDs. Hospitals are providing both hospitalization and ambulatory services and Primary Medical Care units providing only ambulatory care which function with non-specialist medical doctors and other staff. The curative sector faces following problems preventing it in providing better services to public.

- Unimproved Emergency care services (A \& E, EM OC, and ICU etc.)
- Unimproved other specialized care and supportive services
- Unimproved Investigative facilities in hospitals
- Inefficient and quality of General Health care services in all hospitals
- Lack of access to blood
- Lack of proper infrastructure facilities for patients
- Lack of good quality equipment and Infrastructure
- Lack of adequate drugs in the health service to be provided to patients
- Poor drainage and sanitation facilities at the hospitals

### 2.2 Ayurveda

The Ayurveda hospitals in Sri Lanka provide curative services to the public. The Ayurveda hospitals in Mannar district are facing following challenges in providing efficient service to public.

- Lack of access to Indigenous Medicine services
- Inadequate availability of Ayurveda Drugs and Herbals
- Lack of access to prepared Indigenous Drugs and Herbs
- Inefficient utilization of available services of Indigenous Medicine.

## 3. Access to Health Services

Access to hospitals in rural areas too is very difficult because of the state of the roads. The challenge in rural areas is that the local people without improved livelihoods and income cannot access proper
nutrition resulting in neglected health care of themselves and the families.

## 5. Strategies outcomes and future outlook

The Ministry of Health (national and provincial) has formulated the following strategies and initiatives to be implemented in the next five years.

- Improving access to health care services through establishment of HRM, HI, CR system, online diagnostic facility, online clinic facility;
- Improved health promotion and awareness services;
- Improved access to rehabilitative, curative and preventive health care services;
- Improved access to paying-wards;
- Improved access to Geriatric care services;
- Improved access to health care services through Public-Private Partnership (PPP);
- Improved institutional capacity for the empowerment of community on health;
- Infrastructure development to meet emergency challenges and for increased range of specialities of health care services; and
- Improved access to Indigenous medicinal services.

The Five Year Development Plan aims at an improved health status of the people living the Mannar district as well as improved access to health care services. The expected outcomes and respective targets of the health sector for 2021 are given below.

|  | Indicators | Baseline <br> 2014/2015 | Targets <br> 2021 |
| :--- | :--- | :---: | :---: |
| 1 | Reduction in Malnutrition among: | TDB | Reduction by <br> $50 \%$ |
|  | 1.1 Mothers | 12.9 | 5.0 |
|  | 1.2 Children less than 2 years \% |  |  |
| 2 | Reduction in Mortality | 59.4 | 25.0 |
|  | 2.1 Maternal mortality rate (per 100,000 live births) | 8.77 | 6.0 |
|  | 2.2 Infant mortality rate | 75 | Zero |
| 3 | Reduction in Dengue cases (Confirmed) | TBD | Reduction by |
| 4 | Reduction in new cases of Diabetes | $50 \%$ | Zero |
| 5 | Reduction in home deliveries | TBD | Zero |
| 6 | Reduction in new cases of HIV/Aids | TDB | Reduction by <br> $50 \%$ |
| 7 | Access to health care services - Out of pocket expenses of <br> patients | TBD | 15 Minutes |
| 8 | Access to health care services - Waiting time |  |  |

## Chapter 12

Social Services

## 1. Introduction

Provision of Social services in the district is aimed at improving social integration and social inclusiveness. Social integration is a dynamic and principled process of promoting the values, relations and institutions that enable all people to participate in social, economic, cultural and political life on the basis of equality of rights, equity and dignity. It is the process in which societies engage in order to foster societies that are stable, safe and just - societies that are based on the promotion and protection of all human rights, as well as respect for and value of dignity of each individual, diversity, pluralism, tolerance, non-discrimination, non-violence, equality of opportunity, solidarity, security, and participation of all people, including disadvantaged and vulnerable groups and persons while social inclusiveness refers to a process by which efforts are made to ensure equal opportunities for all, regardless of their background, so that they can achieve their full potential in life. It is a multi-dimensional process aimed at creating conditions which enable full and active participation of every member of the society in all aspects of life, including civic, social, economic, and political activities, as well as participation in decision-making processes as well as a process by which societies combat poverty and social exclusion.

As per the Sustainable Development Goals set by the United Nations under reduction in equalities and improving Peace, justice and Strong institutions, this District Development Plan aims at improving the following.

1. Increase in Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population
2. Improved Labour share of GDP, comprising wages and social protection transfers
3. Reduction in the proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers
4. Reduction in proportion of young women and men aged 18-29 years who experienced
sexual violence by age 18
5. Reduction in the proportion of businesses that had at least one contact with a public official and that paid a bribe to a public official, or were asked for a bribe by those public officials.

## 2. Review of Present Situation in Mannar

About $80.2 \%$ of the economically active population are males in Mannar district which is a higher proportion compared to that of other districts. Though the accurate data on social indicators have not been periodically published and readily available, the following negative trends were observed in the Mannar district.

1. High rate of poverty- $20.1 \%$ in 2012/13 (19,447 persons),
2. Increasing trend of youth and female unemployment - Also about $6.4 \%$ of economically active population are unemployed ${ }^{5}$. There are also $18.8 \%$ of youth and $12 \%$ of females in the Northern Province are unemployed. Youth unemployment represents about 52\% of total unemployment in the Province. There are about 20\% of youth and $15 \%$ of females in the district in the district are unemployed (estimated). Youth unemployment represents about 52\% of total unemployment in the Province.
3. Low level of labour force participation - The Labour Force Participation Rate in Mannar district is $44.0 \%$ and that of females is $15.3 \%$ which are the lowest participation rates in the country.
4. Low level of computer literacy $-11.2 \%$ in 2015
5. Increase in consumption of alcohol
6. Increase in incidences of child and women abuse
7. Increase in incidences of bribery to public officials
8. Deterioration of social security for the elders
9. Discrimination against rights of disadvantaged and vulnerable groups/persons

## 3. Social Infrastructure

### 3.1. Introduction

The social services sector includes the Social infrastructure and provision of social services. The Social infrastructure includes roads, housing, water supply and sanitation, electricity and transport facilities. Their problems, issues as well as future plans are described below.

### 3.2. Vision and Mission

The Vision and Mission of the Social Infrastructure sub-sector of the district are:
"People live in a habitable environment with basic amenities in Mannar District.

Serve the people by providing sustainable infrastructure facilities in an effective manner to meet current and future demand and ensure user satisfaction in Mannar District."

[^4]
### 3.3. Strategies of Social Infrastructure sub-sector

The strategies of the sub-sector are listed below.

1. Improved access to housing - Construction of affordable houses by providing concessionary loans/grants
2. Improved operational and monitoring mechanism - Establishing advisory services and housing facilities for beneficiaries
3. Improved rehabilitation and resettlement - Prepare a proper settlement plan for the future housing programme
4. Improved access to safe drinking water and facilitating the sanitation solutions
5. Improved access to mobility - Improve and maintain the quality of the road network by using cost effective, innovative design and construct to user satisfaction
6. Improved access to electricity - Provision of reliable electricity supply to each consumer
7. Promote public and private partnership
8. Providing effective live line facilities (transport, water supply, electricity and communication)
9. Improved environmental wellbeing - Enhance the green environment and social protection through community participation
10. Improving institutional capacity to deliver better services

## 4. Roads \& Bridges

### 4.1 Introduction

The quality of life of the people and economic growth are closely associated with travelling and transportation. A good network of roads promotes marketing of goods and produces and helps to secure a fair price for the produce. It also assists in accessing essential services such as education, healthcare (access to schools and hospitals) and other needs such as water supply, electricity supply and other social services.

The recently reconstructed road to Thalaimannar from Madawachchiya would generate tremendous opportunities for regional linkages, economic growth, poverty alleviation, employment generation and reduce regional development disparities as well as recommencing trade and transport between Sri Lanka and India via Thalaimannar and Dhanushkody. This will also promote investment opportunities in the district.

The district has deferent categories of roads in progress is being upgraded under deferent funded projects. However, there is still potential to address the problems caused by limited access to roads.

Table 12.1: Different Categories of Roads available in the District

| Responsible <br> Department | Type of Road | Total Length (KM) | Upgraded Length (KM) | Need to be Upgrade Length (KM) | Need to upgrade Length (\%) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| RDA | A\&B Class | 114.1 | 89.0 | 25.0 | 21.9 |
| RDA | B Class | 95.1 | 80.1 | 15.0 | 15.8 |
| RDD | C \& D Class | 335.0 | 95.0 | 240.0 | 71.6 |
| ACIG | Rural Roads | 1,006.7 | 337.5 | 669.2 | 66.5 |
| ACAD | Agri. Roads | 502.75 | 12.0 | 490.75 | 97.6 |
| Total |  | 2,053.65 | 613.6 | 1,439.95 | 70.1 |

RDD Mannar District Chief Engineer's Office is responsible for the construction and maintenance of 335.0 KMs C\&D classes of roads of which 127 KMs are Tarred roads and 208 KM are Gravel roads.

### 4.2 Vision and Mission

The Vision and Mission of the Roads sub-sector of the district are:
"Commuters Satisfaction through a sound road system".

To provide safe and comfortable link road network with connectivity for the convenient transportation of passengers and goods in fair and equitable manner by improving and maintenance of Roads, bridges, culverts and ferries."

### 4.3 Problems and Challenges

Well maintained road network including internal gravel roads is vital for the efficient functioning of village life with improved access to places as well as provision of services to the community by the Government. The community would face server inconvenience during the monsoon rain season, if the roads have not been adequately maintained. The Mannar district road sector faces the following problems and challenges

- Damaged or not maintained local roads
- Poor connectivity to main road due to damage or not maintained the link and local roads

### 4.4 Strategic Outcomes

The following strategic outcomes have been identified for the road sector in the Mannar District.

- Improved link roads.
- Improved local roads

## 5. Housing

### 5.1 Introduction

There is severe housing shortage in the Mannar district. There were about 25,000 houses destroyed or damaged by Tsunami in 2004. Also there were many houses damaged by the conflict and there are many still to be reconstructed or renovated. The remaining housing shortage prevails mainly in the western border areas of the district. Also there are about $15.8 \%$ of families headed by women, $53 \%$ of families are below the poverty line and about $20.7 \%$ of families are living without affordable houses in the district.

### 5.2 Vision and Mission

The Vision and Mission of the housing sub-sector of the district are:
"Every family is living in a house located in a habitable environment.
"We provide shelter for people with community and stakeholder participation"

According the statistic in year 2012, 106,192 families are living in affordable permanent houses but 35,414 families are living in temporary houses, of which 13,284 houses are ones that have been damaged due to the conflict. There are war affected and disaster affected families with 24,197 temporary houses and 19,311 families with no housing have also been identified. Further there are about 7,644 families with no housing that can be categorized as vulnerable families.

### 5.3 Issues, problems and challenges

The more important sector needs and problems that have been identified are as follows.
a. Large number of families with low income who cannot afford to pay housing loans or part of the housing loans,
b. Lack of funds and cash inflow of homeless people
c. High cost of construction and continuing trend of escalation of prices of construction materials
d. Insufficient number of beneficiaries who participate at housing construction works
e. Poor quality of material and construction workmanship

### 5.4 Strategic outcomes

The expectation of the housing sub-sector is to provide 13,284 numbers of houses to the most vulnerable communities in Mannar District. These include the families whose houses were destroyed by civil conflict. The prioritized housing needs were categorized further according the different types of vulnerabilities and are presented below.

Table 12.2: Vulnerable Communities in Mannar District

| No. of <br> Damaged <br> by Civil <br> Conflict | No. of War <br> Widows | No. of <br> Orphans | No. of <br> Disables | No. <br> Indigenous <br> Families | No. of <br> Poorest <br> Families | No. of <br> Resettled <br> Indian <br> Returnees | No. of <br> Resettled <br> Vanni <br> Returnees | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 13,284 | 1,430 | 137 | 480 | 721 | 9,837 | 40 | 639 | $\mathbf{1 3 , 2 8 4}$ |

Table 12.3: Housing stock - 2015

|  | DS Division | Permanent <br> Houses | Semi- <br> permanent <br> houses | Huts | Temporary <br> Houses | Total |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |
| 1 | Mannar town | 11,112 | 1,139 | 870 | 1,208 | 14,329 |
| 2 | Nanaddan | 4,472 | 590 | - | 652 | 5,714 |
| 3 | Musali | 4,313 | - | - | - | 4,313 |
| 4 | Manthai West | 5,215 | 611 | 415 | 1,164 | 7,405 |
| 5 | Madhu | 2,619 | - | - | 1,185 | 3,804 |
|  | Total | 27,731 | 2,340 | 1,285 | 4,209 | 35,565 |

The following Table presents the housing needs of Mannar district.
Table 12.4: Housing requirement - 2015

| DS Division |  | Completed new house requirement | Completed Houses | Requirement of damaged Houses | Completed damaged Houses |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Mannar town | 6,239 | 3,118 | 697 | 51 |
| 2 | Nanaddan | 2,622 | 1,726 | 1,092 | 52 |
| 3 | Musali | 3,910 | 3,492 | 122 | 43 |
| 4 | Manthai West | 4,592 | 4,060 | 236 | 229 |
| 5 | Madhu | 1,280 | 2,799 | 142 | 28 |
|  | Total | 18,643 | 15,195 | 2,289 | 403 |

The huts $(1,285)$ and temporary houses $(4,209)$ that are present today need to be improved as permanent houses during the next 5 year period.

## 6. Water and Sanitation

### 6.1 Introduction

The National Policy is to provide access to safe drinking water for all over the medium term. Access to water supply and sanitation facilities are regarded as one of the basic rights of the people in the country and are among the indicator of MDG No-7.

However, the recent development projects implemented in the Mannar District supplies piped borne water to $31 \%$ of families. This represents about $60 \%$ of urban populations. The sector aims at providing access to adequate sanitation to $75 \%$ of the population by 2018 and to $100 \%$ by 2021.

The following Table presents the water supply details of the district. The detail of water supply connection in 2015 is shown by following Table.

Table 12.5: Details of water supply

|  | DS Division | No. of Households |
| :--- | :--- | :---: |
| $\mathbf{1}$ | Mannar town | 6,300 |
| $\mathbf{3}$ | Nanattan | 856 |
| $\mathbf{4}$ | Musali | 414 |
| $\mathbf{5}$ | Manthi West | 1,175 |
| $\mathbf{6}$ | Total | 332 |

### 6.2 Vision and Mission

The Vision and Mission of water and sanitation sub-sector of the district are:
"A society with no health hazards due to water and sanitation"

We provide safe drinking water and sanitation to all, including rural areas, improving operational efficiency, achieving customer satisfaction, increasing commercial viability, accountability and institutional development"

### 6.3 Present Performance

About 70\% of the population of the District is living in the rural areas who are mainly dependent on the ground water for their safe drinking water, but climate change and disasters are affecting these water sources. Families living in the rural areas are struggling to find safe drinking water annually. About $57 \%$ households of the district are struggling to access improved water sources within 250 m travelling distance.

There are 21,718 households expecting the water supply connection. These households will be served by the National Water Supply and Drainage Board, some non-government agencies and community based organizations which are working in the water supply infrastructure projects in the district.

However, the recent development projects implemented in the Mannar District supplies piped borne water to $32 \%$ of families. This represents about $24 \%$ of urban populations. The sector aims at providing access to adequate sanitation to $75 \%$ of the population by 2018 and to $100 \%$ by 2021.

Table 12.6: Percentage of Households in Occupied Housing units and main source of Drinking Water - 2015

| Total <br> Households: | $\%$ | Common <br> Well | Un-Protected <br> Well | Piped Borne <br> Water | Tube Well | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Served | $62 \%$ | 9,444 | 16,723 | 30,804 | 5,029 | 62,000 |
| To be served | $38 \%$ | 4,564 | 5,863 | 21,718 | 5,747 | 37,892 |

[^5]Further, there about 60\% of households in the district, mostly in rural areas, are struggling to access improved sanitation facilities within premises.

Table 12.7: Percentage of Households Occupying Housing units and Toilet Facilities - 2015

| Total <br> Households | $\%$ | Water seal | Sharing with <br> another <br> Household | Temporary <br> toilets | Others | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Needed by HH | 24.2 | 7,557 | 1,152 | 766 | 346 | 9,821 |

Source: Basic Housing Information by Districts 2015

### 6.4 Problems and challenges

The main problems and challenges in relation to water supply in Mannar district are high cost of pipe-borne water supply, high cost of operation, lack of funds and shortage of suitable sources of safe drinking water.

## 7. Electricity

### 7.1 Introduction

In 2012 the Ceylon Electricity Board (CEB) incurred a massive loss of Rs. 61 billion. This is due to the fact that the CEB was generating electricity at a cost which is higher than its tariff levels and inefficiencies with in CEB. At present the average cost per unit of electricity is Rs. 23.00 though the tariff levels for households are between Rs. 3.60 to Rs. 15.00 per unit.

There are two sources of electricity for the district, namely the CEB grid and own solar systems. Access to electricity is possible when there are 60-70 households situated close to each other. A transformer is placed at each settlement which can service households within a 1.8 KM radius. Average connection cost is Rs. 17,000 and loans can be accessed by Samurdhi beneficiaries for electricity connection.

### 7.2 Present performance

About 28,177 families have the connection at present whereas further 10,895 families awaits for the connection in the district. At present CEB provides about 650 new connections every month.

Table 12.8: Percentage of Households in Occupying Housing units and Principal Type of Lighting

| Total Households | Electricity | Kerosene | Solar Power | Other |

| 39,756 | 5,576 | 2,812 | 30,510 |

Source: Statistical Handbook 2015

## 8. Transport

### 8.1 Bus Routes and Public Transport

Public transport services are mainly provided by state owned Sri Lanka Transport Board (SLTB) and by private bus operations. The bus services have been regulated by Northern Province Transport ministry. About 70 buses (state - 45 and private -25) are operating on local roads in Mannar. They cover nearly 37 areas and there are about 62 services per day. Average number of passengers served per day
 is about 2,900.

### 8.2 Railway Network

The main railway station of the Mannar District is located 1 KM from Mannar town. The station was constructed during British Colonial rule. This was destroyed during the conflict period and reconstructed in 2014. The line from Maho and Madwachchiya to Thalaimannar is a single line with rails supported in wooden sleepers. A passenger train takes about 9 hours to reach Colombo from Thalaimannar.

## 9. Social Services

### 9.1 Introduction

According to the poverty head count
 index (2009/10) Mannar District reports one of the highest levels of poverty in the country, at $20.1 \%$. The poverty gap index is 5.1 , again one of the highest in the country (national average is 1.7).

### 9.2 Women Headed Households and Elderly people

The number of women headed families in Mannar district was 5,467 which represent $16.8 \%$ of total household in the district (2012). Also there are many 'abandoned' women in Mannar district. There is one elderly home operating in Mannar District.

|  | DS Division | No. of Households |
| :--- | :--- | :---: |
| $\mathbf{1}$ | Mannar town | 2,311 |
| $\mathbf{2}$ | Nanattan | 898 |
| $\mathbf{3}$ | Musali | 772 |
| $\mathbf{4}$ | Manthi West | 967 |
| $\mathbf{5}$ | Madhu | 519 |
| $\mathbf{6}$ | Total | 5,467 |

### 9.3 Early Marriage and Statutory Rape

There is an increasing trend of early marriage and incidences of rapes taking place in the district. However, there is no recently published data available in this regard.

### 9.4 Economic Migration

Economic migration is a growing social problem in the Mannar district. Mannar had recorded the highest number of migrant workers in the Eastern province. There were 1,201 persons who have migrated for foreign jobs in $2014^{6}$. There are many negative impacts on migration of mothers for foreign employment. When mothers leave aboard for employment grandparents become parents and fathers leave homes to live with newly found partners or wives resulting in families getting destroyed and children getting abundant or neglected. Many children also get dropped out of the school due to lack of supervision and direction by parents. In addition, there were many, though data are not available, have left Mannar district searching for employment.

### 9.5 Children's Homes

In Sri Lanka the Probation Service looks after children and visits homes once every 3 months. It is government policy to keep children within a family setting wherever possible. There are 5 children's homes in the Mannar district supposedly catering for children between the ages of $6-18$. The government pays Rs. 500 per child monthly in arrears except for boys over the age of 16 who only get Rs. 300. At most times the payments had been delayed for years resulting in the homes being dependent on external funding sources such as foreign donors.

The homes require the children to be returned to the parents once they reach 18 years of age. However, there were many incidences where children refused to leave the children's home due to fear of early marriage proposals from parents, sending them for work at homes or are expected to carry the burden of running the home. There were cases of children committing suicide due this.

### 9.6 Sports

This Five Year Plan proposed to develop and popularize sports in the district. Apart from the obvious health benefits, sport as a recreational pastime would be much valuable for the society as it would reduce the stress of youth, reduce domestic violence and use of alcohol by the youth. The following priorities have been identified by the district for the sports development in the district. They are:

- Establishment of different types of standard play grounds
- Capacity building for sports officers
- Coaching programme
- Sports clubs development

### 9.7 Problems, Issues and Challenges

The main problems, issues and challenges faced by the social services sector are presented below:

[^6]| Area | Problems, issues and challenges |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Output by the Govt. agencies | Most Govt. agencies are lethargic and inefficient | Lack of focus on purpose and results delivery by Govt. agencies | Politicisation of political influences | Lack of accountability and responsibility | Lack of customer focus \& unhealthy attitudes by officials |
| Community participation and understanding | Lack of participation by the community | Backward attitudes by the community | Lack of knowledge and understanding on their rights \& Govt's obligations to serve them | Inadequate representation of women in decision making/ women participation | Weak demand for results delivery by the community |
| Policies and delivery mechanisms | Weak implementation of law, policies and delivery mechanisms | Out dated policies, rules, regulations and systems | Focus on processes rather than results delivery | Ambiguity on the functional areas between various levels \& structures of the Government | Budgetary constraints \& timeliness of release of funds |

To address the above problems, issues and challenges, the social sector has identified many strategic initiatives under the following key result areas.

1. Improved habitable environment
2. Social Services Delivery
3. Community Empowerment

There are many initiatives been identified under above key result areas to be implemented in the next five year period and are being presented in this results framework and the action plan.

## 10. Strategic outcomes and future outlook

The five year development plan aims at a higher community satisfaction in relation to the delivery of social services in in the district. The main outcomes expected to be achieved during the next five years are as follows:

1. Improved living conditions in the district with major proportion of households having access to amenities and facilities such as water, electricity, communication, road access, housing etc.
2. Improved satisfaction of the community on social service delivery
3. Increased social security of the community
4. Improved performance by the local authorities
5. Improved safety and security
6. Sustained reduction in child abuse, women abuse and sexual harassments as well as protection of their rights

The Five Year Plan focused on the following results which can contribute to the development of the social infrastructure of the district.

| Indicators | Baseline | Targets |
| :--- | :---: | :---: |
| $\mathbf{2 0 1 5}$ | $\mathbf{2 0 2 1}$ |  |
| 1. Road-Area free of damages (sq. MT) | TBD | Zero |
| 2 Houses with source of safe drinking water | $62 \%$ | $99 \%$ |
| 3. Houses with proper toilets | $75.8 \%$ | $100 \%$ |
| 4. Percentage houses using kerosene as main source of lighting | $22.1 \%$ | $5.0 \%$ |
| 5. Requirement for permanent housing | 5,334 | 1,000 |
| 6. Roads to be upgraded - A\&B Class (Km) | 21.9 | Zero |
| 7. Roads to be upgraded - B Class (Km) | 15.8 | Zero |
| 8. Roads to be upgraded - C \&D Class (Km) | 71.6 | Zero |
| 9. Roads to be upgraded - Rural roads (Km) | 66.5 | Zero |
| 10. Roads to be upgraded - ACAD roads (Km) | 490.75 | Zero |

## Chapter 13

## Local Government Services

## 1. Introduction

One of the Sustainable Development Goals is the "Sustainable Cities and Communities" which aims at making cities and human settlements inclusive, safe, resilient and sustainable. In this regard, the SDG specifies the following indicators.
i. Proportion of urban population living in slums, informal settlements or inadequate housing
ii. Number of deaths, missing persons and persons affected by disaster per 100,000 people
iii. Direct disaster economic loss in relation to global GDP, including disaster damage to critical infrastructure and disruption of basic services
iv. Annual mean levels of fine particulate matter in cities (population weighted)
v. Number of countries with national and local disaster risk reduction strategies

The achievement of this SDG and the related indicators discussed above is a responsibility of all local authorities and the Ministry of Provincial Councils and Local Government. The consultations with the stakeholders and review of literature revealed that the Ministry is taking many initiatives to ensure that the capacity of local authorities are strengthened for them to be able to serve the communities in an effective and efficient manner and that they are self-sustainable. A few important initiatives undertaken by the Ministry includes the following.
i. Human resource development - Training, exposure visits and special courses (e.g.

Diploma courses) are offered to the staff of local authorities and provincial councils. There is a separate training institute "The Sri Lanka Institute of Local Governance (SLILG)" is being operated by the Ministry in this regard.
ii. Infrastructure development - Funding from the central government is provided to the local authorities to construct and upgrade selected infrastructure of the local authorities
iii. Provision of funding - Funding is provided under various loan schemes operated by the Local Loans and Development Fund (LLDF).
iv. Promoting the best performing local authorities. E.g. Swarnapurawara Presidential Award scheme held on an annual basis.
v. Advisory support - The ministry guides and advise all the provincial councils and local authorities on a regular basis as well as on special matters/special requests
vi. Revision and formulation of policies, strategies, rules, regulations and other legislations in relation to local governance
vii. Budgetary support to local authorities (for recurrent expenditure of local authorities)

## The Vision and Mission of the Ministry of Provincial Councils and Local Government

are:
"A Provincial and Local Government System which is effective, collaborative, innovative and accountable and provides high quality services in the communities"
"The Ministry works for the betterment of all communities through partnerships with provincial councils, local governments and other organizations to:

- Formulate policies and legislations to develop the provincial and local government system;
- Enhance the capacity of provincial and local government to exercise their powers and provide services; and,
- Ensure public interests are reflected in the provincial and local government system."

## 2. Local Authorities in Mannar district

The Mannar district has 6 local authorities. They are; Mannar Urban council, Mannar Town Pradeshiya Sabha, Nanaddan Pradeshiya Sabha, Museli Pradeshiya Sabha, Madhu Pradeshiya Sabha and Manthai West Pradeshiya Sabha. The areas of responsibility are divided into three areas. They are: Public Health and safety, public utilities and thoroughfares.

Their primary functions are in relation to the above areas of responsibilities are as follows.

1. Local area development - This include two main areas. They are: (a) local development planning, policy development, waterfront development, town centre development, property management and development, and (b) enabling housing development through existing and future spatial priority areas.
2. Parks, Community and lifestyles - This include: local parks, Libraries, community facilities, community services and grants, arts and cultural facilities, activities and community events, sports facilities, recreation centres, housing for children and elderly people
3. Environmental management and regulation - This includes building and maintaining the storm water systems, improving the quality of water in streams, ponds and harbours, waste
collection, including recycling and reducing waste to landfill, protecting biodiversity, undertaking regulatory activities such as resource and building consents, dog control, pest control, food licensing and water supply.
4. Water supply and wastewater - This includes building and maintaining the network of pipes, dams, bowsers and pumps required to provide a safe drinking water and sewerage management.
5. Thoroughfares - Building and maintaining all local and main arterial roads, footpaths, cycle paths, bridges, carparks, culverts etc. and providing public infrastructure facilities for transport services such as bus stations, bus stops and transport safety, education and enforcement.

## 3. Vision and Mission

The Vision and Mission of Local Government sub-sector are:
"Green, liveable and prosperous cities, sustaining healthy and engaged communities"
"We promote and support health, wellbeing, safety and resilience of our communities, protect our heritage and conserve water and other natural resources of our environment"

## 4. Present performance

Though there were no detail data available with regard to the performance by local authorities, the stakeholder and public consultations revealed that the performances by the local authorities are not satisfactory. The main concerns highlighted at the consultations in relation to the performance of local authorities are as follows.
i. Lack of infrastructure development by the local authorities - These includes roads, parks, drainage infrastructure, ponds, sports grounds and markets etc.
ii. Deteriorating cleanliness of the cities and townships
iii. Increasing environmental pollution
iv. Pollution of water bodies due to dumping
v. Poor customer service by local authorities
vi. Lack of focus on results (Outcomes and Outputs) as well as their roles and responsibilities
vii. Political interference on day to day operationalization of local government functions
viii. Political party differences resulting in work delays, revisions and cancellations
ix. Waste of resources and ineffective, inefficient management

## 5. Strategic outcomes and future outlook

The five year development plan aims at a higher community satisfaction in relation to the delivery of local government services of all local authorities in the district. This has also been identified by the Ministry of Provincial Councils and Local Government as one of the main outcomes that need to be achieved by all the local authorities. The main outcomes expected to be achieved during the next five years are as follows:

1. Improved customer satisfaction on services by the local authorities
2. Improved cleanliness of all local authority areas
3. Improved connectivity by the communities (increased road access/thoroughfares)
4. Improved public health
5. Sustained reduction in water salinity

The Five Year Plan of the local governance sector focuses on the following targets which can contribute to the enhancement of lifestyles of the community of the district.

| Indicators | Baseline <br> 2015 | Targets <br> $\mathbf{2 0 2 1}$ |
| :--- | :---: | :---: |
| 1. Level of customer satisfaction | $50 \%$ <br> (Estimated) | $\mathbf{9 5 \%}$ |
| 2 Level of access to markets (cities) by the community (in <br> relation to the quality of passage and time) | TBD | $\mathbf{1 0 0 \%}$ |
| 3. Level of cleanliness of cities and townships (Score as per the <br> cleanliness index to be developed) | TDB | $\mathbf{1 0 0 \%}$ |
| 4. Level of health of communities - free of incidences of <br> epidemics resulting deaths | TDB | Zero |
| 5. Level of salinity of water in the ponds | TDB | $10 \%$ |
| 6. Number of deaths due to travel accidents | 12 | Zero |

## SECTOR: Local Government Services

## SUB SECTOR: Services of Local Government

THRUST AREA - I: Increased Service Delivery to Public
KEY RESULT AREA - 1: Increased Service Delivery to Public

| OUTPUT 1.13: Improved upgrades and upkeep of the lagoon protection bunds and drainage systems (Reduce salinity) |  |  |  |  |  |  |  |  |  |  |  |
| OUTPUT 1.14: Improved access to public amenities in the district | No. of amenities (excluding roads, bus halts and daily markets) | No. | $\begin{aligned} & 200(2015) \\ & 327 \text { (2016) } \end{aligned}$ | 421 | 421 | 421 | 421 | 421 |  |  |  |

## Chapter 14: <br> Monitoring Plan

## 1. Introduction

This section describes the proposed monitoring plan for the district to ensure that this plan is effectively implemented and the planned outputs are delivered efficiently and effectively and the expected outcomes are achieved. The proposed monitoring plan will have three tiers originating from the individual agencies and to the cluster levels and finally to the district level as depicted below.

| Level of |  |  |  |
| :---: | :---: | :---: | :---: |
| Monitoring |  |  |  |
| District level | District level Monitoring: | District Level Monitoring: | District Level Monitoring: |
|  | Primary Sector cluster/s | Secondary Sector cluster/s | Tertiary Sector cluster/s |
|  |  |  |  |
| Department/ Agency Level | Agency level Monitoring - Monitoring by each Department and Agency |  |  |

The description of each of the monitoring levels and meetings are presented below.

## 2. Monitoring at the District Level

Different monitoring meetings will be held at the district office for each of the sectors or sub-sector clusters. (E.g. Primary Sector Cluster 1 - DoA, DoAS, Irrigation, Environment etc., Primary Sector Cluster 2 - Livestock, Fisheries, Irrigation, Environment etc.) This meeting will be chaired by the DS or DD-Planning. Participation of officials from each of department or agency is essential but DS could also summon any additional officers to participate at this meeting. The agencies that are included in each cluster or sub-cluster will be determined by the DS in consultation with officers of the respective agencies directly falling into the respective cluster. This district level monitoring meeting will be held on a quarterly basis, at the end the month following the quarter. (E.g. 1st Quarter meeting on or before 30th April, 2nd Quarter meeting on or before 30th of July, 3rd Quarter meeting on or before 30th of October and 4th Quarter meeting on or before 30th of January). The monitoring reports in relation to results (RFW but not the activities) produced at the agency level would be presented at this meeting. A secretary would be appointed from the officials who are participating or a designated officer by the DS would keep the minutes of the meeting.

## 3. Monitoring at the Agency Level

Each department/agency (E.g. RDHS, DoA, DoE, CEB, RDA, DoI, RDA, NWSDB, CAA, Police etc.) would have their own monitoring meetings chaired by head of the department and held once a month. The
extent of delivery of identified outputs and achievement of expected outcomes are to be reviewed at this meeting along with level of budget utilization, extent/level of activity completion and other challenges, issues and problems encountered in delivering the outputs/services. The monitoring data sheet would be the same as that of RFW and Activity Plan where actual are shown by inserting a line below the line where targeted are shown. Annual target column will be segregated to show data for each quarter. Please refer to the example of formats given below. There will be some outcomes that cannot be reported on a monthly basis and those cages would be left blank until such time the outcome performance data are available. (E.g. Pass-rates of $A / L$ and $O / L$ students can only be reported annually). Except for this type of items, all other cages should have data reported so that the monitoring mechanism would be effective and necessary actions could be discussed and implemented to improve the situation.

## 4. Role of District Secretary in Monitoring

District Secretary (DS) is the principal officer who needs to ensure the wellbeing of the general public living in the district. Therefore, monitoring to ensure effective rendering of services by Government Institutions has become one of the key duties of the DS. Hence, it is important for DS to ensure that the services are effectively and efficiently delivered and intended results are achieved. Accordingly, in relation to the monitoring of the implementation of this five year plan, the DS will be responsible for the following roles.

- Effective institutionalization and operationalization of the district level monitoring;
- Chair of the district level quarterly monitoring meetings;
- Ensure that the intended results are effectively achieved;
- Ensure required links and coordination between agencies and sectors take place and they are effective;
- Ensure all required stakeholders are participated in the monitoring activities and meetings;
- Provide appropriate solutions for issues and problems in the implementation to ensure all activities are implemented as planned;
- Provide necessary guidance and direction to the DS staff and other agencies (if required);
- Summon and conduct of quarterly monitoring meetings;
- Ensure participation of DS officials (E.g. DD-Planning) in the sectoral level monitoring meetings and also agency level meetings if required;
- Ensure that the required monitoring reports are submitted and tabled at the monitoring meetings;
- Ensure that the periodic reporting to other stakeholders (E.g. National level Organizations and donors); and
- Any other ancillary activities which are relevant to monitoring of the five year development plan.

## 5. Role of DD - Planning on Monitoring

DD-Planning is the officer responsible for providing the leadership for the monitoring function on behalf of the District Secretary (DS). The monitoring of effective rendering of services by Government Institutions has become one of the key duties of the DD Planning. Accordingly, in relation to the monitoring of the implementation of this five year plan, the DD-Panning will be responsible for the following roles as well.

- Effective implementation and operationalization of the district level monitoring;
- Chairing of the district level quarterly monitoring meetings, in the absence of the DS;
- Ensure that all officers who require to be participating at the monitoring meetings
are participated and required reports with all relevant data are circulated on time;
- Ensure required links and coordination between agencies and sectors take place and they are effective;
- Provide solutions for issues and problems in implementation ensuring that the all activities are implemented as planned;
- Provide necessary guidance and direction to the DS staff and other agencies (if required);
- Summoning and conduct of quarterly monitoring meetings on behalf of the DS;
- Ensure that the periodic reporting to other stakeholders (E.g. National level Organizations and donors); and
- Any other ancillary activities which are relevant to monitoring of the five year development plan.
- Provide / undertake all other relevant and ancillary functions in relation to operationalization of the monitoring mechanism
- Assist the DS in the function of implantation of the monitoring function

## 6. Role of Head of Department on Monitoring

Head of the department is the officer responsible for providing leadership for the monitoring function in his/her department/agency. This officer will be assisted by DD planning of that agency/department. In relation to the monitoring of the implementation of the departmental and sectoral five year plan, the head of department will be responsible for the following.

- Effective implementation and operationalization of the monitoring function in the department;
- Chairing of the departmental monthly monitoring meetings;
- Ensure that all officers who require to be participating at the monitoring meetings are participated and required reports with all relevant data are circulated on time;
- Ensure that required reports to be sent to the DS for district level monitoring are sent on or before the due date (at least 7 days before the scheduled meeting date);
- Ensure required links and coordination between the units of the department takes place and they are effective;
- $\quad$ Provide solutions for issues and problems in implementation ensuring that the all activities are implemented as planned;
- Provide necessary guidance and direction to the Departmental staff and other agencies (if required) for monitoring;
- Summoning and conduct of monthly monitoring meetings for the department/ agency;
- Ensure that the periodic reporting to other stakeholders (E.g. National level Organizations and donors);
- Any other ancillary activities which are relevant to monitoring of the five year development plan at the departmental level;
- Provide / undertake all other relevant and ancillary functions in relation to operationalization of the monitoring mechanism within the department; and
- Assist the DS in the function of implantation of the monitoring function.

6

## UNSUSTAINABLE CROP SECTOR DEVELOPMENT

ANNEX - 2: LIVESTOCK SECTOR - PROBLEM TREE

Increased quality and quantity of meat production (chiken)

Management Frontiers (Pvt) Ltd

## ANNEX - 7: HEALTH SECTOR - PROBLEM TREE

## Inadequate response from higher authorities

## Management Frontiers (Pvt) Ltd

## Ignorance by Relavant Authories

## Management Frontiers (Pvt) Ltd

## ANNEX - 9: SOCIAL SERVICES SECTOR - PROBLEM TREE

ANNEX - 10: LOCAL GOVERNMENT SECTOR - PROBLEM TREE

## ANNEX - 11: TOR OF DISTRICT /PROVINCIAL LEVEL ADVISORY COMMITTEE <br> (Sample Mannar District Advisory Committee)

An institutional arrangement is necessary to carry out and complete the above planning process and obtain the final products. The following arrangements need to be established to produce the desired outputs in time.

## 1. District/Provincial Level Advisory Committee

## 2. Sector Level working Group

## 1. District/Provincial Level Advisory Committee

This a governing body which holds responsibility to produce the desired outputs (above said plans) with in the time frame.

Group members: ( $\mathbf{1 2}$ Members proposed by GA)

1. GA-Chair person
2. Director Planning - Executive Secretary of the Group
3. Deputy Chief Secretary-Planning of North Province - Member
4. Additional GA - Member
5. Assistant Commissioner of Local Government (ACLG)
6. UNDP Representative - Member
7. 8. Divisional secretaries - 05 (Mannar Town, Manthai west, Nanattan, Madhu and Musali)

## Terms of Reference for the District Working Group

| Terms |
| :--- |
| 1.Provide guidance \& advice pertaining to Planning process to the Sector working group |
| 2.Ensure the timely deliverable of the defined outputs according to his TOR |
| 3. Responsible to establish sector (Agriculture/Primary Sector, Industry/Secondary Sector and <br> Service Sector) working groups and ensure the effective functions of the Sector groups |
| 4. Ensure that the updated Sector Level Baseline Data is available to begin the analysis in line <br> with the Key Performance Indicators to set goals /Outcome and targets. |
| 5.Monitoring work programme and approve the monthly progress report and the deliverables <br> produce by working groups |
| 6. Any other technical support to the working groups. |
| 8.................... |
| 9.................... |
| 10............. |

## ANNEX - 12: TOR for SECTOR LEVEL WORKING GROUP (SAMPLE - MANNAR

 DISTRICT)This a working group which holds responsibility to produce the five-year visionary oriented sector development plan within the time frame. Lead Consultant will carry out the process and produce the outputs in line with his/her Terms of Reference.

All the sectors can be categorized under following major three categories.

## 1. Agriculture Sector/Primary Sector

> Agriculture Department
$>$ Animal production \& health Department
> Assistant commissioner agrarian Department
> Irrigation Department
$>$ Fisheries Department
> Department of Divineguma
> Land use planning
2. Industrial Sector/Secondary Sector
> Industrial Department
> Palmyra board
> Industrial Development board
> Coconut Development board
> Cashew Development board
> Tourism Development board
$>$ Export Development Board

## 3. Service Sector

> Education Department
> Health Department
> Electricity/Power \& Energy,
> Telecommunication
> Water Supply and Sanitation/Water Resource Management
> Roads \& Bridges (RDD, RDA)
> Transport Service \& Sustainable Mobility (SLTB, NRTB)
> Sports \& Culture
> Assistant commissioner of local government
> Housing Department
> Environment \& Disaster Management, Costal conservation
> Governance \& Service Delivery: District secretariat office \& All 05 DS divisions (UC, PS, ACCD, Postal, NYSC, Forest, Wildlife)

Therefore, above three major sectors working groups can be established with the following task. Group members:

## Agriculture Sector/Primary Sector (09 Members proposed by GA)

1. Sector Head-Chairperson - Director of Agriculture or Deputy Director of Agriculture
2. Centre Irrigation Engineer - Executive Secretary of the Group
3. Assistant Director Planning of district planning secretariat - As a Representative from the District level working group
4. Sub Sector Heads (from Provincial and Central/District) -

Representative from the selected related Departments: Ex - Animal production \& health, Fisheries Department
5. UNDP Representative - Member
6. National/Lead Consultant - as a Technical Expert
7. Representatives from Divisional Secretariats- As a member and whenever needed
8. Representative from the local government sector (ACLG office)
9. Assistant Commissioner of Agrarian Department - ACAD

## 2. Industrial Sector/Secondary Sector working group (09 Members proposed by GA)

1. Sector Head-Chairperson - Assistant Director of Industrial Development board
2. Department of industrial - Executive Secretary of the Group
3. Assistant Director Planning of Manthai west - As a Representative from the District level working group
4. Sub Sector Heads (from Provincial and Central/District) -

Representative from the selected industrial related Departments (Ex: Palmyra, Coconut board.....
5. UNDP Representative - Member
6. National/Lead Consultant - as a Technical Expert
7. Representatives from Divisional Secretariats- As a member and whenever needed
8. Representative from the local government sector (Related Pradeshiya Sabha of ACLG office)
3. Service Sector (08 Proposed by GA)

1. Sector Head-Chairperson - Assistant Divisional secretary, District secretaries office
2. Department of Health - Executive Secretary of the Group
3. Assistant Director Planning of Musali - As a Representative from the District level working group
4. Sub Sector Heads (from Provincial and Central/District) -

- Representative from the service related Departments (Ex: Education, Telecommunication, Water supply.........)

5. UNDP Representative - Member
6. National/Lead Consultant - as a Technical Expert
7. Representatives from Divisional Secretariats- As a member and whenever needed
8. Representative from the local government sector (Related Pradeshiya Sabha of ACLG office)

## Terms of Reference for the Sector Working Group

| Terms |
| :--- |
| 1.Ensure to produce the sector review framework which provide guidelines to review all the <br> existing document related to sector planning |
| 2.Ensure to produce the review notes which highlights the gap area or new areas of <br> interventions of the sector |
| 3. Ensure that the updated Base line Data are available in line begin the analytical process in <br> time for setting goals / objectives, targets and to define Key Performance Indicators for <br> particular sector. |
| 4. Conduct meetings with relevant stakeholders/communities/target beneficiaries. |
| 5. Validation of draft sector plan in a stakeholder forum |
| 6. Produce working group minutes with Action Points and share with the district level Advisory <br> Committee |
| 7. Participate in the district level forum whenever requested by the District/Provincial Advisory <br> committees. |
| 8.Produce and submit the monthly progress report to the District Level Advisory Committee |
| 9............. |
| 10.......... |
| 11........................ |

## Format of the Review Report

1. Objective
2. Sector vision / mission
3. Type and Duration - (e.g. 5 year plan)
4. Sector Categorization/ Priority
5. Data analysis
6. Justification /analysis report - related issues
7. Planning methodology
8. Consultation/community/stakeholder
9. Innovations /Potential
10. Budget/ resource utilization
11. Implement plan

L2. Risks and assumptions
13. Monitoring Plan
14. Conclusions and Recommendations

## ANNEX- 14: USING VENN DIAGRAM TOOL FOR STAKEHOLDER MAPPING AND CATEGORIZATION

The stakeholders of the education sector are being identified jointly by Students, Parents and Education officers.

## Process

1. Introduce the objective of the exercise
2. Introduce the concept and process
3. Carry out the mapping exercise by using the VENN Diagram tool

4. Categorize the stakeholders
5. Generate the following information by using the following matrix

| Stakeholders | Indicate why <br> there are <br> important <br> stakeholders | What are their Interest <br> (according to your <br> perception) | Any observation |
| :--- | :--- | :--- | :--- |
| Government Authorities |  |  |  |
| 1.Local Authority |  |  |  |
| 2.Provincial councils |  |  |  |
| 3.Divisional Secretariat |  |  |  |
| 4...... |  |  |  |
| 5...... |  |  |  |
| CBOs |  |  |  |
| 1.Farmer Organization <br> 2.Youth Clubs |  |  |  |
| 2.Cattle Breeders Society |  |  |  |
| 2....... |  |  |  |
| 3..... |  |  |  |
| Other CSOs/NGOs |  |  |  |
| 1.Citizen committees |  |  |  |
| 2...... |  |  |  |
| Private Sectors |  |  |  |
| 1...... |  |  |  |
| 2...... |  |  |  |
| Religious Organization |  |  |  |
| 1..... |  |  |  |
| 2..... |  |  |  |
| Political Representation |  |  |  |
| 1.Local Authority level <br> political representation |  |  |  |
| 2.Provincial level <br> political representation |  |  |  |

| 3.National Level Political <br> Representation |  |  |  |
| :--- | :--- | :--- | :--- |
| Cooperatives and |  |  |  |
| Federations |  |  |  |
| 1. SANSA |  |  |  |
| 2. .......... |  |  |  |
| UN Agencies) |  |  |  |
| 1Unicef...... |  |  |  |
| Any other Stakeholders |  |  |  |

## ANNEX - 15: HOW TO DO STAKEHOLDER ANALYSIS?

Once the identification process is completed then one must categorize by using the below matrix. The following matrix shows what information related crop sector need to be collected during the stakeholder consultation process.

| Group | Interests | Problems Perceived | Resources <br> Mandates | Potential Conflicts |
| :--- | :--- | :--- | :--- | :--- |
| Farmer <br> Organizations |  |  |  |  |
| Department <br> Agriculture |  |  |  |  |
| Political <br> Representatives |  |  |  |  |
| Department of <br> Land <br> planning Using |  |  |  |  |
| Department <br> Irrigation |  |  |  |  |

## Columns of a stakeholder analysis may include the following: <br> Group:

- Identify the groups (not individuals) directly or indirectly involved in or affected, positively or negatively, by the development problem and its possible solution. It is vital to include stakeholder groups that are in favour or opposed to a proposed solution. A group in support may contribute to a project's resources if it addresses its problem adequately; a group opposed may use its resources to block or impede project approval or implementation.

## Interests:

- Each group has its own particular interests in relation to the development problem. Interests may reflect possible solutions suggested by groups that are negatively affected by the development problem.

## Problems Perceived:

- Identify each group's perceptions of the difficulties that give rise to, or result from, the development problem. Problems should be stated as negative conditions, and be clear and unambiguous. Avoid identifying the lack of a solution as -the problem. This is discussed in further detail in the next section.

## The Contents of the Problems Perceived Column can be used as inputs to the Problem Tree.

## Resources:

- Financial and non-financial contributions that each group can make in support of or in opposition to a proposed solution. They can be political, legal, human (e.g., volunteer work), financial, non-financial. Examples of non-financial resources: voting, strikes, public opinion, labour force, influence, pressure groups.

## Mandates:

- Formal organizations - such as those that have charters (and mission statements) - have legal or statutory authority to use their resources for specified purposes - perhaps in connection with the central problem.

## Potential Conflicts:

- There could be existing or potential conflicts among groups of stakeholders. (This can be useful to identify assumptions/risks of a plan/project.)

## Interests in a Strategy:

- Once a planning/project strategy is developed, some groups will be strongly in favour of it, while others will be less so, and some will oppose the plan/ project.

## Stakeholder Importance and Influence Matrix

- The stakeholder importance and influence matrix (Figure 6) is another element of the stakeholder analysis, and is a tool used to determine who should be involved in the planning session and how other stakeholders should be engaged in the overall process.

The trainer can explain the matrix and request the participants to identify the stakeholders who fit to each quartile

All the above analysis may allow one to identify the important area /Thrust Ares of a sector perceived by the stakeholders and to identify the problems/issues and risks face by the all stakeholders. Therefore, it is necessary to conduct a stakeholder analysis to identify the problems and the root cause of the problem. Adequate data is needed for identifying the problems and the root causes of the problem.

# ANNEX - 16: THE CONCEPT OF THE OPEN SPACE DIALOG FORUM 

## Rapid Community Consultation Process for updating and deciding the key development Intervention /Results /Thrust Areas identified by the individual sectors

## Objective of the Community Consultation Process

To provide opportunities to the key stakeholders (government staff, community representatives, political representatives, academics, privates and NGO representatives) to participate in a useful social process that enables different individuals and groups, who are affected by an issue or initiative, to enter into dialogue, negotiate, learn, make decisions for collective planning.

## Schematic of Consultations Steps \& Tools

|  | 2.Define the desired outcome of the consultation | Consultation with <br> sector heads |
| :--- | :--- | :--- |
|  | 4.Ensure the that the stakeholders have sufficient capacity <br> to engage fully and effectively in consultation | Free, Prior and <br> informed consent <br> approach |
| forum |  |  |

## Approach

Free, prior and Informed Consent (FPIC) approach will be used to ensure the right of community to participate in the data assessment /appraisal and updating process in ensuring their rights or needs and to give or withhold their consent to activities affecting their well beings.

## Free

Free refers to a consent given voluntarily and absent of "coercion, intimidation or manipulation". Data /Information is transparently and objectively offered to stakeholders and the meetings and decisions take place at locations and times and in languages and determined by the stakeholders. All community members are free to participate regardless of gender, age or standing.

Prior
Prior implies that the sufficient time is provided to understand, access, and analyse data/information on the proposed activity (to ensure that the stakeholders hold the sufficient capacity to engage in the consultation process).
Informed
Informed refers mainly to the nature of the engagement and type of information that should be
provided prior to seeking consent and also as part of the ongoing consent process. Also one should ensure all key stakeholders received sufficient information in time
Consent
Consent refers to the collective decision made by the rights-holders and reached through participatory decision-making processes of the affected peoples or communities. Consent must be sought and granted or withheld according to the unique formal or informal political-administrative dynamic of each community.

## ANNEX - 17: PROBLEM ANALYSIS

It is important to understand the cause -effect relationship to arrange or structure the problems/ issues based on the information or data collected from the stakeholders' consultation meetings/ workshop. The following figure shows how to structure the problems logically by using the cause and effect relationship.

## A Sample sector (Health) Problem Tree

## ANNEX - 18: HOW TO DEVELOP AN OBJECTIVE TREE?

- In the Objectives Tree, what were causes in the Problem Tree become means, and what were effects become ends. The Problem Tree is like the negative of a photograph, while the Objectives Tree is the photograph after it has been developed.
- Objectives Analysis serves to underline the importance of developing a complete and valid Problem Tree. It may be necessary to add objectives if relevant and necessary to achieve the proposed objective, or eliminate objectives that do not seem realistic.

## A Sample sector (Health) Objective Tree

## ANNEX - 19: HOW TO IDENTIFY THRUST AREAS FROM A MISSION STATEMENT OF A SECTOR

Government stakeholders/agencies may define their sector thrust areas based on the organizational Vision, Mission and Mandate. The following matrices show how a sector Thrust Areas and Results Areas were defined.

Figure 1: Thrust Areas of Health Sector ${ }^{7}$

| Sector/ ORGANIZATION | DOMAIN | PURPOSE | THRUST AREAS | RESULTS AREAS |
| :---: | :---: | :---: | :---: | :---: |
| Health | Quality of Life | Wellness/Health | Curative Care Services. | Improved emergency care services |
|  |  |  |  | Improved Investigative services |
|  |  |  |  | Improved blood bank services |
|  |  |  |  | Improved medico-legal service |
|  |  |  |  | Improved quality of general health care services |
|  |  |  | Preventive <br> Healthcare Services. | Mother and Child Care Communicable Diseases Non-Communicable Diseases $\qquad$ |
|  |  |  | Promotive <br> Healthcare Services. | ........................ |
|  |  |  | Institutional Capacity Development | ............................... |
|  |  |  | Good Governance | ................................. |

[^8]Figure 2: Thrust Areas of Department of Agriculture of Eastern Provincial Council ${ }^{8}$

| Sector/ ORGANIZATION | DOMAIN | PURPOSE | THRUST AREAS | RESULTS AREAS |
| :---: | :---: | :---: | :---: | :---: |
| Agriculture | Quality of Life | Improve Living Standard | Production and Productivity (Yield) | Increased production of improved seeds and planting materials. |
|  |  |  |  | Increased paddy production. |
|  |  |  |  | Increased OFC production (6 OFC Crops - Maize, cowpea, ground nut, green gram, chilly, red onion) |
|  |  |  |  | Increased fruit production. |
|  |  |  |  | Increased vegetable production and off season cultivation. |
|  |  |  |  | Conserved Soil and water. |
|  |  |  |  | Environmental conservation and protection |
|  |  |  | Profitability \& value addition | Post-harvest technology and agro based industry. Value addition |
|  |  |  | Institutional Capacity | ......... |
|  |  |  | Good Governance | ...... |

[^9]
## ANNEX - 20: HOW TO DEVELOP RESULTS FRAMEWORK THE OBJECTIVE ANALYSIS.

Based on the objective tree, identify the respective outcomes to be achieved. The outcomes should refer to the core problem or the need of the clients and the stakeholders.
E.g. for Outcomes:

1. Reduction of water borne diseases
2. Reduction in other diseases (various)
3. Increase production and productivity (yield) of paddy and other crops
4. Increased income from tourism
5. Increased tourist arrivals
6. Increased employability of university graduates /Trained vocational personnel
7. Increased economic activities in the district
8. Increase industrial production in the district
9. Increased production and yield of plantation/commercial crops
10. Increased fish catch/fish production

At most times, the solutions that could be provided/offered for factors that cause the problems will be the outputs.
E.g.

Problem - High incidence of water borne diseases
Causes - Lack of access to safe drinking water, Poor sanitary practices due to lack of awareness on hygienic and sanitation practices among the community.

Accordingly the outcomes and outputs that can be included in the results framework would be as follows:

Outcome: 1. Sustained reduction of water borne diseases
Outputs: 1. Increased access to safe drinking water
2. Increased awareness on hygienic and sanitation practices among the community

Salient feature in the above outcome and output would be that the outcome is beyond the control of the officials but the outputs are under the control of the officials. However, the officials are accountable for the outcomes as achieving the outcome is the very purpose of the intervention/project. It should also be noted that the officials are responsible for the output while they are accountable for outcome/s.

## ANNEX - 21: THE GUIDELINES FOR VALIDATION

## Frist level of Validation- Validation of Sector Development Plan

This validation process will be taken place when the sectors plans have been developed.

## Participants of the validation Forum

Local Authority political representatives, divisional level CBOs/CSOs, Targeted communities, private sector and NGO sector representatives and Government staff from Provincial Councils, Local Authorities and district and Divisional level government staff

## Validation process

- Free, Prior and Informed approach will be used. Thus, a summary of district plan need to be shared before the validation process so that the Dialogue forum could be taken place.
- The guidelines of Open Space dialogue forum will be strictly followed in order to avoid foreseeing conflict arises during the discussion session
- All the inputs/comments will be recorded and summarized in a plenary session and will be validated.
- Incorporating the comments into the plan

## Final level of Validation: Validation of District /Provincial Development Plan

This validation process will be taken place when the district/provincial level plans have been developed.

## Participants of the validation Forum

Political Representatives/Members of Parliament, District level CSOs, Private Sectors and NGO sector representatives and Government staff, members from Provincial Councils, Local Authorities and district level staff are identified as participants for this validation process.

## Validation process

- Free, Prior and Informed approach will be used. Thus, a summary of plan will be shared before the validation process so that the Dialogue forum taken place.
- The guidelines of Open Space dialogue forum will be strictly followed in order to avoid foreseeing conflict arises during the discussion session
- All the inputs/comments will be recorded and summarized in a plenary session and will be validated.
- Incorporating the comments into the plan

## Disseminating the Final Version of the plan

The final version of the plan will be shared among the stakeholder before publishing.

# ANNEX - 22: SECTOR DEVELOPMENT PLAN-DETAILED ANALYTICAL REPORT- FORMAT 

## Example Sector: Agriculture Sector

Contents of the Analysis
List of Tables
Abbreviation
Executive Summary

1. Background
2. Vision, Mission, Mandate, and Policy of a sector
3. Situation Analysis and Review of Present Performance
4. Problems and problem Analysis
5. Strategic Development Results (Outcomes and Outputs)
6. Sector development Plan
