MONROVIA, LIBERIA, DECEMBER 2011.

Statement of Publication

The Liberia Bulletin of Statistics presents is an official bi-annual publication of the Liberia Institute of Statistics and Geo-information Services (LISGIS) and presents statistics of the overall performance of the Liberian political, economic and social environment.

The bulletin includes social, demographic and economic statistics disaggregated by county, urban and rural, age and sex in most instances. LISGIS Departments of Statistics, Dissemination and National Coordinating Secretariat through coordination with members of the National Statistical System have several data which underpins these official statistical releases. To this note, LISGIS welcome request for further information and feedback. Stakeholders' voice of interest can improve future publications.

This publication is available on LISGIS website, CD – ROM and handy hardcopies. For additional information, clarification or feedbacks please contact the following:

The 2011 Liberia Bulletin of Statistics was prepared under the overall umbrella of the 18 members Ministries and Agencies of the National Statistical System (NSS) coordinated by LISGIS through its secretariat for coordinating The National Strategy for the Development of Statistics. LISGIS Department of Dissemination through its Principal Analyst Yusuff Sarnoh and Research Officer Rudi Vinton and UNDP technical representation through Research Associate Wellington Jah and MDGs and Development Information Specialist Abdulai Jalloh coordinated the technical compilation of the Liberia Bulletin of Statistics – 2011.

It was prepared under the overall guidance of Dr. T. Edward Liberty, Director General, LISGIS, Mr. Francis Wreh, Deputy Director of Statistics and Mr. Johnson Q. Kei, Deputy Director, Department of Dissemination. The joint NSDS working team validated the data.

We acknowledge the overall materials and logistical support provided by UNDP through its Strategy and Policy Unit. We also recognized the contribution of the African Development Bank through its technical arm Avo Njosa for the advisory role to this publication.

The NSDS joint working team comprised key staff from various units of statistics across the following line ministries and agencies:

Ministry of Public Works, Ministry of Finance, Central Bank of Liberia, Ministry of Planning and Economic Affairs, Ministry of Commerce and Industries, Ministry of Education, Ministry of Internal Affairs, Ministry of Labour, Ministry of Transport, Ministry of Health and Social Welfare, Ministry of Agriculture, Bureau of Immigration and Naturalization, Ministry of Gender, Liberia Water and Sewer Corporation, Liberian Refugee Repatriation and Resettlement Commission, the University of Liberia and Civil Service Agency.

Foreword

Timely and reliable statistics are considered essential for evidence-based policy or decision-making and for better support to policy implementation, monitoring progress and evaluation of outcomes and impacts of development initiatives such as the Poverty Reduction Strategies (PRSs), County Development Agenda (CDA) and the Millennium Development Goals (MDGs). These initiatives have accordingly resulted in an unprecedented increase in demand for statistics as policy makers and other stakeholders seek information to improve on national and international developments. Critical to achieve development results is the ability to measure and closely monitor progress. This is in line with the commitment made by developing countries, including Liberia as will be seen in the coming years, when the country will fully be involved in managing for results.

Lack of data availability continues to be one of the major challenges to successful implementation of development programs as monitoring becomes skewed while results had been in most instances far from actuality. It is expected that this second publication will respond to data needs of stakeholders and other international initiatives aimed at promoting economic and socio-development to which Liberia has committed herself. Measurement makes management easier.

The joint collection and sharing of information among actors in Liberia National Statistical System to ensure this publication is produced signals the level of progress made in coordinating statistics in Liberia as outlined in the National Strategy for Development of Statistics (NSDS). The improvement is expected to lead to better monitoring of development results over the coming years as Liberia drives to middle income status.

The first post conflict issue was to set the pace. The level of improvement and coordination within the NSS explains the collaboration in producing a National Dissemination Policy upon which this issue and all other future issues will be principled. We are confident that this year bulletin of statistics and its related databases, from which it is generated, will become key repositories for providing development information across Liberia. It is therefore incumbent upon all data users and providers to act in accordance with the National Data Dissemination Policy to ensure Liberia fill data gaps to enhance its positioning nationally and worldwide.

General Note

The statistics presented in this publication are as far as possible in accordance with International recommendations and definitions. In any instances where there is deviation from standards, footnotes are indicated and further explanations are provided.

I. SOCIAL AND DEMOGRAPHIC INDICATORS

Data presented in this section, are derived mainly from the following publications: Liberia National Population and Housing Census (NPHC) 1984 and 2008. Liberia 2010 Labor Force survey¹ and the 2010 Liberia school census report. Data presented generally relate to the public (official) and private (independent) as well as community and Missions schools (Church own Borden schools). The levels of schooling are categorized into Primary, Junior High and Secondary schools in most cases. The indicated years refer to the beginning of school year. In most instances the statistics are disaggregated by county, major districts, sex and age distribution.

Population by age groups

In most instances three age groups are used in order to highlight the proportion of active population vis-à-vis the dependant population. Population aged 15-64 is the number of people who could potentially be economically active, excluding children. This publication group ages by 5 years to strike the effect of age differences by sex and county.

Economically active population

The economically active population comprises all employed and unemployed persons (including those seeking jobs for the first time). It covers employers, persons working on their own account, salaried employees, wage earners, unpaid family workers, members of producers' co-operatives and members of the armed forces.

Life expectancy, Crude birth and death rates

Life expectancy at birth is the average number of years a newborn infant would live if prevailing patterns of mortality of the total population at the time of his/her birth were to stay the same throughout his/her life. Crude birth and death rates represent the number of live births and the number of deaths respectively per 1000 people. Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (postnatal cessation of vital functions without capability of resuscitation). This definition excludes fetal deaths.

Net reproduction rate

The net reproduction rate is the average number of daughters that would be born to a woman if she passed through her lifetime conforming to the age-specific fertility and mortality rates of a given year. This rate is similar to the gross reproduction rate but takes into account that some women will die before completing their childbearing years.

Total fertility rate

The total fertility rate is the average number of children that would be born per woman if she experiences no mortality and were subject to a given set of age-specific fertility throughout her lifetime.

Teaching Staff at specific level

Teachers are defined as persons whose professional activity involves the transmitting of knowledge, attitudes and skills that stipulated in formal curriculum programme to students enrolled in a formal educational institution at specific level (primary, secondary or tertiary).

Student enrolment at specific level

First level student enrolment is the number of pupils enrolled at the primary level of education, considering boys, girls and by county regardless of age. Second level student Enrolment is the total number of students enrolled at

¹ The 2010 Labour Force Survey report is available and use in major publication and pending official launch after the 2011 Presidential election. The importance to this launch center around the unveiling circumstances and importance of this publication since the establishment of Liberia as a country.

the secondary level of education, considering boys, girls and by county regardless of age.

Pupil-Teacher ratio

Pupil-teacher ratio is the average number of pupils (students) per teacher at a specific level of education in a given school-year.

II. ECONOMIC STATISTICS

This section provides information on national accounts. National accounts data provide essential information on the economic performance of in terms of growth and structure of output, investments and savings. National accounts data are still being published by the World Bank and IMF and by the Central Bank in some instances using the 1993 System of National Account (SNA).

Gross Domestic Product (GDP)

GDP measures the total final output of goods and services produced by a national economy within a year, excluding provisions for depreciation. When all the components of GDP are valued at current prices in the market at the time and does not takes inflation into account, they are referred to as **nominal gross domestic product or GDP at Current prices**. The production of goods and services separate from any changes that may occur in the economy during year is **GDP at constant prices or Real GDP**

GDP by kind of economic activity (by sector)

GDP by sector gives value-added by the broad categories of the ISIC classification. Value added is evaluated at basic prices or factor cost or at producer prices depending on the current practice in the country. Data is provided at current prices and in terms of growth rates over the previous year based on data at constant prices.

Expenditure on GDP

General Government final consumption General Government final consumption expenditure comprises all current expenditure for purchases of goods and services by all levels of government, as well as capital expenditure on national defense and security.

Private final consumption

Household final consumption expenditure represents the final consumption of households and non-profit institutions. It includes imputed rent for owner-occupied dwellings but excludes purchases of dwellings and it also includes any statistical discrepancy. Gross capital formation consists of gross domestic fixed capital formation plus net changes in the level of inventories.

Exports and imports of goods and services

Refer to the value of goods and non-factor services provided to or from the rest of the world. They do not include receipts and payments for factor services such as investment income, interest and labor income. The data are generally estimated on the basis of foreign trade statistics and are not directly comparable with those from the balance of payments.

Harmonized Index of Consumer

A list of the final costs paid by consumers for items in a basket of common goods. The Harmonized Index of Consumer Prices (HICP) is produced to help measure inflation and to guide government in the formulation monetary policy. The index tracks the prices of goods such as food and non-alcoholic beverages, alcoholic beverages, tobacco & narcotics, clothing & footwear, housing, water, electricity, gas, other fuel etc taken from Monrovia prices.

Key Agricultural production

The agricultural production is based mainly on information from the online database of the Central Bank of Liberia (CBL) and on listings (commodity basis) prepared by the Ministry of Agriculture. The five major crops produced by the country are obtained by calculating the average yearly production of each crop produced by metric tons.

External Trade

International trade is the exchange of goods and services between countries. This type of trade gives rise to a world economy, in which prices, or supply and demand, affect and are affected by global events.

III. FINANCIAL AND MONETARY STATISTICS

Data in this section are mainly gathered from the Central Bank of Liberia, Ministry of Finance and the IMF.

Money supply

Comprise transferable deposits and currency outside deposit of banks.

Net foreign assets

Net foreign assets equal the sum of foreign assets, less the sum of foreign liabilities of monetary authorities and deposit money banks.

Exchange rates

Exchange rates are expressed in national currency unit (Liberian Dollars) per US dollar unit and are reported as end of period and period averages of market exchange rates and official rates. The market rate is defined as the rate determined largely by market forces; and the official rate is determined by the authorities.

Inflation

Measured the annual percent changes in Consumer price index. Consumer price index (CPI) shows the cost of acquisition of a basket of goods and services purchased by the average consumer. Weights for the computation of the index numbers are obtained from household budget surveys. CPI data are provided by the national statistical systems, mainly by the national bureau of statistics or Central banks.

External Debt

External Debt (total outstanding debt) is the amount, at any given time, of disbursed and outstanding contractual liabilities of residents of a country to non-residents to repay principal, with or without interest, or to pay interest with or without principal. It is the sum of public and publicly-guaranteed short and long-term debt, private non-guaranteed short and long-term debt and the use of IMF credit.

Domestic credit

Domestic credit includes all domestic assets of the banking system. It is the sum of claims on the central government (net), on official entities and the private sector. Credit to the private sector is shown separately but as a subset of domestic credit.

IV. Millennium Development Goals:

In September 2000, leaders from 189 nations agreed on a vision for the future: a world with less poverty, hunger and disease, greater survival prospects for mothers and their infants, better educated children, equal opportunities for women, and a healthier environment; a world in which developed and developing countries worked in partnership for the betterment of all.

This vision took the shape of eight Millennium Development Goals, which provide a framework for development planning for countries around the world, and time-bound targets by which progress can be measured.

The eight MDGs range from halving extreme poverty to halting the spread of HIV/AIDS and providing universal primary education, all by the target date of 2015. The individual goals are as follows:

- Eradicate extreme poverty and hunger
- Achieve universal primary education
- Promote gender equality and empower women
- Reduce child mortality
- Improve maternal health
- Combat HIV/AIDS, malaria and other diseases

- Ensure environmental sustainability
- Develop a global partnership for development.

Liberia MDGs indicators were gathered from LISGIS through various government agencies responsible for ensuring the goals are achieved.

Introduction

The 2011 Liberia Bulletin of Statistics which is the second edition published since Liberia post-crisis is a result of joint efforts by various line ministries and agencies, including our international partners who were instrumental in providing socioeconomic data on various sectors of the country. The Liberia Bulletin of Statistics is meant to provide key national data that could be used by policy makers, researchers, etc., and to heighten data providers, producers and users about the essentially of statistic to development in Liberia.

Previously, data limitations were immense while ministries and agencies of government in Liberia provided individual disharmonized data thus lacking credibility for policy making. The current collaboration of the NSDS sector institutions has greatly improved the collection, validation and publishing of national data.

The data in this issue of the Liberia Bulletin of Statistics are arranged mostly for the year 2005 to 2011. However some data are available for periods before the years stipulated. The bulletin is published in one volume consisting of general notes and summary tables.

The summary tables are presented in sections and comprise demographic data such as population size, labor, gender dimension, education and health; economic data including external trade; monetary statistics and inflation; Millennium Development Goals; and finally other data such as transportation, water production and consumption, fire disaster, accident, crime and communications.
