

Why do we (not) use the PC or Internet?

Use of PC /Internet

Purpose of PC / Internet use

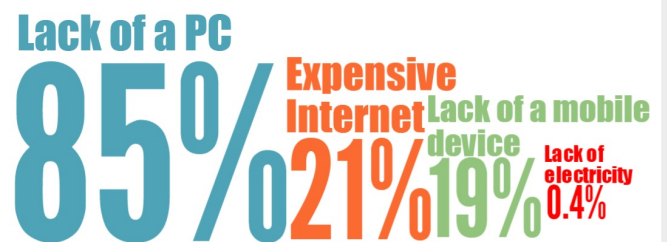

Searching information about the activity of central and local public authorities holds a share of only 11%, while governmental web pages have even less – 8%. Less than 40% of respondents use these services frequently or very frequently.

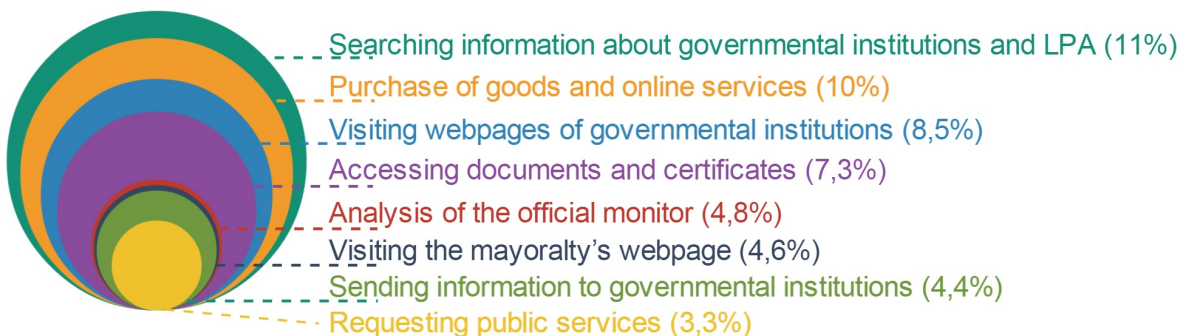

Main causes for the lack of a personal computer at home

Main causes for the lack of internet access at home.

The Internet/computer is perceived as device for leisure activities

This survey of public opinion was carried out by the Centre for Sociological Investigations and Marketing "CBS-AXA" on a sample of 1094 people (56,6% women and 43,3% men), residents of 30 villages, communes and towns that are beneficiaries of the Joint Integrated Local Development Programme. The survey was conducted during April 15-28, 2014 and has a margin of error of +/- 3%.
