## PROJECT BACKGROUND

Electoral support and capacity development are part of UNDP's democratic governance assistance worldwide, through which UNDP helps nations build democratic frameworks to improve representation, accountability, and transparency for the benefit of citizens.

The long-standing partnership between UNDP Moldova, the Central Electoral Commission (CEC) and the Centre for Continuous Electoral Training (CCET) resulted in the establishment of strong professional institutions, able to provide "transparent and professional electoral management", as attested by OSCE/ODIHR Observation Missions<sup>1</sup>. UNDP Moldova undertook solid steps in addressing the key vulnerabilities in the electoral process through the "Improving the quality of Moldovan democracy through parliamentary and electoral support" Programme (July 2012 – July 2017), that helped the CEC to apply a comprehensive strategic approach towards improving the electoral processes, engaging with other Government institutions with respect to the data quality assurance and sharing. The CEC, with UNDP support, managed to bring the Moldovan electoral process to an advanced level through the development and use of the modern and innovative State Automated Information System "Elections" (SAISE). This system represents a digital transformation tool that enables the electoral management body to administer electronically multiple tasks of the electoral process and to improve the accuracy of data in the State Register of Voters (SRV) through the data exchange with the State Register of Population (SRP).

However, as previous electoral cycles demonstrated, the capacity of the Central Electoral Commission alone did not provide for its credibility, nor a visible advancement of the integrity of the electoral process. The overall low trust of Moldovan citizens in public institutions was affecting the CEC, with a detrimental impact on the credibility of the institution and the truthfulness of the electoral process.

Following the 2014 Parliamentary and the 2015 General Local Elections, three key challenges were identified based on national and international electoral assessments. First, to have a more accurate SRV, the quality of data needed to be improved by reengineering the Civil Status Service systems, fully developing the Address Register and modernizing the residence registration process. Secondly, data exchange needed to be facilitated by developing decentralized population data registers which, following the concept of interoperability, would be accessible through the governmental data exchange platform MConnect. Third, the transparency and accuracy of the data generated during the electoral process had to be enhanced to increase voters' trust.

The impressive results achieved and the need for ensuring the sustainability of the previous interventions, confirmed by the UN Needs Assessment Mission (NAM) in 2016 (composed of representatives of the UN Electoral Assistance Division in New York and the UNDP/EC joint task force in Brussels), led to the elaboration and initiation of the next phase of the UNDP electoral assistance "Enhancing democracy in Moldova through inclusive and transparent elections" Project. The Project had a primary goal to extend and further enhance its support to stakeholders in implementing the new legal frameworks, as well as the technical infrastructure, to develop needed capacities and to raise the level of civic engagement of voters to move Moldova's electoral and democratization processes further on.

In line with the UN – Republic of Moldova Partnership Framework for Sustainable Development for 2018-2022, and, in particular, its Outcome 1, the Project aimed to enhance the effectiveness and responsiveness of public services to further ensure that the people of Moldova benefit from a democratic, transparent and accountable Government. The Project specifically focused on the further improvement of the State Register of Voters to guarantee a transparent and highly inclusive electoral process. It also supported the mechanisms that foster transparency and inclusiveness within the society by running an extensive civic education program and supporting new innovative methods in the area of Political Party Finance Reporting and Disclosure.

Building on the accomplishments of the previous interventions, the new Project addressed the key challenges to enhance the transparency and inclusiveness and, therefore, the credibility of the Moldovan electoral process – an objective in line with the Sustainable Development Goal 16.

---

<sup>1</sup> OSCE/ODIHR Election Observation Mission Report on the Presidential Elections / 30 October and 13 November / available at: <https://www.osce.org/odihr/elections/moldova/300016>

The challenges have been addressed through the following **four intervention points**:

1. Improve insufficient data quality and accessibility;
2. Address limited inclusiveness of the electoral process;
3. Support the political parties financing framework to bring more transparency in the electoral process;
4. Enhance the limited information on political participation and electoral processes.

Following an extensive cooperation approach, the Project addressed the identified challenges by partnering, in addition to the CEC, with the (at that time) recently created Public Services Agency, and the e-Governance Agency (EGA) – as full beneficiaries of the Project.

Prior to the official starting date, the Project and CEC had established a long working and cooperation partnership with the population registration agencies, such as the Civil Status Service and the SE “Cadastru” to improve their business processes and registers to ultimately enhance the quality of data sent to the State Register of Population and from there to the CEC’s State Register of Voters. However, in May 2017, five public registration agencies, including the Civil Status Service and the SE “Cadastru” merged into the Public Service Agency (PSA), the Civil Status Service becoming the Department of Population Registration and Documentation and the SE “Cadastru” - the Cadaster Department, respectively. The transition process had a significant impact on the Project timeframe, as only in August 2017 the institutional and management setup of the PSA was in place.

The Project initiation and launch in August 2017 coincided with several political developments in the country that, as a result, had an impact on the implementation of planned activities and need to be considered, when assessing the Project’s progress for 2017 – 2020.

#### CHANGES IN ELECTORAL LEGISLATION AND REGULATIONS AND THEIR IMPACT ON PROJECT OBJECTIVES

On the 14<sup>th</sup> of July 2017, the Parliament adopted the Law on the new mixed electoral system that foresaw 51 member constituencies (single round first-past-the-pole) and 50 seats to be filled through the proportional system.

The electoral reform had a direct impact on the initial planning phase of the Project. With a new electoral framework in place, the SAISE required to be considerably adjusted, as to become operational in the context of the mixed electoral system. To meet this need, the support provided under Output 2 significantly increased. The reform also had an impact on the structure of civic education activities under Output 4, which had to be redesigned, reorganized, and extended at the national level.

After the impressive functionality of the SAISE during the 2019 Parliamentary Elections and a multi-layered and complex civic education and voter information campaign conducted in 2018, the Project faced new changes in the electoral legislation and provisions that affected the Project objectives and results. Thus, on August 15<sup>th</sup> 2019, the mixed electoral system was abolished, and the proportional electoral system – reinstalled. The SAISE needed to be revised and readjusted to the previous version, as to comply with the requirements of the 2019 General Local Elections, while the printed and video electoral materials on mixed electoral system lost their usefulness for further civic education and voter information campaigns (Output 2 and 4).

At the same time, the CEC adopted a set of amendments to the Regulation on the Political Parties, Financing including the mandatory online reporting using the “Financial Control” Module of the SAISE as of January 1<sup>st</sup>, 2020. This amendment, including the updated documentation for financial reporting, has required a thorough adjustment of the “Financial Control” Module, completed in April 2019 (Output 3), delaying the piloting and fully implementation process by April 2020.

On August 19<sup>th</sup>, 2019, the Moldovan Parliament introduced a gender placement quota for the political parties’ lists of candidates, as to ensure that at least 3 candidates out of each 10 represent one of the sexes. As the local election results showed, the amendments to the Electoral Code recorded positive trends in women elected to local bodies (for mayors from 20,6% to 21,8%, for local councilors from 30% to 36,5%, and for district councilors from 18,5% to 27,8%). The data analysis made by the Project under Output 4 was broadly used for public information through social media, public events, and cascade training.

## CHANGES IN THE PROJECT'S NATIONAL PARTNERS MANAGEMENT

In early July 2019, the CEC management (Chairperson, Deputy Chairperson, and Secretary) resigned. The new CEC Chairperson, Deputy Chairperson, and Secretary were appointed on the 19<sup>th</sup> of July 2019<sup>2</sup>. The management of the two other main Project partners – the Public Services Agency and the e-Governance Agency have also resigned in July, and the new Executive Directors have been appointed in September.

After another change of the Moldovan Government in November 2019, there was another change of the management structure within the Project's partner institutions (the Public Services Agency and the e-Governance Agency).

Due to these changes, the complex IT tasks, such as IT Civil Status Acts System, IT Address Register and the IT Module "Financial Control" registered delays in the implementation and adjustment, while high risks of their incompleteness by end of the Project led its no-cost extension by end of April 2020 (Output 1 & 3).

In February 2020, a new Director of the Center for Continuous Electoral Training was appointed. Due to a strong institutional memory of the Center and its extensive capacity to design, plan and implement civic education and voter information campaigns, the Project did not register any issues under Output 4.

## 2017 – 2020 PROJECT SUPPORT TO THE ORGANIZATION OF ELECTIONS

Throughout its implementation, the Project offered technical support to the organization of six (6) major elections and referendums. For each election, the IT expertise was ensured as to mitigate any potential risks related to the proper functionality and cybersecurity of the SAISE. For all electoral exercises, the system proved an impeccable running of all modules, once again demonstrating the high value of the UNDP support in the digital transformation of the electoral process in Moldova.

*Table 1. Elections and Referendums organized during 2017 – 2020*

Nr.	Election Date	Election type	Voter Turnout %
1.	November 19th, 2017	Local Referendum in Chisinau	17.54%
2.	November 19th, 2017	New Local Elections in 10 localities: Fundurii Noi, Ștefănești, Plopi, Sărăteni, Ghiliceni, Lăpușna, Berlinț, Căpriană, Sîngera, Zîrnești	N/A
3.	May 20th, 2018	Early Local Elections in Balti Municipality	35,13%
4.	May 20th and June 3rd, 2018	Early Local Elections in Chisinau Municipality and other 5 localities Volovița, Leușeni, Jora de Mijloc, Nemțeni, Pîrlița	39,37%
6.	February 24th, 2019	Parliamentary Elections	50.57%
7.	February 24th, 2019	Consultative Referendum (Question 1)	39,82%
8.	February 24th, 2019	Consultative Referendum (Question 2)	39,79%
9.	October 20th, 2019	New Parliamentary Elections (SMCs no. 17, 33, 48 and 50)	N/A
10.	October 20 <sup>th</sup> , 2019	Local General Elections, first round	41.68%
11.	November 3rd, 2019	Local General Elections second round (Chisinau Municipality and other 385 localities)	40.34%
12.	March 15th, 2020	New Parliamentary Elections in SMC no.38 Hincesti	23.3%

However, the electoral exercises each time involved all CEC staff in preparations, thus reducing the speed of the coordination and decision-making processes required for certain Project activities (e.g. activities related to political parties financing).

<sup>2</sup> CEC Decision no. 2539 on the appointment of the Commission's Chairperson, Deputy Chairperson and Secretary [https://a.cec.md/ro/cu-privire-la-numirea-in-functie-a-presedintelui-vicepresedintelui-si-2751\\_92933.html](https://a.cec.md/ro/cu-privire-la-numirea-in-functie-a-presedintelui-vicepresedintelui-si-2751_92933.html)

The Project's support provided for the above-mentioned electoral exercises entailed the technical and public outreach interventions, including, but not limited to:

#### MODERNIZATION OF THE ELECTORAL IT SYSTEM

- Adjustment of the State Automated Information System "Elections" (SAISE) for the mixed electoral system and General Local Elections;
- Load and stress testing of the SAISE and CEC official webpage prior to each national-level election (Parliamentary and General Local Elections);
- Enhancement of the application for real-time visualization of electoral data (voter turnout and preliminary results). Following its initial usage during the 2019 Parliamentary Elections, the application has been customized for all types of elections (Parliamentary, Local and Presidential);
- Enhancement of the data structure of the State Register of Voters (SRV);
- Updated application for public visualization of electoral data (corresponding polling stations and number in the electoral list);
- Development of the online application for Diaspora voters (diaspora.voteaza.md), piloted during the 2019 Parliamentary Elections, and subsequently used during the new Parliamentary Elections for SMC no. 50.

#### MODERNIZATION OF THE CEC IT INFRASTRUCTURE

- Upgrade of the SAISE software and hardware capabilities via new database servers, server management licenses and data mapping applications;
- Piloting innovative IT solutions for optimizing the voting process. As an alternative to the manual processing of the voters' ID number, the usage of barcode scanners has been tested in 70 polling stations in Chisinau during the 2019 General Local Elections.

#### NATION-WIDE CIVIC EDUCATION AND VOTER INFORMATION CAMPAIGNS

A detailed description of this support is available under Output 4.

During its implementation period, the Project also supported Moldova's progress towards the achievement of the 2030 Agenda for Sustainable Development<sup>3</sup>, particularly of SDG 16: "*Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels*" (targets 16.6, 16.7, and 16.9). The main areas of the Project's intervention were additionally designed to cross-cuttingly support the achievement of SDG 5: "*Achieve gender equality and empower all women and girls*" (target 5.5) and SDG 10: "*Reduce inequalities within and among countries*" (target 10.2).

---

<sup>3</sup> 2030 Agenda for Sustainable Development / available at <https://www.un.org/sustainabledevelopment/development-agenda/>

## PROGRESS REVIEW

### OUTPUT 1: CREDIBILITY OF THE STATE REGISTER OF VOTERS ENHANCED

Prior to the Project start, the quality of data supplied by the State Register of Population (SRP) to the Central Electoral Commission was outdated and the workflows included multiple paper-based processes that produced a time gap and a high margin of error. Of primary concern was the share of citizens that were included, during elections, on the supplementary voters' lists, giving room for the criticism of the electoral process and its integrity.

To increase the credibility of the State Register of Voters (SRV), the Project was mandated to provide support in enhancing the governmental IT registers relevant to the electoral process and fostering their interoperability and data exchange.

The Project expanded its strategic partnership engaging, in addition to the Central Electoral Commission, with the Public Services Agency (PSA) and the e-Governance Agency (EGA). These institutions became full beneficiaries of the Project under Output 1. To fortify their commitment, as well as to ensure their active and coordinated participation in the implementation of activities, the Project facilitated signing of a [Collaboration Agreement](#) between the Central Electoral Commission, Public Services Agency, and the E-Governance Agency on the 14<sup>th</sup> of December 2017. The document highlighted their commitment to re-engineer the Civil Status Acts Register and Address Register, and to enhance the interoperability framework necessary for an accurate and up-to-date data exchange, relevant for an enhanced electoral process. Moreover, the Public Services Agency proved its commitment by signing a Financing Agreement with the UNDP (with a total value of 125,000 USD) for the reengineering of both IT-based registers (Civil Status Acts Register and Address Register) aiming at providing key data for elections in the future.

### OBJECTIVE 1.1: CIVIL STATUS ACTS REGISTER SYSTEM REENGINEERED

#### RESULTS ACHIEVED

- ❖ Concept and Roadmap of the Civil Status Acts IT Register – developed and approved by the PSA
- ❖ Task force for IT Register implementation – created and continuously coordinated
- ❖ Technical Specifications of the IT Register – developed, updated, officially approved, and included in the tender documentation
- ❖ Technical documentation (Business Process Analysis, Software Requirements Specification and Software Design Documentation) of the IT Register – elaborated and approved
- ❖ IT Register development – completed
- ❖ Adjustment of the IT Register to the SGARI platform of the PSA – under finalization stage
- ❖ Adaptive and corrective maintenance for 12 months from IT Register in production – ensured

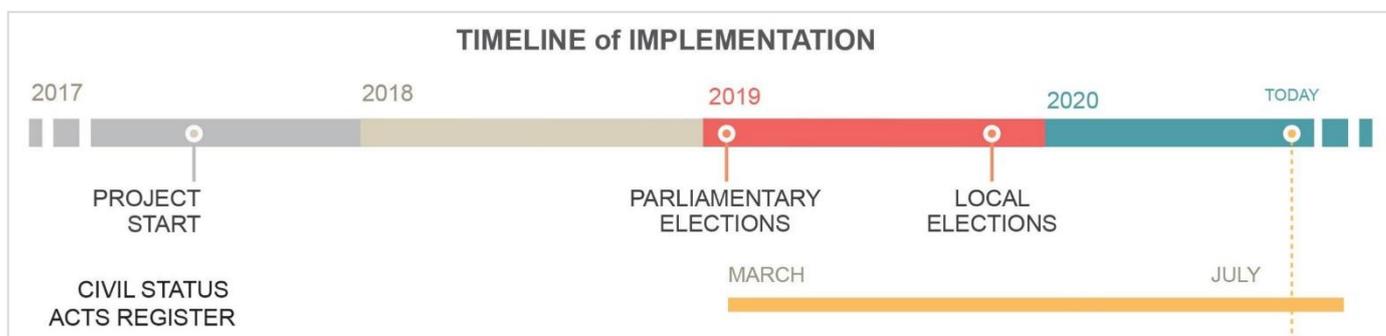

In 2015, the Electoral Component of the UNDP Democracy Programme (2012-2017) established a strong working and cooperation partnership with the Civil Status Service<sup>4</sup> in order to provide authentic data to the State Register of Voters. In this sense, a detailed and comprehensive As Is – To Be Analysis has been performed to reengineer the civil status acts' business processes and sub-processes. Based on this re-designed institutional workflow, the first IT concept of the Civil Status Acts Register has been drafted and thoroughly discussed with different stakeholders, such as the Ministry of Justice, Ministry of Health, e-Governance Agency and, at that time, State Enterprise "Registru". Moreover, a Roadmap for the IT System's implementation has been elaborated and the corresponding infrastructure, architecture, IT equipment and staff capacity have been assessed in detail.

The UNDP Project "Enhancing democracy in Moldova through inclusive and transparent elections" continued to build on the foundation described above. Regardless of the strong ground prepared in advance, with the integration of the Civil Status Service into the Public Services Agency, the designed concept of the Register had to be revised and adjusted to fit into the new Agency's structure and workflow. The institutional

<sup>4</sup> Department of Population Registration and Documentation of the Public Services Agency, after complex institutional restructuring in 2017.

transformation implied the involvement of specialists from other PSA Departments, in addition to the Civil Status Acts experts, thus, hampering the coordination and approval process of the technical documentation needed to start the development of the IT System by registering a six-months delay compared to the initial Project work plan. To support the coordination process, the Project created and maintained an effective task force mechanism with PSA representatives as to advance in reaching the targets in an acceptable timeframe.

Another factor that affected the adequate modernization of the Civil Status Acts IT architecture in due time was the reengineering of the PSA in-house information access platform SGARI – a core platform that ensures the internal data exchange within the Agency, as well as its interoperability with external systems (including the SRV) through MConnect. This factor represented one of the justifications for the no-cost extension of the Project by the end of April 2020.

The COVID-19 pandemic situation in Moldova that started in March 2020 impeded the PSA IT Department to conclude the SGARI reengineering works by April. Thus, the last stage of the Civil Status Acts IT Register’s implementation continued by internally testing the functionalities and configuring the IT System in compliance with the technical specifications. Currently, the IT System entered into a one-year maintenance period, during which the Agency committed to carry out independently any additional adjustments to the system by coordinating the efforts with the developing company, mainly related to the connection with the State Register of Population.

The contribution of the UNDP to the reengineering of the civil status acts’ business processes and sub-processes, and modernization of the institutional IT architecture represents a cornerstone in achieving a digital transformation of public registration services from which will benefit not only the central and local public authorities and private sector, but also all citizens of the Republic of Moldova.

## OBJECTIVE 1.2: IT – BASED ADDRESS SYSTEM REENGINEERED

### RESULTS ACHIEVED

- ❖ Completion of the Address Register IT System phase I – defined with PSA
- ❖ Task force for the Address Register IT System phase II implementation – created and coordinated
- ❖ Workplan for Address Register IT System phase II implementation – developed and approved
- ❖ Technical documentation (Business Process Analysis, Software Requirements Specification and Software Design Documentation) – elaborated
- ❖ Address Register IT System development and data migration – completed
- ❖ Adaptive and corrective maintenance for 12 months from IT Register in production – ensured
- ❖ Address System Guide – elaborated
- ❖ Regional Cadaster Officials (44, including 24 women) – capacitated
- ❖ Process of establishing the boundaries for 83 localities – completed
- ❖ Public outreach campaign – conducted

One of the issues expected to improve the quality of the data in the State Register of Voters is the accuracy of each voter’s address. In 2014 – 2016, in the framework of the Democracy Programme/ Electoral Component, UNDP supported the Agency of Land Relations and Cadaster (ALRC) and the State Enterprise

“Cadastru” in the development of a new legal and regulatory framework for a new Address System in Moldova and, subsequently, the evolution of the Address Register IT System (ARIS) for which the design and development were started in 2016 and needed to be continued in three more phases over the following three years. In July 2017, in the same period with the current Project initiation, the Moldovan Parliament adopted the [Law on the new Address System](#). The Law prescribed uniform provisions to register addresses at the national level, to represent addresses geographically, to process cadastral information, and to establish clear competences of the stakeholders involved in the process. In addition to the multitude of practical cadastral benefits, the new Address System advanced in ensuring an increased transparency of the electoral process due to a more precise assignment of voters to their corresponding polling stations.

In line with new technical and operational responsibilities of the Cadaster officials in compliance with the provisions of the new Law on Address System, the Project provided support in developing the [Address System Guide](#) in both Romanian and Russian languages and conducting a series of training sessions for central and local authorities on the registration, assignment and update of addresses.

Figure 1.1. Details of the updated Address System Guide

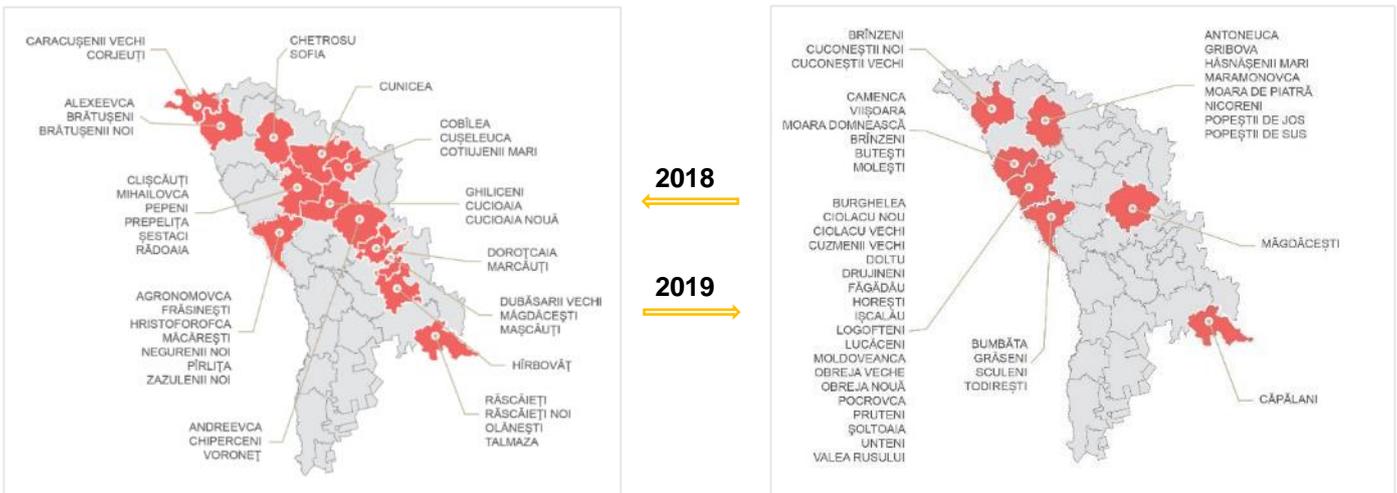

Three regional trainings were organized in partnership with the Cadaster Department of the Public Services Agency (Chisinau, Balti, and Cahul), during which 44 representatives of the local public administration and Cadaster officials (24 women and 20 men) benefited from theoretical learning and practical sessions.

Figure 1.2. Training session on the new Address System (Balti / 09 October 2019)

As the Address Register IT System represents a register that contains classifiers of administrative-territorial units (e.g. districts, cities and villages) and basic elements of urban infrastructure (e.g. streets, buildings), it is highly important, including for the electoral process, that the data provided by the system is as complete and accurate as possible. In 2018, the Project, in collaboration with the CEC and PSA, has agreed to provide local cadastral expertise for establishing the boundaries of multiple localities, of priority for the 2019 Parliamentary and General Local Elections. As a result, the boundaries of 83 localities (41 in 2018 and 42 in 2019) have been defined, registered, and officially included in the Cadaster Department’s database.

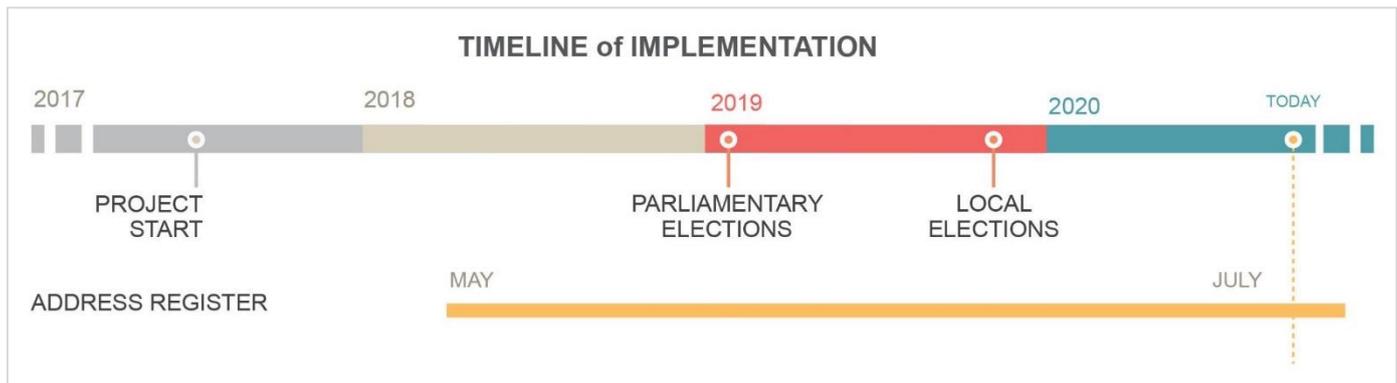

Figure 1.3. Localities which boundaries were established in 2018 (left) and 2019 (right) with Project support

### DEVELOPMENT OF THE ADDRESS REGISTER IT SYSTEM

With the integration of the Agency of Land Relations and Cadaster (ALRC) and SE “Cadastru” into the Public Services Agency as the Cadaster Department, the Project supported a comprehensive analysis of the compatibility and integration of the Register in the existing PSA infrastructure. For this, an extended task force has been created, involving not only the Cadaster specialists, but also PSA experts from other departments. As a result, a joint agreement on the IT System implementation work plan was approved.

Initiated in May 2018, the development of the Address Register (phase II) proved to be a substantial and complicated task for both the Project and PSA teams. The system’s increased level of complexity led to consecutive iterations of development and testing cycles. These complementary efforts extended the implementation period with over six months, much needed for meeting the beneficiary’s expectations. As of December 31<sup>st</sup>, 2019, the Address Register entered the adaptive maintenance stage.

The IT system was conceptualized as a combination of a cadastral database and of an advanced GIS mapping instrument, with functionalities that make the ARIS to be unique at the regional level. Though, for achieving an accurate and up to date register with correct data sets the Public Services Agency should revise its IT architecture, including the State Register of Population. This may require in the future both internal and external efforts.

From the implementation of ARIS will considerably benefit central and local authorities, public institutions, business environment, and citizens. In addition to this, once integrated by the PSA with the State Register of Population, ARIS data exchange will foster data completeness in the State Register of Voters and will qualitatively impact the accuracy of voters’ lists and the transparency of the electoral process.

To inform citizens about the Address Register and the Address System’s provisions, the Project designed a public outreach campaign. Out of different informative materials, a [videographic](#) has been created and broadcasted through TV channels, social networks, and mass media. Similar to previous video products developed by the Project bearing in mind the accessibility aspects, this material was developed in both Romanian and Russian languages, accompanied by sign language.

## OBJECTIVE 1.3: M-CONNECT PLATFORM LEGALLY REGULATED AND INTEROPERABILITY OF POPULATION REGISTRATION DATA ENSURED

### RESULTS ACHIEVED

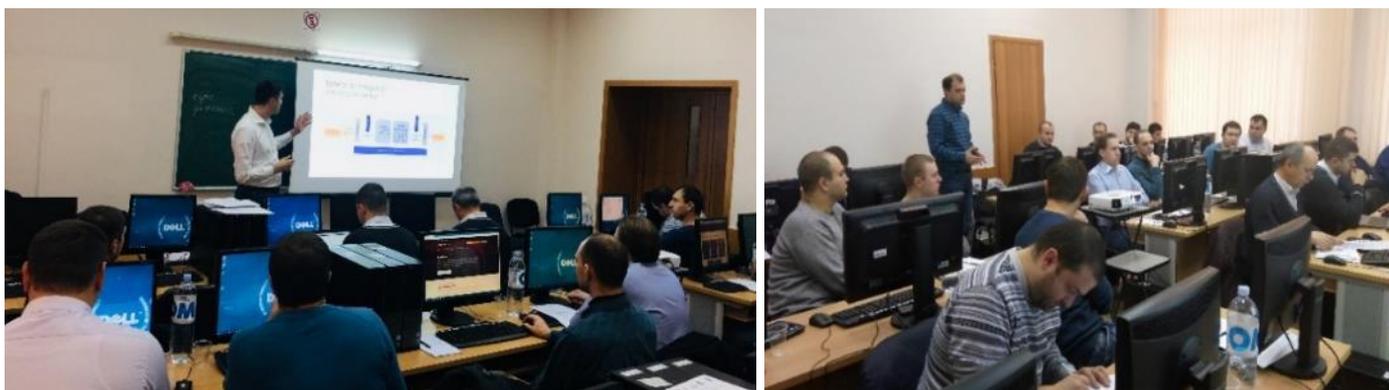

- ❖ IT staff of 17 central public institutions (20 men and 1 woman) – capacitated in WSO2 architecture
- ❖ Public outreach campaign on MConnect Platform – conducted
- ❖ Draft Law on data classification – elaborated
- ❖ EGA Strategic Development Plan for 2020 – 2024 – elaborated
- ❖ GAP analysis of the digital infrastructure of the e-Governance framework – completed

The interdependence between the population registration system and the inclusiveness and transparency of elections is an internationally recognized subject to which the Republic of Moldova is no exception. In this sense, among the main objectives of the Project to modernize the IT systems, was also the enhancement of the interoperability of institutional data sets through the MConnect platform owned by the E-Governance Agency (until 2018 – the e-Governance Center). Since its establishment in 2010, the e-Governance Agency is at the core of Moldova’s e-transformation agenda. Supported by the World Bank, UNDP and other partners, the Agency has made significant progress in modernizing governance using ICT, establishing a robust world-class core ICT infrastructure for electronic services, including the MCloud hosting infrastructure, the MConnect interoperability and data exchange platform. From 2014, the Agency is leading the MConnect as a technical solution that ensures the exchange of data between information systems administered by ministries, central public authorities subordinated to the Government and organizations from the same area of competences, regardless the period of their establishment. It was estimated that in the period 2017 – 2019, 8.2 million lei were saved due to a free exchange of data among institutions.

On July 19<sup>th</sup>, 2018, the Moldovan Parliament adopted the [Law on data exchange and interoperability](#), document elaborated in the framework of the previous UNDP Democracy Programme/Electoral Component. The adoption of the Law represented a major result of the collaboration between UNDP and e-Governance Agency (EGA), being a progressive example of sustainability with a spill-over impact beyond the elections area and a future-oriented basis for the exchange of digital content among government institutions. Having the adequate legal basis in place, the “Enhancing democracy in Moldova through inclusive and transparent elections” Project fortified the partnership with EGA to establish necessary preconditions for a broad availability of the MConnect platform for public institutions following normative, organizational, technological and semantic frameworks.

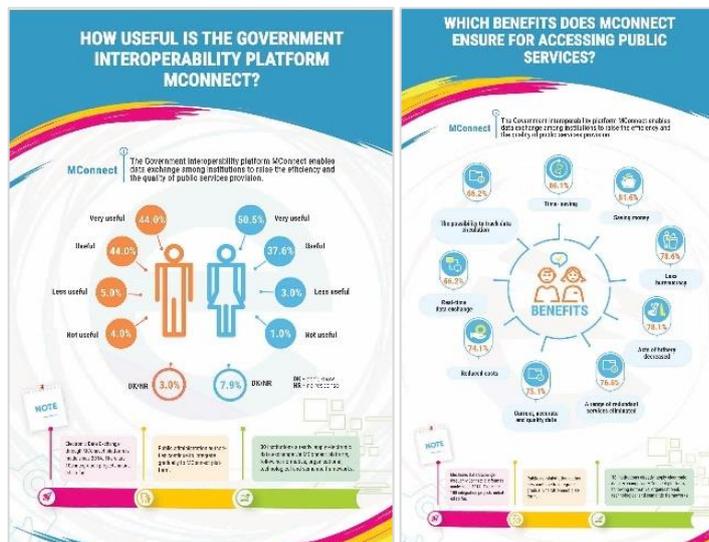

Since its initiation, the Project provided support to the Agency in expanding the knowledge base of these operations, through social media campaigns and different public outreach tools – a [videographic](#), informative [infographics](#) and various narrative contents. In parallel with the public outreach efforts, in 2017, during a three-day training course the Project capacitated the IT staff from 17 central public institutions (21 participants - 20 men and 1 woman), mainly the ones administering data systems important for the electoral processes. The participants were instructed on the establishment of WSO2 architecture and on how to install, use and monitor the components of the interoperability Platform. There was an extremely high interest to the course, both from the group of registered participants and from others willing to attend which

Figure 1.4. Training session on WSO2 architecture for central public institutions (14 -16 November 2017)

demonstrated the timely design and implementation of the activity, as well as its appropriateness to the IT needs of the Government institutions. The WSO2 training established a first trained group of MConnect integrators in the central public administration sector and began to institutionalize an IT memory on MConnect installment, configuration and usage within the IT departments of various Government institutions.

In 2018, the Project helped with the organization of a high-level MConnect conference during which the key messages emphasized the platform’s mission to exclude redundancy and ensure data accuracy and transparency in key processes that are paramount for democratic governance: elections, public procurement, institutional integrity, transparency, etc. For this event, a video vox-populi [“What do people think about the modernization of public services”](#) and a set of 6 (six) infographics on the MConnect platform’s results and on people’s perceptions about its benefits have been produced with the Project support and offered to about 100 (including 23 women) participants of the conference. The infographics showed that 94,5% of people (50,5% women) consider that the MConnect is useful, 81,6% that is money-saving and 75.1% that it provides accurate and quality data. Also, 78,6% considered that it ensures less bureaucracy, 78,1% that it decreases the acts of briber, and 76,6% that it eliminated a range of redundant services. The event was live-streamed through [Privesc.eu](#) and had 11,572 views. Being used by more than 35 public institutions, the MConnect platform brought progress in many of the sectors targeted by the Sustainable Development Goals, such as health and well-being of citizens, access to quality education, economic growth, innovation and infrastructure, reduced inequalities, as well as justice and strong institutions.

With the assistance of the Interoperability Integration Team, created by the Project in 2017, the EGA has further advanced the establishment of the necessary prerequisites to ensure extended connections of the State IT Systems administered by Government entities to MConnect, as well as to MAccess, MSign, MLog and, where needed, to MPay. These integrations aimed at allowing the institutions to modernize their services, in accordance with their business processes, and supply data in a more accurate and fast manner. To further enhance the institutional capacities, the Project held several technical meetings with the National Integrity Authority, the Ministry of Internal Affairs and the Ministry of Health, Labor and Social Protection.

In parallel, to support the implementation of the Law on interoperability and data exchange, the Project assisted the EGA with IT expertise in developing a Semantic Catalogue - an Information System aiming at ensuring an accurate and coherent use of terminology in the data exchange process through the MConnect. However, during 2018, following the institutional upscale of the Agency, the Project has revised its technical assistance based on new EGA institutional priorities. Therefore, the development of the Semantic Catalogue was jointly decided to be continued by the Agency with its internal resources, while several new strategic objectives were added. Among them were the elaboration of the first EGA’s Strategic Development Plan for 2020 – 2024 and the legal expertise for drafting a *Law on data classification*, aiming at complementing the Law on data exchange and interoperability. The drafted provisions focused on the regulation of data classification by different types and levels of sensitivity, as well on data security, confidentiality, integrity, and availability principles during data exchange among MConnect users.

A key stage in the Project’s collaboration with the EGA was the GAP analysis (*As-Is/ To-Be*) of the Moldovan e-Governance framework, undertaken by an international expert. The effort was concentrated on reviewing the existing infrastructure and centralized services (*at the business process and hardware levels*) for identifying the existing gaps and elaborating a roadmap for their improvement. In March 2020, following an extensive field research, the international expert presented the findings and conclusions of the GAP analysis, with recommendations for achieving the expected (*“to be”*) status of the EGA’s digital services for more reliable data exchange and integration of data sources.

## OUTPUT 2: STATE AUTOMATED INFORMATION SYSTEM “ELECTIONS” ENHANCED

### RESULTS ACHIEVED

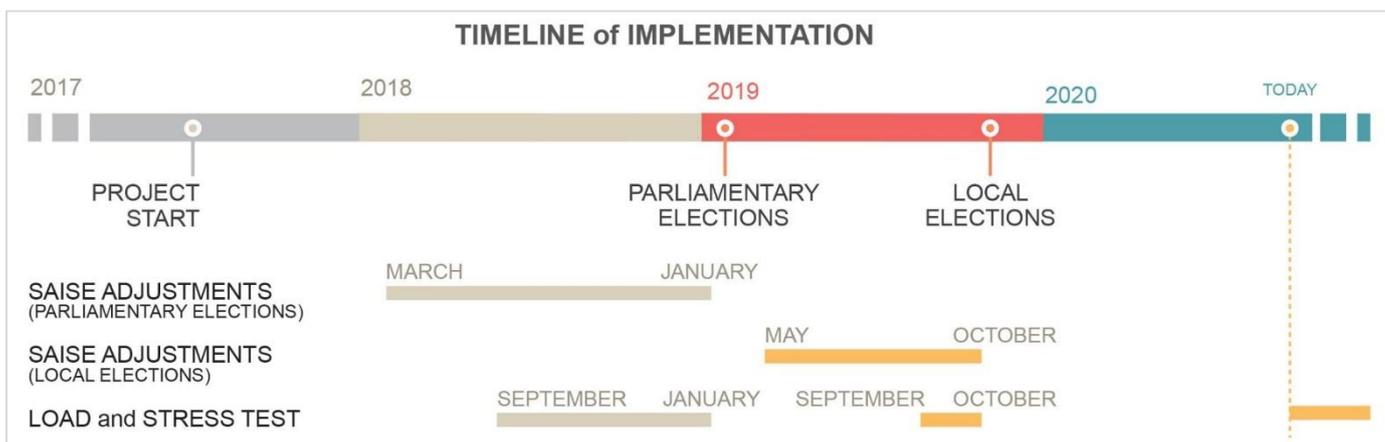

- ❖ SAISE Modules overall modernization and upgrade with continuous IT expertise and coaching – ensured
- ❖ SAISE adjustments for the mixed electoral system – completed
- ❖ Modernization of the State Register of Voters for the General Local Elections – carried out
- ❖ SAISE load and stress tests for the Parliamentary and General Local Elections – performed
- ❖ Modernization of the SAISE’s server infrastructure (software and hardware) – completed
- ❖ Interface for real-time visualization of voting results for different types of elections (Parliamentary, General Local and Presidential elections) – crowdsourced and functional
- ❖ Online application for out-of-country voters (diaspora.voteza.md) – created and functional
- ❖ Register of Electoral Officials – developed and functional
- ❖ Piloting of a technical innovation of using ID card barcode scanners in 70 polling stations in Chisinau municipality – conducted and its efficiency demonstrated
- ❖ Interface of the “Check your name in the State Register of Voters” application – redesigned
- ❖ Transposal of the “Check your name in the State Register of Voters” application on the QIWI self-service payment terminals across the country (over 600 units) – carried out
- ❖ Interface of data visualization of election results per polling station – adapted
- ❖ SAISE Modules “Electoral candidates” and “Documentation” developed and improved
- ❖ Set of videographics on the IT aspects of the electoral process – developed and promoted
- ❖ Public outreach campaign on the CEC’s IT innovations in elections – implemented

The ability of the Central Electoral Commission to deliver elections in a professional and transparent manner lies to a great part in the ability of the institution to demonstrate a high level of performance in data management and ensuring the accessibility of information. The Commission’s core informational platform for elections management is the State Automated Information System “Elections” (SAISE). Developed in 2014 with the UNDP Democracy Programme/Electoral Component support, SAISE became by 2020 a complex system with **13 modules** covering the most of electoral processes, ranging from the pre-registration of voters, operation of the polling stations and aggregation of election results. During each election, the CEC and UNDP have come up with new useful tools, but also new modules, for voters and electoral officials, but also for a smooth running of the electoral process.

Following the adoption of the mixed electoral system in July 2017, bringing the information system to the next level has become a challenge. With **9 modules active at that moment**, the enhancement of the SAISE was one of the most complex activities of the Project. Initiated in early 2018, the adjustment was implemented in parallel with the existing version of the SAISE that remained intact, to ensure data integrity.

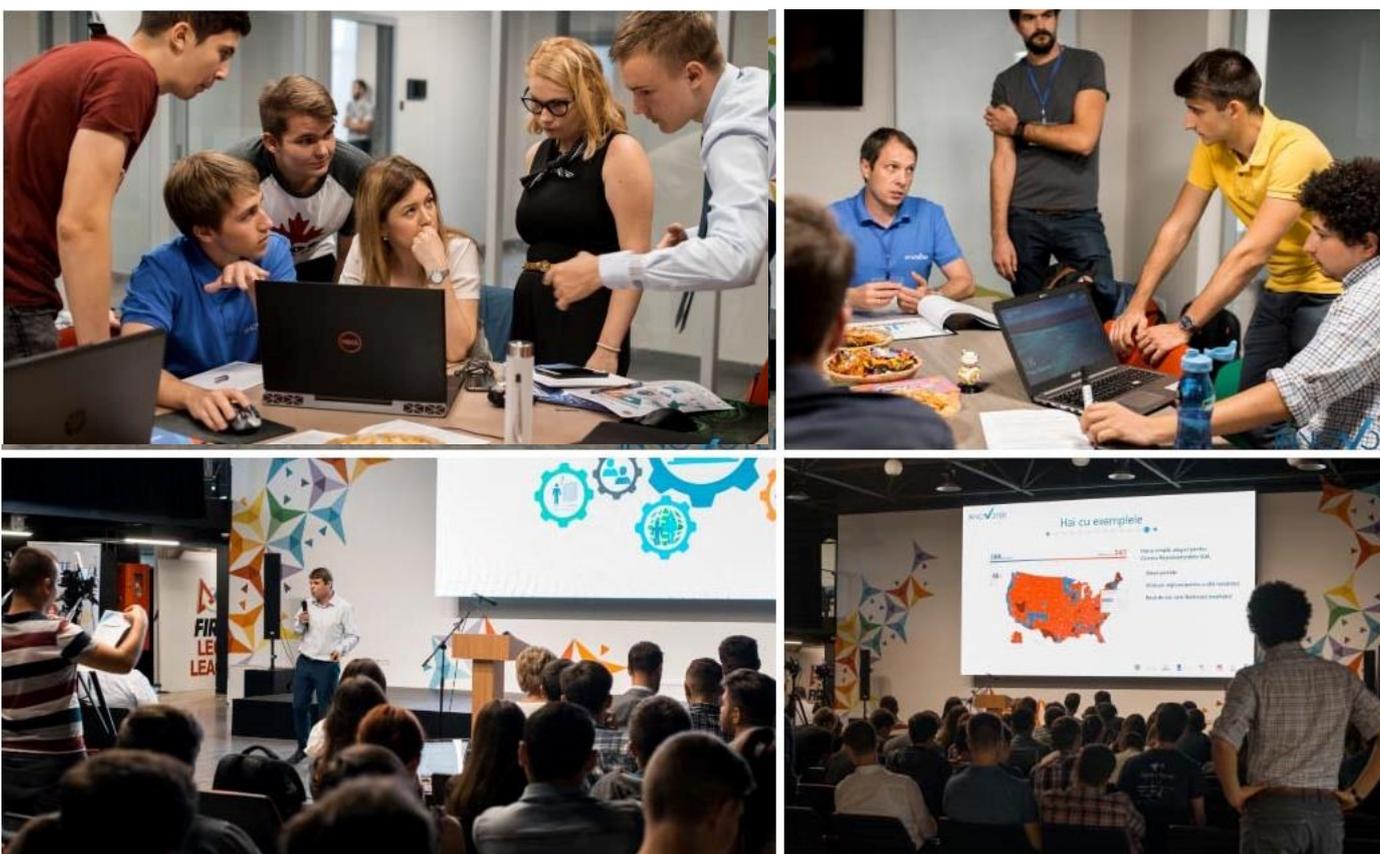

During the early Mayoral Elections in Chisinau and Balti (May 2018), SAISE demonstrated an exceptionally good performance by displaying instant and accurate data about voter turnout and preliminary results ensuring the transparency of the electoral processes despite the ongoing adjustment process.

By 2019, a total of 74 SAISE functionalities (compared to the 32 initially planned) have been added or updated, the implementation of the additional tasks being co-financed by the CEC (cost-sharing agreement signed with UNDP on September 4<sup>th</sup>, 2018, total value – 993,900 MDL). Considering the increased technical requirements related to the mixed electoral system data management, SAISE’s capabilities have been upgraded via the purchase and installment of two database servers (WEB API type), that provided additional processing power, storage and reliability, being fully compatible and interchangeable with the current CEC infrastructure.

In line with the Project’s strategic objective of ensuring transparency and inclusiveness of the electoral process, as well as to provide an easy-to-see and easy-to-understand display of electoral data generated by the new mixed electoral system during E-Day, the Project has organized in September 2018, the first edition of the [InnoVoter](#) Creativity Lab. Designed as an IT hackathon with a specific focus on crowdsourcing a design for the real-time display of voter turnout and preliminary voting results, this event was a premiere for the Republic of Moldova and a transformative innovation for the UNDP. For three days, being mentored by a specialized team consisting of UNDP IT consultants and CEC IT Department representatives, 30 participants (including 3 women) analyzed dozens of datasets and designed six (6) prototypes considering the accessibility, disaggregation and user-friendliness of the information needed to be exposed during Parliamentary Elections. As a result, the best prototype has been selected and implemented by the CEC with the Project support, becoming a tremendous practical example of a digital transformation, unique in the region. Besides the symbolic award received for participation, the young participants benefited from a great feel of accomplishment for their contribution to a such important national electoral process involving millions of citizens inside and outside the country. The event has been live broadcasted through Privesc.eu reaching 8,791 views ([first day of the event](#)) and 34,247 views ([last day of the event](#)).

Figure 2.1. InnoVoter – Creativity Lab, first edition (14 – 16 September 2018)

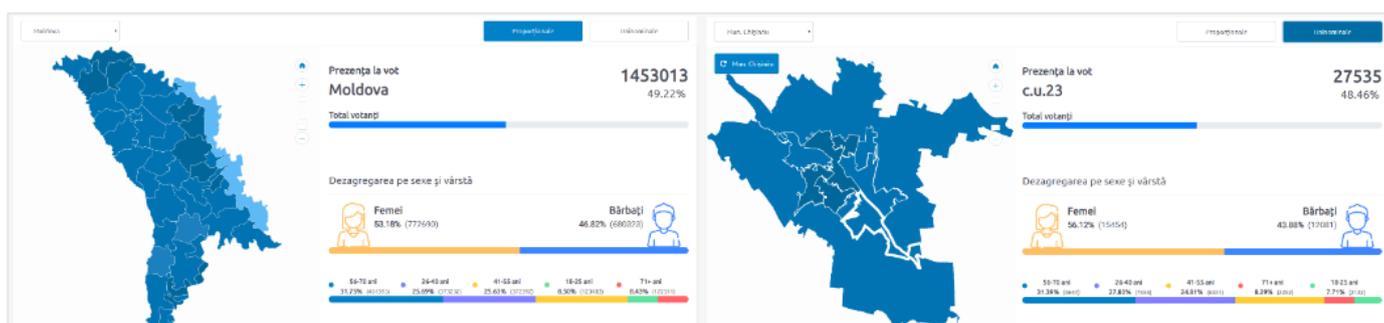

## SUPPORT TO THE TECHNICALLY TRANSPARENT AND INCLUSIVE PARLIAMENTARY ELECTIONS

The 2019 Parliamentary Elections represented a high-stake milestone for the Project. The technical design and implementation of a fully operational system with new interfaces and functionalities, complemented by the hardware and software solutions, made the electoral process more effective and transparent. The Project offered comprehensive IT technical and advisory support to ensure a smooth running of the SAISE during the E-Day. Consequently, both national and international observers, including from OSCE/ODIHR<sup>5</sup>, confirmed its adequate and stable performance, despite a considerable number of cyber-attacks recorded throughout the E-Day by the Security and Intelligence Service<sup>6</sup>.

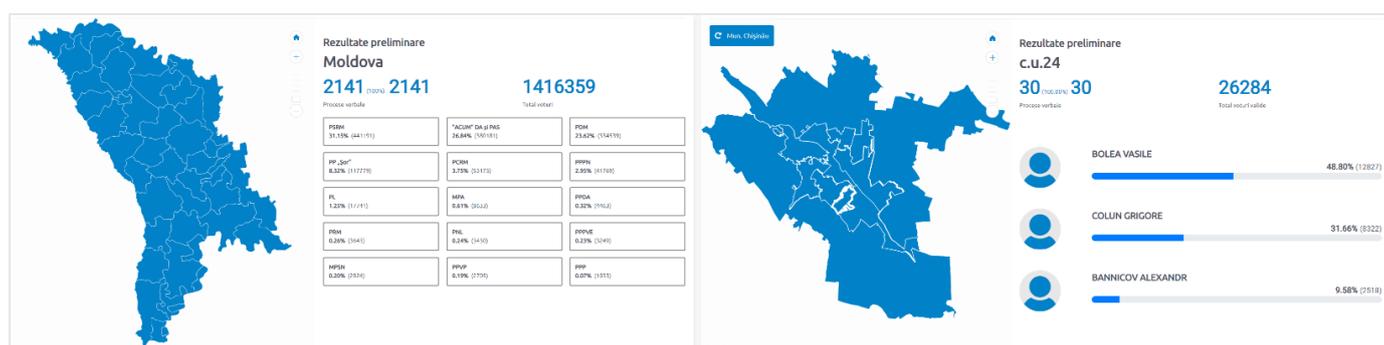

The real-time data interface developed based on the idea crowdsourced by the team of young developers and designers during [InnoVoter](#) has been tested and launched during the E-Day on the CEC website through a distinct application, a measure that reduced the overload of the official website to a minimum and eliminated the possibility of the servers' crashes. [More than 1.7 million people accessed the interface application during E-Day.](#)

Figure 2.2 Instant display of voter turnout information during E-Day, 2019 Parliamentary Elections

After the closing of the polling stations, the number of views for the preliminary results' application significantly increased (particularly between 23:00 - 01:00). Due to the additional processing power, storage capacity and reliability of the SAISE ensured by the Project, the CEC IT infrastructure performed very well and managed to be responsive for up to 10,000 concurrent views (the equivalent of five GB per second). In total, this application has registered over 150 million requests/accesses.

Figure 2.3. Instant presentation of the preliminary results, 2019 Parliamentary Elections

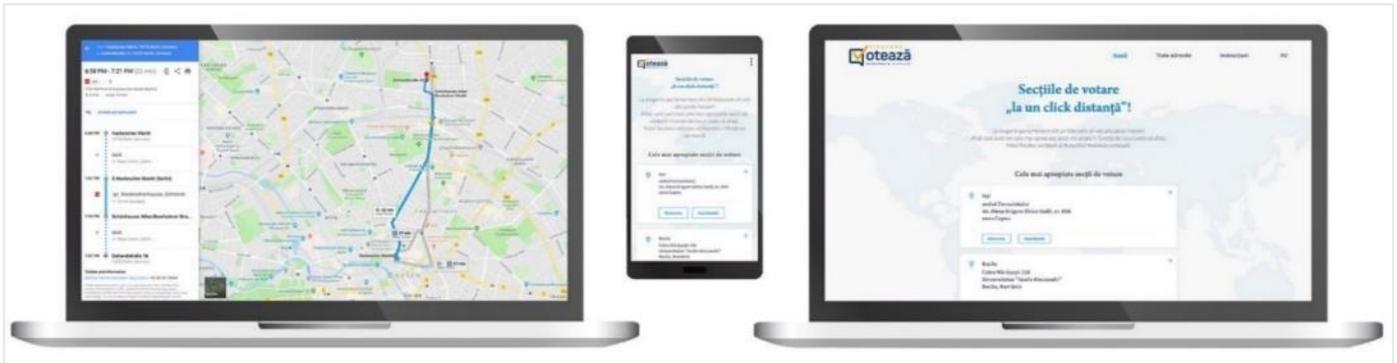

The voting process abroad during the 2019 Parliamentary Elections has been conducted in 123 polling stations. To strengthen the transparency and inclusiveness of the out-of-country voting, the Project made available the new online application – [diaspora.voteaza.md](#) in both Romanian and Russian versions. This resource mapped all polling stations abroad and offered intuitive suggestions and travel routes based on the users' current geolocation. Once the voter indicated his/her place of residence, the application generated locations for the three closest polling stations. Moreover, with the Project support, the Central Electoral Commission and the Ministry of Foreign Affairs and European Integration agreed on providing an hourly update about the availability (congestion) of each polling station opened abroad. In this manner, the application offered a color-based queue indicator (red – crowded; yellow – partially crowded; green – available).

<sup>5</sup> [OSCE/ODIHR Election Observation Mission Report on the Parliamentary Elections / 24 February 2019 /](#)

<sup>6</sup> [Security and Intelligence Service press release / 25 February 2019 /](#)

Figure 2.4. The Interface of the online application for Diaspora voters – diaspora.voteaza.md

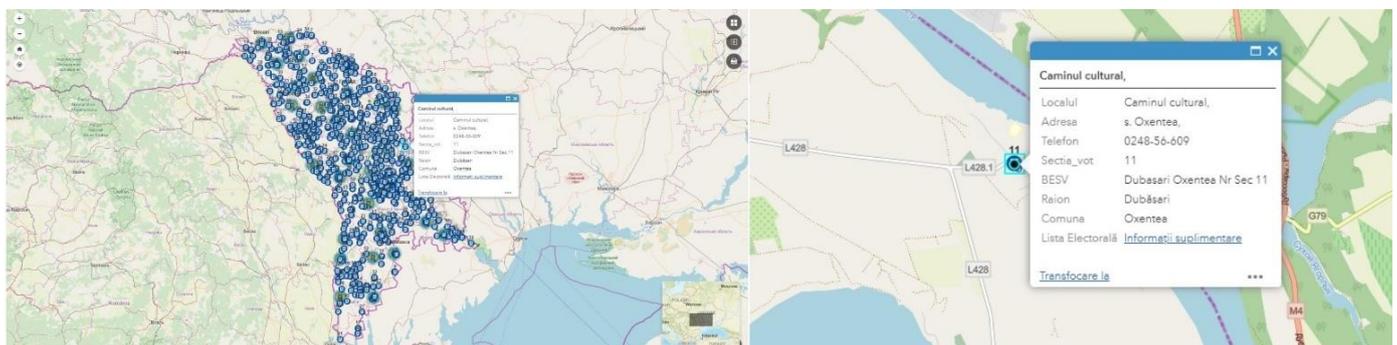

The application was viewed on the E-Day by 42,182 users from 90 countries, 70% of them using the mobile phone. Most active users (48%) were young people aged 25-34 years. Thus, the CEC’s IT ecosystem was extended with an additional innovative and accessible solution to be used by the voters.

The full list of polling stations and addresses of polling stations designated exclusively for voters residing in the Transnistrian region (constituencies 47 and 48) have been published on the [voteaza.md](http://voteaza.md) platform with the similar to [diaspora.voteaza.md](http://diaspora.voteaza.md) application accessibility features (Google Maps forwarding) to ensure access to information to all voters assigned to these constituencies.

To achieve an extensive outreach of all innovative solutions designed for the Parliamentary Elections, the Central Electoral Commission organized in February 2019, with the Project assistance, a public session for major media outlets and civil society representatives. The session was attended by over 30 persons being broadcasted live through the [Privesc.eu](http://Privesc.eu) platform reaching 17,758 views.

In the post-electoral period (March – September 2019), the Project ensured the sustainability of the developed IT solutions through transferring of their source codes, manuals, and user guides to the CEC IT Department. To increase the responsiveness and continuous reliability of the software and hardware infrastructure for their full compatibility with the upgraded version of the SAISE, the Project supported the installation of the Microsoft SQL Server 2017 license (server management system) and the ArcGIS Server license (geographic information and mapping system) that enhanced the mapping solutions related to the voters’ registration and data visualization (Figure 2.5)

Figure 2.5. The Interactive Map of Electoral Constituencies (available on the CEC webpage)

## SUPPORT TO THE TECHNICALLY TRANSPARENT AND INCLUSIVE GENERAL LOCAL ELECTIONS

To reduce the human error during the E-Day and ensure an efficient and fast oversight of the complex network and its users, the SAISE’s infrastructure (deployed on 25 distinct physical and virtual servers) was enhanced in terms of security and access control by the server for the access management and monitoring solution (Fudo PAM). Additionally, the server warehouse has been modernized with two extra database servers, which replaced outdated units to guarantee a considerable increase of the SAISE productivity during elections. Before the General Local Elections, the interface of the “Check your name in the State Register of Voters” application, developed with the UNDP support and available on the CEC website or by direct access at [verifica.cec.md](http://verifica.cec.md), where a voter can quickly get information and contact details of his/her polling station, was redesigned to offer more intuitive user navigation and a better view of the polling station location.

Figure 2.6. Updated interface of the “Check your name in the State Register of Voters”

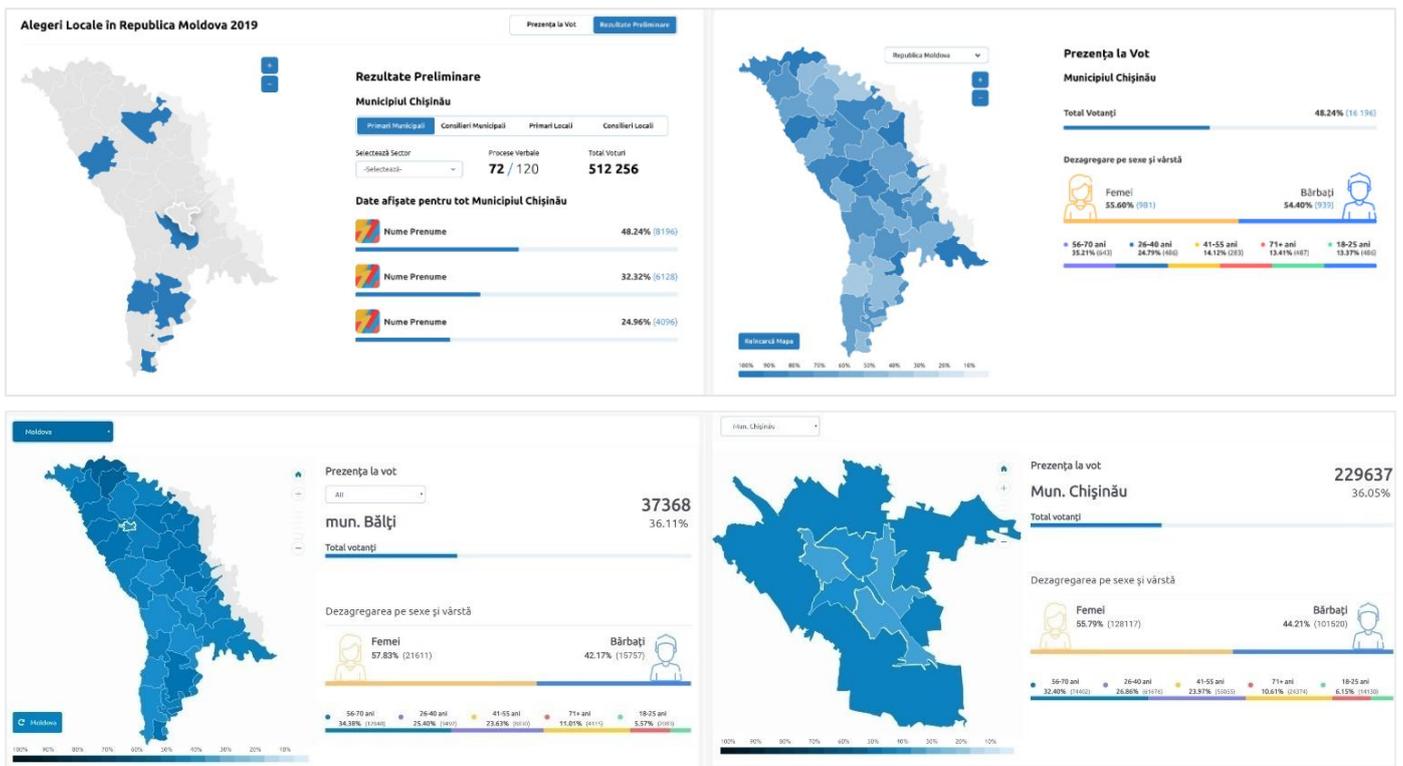

Moreover, to increase the public’s access to electoral data, the Project offered support to the CEC in transposing the “Check your name in the State Register of Voters” on the **QIWI self-service payment terminals**, that are mostly available across the country (over 600 units). As a result, any Moldovan citizen can access the information related to his/her polling station (including address) and the number in the electoral list in three easy steps and free-of-charge. The information was set to be viewed both on the terminal’s screen and via a paper receipt. While the technical side was performed with UNDP support, the partnership/ agreements with the payment terminal operator were defined independently by the Central Electoral Commission.

Figure 2.7. “Check your name in the State Register of Voters” application for payment terminals

Similar to the exemplary experience in supporting the 2019 Parliamentary Elections with real-time disaggregated data, during both E-Days of the General Local Elections (October 20<sup>th</sup> and November 3<sup>rd</sup>, 2019), the visualization of the voters’ turnout and the preliminary results were showcased in an easily accessible and timely manner.

Figure 2.8. Real-time visualization of voter turnout and preliminary results (round 1st, October 20<sup>th</sup> 2019)

SAISE reconfirmed its exceptional functionality and impeccable provision of online disaggregated data for more than 1.2 million users, being also assessed by the European Network of Election Monitoring Organizations (ENEMO)<sup>7</sup> as in line with the national legislation and international standards.

On the 20<sup>th</sup> of October 2019, in parallel with the General Local Elections, the Moldovan voters participated in the new Parliamentary Elections for four constituencies, including constituency no. 50 (to the West of Moldova). For the latter, 85 polling stations were opened in 22 European countries. The [diaspora.voteaza.md](http://diaspora.voteaza.md) application was updated and offered its mapping/ routing support to 5,209 users. While the number of users of the application in October was significantly lower compared to the February elections (42,182 users), they represented exactly 55% of the active voters in each of the elections. Moreover, both in February and October, the most active users were young people aged 25-34 years (48% and 46%), while the share of the mobile devices used for the access to the application was the same – 70%.

Moreover, to further streamline the voting process, the Project piloted a technical innovation of using [ID card barcode scanners in 70 polling stations in Chisinau municipality](#). The randomized controlled trial demonstrated higher productivity of the electoral officials/ data operators utilizing this tool, in comparison with the manual data entry method. Thus, human errors, time, and queues of voters were reduced by 72 percent. This result would require from the Central Electoral Commission a scaling-up phase during the next 2020 Presidential Elections, particularly in the polling stations opened abroad.

In the framework of the SAISE adjustments for the General Local Elections, the Project offered its support to relaunch the application for visualization of election results at the polling station level. Adapted to all types of elections to offer a detailed snapshot of the electoral process at the local level, the application was transferred to the CEC and is planned to be published by September 2020 on the official website.

## SUSTAINABLE DEVELOPMENT AND MODERNIZATION OF THE SAISE MODULES

Since 2014, UNDP's support to the CEC IT ecosystem aimed at developing long term solutions and tools for the immediate electoral shortcomings and necessities. A continuous highly skilled IT expertise, as well as strategic IT advice provided by the Project contributed to the expansion of the SAISE from 9 modules in 2017 to 13 modules in 2020. Each Module became a solid and sustainable part of the IT System ensuring a more transparent, accurate and better organized IT electoral process.

<sup>7</sup> [ENEMO International Election Observation Mission / General Local Elections 2019 in Moldova /](http://ENEMO International Election Observation Mission / General Local Elections 2019 in Moldova /)

Figure 2.9. State Automated Information System – Elections (SAISE) Modules

## STATE AUTOMATED INFORMATION SYSTEM – ELECTIONS

### MODULES AND THEIR FUNCTIONS

**STATE REGISTER OF VOTERS** – Contains data about all Moldovan citizens with voting rights. The data exchange with the State Register of Population is done routinely on a daily basis (24/7). It generates automatically electoral lists for different type of elections ([modernized](#)).

**SUBSCRIPTION LISTS** – Analyzes the content of the lists submitted as support for an electoral candidate. A wide range of electronic filters allow an in-depth qualitative verification of personal data (e.g. name, ID numbers and signatures), reducing the human errors to minimum. It helps the CEC to decide upon the approval/rejection of an electoral competitor for elections/referendums ([updated](#)).

**ROTATION OF CANDIDATES** – Gives possibility to the CEC to publicly display disaggregated data about the actual composition of the local, district and municipal councils. The data are available on the CEC website and presents all elected officials with current mandates, their age and political affiliation, as well as their substitution. These data are frequently used by the CSOs, media outlets, political parties, donors active in the area ([improved](#)).

**PRELIMINARY REGISTRATION** – Allows the CEC to collect information about voters who intend to cast their vote outside the country. This information is further presented to the Government, so that the Executive to decide upon the number of polling stations to be opened abroad additionally to the ones anticipated in diplomatic missions and consular offices. Compared to 2016 when the application was launched and around 3,559 citizens have filled their preliminary registration forms, in 2019 for the Parliamentary Elections a total number of 24,600 voters used the application ([adjusted](#)).

**ELECTIONS DAY** – Ensures the electronic registration of voters during the E-Day in polling stations. SAISE operators introduce the person's unique ID number and register his/her presence at voting, thus preventing the falsification of data and multiple voting ([updated](#)).

**BALLOT PAPERS** – Automatically generates the necessary templates of ballot papers. It prevents the human error and reduce the time and costs for preparing the electoral documentation ([improved](#)).

**CHECK YOUR NAME ON THE VOTER'S LIST** – Allows each citizen with voting rights to check the correctness of his/her data and get contact details of the polling station to which he/she is assigned. The application is publicly accessible on the CEC website ([modernized and upscaled](#)).

**INFOGRAPHICS MODULE** – Gives possibility for the real-time data visualization of voter turnout and preliminary election results ([redesigned and improved](#)).

**MCONNECT INTEROPERABILITY APPLICATION** – Ensures the interaction of SAISE with other governmental IT systems and registers via the MConnect platform ([updated](#)).

**ELECTORAL CANDIDATES** – Provides tools for electronic registration of electoral candidates and administration of their profiles throughout the electoral cycle ([conceptualized and developed](#)).

**DOCUMENTATION** – Allows the CEC to electronically manage and keep records of electoral documents ([conceptualized and developed](#)).

**REGISTER OF ELECTORAL OFFICIALS** – Represents a practical HR Management tool that shall facilitate the evidence of all electoral officials ever involved in elections. The development of this Module was out of the Project scope. However, the CEC requested the Project to provide support to develop the Module, as the Project Team proved several times its high competence and experience in implementing complex IT tasks. An additional cost-sharing agreement with UNDP was signed in May 2019 (with a total value of USD 87,038).

The development started in early January and finalized in April 2020. The Register stores information such as: a) personal data; b) previous positions in electoral management; c) trainings and performance assessment indicators. For future elections, the Module will provide adequate data to adopt optimal administrative decisions in selecting and appointing electoral officials.

To maximize the Module's utility, the Project contributed to the migration into the system of the historical data about all officials and local staff involved in the 2016-2019 electoral cycles, amounting to 49,700 entries ([conceptualized and developed](#)).

**FINANCIAL CONTROL MODULE** – ([conceptualized and described under Output 3](#)).

All IT Modules are managed through **SAISE ADMIN** – System's core that ensures a centralized administration of operational functions intended to manage the users and their roles and to initiate electoral cycles.

During 2017 – 2020, in addition to the technical IT support in adjusting the SAISE, the Project also helped the CEC in delivering a set of videographics targeting the general public that explain key IT procedural aspects of the 2019 Parliamentary Elections and electoral process. The products have been largely promoted on TV channels, social media platforms and represented a consistent part of the civic education and voter information campaigns carried out during 2018 – 2019. To ensure accessibility of the information, all video materials have been developed in both Romanian and Russian languages, accompanied by sign-language.

Figure 2.10. Videographic explaining the life of a ballot paper

Throughout the Project implementation, the effective enhancement of the SAISE brought remarkable improvements in the election process. The Central Electoral Commission currently benefits from more reliable informational solutions for electoral management and oversight, a renewed server infrastructure and a clear roadmap for the future medium-term development of its IT ecosystem. Moldovan citizens and key actors, particularly the civil society and political parties, can now view in real-time the voter turnout and disaggregated results of the elections, Diaspora members can find their polling stations faster than before and the voting process is optimized at the polling station level due to the innovative solutions supported by the Project. Adhering to the CEC’s roadmap for developing the SAISE, the Project’s digital transformation path under Output 2 included multiple measures for ensuring the compatibility of new solutions with existing IT services of the CEC, thus increasing the sustainability of the provided support and creating opportunities for future digitization efforts.

## OUTPUT 3: POLITICAL PARTY FINANCE FRAMEWORK FURTHER ADVANCED

### OBJECTIVE 3.1. POLITICAL PARTY FINANCE MODULE OF SAISE FULLY OPERATIONAL

 RESULTS ACHIEVED

- ❖ Revision of the electoral legal framework with respect to the mixed electoral system and political party financing – completed
- ❖ A set of information products (video-graphic, infographics) on political party and electoral campaign financing, including from gender perspective – developed and largely promoted
- ❖ “Financial Control” Module of SAISE – developed
- ❖ Second edition of the InnoVoter Creativity Lab – organized
- ❖ Prototype of the “Financial Control” Module public interface – produced through crowdsourcing
- ❖ Elaboration of the “Financial Control” Module’s public interface – completed
- ❖ Digitization of the historical political parties’ financial reports – completed
- ❖ Specialized support for the harmonization of the electoral legal framework, with emphasis on personal data protection, accessibility and transparency – provided
- ❖ Technical training of political parties on the usage of the “Financial Control” Module – completed

Building on the previous UNDP interventions, the current Project helped the Central Electoral Commission to further advance in strengthening the political parties finance framework with a fully operational online reporting tool and improved electoral legislation.

According to the Law on Political Parties Financing adopted by the Parliament in April 2015, the Central Electoral Commission became responsible for the monitoring and analysis of the political parties and electoral campaigns financial reporting – a challenging task requiring strong institutional capacities and efficient mechanism to ensure fair and equal opportunities for all electoral competitors. From January 2016, the CEC started to monitor and analyze both election campaign and annual political parties’ finance reports. The use of the paper-based format of reporting resulted in critical amounts of data that needed to be processed by the employees of the CEC’s Finance Department. The CEC found itself in the difficult position to exercise oversight over the political party finance without being adequately equipped for this function. Thus, within the framework of the previous UNDP Programme (Democracy Programme/ Electoral Component) a new SAISE module has been conceptualized to facilitate the online submission of financial reports by the political parties. The “Financial Control” system was designed to automate the complete lifecycle of the processes related to the political parties’ reporting on the activities implemented with the funds received from the state budget, as well as on electoral campaigns’ expenditures.

Due to an initial funding gap, the development of the IT system started with a six-months delay, in March 2018, within the current Project, based on a comprehensive IT Concept defined with inputs received from the main stakeholders, civil society representatives and the Project IT experts. In February 2019, the Module was deployed in the CEC infrastructure, becoming an integral part of the SAISE. Considering the novelty of this instrument, throughout 2019, specialized training has been conducted for both the CEC staff (as system

administrators) and political parties' representatives (as system users). The training participants have been familiarized with the user interface and technicalities, have had the opportunity to simulate the online reporting process, to receive clarifications on each step to be made and to identify bottlenecks.

In June 2019, the Central Electoral Commission adopted a [set of amendments](#) to the Regulation on political parties' financing, including the major decision on the mandatory status of the online reporting, using the "Financial Control" Module of the SAISE, as of January 1st, 2020. All political parties were strongly encouraged to use the system for submitting the online reports on a voluntary basis, prior to the mandatory date. Although the high interest to pilot the system was expressed by the treasurers during the training, none of the political parties submitted online their mid-year reports for 2019. By end of June 2020, only 22 political parties (out of 33 that submitted their yearly reports for 2019 fiscal year) have used the module. With the software and technical setup in place provided by UNDP, the CEC will have to further ensure the functioning and timely adjustment of the module to eventual changes in the legal framework governing political parties' financial reporting, through adaptive and corrective maintenance. In parallel with the system piloting, the Project provided support in digitizing the historical paper-based financial reports submitted by the political parties/ candidates during 2014 – 2018, as part of the digital archive of the "Financial Control" Module. Over 2,264 reports have been digitized and migrated into the database of the system. In the long-run, this effort will allow the CEC to better analyze and track the data related to donations, expenditures and transfers, while also smoothing the transition from paper-based to digital/ online reporting.

### PUBLIC INTERFACE OF THE "FINANCIAL CONTROL" MODULE

In 2019, the Project and the CEC's Financial and IT Departments replicated the 2018 Project's best practice of crowdsourcing ideas from young people - [InnoVoter Creativity Lab](#). The purpose was to select a user-friendly easy-to-see and easy-to-understand design for the public interface of the "Financial Control" Module, which has as one of the main functions the automatic generation of reports on the CEC webpage.

Similar to 2018, the Project selected 30 young professionals and students (*including 7 women*) and capacitated them with electoral knowledge, including political parties' financing particularities, as to deliver innovative solutions and prototypes. This edition had a larger reach than the first one, being watched online through the [Privesc.eu](#) platform by six (6) times more users during the first day (8,791 views in 2018 versus 53,541 in 2019), fact that demonstrated a higher interest among young people and citizens in electoral education events. The learning practical approach has been evaluated by all participants as very useful, challenging, intense, and entertaining. They suggested replicating crowdsourcing events on other IT electoral topics.

Figure 3.1. InnoVoter – Creativity Lab, second edition (24 – 26 May 2019)

After the event, the Project supported the development and implementation of the winning prototype, being commissioned to the CEC at the end of December 2019. The data visualization interface of the Module shall provide useful tools for public information, as well as opportunity for data analysis and scientific research in the electoral field, thus ensuring the transparency and accessibility of data as a key premise for a trustworthy electoral process. Its publication is planned by the CEC in the forthcoming period.

Figure 3.2. Prototype for data visualization of financing of political parties and electoral campaigns

### OBJECTIVE 3.2. TECHNICAL SUPPORT FOR THE REVIEW OF THE LEGAL REFORM OF THE ELECTORAL CODE PROVIDED

In 2018, consultations between the Parliament and CSOs on the amendments to the legislation on Political Parties' Financing resulted in the adoption of amendments to the Electoral Code and to the Law on Political Parties' Financing. Advocacy efforts to strengthen women's participation in politics resulted in the adopted legal amendments providing better opportunities to women by lowering the number of signatures to be collected by women candidates for the registration, compared to men, and by offering financial incentives to political parties for the women elected on the party lists or supported in single-mandate constituencies.

#### The distribution breakdown of the state budget allocation for political parties as per the amendments to the Law on Political Parties Financing, Article 27(1):

- ⇒ **40%** - proportionally to political parties based on results obtained in Parliamentary Elections;
- ⇒ **40%** - proportionally to political parties based on results obtained in Local Elections;
- ⇒ **10%** - proportionally to political parties that will observe the 40% quota of women candidates out of the total number of candidates put forward in uninominal constituencies for the Parliamentary Elections.
- ⇒ **5%** - proportionally to political parties based on the actual number of women elected as members of Parliament in uninominal constituencies;
- ⇒ **5%** - proportionally to political parties based on the actual number of young people elected in the Parliamentary and Local Elections.

To distribute the information on the above incentives, the Project produced a set of infographics that have been widely broadcasted on social media in both Romanian and Russian languages. These products emphasized specifically the need for political parties to observe the quota of 40% on the party lists in order to be registered for the proportional component of the elections and reminded parties about the financial incentives for the nomination of 40% women in the uninominal constituencies. In November 2018, the CEC also issued a [Recommendation](#) to political parties urging them to review and adjust internal regulations and management structures to comply with the 40% gender quota in the leadership bodies, as the failure for non-compliance with the respective requirement could have resulted in the non-registration of the political party in the Parliamentary Elections. Additionally, the Project assisted the CEC in developing a [videographic](#) aimed to deliver the complex information on a more user-friendly manner. The spot was largely promoted via TV channels, through social media platforms, trainings and public events.

Also, an **information guide**, consisting of eight (8) infographics to illustrate: a) the main provisions of the political parties financing legislation (3 infographics); and b) the electoral campaigns financing (5 infographics) has been developed. The guide exemplified the standard requirements concerning donations to a certain political party (by legal and physical entities), the methods and types of allowed donations to a certain political party and the restrictions for financing.

Figure 3.3. Videographic on political parties financing

In August 2019, prior to the General Local Elections, the Moldovan Parliament adopted a set of new amendments to the Electoral Code<sup>8</sup>, including: 1) abolishment of the mixed electoral system and returning to the proportional electoral system; 2) prohibition of the electoral campaigning one day prior to and during Elections Day; 3) allowing voting for citizens living abroad with expired passports and/or national IDs; and 4) prohibition of donations from private companies that have/had contracts with public institutions in the past 3 years prior to elections. The Moldovan Parliament also introduced a **new gender placement quota** for the political parties' lists of candidates, as to ensure that at least 4 candidates out of each 10 represent one the genders. As the changes to the Electoral Code were made three months before the General Local Elections, for these elections, as an exception, it was accepted the formula of 3 candidates out of each 10 to represent one of the genders.

Figure 3.4. Infographics of the Information Guide on political parties and electoral campaigns financing.

Following these updates, the Project provided legal technical support to the CEC in collecting information and preparing a package of legal amendments necessary for the harmonization of the electoral legal framework, with emphasis on personal data protection, accessibility and transparency of information. A set of comprehensive draft amendments to the Electoral Code was elaborated, focusing on the exclusion of discrepancies between regulations and conceptualization of an implementation roadmap, in close collaboration with the CEC members and departments. In March 2020, the compiled proposals to amend the electoral legislation was submitted to the CEC for further use in drafting and defining a legislative initiative for amending the Electoral Code<sup>9</sup>.

In the upcoming years, further technical support will be critical for consolidating capacities of the CEC to perform oversight on political party financing<sup>10</sup>. An important role will have to be played by an extended network of partners of the Central Electoral Commission, including CSOs and investigative journalists, that will be able to offer their support in monitoring and reporting on their findings. Moreover, using the CEC Development Strategy (2020 – 2023) and Election Observation Mission reports as basis, the Project will provide targeted support to improve the necessary electoral legal and regulatory framework to address loopholes or contradictions in implementing the legal provisions.

<sup>10</sup> GGF Thematic Report and Project Evaluation / 2020 / p. 8.

## OUTPUT 4: CIVIC EDUCATION AND VOTER INFORMATION SYSTEMS STRENGTHENED WITH A PARTICULAR FOCUS ON WOMEN AND YOUTH

The substantial civic engagement efforts undertaken by the CEC, CCET and Project teams during 2017 – 2020, by reaching around 354,000 direct and over 1,800,000 indirect beneficiaries (inside and outside the country) through more than 1,130 activities, as well as the broad distribution of electoral materials, including the ones adapted for the specific groups of voters, have been praised several times at the national and international levels during different events and conferences. In 2019, the Central Electoral Commission received the Citizens' Engagement Award for significant contribution to the democratization of the electoral processes at the 17th Edition of the [International Electoral Affairs Symposium in Accra, Ghana](#). Later, the model of the “Democracy Matters” civic education and voter information campaign has been presented as good practice during the UNECE Regional Forum on the UN Sustainable Development Goals, in Geneva. Representatives of different UN agencies and entities from Eurasia, but also their partners, learned about the Moldovan innovative and creative approaches used while delivering electoral education.

The OSCE/ODIHR observation mission also mentioned in the [Report on Parliamentary Elections](#) about the civic education and voter information campaign targeting different groups of voters: women, youth, people with disabilities, ethnic and language minorities, and Diaspora voters as being “...*interactive, with practical exercises on voting and counting procedures, in line with previous ODIHR recommendations...*”. Moreover, the observation mission in particular mentioned the CEC initiative to facilitate the participation of voters with disabilities and the good partnership established with civil society organizations for the dissemination of “*a number of materials in easy to read formats, designed for voters with mental disabilities and learning difficulties, containing simplified texts accompanied by explanatory images about elections and voting procedures.*” It was recommended to continue these efforts to strengthen the participation of citizens in the democratic processes.

If the 2018 civic education and voter information campaign was necessary to explain the mixed electoral system, then for 2019 – 2020 years the Project narrowed the scope of its support, focusing on replicating civic engagement activities and on strengthening the established education networks that demonstrated the valuable impact, in particular for young voters to generate a positive change and bridge the knowledge gap that often leads to misinformation and lower trust in the electoral processes.

### RESULTS ACHIEVED

- ❖ CEC official web page ([cec.md](#)) and its civic education platform ([voteaza.md](#)) – developed;
- ❖ One CCET E-Learning Module “I choose my Parliament in 60 seconds” – developed;
- ❖ 16 videographics conceptualized, developed, disseminated and broadly used within civic education and voter information campaigns;
- ❖ 6 (six) video spots targeting young people to motivate them to vote, as a result of the Filmmakers Camp – crowdsourced and broadly disseminated;
- ❖ 3 (three) video stories (Elephant in the Room) as a result of the VotART workshop – designed and largely promoted during the information campaign for the 2019 General Local Elections;
- ❖ Accessibility Study “Equal Access for all abilities in the polling stations” (2019 and 2020 editions) – developed and available in Romanian, Russian and English languages;
- ❖ Bi-lingual disaggregated data analysis “2019 Parliamentary Election through a gender lens” – developed and publicly launched;
- ❖ Bi-lingual disaggregated data analysis “Gender Profile of the 2019 Local General Elections” – developed and publicly launched;
- ❖ Two national surveys to assess the public perception on CEC image and civic education and voter information campaigns – conducted;
- ❖ 15 exhibitions of electoral materials, posters and drawings – organized;

- ❖ 18 Specialized radio broadcasts in Romani, Gagauz, and for people with visual disabilities – facilitated;
- ❖ 1 Distribution in premiere of 52,383 electoral post-cards “Your vote matters” designated for first-time voters. Direct beneficiaries – 25,626 young women and 25,757 young men;
- ❖ 294 electoral information sessions through cascade training (Librarians’ Network) – conducted. Direct beneficiaries – 5,617 librarians, pupils, library users, including 3,864 women;
- ❖ 198 Electoral Information activities and events (*mobile caravans, door-to-doors, bus campaigns and field-days, including “Elections on Road” campaign nationwide and also focused on ATU Gagauzia*) – organized. Direct beneficiaries – 66,314 people, including 44,253 women;
- ❖ 155 Electoral Information Sessions on mixed electoral system – conducted at the national and local levels. Direct beneficiaries – 64,005 people, including 37,791 women;
- ❖ 125 Election Simulation Exercises – conducted. Direct beneficiaries – 12,621 people, including 6,588 women:
  - 60 simulation exercises for young voters, including first time voters. Direct beneficiaries – 4,362 people, including 2,559 women;
  - 25 simulation exercises for Roma voters. Direct beneficiaries – 7,000 people, including 3,200 women;
  - 15 simulation exercises for voters with hearing, vision, psychological, intellectual and multiple disabilities. Direct beneficiaries - 589 people, including 363 women;
  - 11 Elections simulations in ATU Gagauzia high schools on Bashkan Elections conducted – 263 young people, including 157 women;
  - 8 simulation exercises for elderly people – 209 people, including 158 women;
  - 5 simulation exercises for women survivors of domestic violence, survivors of human trafficking and single mothers. Direct beneficiaries – 148 women from 5 Community Centers;
  - 1 simulation exercise for detainees from Prison No. 3 from Leova. Direct beneficiaries – 47 men involved and 3 women;
- ❖ 76 Elections of the School Councils – organized (first and second editions). Direct beneficiaries – 1,688 young people, including 1,162 women;
- ❖ 50 Interactive Electoral Quizzes for young voters, mainly first-time voters – organized. Direct beneficiaries – 1,869 young people, including 1,115 women.
- ❖ 40 Interactive electoral sessions “Choose Democracy” for pupils – organized. Direct beneficiaries – 854 young people, including 432 women;
- ❖ 37 Electoral Trainings for young voters, including first-time voters conducted. Direct beneficiaries – 987 young people, including 640 women;
- ❖ 20 Regional Intellectual Games “What? Where? When?” (2017 – 2020 editions). Direct beneficiaries – 912 young people, including 566 women;
- ❖ 19 electoral public events – conducted. Direct beneficiaries – 1,384 people, including 835 women;
- ❖ 18 electoral training for librarians’ network – conducted. Direct beneficiaries – 340 librarians, including 4 men.
- ❖ 15 sessions of the Electoral Hub Platform (E-Hub) on different electoral topics, including gender aspects – organized and live streamed. Direct beneficiaries – 284 people, including 180 women;
- ❖ 10 Innovative Combinations of cultural events (*festivals, handcrafts, poetry and song sessions, thematic soirees*) with electoral education sessions for elderly people, including solitary ones. Direct beneficiaries – 307 seniors, including 200 women;

- ❖ 10 Electoral Cafés for young voters, including first-time voters – organized. Direct beneficiaries – 375 people, including 237 women;
- ❖ 10 Door to door campaigns in universities’ dormitories – conducted. Direct beneficiaries - more than 3,000 young people, including 1,475 women;
- ❖ 9 Training of Trainers – organized. Direct beneficiaries – 309 people, including 175 women;
- ❖ 4 practical workshops with detainees from 4 penitentiaries on voting procedures and electoral processes – conducted. Direct beneficiaries – 134 people, including 50 women;
- ❖ 4 Electoral Forums for young people – conducted. Direct beneficiaries – 446 people, including 188 women;
- ❖ 4 Public Lectures for students – facilitated. Direct beneficiaries – 700 students, including 419 women;
- ❖ 4 Electoral Debates on electoral issues – carried out, including 1 on promoting gender equality. Direct beneficiaries – 260 people, including 189 women;
- ❖ 4 Online workshops “Women in Elections” – designed and piloted through social networks. Direct beneficiaries – 148 women.
- ❖ 3 Editions of the “CCET Open Talks Conference” – designed and organized. Direct beneficiaries – 374 people, including 208 women;
- ❖ 2 Editions of the InnoVoter Creativity Lab in Elections – designed and organized. Direct beneficiaries – 60 young people, including 10 women;
- ❖ 2 Electoral Week/Month editions – conducted in 1,265 schools, involving at least 33,600 pupils, including 17,472 young women.
- ❖ 2 campaign for youth – conducted, reaching 15,062 young people, including 7,368 young women.
- ❖ Teacher’s Programme “Promoters of the Electoral Education” – piloted. Direct beneficiaries – 40 teachers;
- ❖ Three – day session “Weekend Training: Media & Elections” – conducted. Direct beneficiaries – 27 journalists, including 18 women.
- ❖ First edition of the Lightroom (un)conference “Aggressiveness and ethics in electoral campaigns” – designed and organized. Direct beneficiaries – 150 people, including 78 women.
- ❖ First edition of the Filmmakers Camp – designed and organized. Direct beneficiaries – 22 young people, including 4 women;
- ❖ First edition of the VotART – creativity workshop in elections – designed and organized. Direct beneficiaries – 19 young professionals and students.
- ❖ One Inclusive Camp for children from boarding schools – designed and organized. Direct beneficiaries – 44 children from 3 boarding schools located in Ceadir Lunga, Carpineni and Bender;
- ❖ One two-days training for newly elected Roma Local Councillors – organized. Direct beneficiaries – 12 people, including 6 women;
- ❖ One Training using the cascade method aiming at informing the voters from Transnistria – organized. Direct beneficiaries – 20 NGOs representatives from Slobozia and Tiraspol (all women).
- ❖ 1 Flash-Mob for people with mobility disabilities and wheelchair users in Comrat – facilitated. Direct beneficiaries – 8 people, including 6 women.
- ❖ 1 Social media campaign targeting Diaspora representatives – conducted. In total, 286 posts (videos, infographics, live-conferences, electoral materials) on Facebook and Odnoklassniki – created – reaching 79,310 directly involved people, including 39,829 women from 25 countries.

The previous programmatic interventions, implemented by UNDP Moldova in partnership with the Central Electoral Commission and the Center for Continuous Electoral Training, resulted in the consolidation of the beneficiary institutions' capacity to deliver professional trainings to a wide range of stakeholders (including electoral officials, observers, CSOs, and political parties), as well as to design and implement meaningful voter information programmes. With the support of UNDP Moldova's Democracy Programme/Electoral Component (2012 – 2017), the CEC and CCET have embedded human rights and gender equality objectives into their Strategic Development Plans for 2016-2019<sup>11</sup>, particularly related to: 1) *strengthening civic education and voter information systems*; 2) *improving communication with citizens and stakeholders*, and 3) *consolidating the information-sharing network consisting of LPAs, librarians, teachers and CSOs*.

Building on the previous efforts, the current UNDP Project applied a tailored and flexible strategy in achieving the Output's targets, demonstrating high performance and adaptability to the external factors and unstable political context. In this sense, key priorities have been identified and pursued:

- ❖ to strengthen the CEC communication with the citizens and different stakeholders;
- ❖ to consolidate the networking with CSOs and national and local partners;
- ❖ to design and implement large-scale civic education and voter information programmes on elections;
- ❖ to conduct targeted civic education programmes between elections;
- ❖ to pilot and carry out innovative electoral education and voter information activities for youth; and
- ❖ to implement human-rights and gender equality interventions for a more inclusive electoral process.

At the beginning of the Project, the team provided strategic expertise to increase the image and visibility of the electoral management body, to capacitate the CEC staffers on communication techniques and strategic messages, as well as to foster the outreach channels. During September – December 2017, the Project provided assistance to the CEC in conducting a series of information and coordination meetings with around 200 electoral officials, including 136 women from 9 districts (Chisinau, Cantemir, Hincesti, Leova, Soroca, Cahul, Făleşti, Calarasi and Teleneşti) and in organizing an [International Electoral Conference](#) (16<sup>th</sup> – 17<sup>th</sup> October) on the 20<sup>th</sup> anniversary of CEC's permanent activity (with more than 150 national and international participants).

In 2018, the Project facilitated the upgrade of the Commission's official webpage ([cec.md](#)) and of its civic education platform ([voteaza.md](#)), both websites being tailored to the latest technological and design trends and offering a more efficient presentation of information to the public (in Romanian and Russian languages).

The civic education platform ([voteaza.md](#)) was also used as a primary source of information for most youth-oriented communication activities related to the mixed electoral system, providing interactive easy-to-see and easy-to-understand materials about voting outside the country, preliminary registration, electoral constituencies, electoral legislation and civic education and voter information events. A [video guide](#) presenting its main features and compartments has been developed with the [Project support](#) and largely promoted through social networks and mass media.

Throughout 2018, the Project also facilitated the signing of over 14 cooperation agreements between the CEC and other public institutions, including the State Chancellery, Ministry of Internal Affairs, Ministry of Foreign Affairs and European Integration, Ministry of Education, Culture and Research, Ministry of Health, Labor and Social Protection, Ministry of Economy and Infrastructure, Border Police and the Postal Office. Resulting from the 2016 – 2019 CEC's Strategic Development Plan, the main focus on the partnerships was a joint commitment to support the efforts of better informing citizens about electoral processes, increase synergies in communication and distribution of information materials.

Developed in 2015 with UNDP support, the CCET's web-based e-Learning Platform was further updated with new online training courses bringing the total to 27 courses that are currently available to the public. In 2018, an interactive course [I choose my Parliament in 60 minutes](#) was added to the library and utilized during the civic education activities involving librarians, first-time voters and pupils.

CCET Strategic Development Plan for 2016 – 2019/available at: <http://CCET.md/index.php?pag=news&id=1178&rid=1179&l=ro>

Figure 4.1. Official CEC website upgraded, accessible and user-friendly

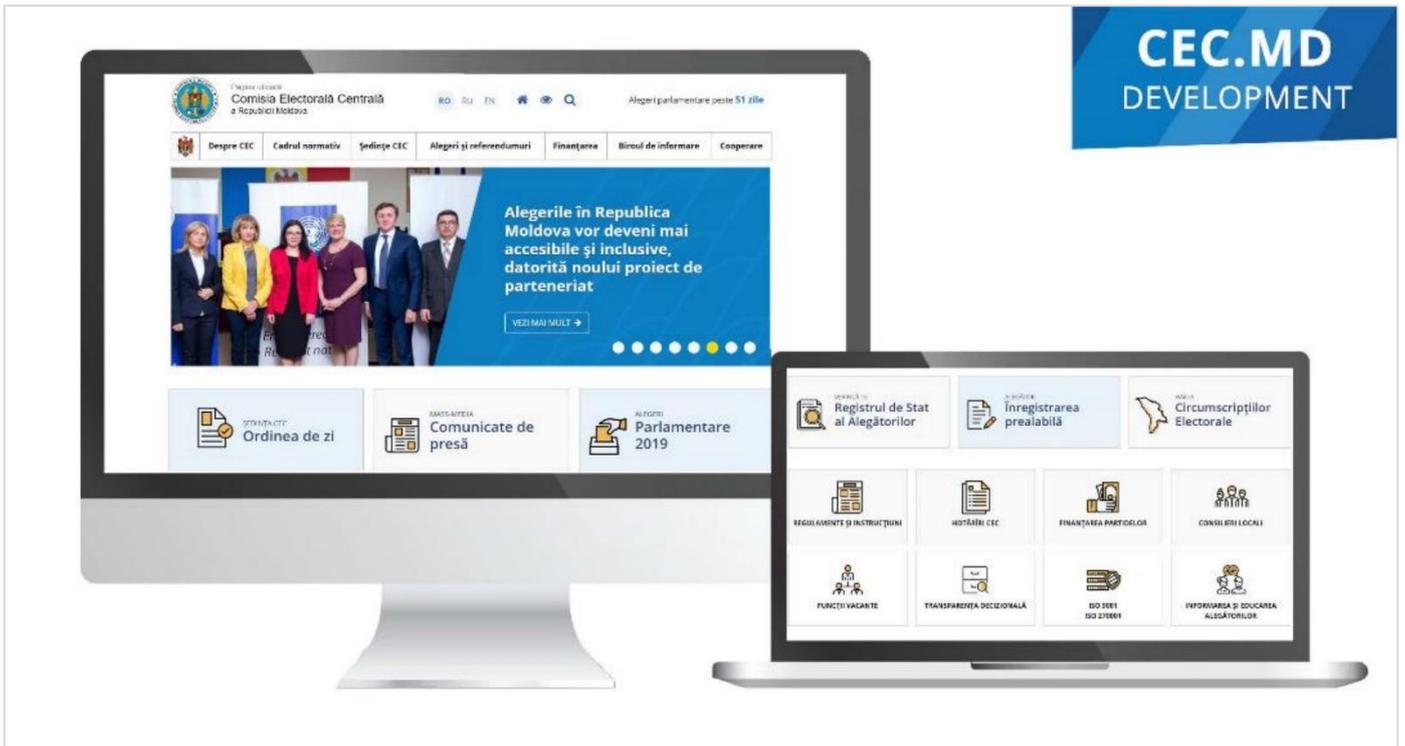

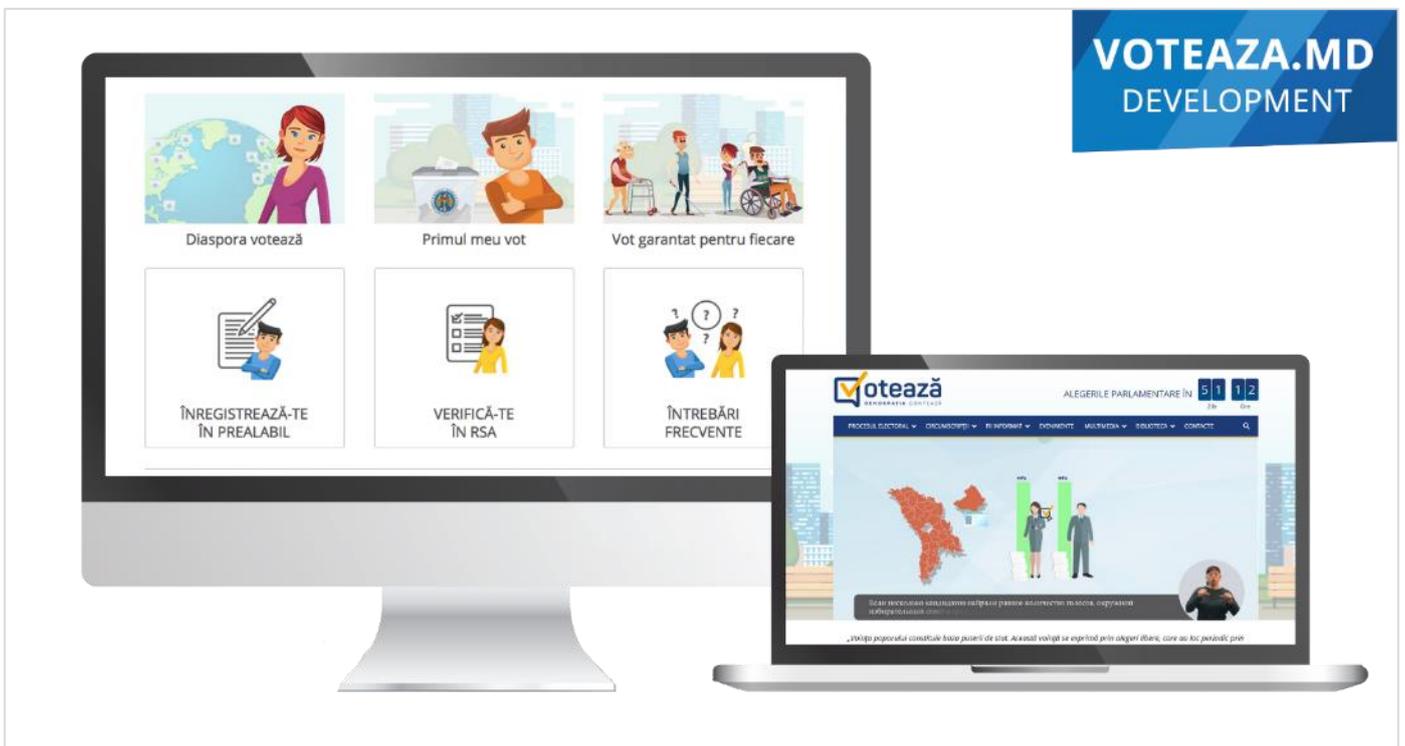

Figure 4.2. Civic education platform upgraded, accessible and user-friendly

From one election to another, the number of users constantly increases. Currently, the Platform successfully complements the CCET face-to-face learning programs and has the potential to reach different groups of voters and stakeholders with reduced training costs and up-to-date electronic didactical materials. In the long run, this tool will have an important role in preparing remotely the electoral officials for elections, thus increasing the outreach in a transformative manner<sup>12</sup>.

## “DEMOCRACY MATTERS” CAMPAIGN FOCUSED ON MIXED ELECTORAL SYSTEM

The 2018 civic education and voter information programmes was initially planned to focus on delivering general knowledge on electoral processes between elections. With a new mixed electoral system in place, the Project adapted and customized its Action Plan to the new requirements, designing and conducting holistic and multi-layered interventions, aimed at creating mechanisms to empower and foster civic participation, as well as building a strong and sustainable information and education network, through two distinct campaigns: 1) Nationwide Campaign - “Democracy Matters” implemented by the Central Electoral Commission with the direct Project support; 2) Civic education and voter information campaigns “Democracy Matters” implemented by 12 NGOs selected under the Small Grants Programme “Elections 2019”.

The “Democracy Matters” campaign was designed to deliver relevant electoral information about the specifics of the mixed electoral system, roles and responsibilities of the Central Electoral Commission and its main strategic objectives set for the 2019 Parliamentary Elections. One of the biggest challenges was to produce supporting electoral materials in an accessible and easy-to-understand ways, considering the complexity of the new system, such as brochures, posters, infographics, videographics and video materials. To reach as many citizens as possible, the campaign was carried out during the whole 2018 year, by establishing multiple partnerships with public institutions to disseminate the electoral information and contribute to an increased outreach within and outside the country. The “Democracy Matters” campaign was structured in several levels of intervention, considering the target groups and the purpose of the efforts.

Figure 4.3. “Democracy Matters” implemented by the CEC with the direct Project support (2018)

**Mobile bus-campaign “Elections on Road”** has been organized in 15 district centers through 28 regional meetings during April – May 2018. More than 3,545 people (2,382 women and 1,163 men) have received through face-to-face meetings a detailed information on the overall electoral process and provisions of the mixed electoral system. The main goal of this exercise was to strengthen the relationship between citizens and the electoral management body, thus facilitating a direct, close communication on new amendments to the Electoral Code, new electoral regulations, the importance of participating in elections and the role of the

electoral staff and local leaders in organizing elections. For the first time ever, a public institution undertook such an effort in delivering messages directly to the citizens, distributing first-hand materials and details about its daily work, strategic vision and plans for the future.

*Table 4.4. Table of district centers covered by the “Elections on Road” mobile bus-campaign*

District Center	Session I (large public)			Session II (teachers and pupils)			Total I and II		
	Total	Men	Women	Total	Men	Women	Total	Men	Women
Chisinau	41	16	25	N/A	N/A	N/A	41	16	25

Cahul	97	32	65	N/A	N/A	N/A	97	32	65
Orhei	215	69	146	N/A	N/A	N/A	215	69	146
<b>Total</b>	<b>2,284</b>	<b>741</b>	<b>1,543</b>	<b>1,261</b>	<b>422</b>	<b>839</b>	<b>3,545</b>	<b>1,163</b>	<b>2,382</b>

To evaluate participants' knowledge and interest in the electoral processes, at the end of each session the attendees were required to complete a survey. Out of 2,320 participants (including 1,713 women) that completed the questionnaire, 47% were officials from local public administrations (secretaries of local councils, mayors, heads of departments, cadastral engineers, etc.), 31% were students/pupils and 13% were teachers and school principals. An absolute majority confirmed the usefulness of the information events and expressed their firm belief that the events can contribute to a more active involvement of citizens in the electoral processes. 78% acknowledged that the information events were *very useful* and *useful*; 81% confirmed that they understood *very well/sufficiently well* the new mixed electoral system rules and procedures; almost 70% said they are confident in the professionalism of the CEC, while 7% of respondents expressed their lack of confidence in the election management body. Speaking about their intention to vote at the 2019 Parliamentary Elections, 80% of the respondents declared that they are certain they will participate. The stronger intention to vote were expressed by public officials and teachers (88%), compared to a lower intention expressed by pupils and students (72%) (for more details, see Figure 4.5)

Figure 4.5. Survey results on assessing the “Elections on Road” mobile bus-campaign

**Information campaign targeting Moldovan citizens residing abroad** as part of the “Democracy Matters” information campaign has been carried out in parallel with the mobile bus-campaign in partnership with the Central Electoral Commission and Border Police. In total around 330,000 citizens crossing the border points have been informed about the mixed electoral system and the opportunity to preliminary register for the 2019 Parliamentary Elections. Additionally, in the framework of the partnership between the CEC and the Ministry of Foreign Affairs and European Integration, a total of 41,000 information materials (posters, flyers, brochures, etc.) on the mixed electoral system and preliminary registration for out-of-country voters were distributed to all 34 Moldova’s diplomatic missions abroad. Four (4) direct information campaigns focused on informing people living abroad at the busiest routes have been organized by the CEC staff helped with 10 volunteers (mostly women), reaching a total of 850 citizens:

- [Chisinau International Airport](#) – around 500 citizens
- [Railway Station](#) – around 100 citizens
- [Leuseni Border](#) – around 100 citizens
- [Chisinau North Bus Station](#) – around 150 citizens

Additionally, in partnership with the Chisinau International Airport, in the period of the Easter Holidays, videographics on elections and a [motivational video](#) targeting the Diaspora, as well as a videographic on [preliminary registration](#) opportunity have been broadcasted in both languages (Romanian and Russian) for a period of two weeks.

Figure 4.6. Motivational video targeting the citizens living abroad

Figure 4.7. Videographic on preliminary registration

**Electoral Week in Schools** About 192,000 pupils from 1,265 schools took part in the first-ever organized Electoral Week (21 – 25 May 2018) carried out by the CEC in partnership with the Ministry of Education, Culture and Research and the district Departments of Education with the Project support. This pilot exercise aimed at informing pupils (mostly first-time voters) about their rights and obligations as voters, about democratic elections' principles and values, different opportunities for civic engagement and last, but not least, about importance to get involved and participate in elections. The electoral materials and guidelines have been prepared by the CEC and, with the Ministry's support, have been sent to schools in advance of the events. The teachers were requested to customize the electoral information received and present it, along with motivational video spots and videographics, during the [ordinary civic education classes](#). In parallel, the smaller classes have illustrated during the [painting classes the motto of the campaign: "Democracy Matters! Your vote counts!"](#). The best paintings have been selected and exhibited for a few weeks in several strategic places in Chisinau (International Airport and the Central Square "Stefan cel Mare"). The drawings exhibited at the Airport have been seen by approximately 10,000 people and those exhibited in the Central Square – by approximately 65,000 people.

**Regional electoral debates – Should young people be obliged to vote?** In November 2018, in the context of the upcoming Parliamentary Elections, three regional debates have been organized with the topic “Should young people vote?”. Each debate session consisted of two teams – affirming and negating the need of the young people to cast their vote. The teams argued their position with practical examples, historic data and cases from other countries. The audience invited to participate to these sessions was represented by students from educational institutions from north, center and south of the country (Riscani, [Chisinau](#), [Cahul](#)). In total, 225 young people, including 154 women, had the opportunity to learn about civic engagement, active participation in democratic and electoral processes, by analyzing different scenarios delivered by both teams. At the end of each session, the participants voted the most convincing debating team and, in all three sessions, the affirmative one (that young people should vote) gained the majority of votes. The debating session organized in Chisinau was focused on the topic ["Young people should be obliged to vote. Yes or No"](#) and was live broadcasted through Privesc.eu platform, reaching 3,660 views.

*Table 4.9. Regional electoral debates – Should young people be obliged to vote?*

Nr.	Date	Educational Institution	Locality	Men	Women	Total
1.	7 November 2018	Argo-Industrial College	Riscani	39	47	86
2.	14 November 2018	State University „Bogdan Petriceicu Hasdeu”	Cahul	3	37	40
3.	21 November 2018	Academy of Economic Sciences	Chisinau	29	70	99
<b>Total</b>				<b>71</b>	<b>154</b>	<b>225</b>

Moreover, additional results in delivering electoral information to youth, specifically young women (230 out of 415 participants) were achieved by supporting the CEC representatives in organizing **(4) public lectures in universities** from Chisinau. The students had the chance to better understand the complexity of the mixed electoral system by asking the electoral officials directly about the election myths, challenges and particularities of the election organization and management. Also, they find out about their rights and responsibilities as voters and about possibilities to become more active in electoral and democratic processes as electoral officials, observers or candidates.

*Table 4.10. Public lectures in universities in Chisinau*

4.	Free International University of Moldova	Chisinau	23	44	67
<b>Total</b>			<b>185</b>	<b>230</b>	<b>415</b>

**Door-to-door campaign in university dormitories.** As the person-to-person approach represented one of the key elements of the whole civic education campaign and voter information conducted in 2018, in December, the CEC representatives and 10 volunteers organized, with the Project support, a three-days door-to-door campaign in 7 university dormitories to interact directly with students, advocate for a conscious

and well-informed voting and different opportunities to be engaged in the democratic and electoral processes both at the national and local levels. In total, more than 3,000 young people have been directly involved in discussions, including 1,475 women. Such initiative undertaken by a state institution was a novelty for the young people familiarized only with political messages and campaigns. Appreciating the efforts, the participants committed to get involved into the dissemination of electoral materials among their peers, receiving for this purpose a customized youth-friendly handbook that comprised easy-to-read, easy-to-understand information about the mixed electoral system, important details about the voting process, as well as other useful information about the electoral management.

**Postcards for first-time voters.** In 2018, for the first time in the Republic of Moldova, the Central Electoral Commission carried out a very complex and lengthy process of preparing and sending [almost 52,500 post-cards to the first-time voters](#), with the Project support. For more than 2 months, the rough data available from the State Register of Voters have been adjusted, compiled by districts and localities and thousands of envelopes have been prepared.

The Commission aimed to deliver a strong personalized message to the first-time voters, in addition to targeting them via social media on the importance to vote and to be actively involved in democratic processes. The post-cards were delivered to 25,626 young women and 25,757 young men a note of significant responsibility that was brought by exercising their right to vote in the 2019 Parliamentary Elections.

Figure 4.11. Post-card for first-time voters (2018)

The Project also helped the CEC in delivering a set of videographics targeting the general public to explain key IT procedural aspects of the 2019 Parliamentary Elections. Eight (8) videographics have been conceptualized and developed in 2018, six (6) of them covered the topics of the IT component of the electoral process. All videographics have been largely promoted on TV channels, social media platforms being available both in Romanian and Russian languages, accompanied by sign-language:

- ⇒ What is the mixed electoral system? Part 1 ([link](#)) and Part 2 ([link](#))
- ⇒ What is the State Register of Voters and how the Electoral Lists are compiled from it? ([link](#))
- ⇒ Details on organizing and conducting Parliamentary Elections for citizens living abroad (Diaspora) ([link](#))
- ⇒ Preliminary Registration of voters residing in a locality on the left bank of the Nistru River ([link](#))

## SMALL GRANTS PROGRAMME “ELECTIONS 2019” FOCUSED ON MIXED ELECTORAL SYSTEM

In early 2018, CEC and CCET with support from the Project launched an initiative to reach out to specific groups of voters using the “person – to – person” approach by engaging non-governmental organizations (NGOs) with relevant grassroots and civic education experience. The Small Grants Programme has been selected as the most suitable mechanism for setting in motion this particular effort and reaching out to women, particularly from vulnerable groups, first-time voters, people with various types of disabilities, linguistic and ethnic minorities, including Roma, particularly women and youth, but also Moldovan citizens living in ATU Gagauzia, Transnistrian region and abroad (Diaspora). The specific target groups have been selected on the following criteria: (a) vulnerability and marginalization of certain population groups and their subsequent limited participation in democratic processes in Moldova, and (b) a set of societal trends that emerged over the past electoral cycles, such as the relatively low participation and interest of youth in elections, on one hand, and increased activism of Diaspora voters, on the other hand.

The civic and voter education activities under SGP “Elections 2019” have been delivered in two phases. The **first phase** (April – July 2018) was aimed at providing information on the actors in electoral processes while promoting an active civic participation culture. The **second phase** (August – November 2018) was focused on explaining to the voters, in detail, including via practical voting simulation exercises, the changes in the electoral system. Out of 24 submitted applications, 12 NGOs were selected as implementers of activities.

## Capacity Building Efforts

To promptly and effectively equip the selected NGOs with knowledge and skills on the electoral process, including the specifics of the mixed electoral system, a series of capacity development activities, along with on-going coaching and mentoring, have been provided by CEC, CCET and the Project experts in the course of the first and second implementation phases of the Programme. During a two-day induction workshop “Grantsville”, the 12 NGOs’ representatives have been trained on the electoral process and its main components, the differences between the proportional and mixed electoral systems, and guided by CEC and CCET experts co-designed methods of civic engagement with specific voter groups based on their distinct characteristics and needs.

In addition to the electoral topics, the NGOs have acquired new skills and knowledge on evidence-based reporting rules of UNDP, gender equality principles to be applied at all stages of Project implementation, including gender-sensitive language and collection and use of gender-disaggregated data and indicators. Principles of neutrality and impartiality in carrying out the electoral information activities in the framework of the SGP “Elections 2019” have been strongly emphasized. The expertise, knowledge and new ideas to engage effectively with specific voter groups on electoral topics equipped the NGOs with a minimum set of skills and electoral expertise to deploy a comprehensive grassroots civic education effort using the person-to-person approach, as feasible.

At the beginning of the second phase of the Programme, two more [workshops](#) have been organized for the NGOs. The results and lessons learned of the phase I have been discussed with the representatives of CEC, CCET and the Project, and the interventions for the phase II have been adjusted, accordingly. The NGOs have received hands-on training on the formation principles and geographic coverage of the single member constituencies set up under the mixed electoral system, creation of lower-level Election Management Bodies (EMBs) and have learned about the Electoral Calendar of Activities for the 2019 Elections (critical points). Two rounds of hands-on Election Day Simulations trainings sessions have

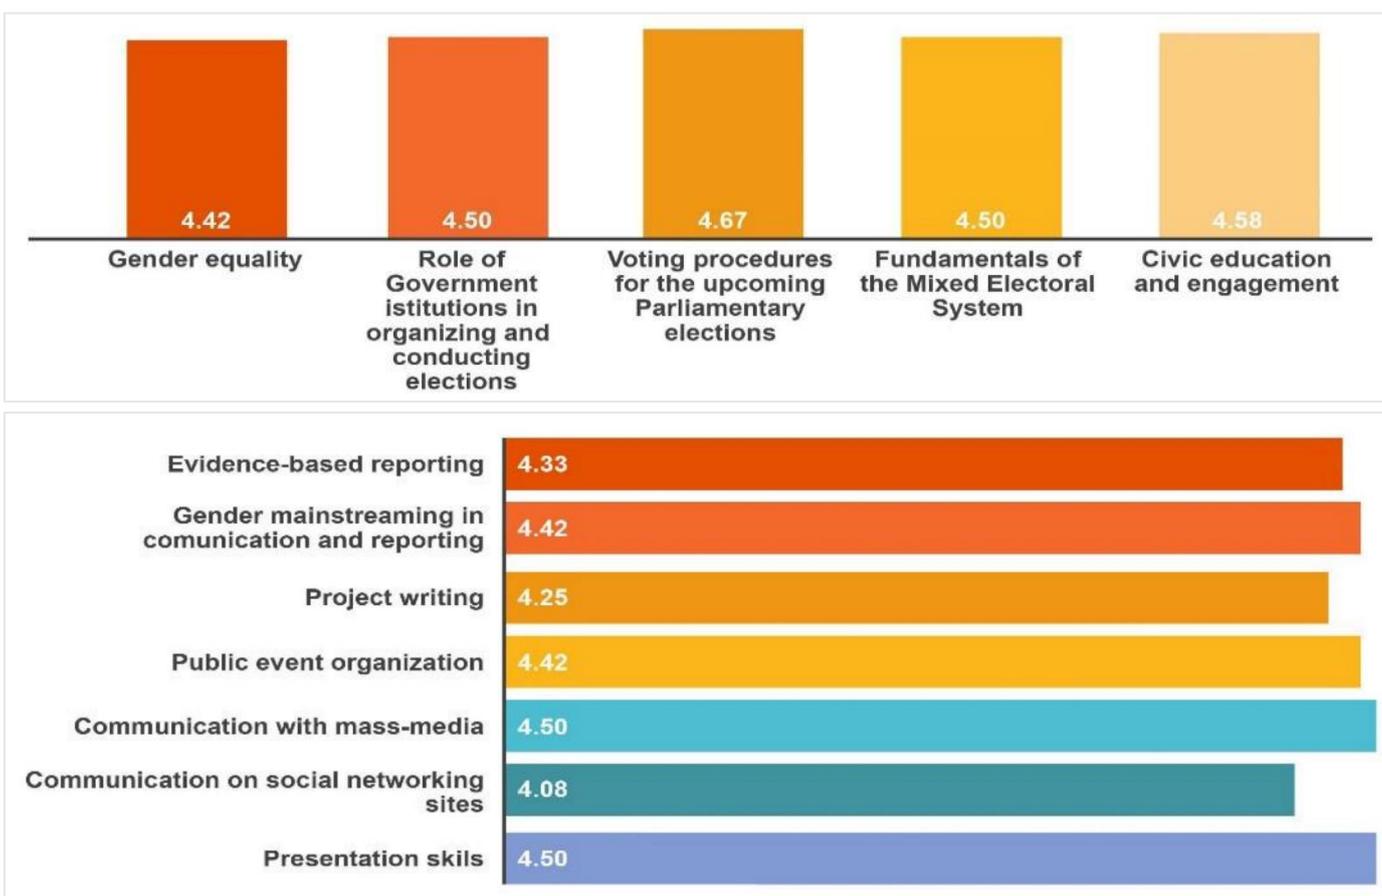

been facilitated addressing most common situations related to the 2019 Parliamentary Elections. These Training of Trainers type activities equipped the NGOs with the necessary expertise to conduct E-Day simulations with their respective beneficiary groups in the target regions, independently. Moreover, a Guide on Organizing Election Simulations in Romanian language has been developed and provided. One of the NGOs (Media Berlii from Gagauzia) voluntarily, and at no-cost, translated it into Russian for use with its Russian-speaking audience.

The training from the phase II also included the consolidation of NGO capacities in the field of non-profit financial management and reporting, as well as communication with mass-media and on social networks. A set of communication platforms have been put in place to communicate and coordinate NGOs’ activities, but also to promptly inform the organizations about the newly developed educational and informational materials, such as: a) Closed Facebook group SGP “Elections 2019” – to share photos and evidence of events, and to communicate latest updates and information; b) Dropbox space SGP “Elections 2019” – where all informational products developed in the civic education campaign, but also project management and communication templates have been shared with NGOs; c) Weekly Calendar of Events – which were aggregated and communicated to CEC, CCET and all NGOs to identify the synergies and coordinate between the organizations.

## Post – Implementation Capacity Assessment

Since the majority of NGOs did not have specific experience in conducting civic education activities on electoral processes, and some did not have previous UNDP grant-implementation experience, the Project team conducted a brief on-line survey among the NGOs to see their perceptions on the capacities developed as a result of their participation in the SGP “Elections 2019”. The organizations indicated, on a scale of 1 to 5 (*with 1 being minimum, and 5 maximum*) that **key thematic areas** in which they improved their knowledge and expertise were with regards to the *new voting procedures* for the 2019 Parliamentary Elections (*an average of 4.67 points*) followed by *increased capacities in designing and conducting civic education and engagement activities in the electoral context* (*an average of 4.58 points*). Additionally, the NGOs reported an increased understanding and knowledge on the fundamentals of the mixed electoral system and role of Government institutions in organizing and conducting elections (*4.50 points on average each*), as well as the importance and principles of *mainstreaming of gender equality in electoral processes and elections* (*4.42 points*).

Figure 4.13. Survey among NGOs implementers

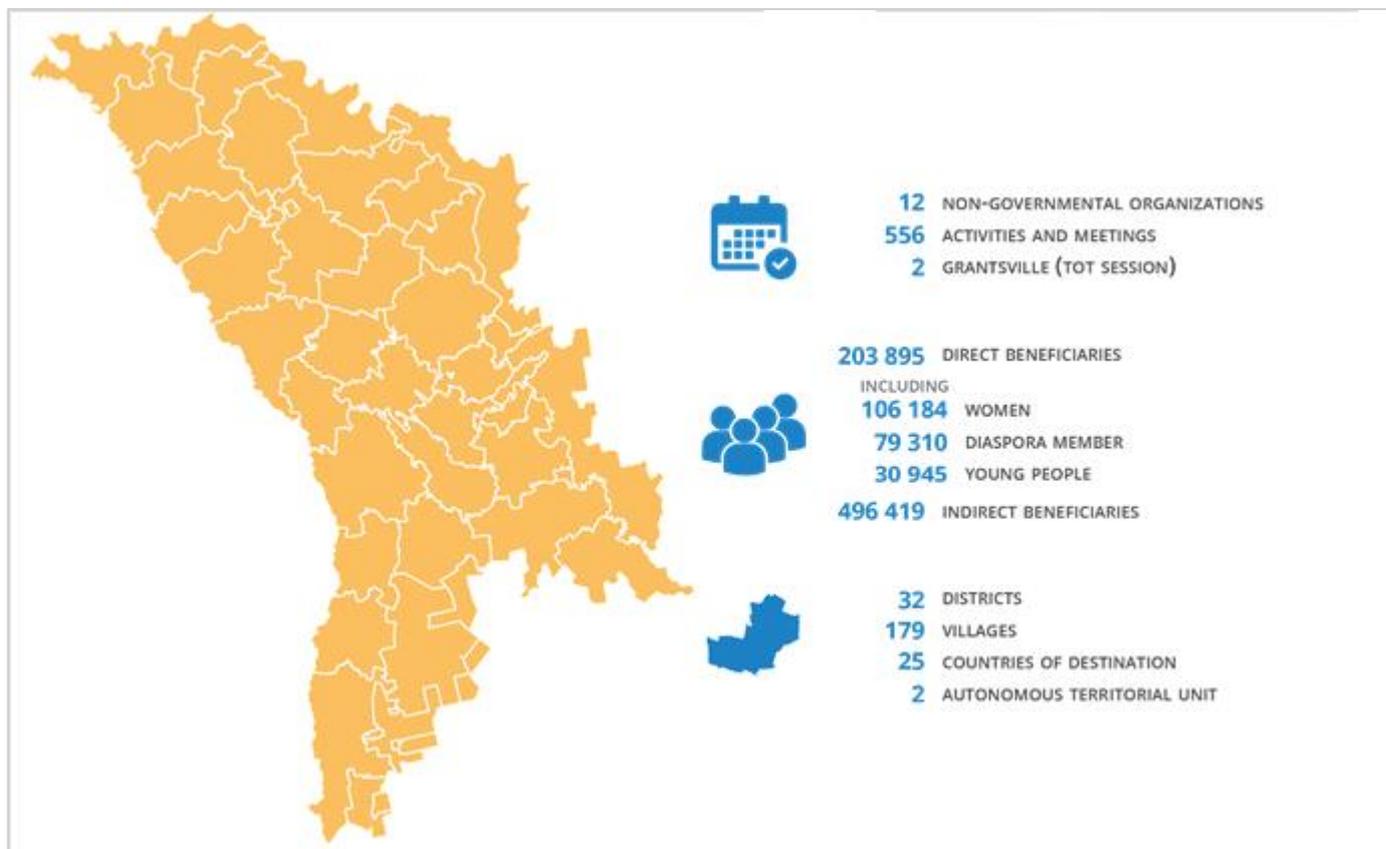

All NGOs indicated that the **key areas of improvement** were communication with mass-media and public presentation skills (*on average 4.5 points each out of 5 maximum*). These were followed closely by a reported capacity increase in *organizing public events and mainstreaming gender in communication and reporting, development of reports using an evidence and results-based approach and communication on social media*. Some organizations particularly indicated new skills learned in *organizing electoral process engagement activities with youth, women from marginalized groups in rural areas from both banks of the Nistru river*. Also, the absolute majority of partner NGOs indicated that *they will continue the civic education on elections voluntarily*, and two of them will do so in the framework of similar projects won from other donors, a success partially due to the expertise and knowledge on elections gained by them in the framework of SGP “Elections 2019”.

All organizations appreciated their experience in partnering with the CEC and CCET in reaching out to citizens and motivating them to participate more actively in the public life, by communicating with them directly in an easy and accessible manner.

## Key Results and Methodology

Making use of the comprehensive civic education and informational package on elections developed by CEC and CCET with the Project support, as well as of the adapted materials, but also the skills and knowledge acquired, the NGOs conducted an estimated total of **556 civic education activities** and actions, including **87 Election Simulations**.

Figure 4.14. “Democracy Matters” implemented through Small Grants Programme “Elections 2019”

The activities were carried out using a mix of innovative and traditional citizens’ engagement methods which were implemented under the “leaving no-one behind” principle prescribed by the Sustainable Development Agenda 2030. The SGP “Elections 2019” had a broad national and international geographic coverage.

--	---	---	--

The multi-faceted effort deployed by the NGOs with support from the national partners and UNDP, reached a total of **203,895 direct beneficiaries, including 106,184 women**. An estimated 496,419 people, of which approximately 252,869 women have been reached indirectly – either via the networks of direct beneficiaries or by other means, including but not limited, to the broadcasts in local media and social media outreach - thus bringing the total number of beneficiaries of the SGP “Elections 2019” to approximately 700,314 people in country and abroad.

To the extent possible, the majority of civic education activities with specific groups of voters located on the territory of the Republic of Moldova, including Gagauzia, but excluding Transnistria, were conducted using mostly innovative person-to-person engagement methods:

**Mobile info-caravans** and **“Field-days”** for voters from remote villages and towns;

**Roma mobile teams** to connect directly with Roma voters via **door-to-door election information** and motivation visits in Romani language;

**Election Day Simulations**, including using adapted techniques and materials for people with disabilities, and carried in Gagauz and Romani language as required;

**Co-design workshops** with people with disabilities to develop/review accessible election solutions for voters with various types of disabilities;

**Bus campaigns** in Gagauzia interacting directly with voters in Gagauz language;

**Flash-mobs** for people with physical disabilities and wheelchair users advocating for accessibility in public buildings, including polling stations;

**Public discussion cafes and intellectual games/contests/quizzes** (including on-line) for young and first-time voters;

**Electoral counselling sessions for women from vulnerable groups**, including victims and survivors of violence, survivors of human trafficking, single mothers, women infected or affected by HIV/AIDS, etc.

**Exhibition and public displays of electoral education materials** placed in schools, rural and urban areas;

**Individual informational house-visits to seniors**, particularly solitary and/or in difficult medical conditions;

**Individual informational visits to prisoners' cells** (Penitentiary Nr. 3);

**Civic education sessions and workshops for detainees** and people released on parole from 3 Probation Offices - Cimislia, Basarabeasca, Leova;

**Specialized radio broadcasts** in Romani, Gagauz, and for people with visual disabilities;

**Cultural events and handcrafts workshops** for seniors, including solitary ones.

Other traditional methods, such as information sessions, workshops, trainings, presentations have been also used in delivering civic education and voter information to specific groups of voters.

To reach out and engage with out-of-country voters, the following social media communication channels have been used:

- ❖ Targeted distribution of civic information on elections and electoral processes in Moldova in **designated on-line spaces** for Diaspora.
- ❖ Organization of **live conferences** on topics of electoral interest relevant to Diaspora with the participation of representatives from CEC, CCET, Ministry of Foreign Affairs and European Integration, ADEPT and Promo-LEX Associations.
- ❖ **Distribution** of over 286 posts and **interaction** with Diaspora voters in 33 Facebook Groups and 13 Odnoklassniki Groups.
- ❖ Setting up of the Facebook page “**Hotline Elections 2019**” (503 members) and posting of all information and educational materials developed in the framework of “Democracy Matters” Civic Education Campaign.
- ❖ Distribution of information on **dedicated Facebook pages** for elections and democratic processes in Moldova – Alegeri.md, Coalition for Free and Fair Elections, ADEPT pages.

In reaching out to voters in Transnistria, the “information by cascade” method has been applied given the challenges to conduct information campaigns on subjects of citizens’ participation and engagement in democratic and electoral processes in the Republic of Moldova on the left bank of the Nistru river.

20 leaders of NGOs from the left and 20 from the right bank have been trained on electoral processes and particularities of the 2019 Parliamentary Elections. The NGO leaders from Transnistria, particularly from the village of Parcani, Slobozia district and Tiraspol, received the Russian versions of printed materials developed by CEC and CCET with the Project support, in particular the Voter Information Guide on Parliamentary Elections, the Poster on the mixed electoral system, as well as all educational videos pertaining to the elections to pass on through their networks to Moldovan citizens residing on the left bank.

Additionally, civic education activities on elections have been organized with young and first-time voters from 2 localities in the Security Zone, particularly the villages of Copanca and Farladeni from Causeni district.

## Adaptation of education materials to specific groups of voters

An important prerequisite for the effective delivery of civic education information to people with disabilities was the use of **adapted materials**, messaging and methods. Therefore, the key electoral information publications and materials pertaining to the Parliamentary Elections and electoral processes at large, have been adapted to the needs of voters, in particular of those with visual, psychosocial and intellectual disabilities. To address the needs of people with hearing disabilities, all informational and motivational videos produced in the framework of the wider “Democracy Matter” Civic Education Campaign included a sign-language interpretation.

In September 2018, a [Public Presentation of Adapted Electoral Materials](#) was organized by the Project with over 80 participants representing the Government, Civil Society and mass media, being translated in sign-language and reaching 7,608 views on Privesc.eu live broadcast.

### Voter Information Guide on 2019 Parliamentary Elections and mixed-electoral system

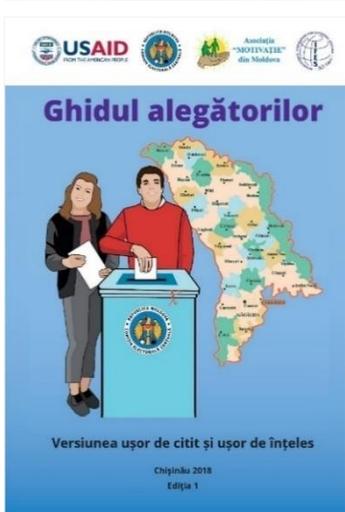

Translated in [Gagauz language](#), printed (500 copies) and distributed in all urban and rural localities from Gagauzia in the partnership with the Electoral Authority in Gagauzia and two NGOs;

Adapted and printed (50 copies) in Braille for people with visual disabilities – distributed via National and Regional Associations of People with Visual Disabilities from Moldova;

Converted in [Audio version](#) for people with visual disabilities – aired 42 times on the on-line radio-station “[Radio vision](#)”, recorded on CDs (50 copies) and distributed via specialized national and regional Associations;

Adapted in “[Easy to Read – Easy to Understand](#)” formats for people with intellectual and psychosocial disabilities available in Romanian (150 copies) and Russian (150 copies) languages. The Romanian and Russian versions have been distributed via specialized Community Centers and Residential Facilities throughout the country.

### Poster on mixed electoral system

Translated in [Gagauz language](#), printed (1,000 copies), distributed in all urban and rural localities from Gagauzia, and displayed in all polling stations on E-day alongside with Romanian and Russian versions due to partnership with the Gagauz Electoral Commission;

Translated in [Romani language](#), printed (100 copies) and distributed in 44 densely populated Roma communities via regional networks of the National Coalition “Roma Voice”.

## Brochure “Democracy can be learned”

Converted in [Audio version](#) for people with visual disabilities - aired 46 times on “[Radio vision](#)”, recorded on CDs (together with Guide) and distributed via National and regional Associations of People with Visual Disabilities;

Adapted and printed in Braille (50 copies) and distributed via aforementioned national and regional Associations.

## Human Rights Dimension of the Small Grants Programme “Elections 2019”

In the framework of the SGP “Elections 2019”, a total of **1,142 people with disabilities** (visual, hearing, mobility, psychosocial, intellectual) of which 654 women (57%) were directly engaged in civic education activities, including [Election Simulations](#) exercises conducted in specialized community centers, residential facilities, national and regional associations. Indirectly, additional 2,367 people, including 1,296 women (people with disabilities and their family members, staff of the specialized institutions, etc.) received necessary information on electoral processes and election procedures. The geographical profile of voters in this category included persons with various types of disabilities residing in 18 districts (Hâncești, Cahul, Criuleni, Rezina, Fălești, Comrat, Drochia, Leova, Ialoveni, Orhei, Dubăsari, Călărași, Strășeni, Basarabeasca, Cimișlia, Soroca and Edinet) and 8 towns and municipalities (Chisinau, Balti, Hâncești, Cahul, Criuleni, Rezina, Fălești and Comrat). They have been engaged directly in **co-designing** election education materials and election day solutions responsive to their needs. For instance: 1) a group of people with hearing disabilities provided recommendations to the CEC regarding the technological and visualization aspects of E-Day briefings to improve the visibility of the sign-language interpretation incorporated in the broadcasts; 2) a group of people with **visual disabilities** reviewed and proposed solutions for the re-design of the **Braille sleeve** to be produced for elections during a co-design workshop; and 3) a group of people with **psychosocial and intellectual disabilities** reviewed and provided feed-back on the content of the easy-to-use and easy-to-read version of the “Voter Information Guide” during a regional focus group discussion.

Another specific voter group facing a lot of stigma in the society are the **detainees** the **ex-detainees**. Representatives from the respective group were also engaged in civic education and information activities and have been provided with practical information about exercising their right to vote in elections. A total of **415 detainees** from the closed type Penitentiary Nr. 3 in Leova learned about their rights, changes in the electoral system and voting procedure, as a results of a **workshop and individual visits** to prisoners’ cells, as well as of an [E-Day Simulation Exercise](#). All detainees have received educational and information materials in Romanian and Russian languages. Moreover, an estimated total of **335 ex-detainees** (over 80% women) covered by Cimislia, Leova, and Basarabeasca Probation Offices have also learned about the new electoral system, documents required to vote, peculiarities related to domicile/residence and received information materials directly at workshops, or via the Probation offices staff during their regular visits.

To engage effectively with the **Roma voters’ group**, 10 mobile teams consisting of a local Roma leader (usually a man), a Roma woman and a young Roma community member (man or woman) have been set-up in 10 Roma target communities. The mobile teams carried out **10 door-to-door** information campaigns and [25 election simulation exercises](#) involving directly an estimated number of **11,094 Roma voters**, including 6,350 women. The activities were conducted in Romani language by trained members of mobile teams. The poster on mixed electoral system has been translated in [Romani language](#) and distributed in 44 densely populated Roma communities via the National Coalition “Roma Voice”. Additionally, **three broadcasts** in Romani language have been aired in framework of the specialized TV show [Petalo Romano](#) and Radio show [Glasos Romano](#) broadcasted on the National TV and Radio Network.

## Gender Equality Dimension of the Small Grants Programme “Elections 2019”

The **gender equality** has been mainstreamed in all civic education activities along with dedicated interventions addressing women, particularly from vulnerable and marginalized groups. An estimated number of **359,053 women** (51%) **of all direct and indirect beneficiaries** of the SGP “Elections 2019”, improved their knowledge in the area of elections, democratic processes and civic engagement.

Out of this number, over 1,900 women with various types of disabilities (vision, mobility, hearing, psychosocial and intellectual) have also been supported to better exercise their election rights by participating in E-Day simulations and receiving adapted materials and training. Over 6,000 Roma women have improved their understanding about the specifics of voting during the Parliamentary Elections. Motivated by the civic education activities, one woman from Otaci community expressed her intention to run as candidate for the 2019 General Local Elections.

Also, **2,231 women** from **vulnerable groups**, particularly survivors of violence, women at risk of violence and /or trafficking, women affected and/or infected with HIV/AIDS, single mothers, women from low-income families in different age categories, including elderly, have been capacitated in actively using their electoral rights. These women, some of whom haven't participated in elections before, due to lack of interest on basis of hardship, and/or restrictions imposed by abusive partners, benefited from [electoral counselling and election simulations](#).

The firm commitment of the CEC, CCET and UNDP to promote and implement gender equality standards in electoral processes, as well as in internal and external communication has been cascaded down to all partner NGOs engaged in the SGP "Elections 2019". The Project team prepared a practical advisory on the observance of gender equality principles at all stages of grant project implementation and provided regular coaching to NGOs to ensure that all civic education interventions are gender inclusive. All partner NGOs have used the gender-sensitive language in their written and verbal communication pertaining to the Project and reported on results achieved using the sex-disaggregated indicators.

### Challenges and Mitigation Measures

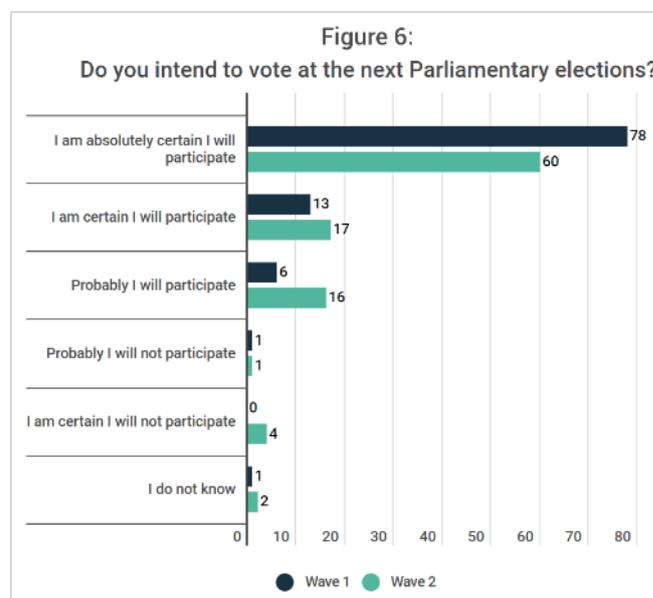

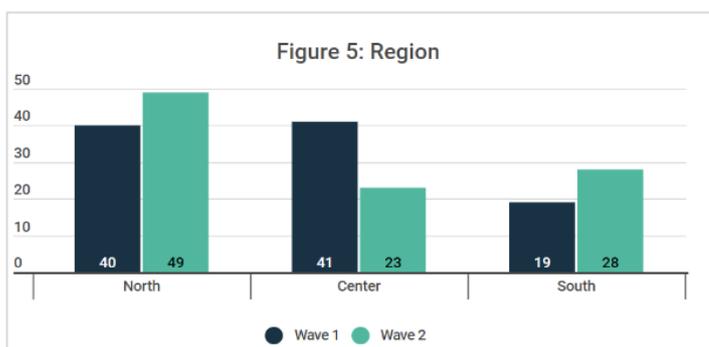

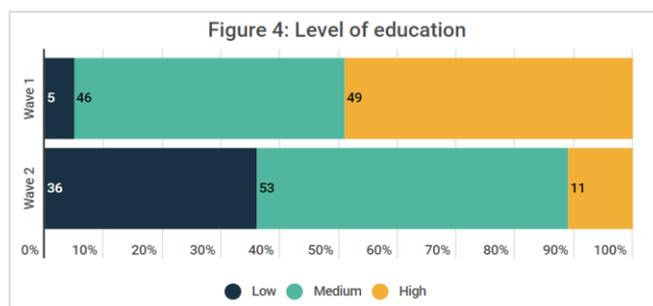

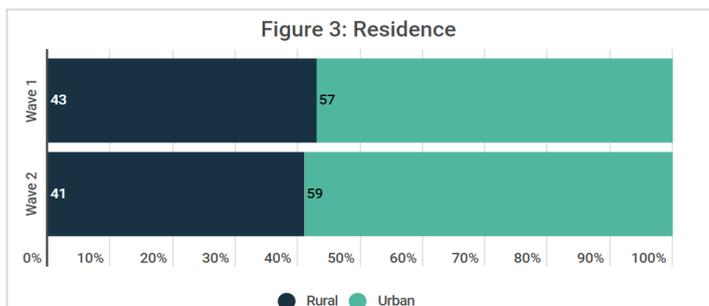

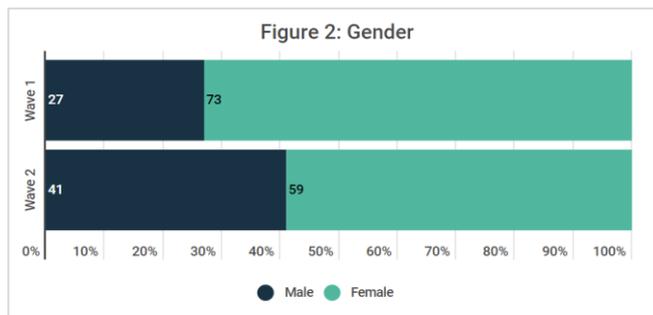

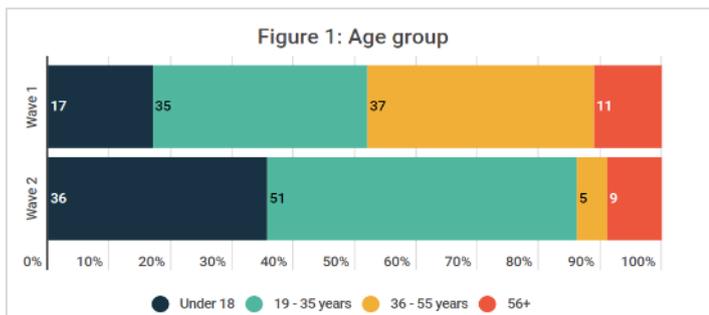

In the course of implementing grassroots civic education and information activities focused on electoral processes in the Republic of Moldova, a set of challenges have been encountered. The most commonly reported challenges, and corresponding mitigation measures applied, are described below:

Challenges	Mitigation measures
Low awareness of citizens, particularly in the rural and remote areas, about the role of citizens and central and local authorities in the electoral processes.	<p>Directly engaging with citizens using a person-to-person approach and simple language.</p> <p>Delivering the information in a customized manner, adapted to the linguistic and accessibility needs of specific target groups.</p>
Limited understanding of citizens about the role and competences of the CEC and CCET, and other stakeholders in the electoral processes.	Providing prompt clarifications on competencies of different state institutions in the electoral process to address the most common misconceptions existing in the society (e.g. that the CEC changed the electoral system).
Low level of trust of citizens in state institutions led to resistance in assimilating the information about elections.	<p>Promoting the concept and culture of active citizenship as a means to catalyze change and contribute directly to democratic processes in the country.</p> <p>Encouraging people to be active beyond voting by keeping politicians accountable after they have been elected into office.</p>
Difficulty of citizens to perceive the civic education and information activities as non-partisan and apolitical due to their previous experience of exposure to similar content distributed by political parties.	<p>Clearly explaining the apolitical character of the civic education and information campaign conducted with the Project support.</p> <p>Explaining the CEC mandate to conduct civic education of voters, besides the election's organization.</p>
Lack of access in Transnistria to conduct civic education activities on elections and democratic processes.	Capacitating the CSOs from Transnistria and equipping them with information (in Russian) to reaching out the Moldovan citizens residing on the left bank of the Nistru river.

## ASSESSMENT OF THE CIVIC EDUCATION CAMPAIGN “DEMOCRACY MATTERS”

To assess the civic education activities within the “Democracy Matters” campaign organized both directly and through SGP “Elections 2019”, a Survey on a controlled group has been conducted. The Survey was carried out by phone in two Waves (June and December) on a representative sample of 251 people (each wave) selected randomly from available lists of participants that attended the campaign events.

Due to the specifics of the civic education campaign, the Wave I covered activities focused mostly on general public (mobile info-caravans, information sessions, bus-campaigns), while the Wave II covered activities focused on young people, including first-time voters (E-Day simulations, door to door campaigns, trainings and thematic forums). For this reason, the young respondents of the Wave I represented 52% and of the Wave II – 87%. Respectively, the level of education, also differed: 95% of respondents with medium and high level of education of the Wave I versus 64% of the Wave II. More women were engaged in the Wave I (74%) compared to Wave II (59%). By the residence area, the data showed similar coverage.

About 91% of respondents from Wave I and 77% from Wave II expressed their firm intention to vote at the 2019 Parliamentary Elections. These were mostly women, people aged 36 and older, residents of the northern regions of Moldova. An increase from 0% to 4% was registered among respondents that didn't have the determination to cast their vote. The decrease in the intention to participate to elections was explained by: a) existing unstable political context; b) continuous reluctance and lack of trust in public institutions; and c) specifics of the Wave II group, that comprised mostly young people under voting age.

The top three sources of information about elections were similar for both Waves:

- Internet news websites (90 vs 85%);
- TV news (83 vs 80%); and
- Social networks (81 vs 80%).

Other sources of information: acquaintances, relatives, friends (78 vs 73%); TV shows and debates (78 vs 68%); and workshops and training sessions (73 vs 58%).

The least popular source of information for both Waves were the Radio (33 vs 20%) (Figure 7).

92% of the respondents (both Waves) assessed the activities as being *useful* and *very useful* (Figure 8).

58% of the respondents from Wave I and 67% from Wave II confirmed that they understood *very well* and *sufficiently well* the presentations on the mixed electoral system (Figure 9).

The respondents discussed about the civic education events with colleagues (83 vs 81%), friends (76 vs 72%) and family members (73 vs 69%).

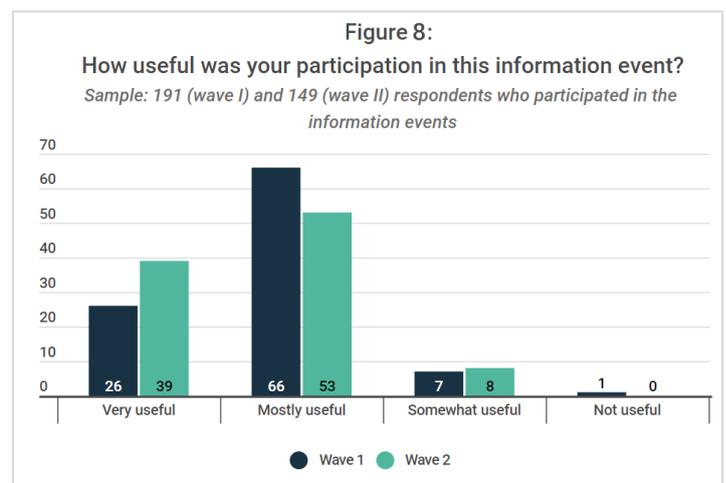

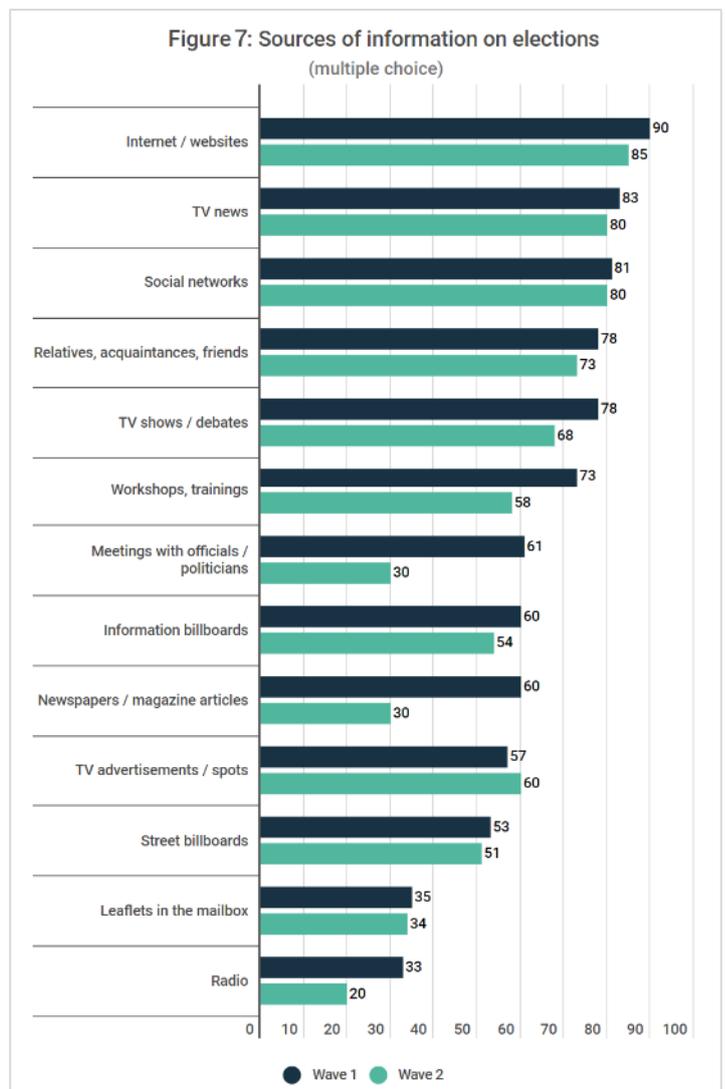

Also, they shared information with their relatives residing abroad (21 vs 25%). Women shared information more frequently than men, in particular with family and relatives from rural areas (Figure 10).

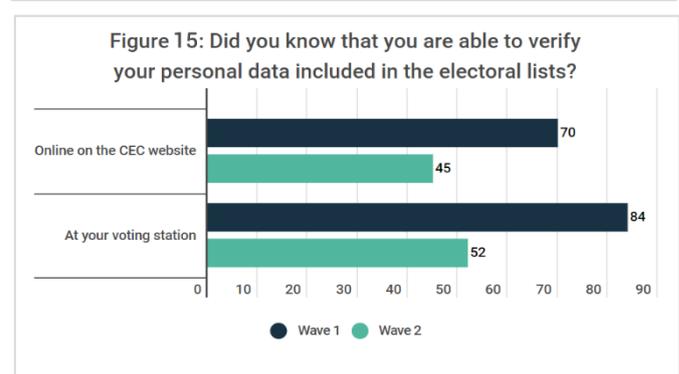

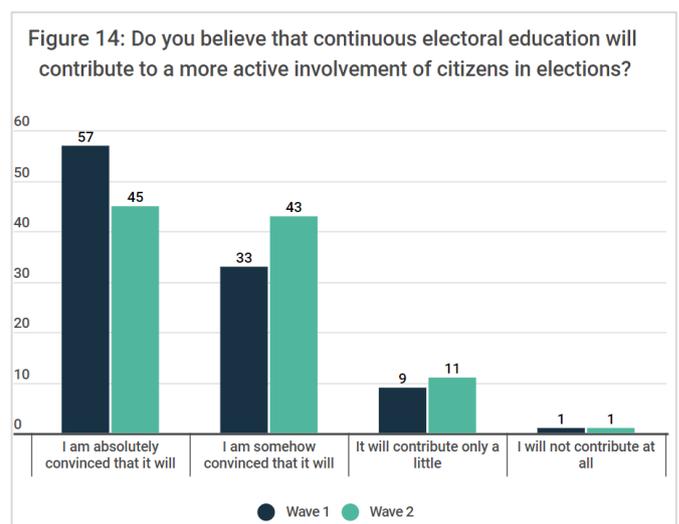

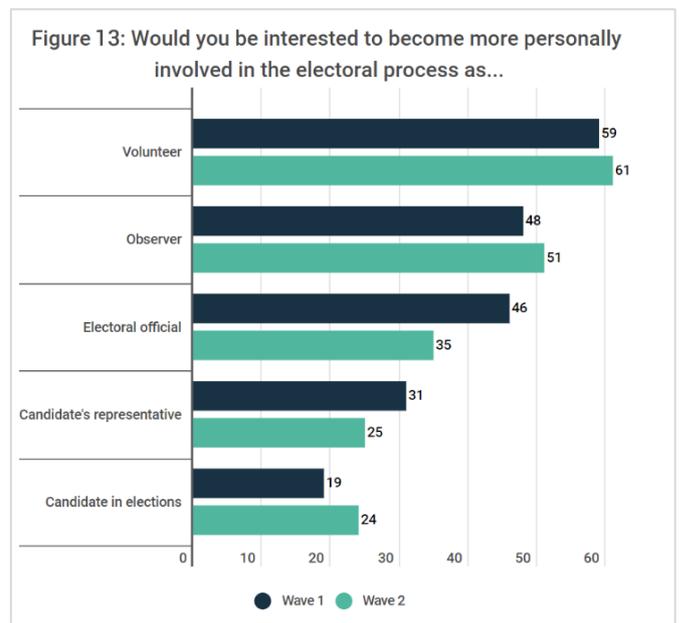

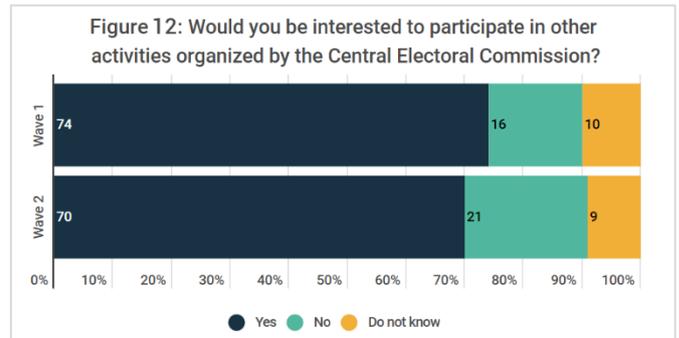

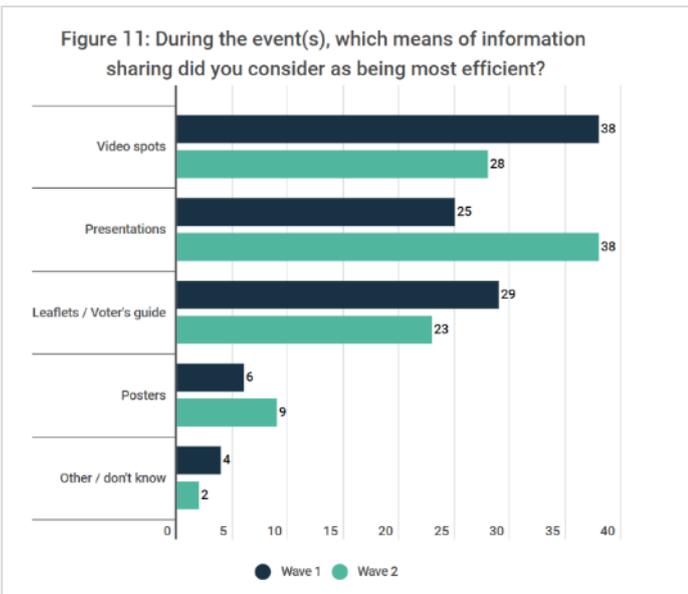

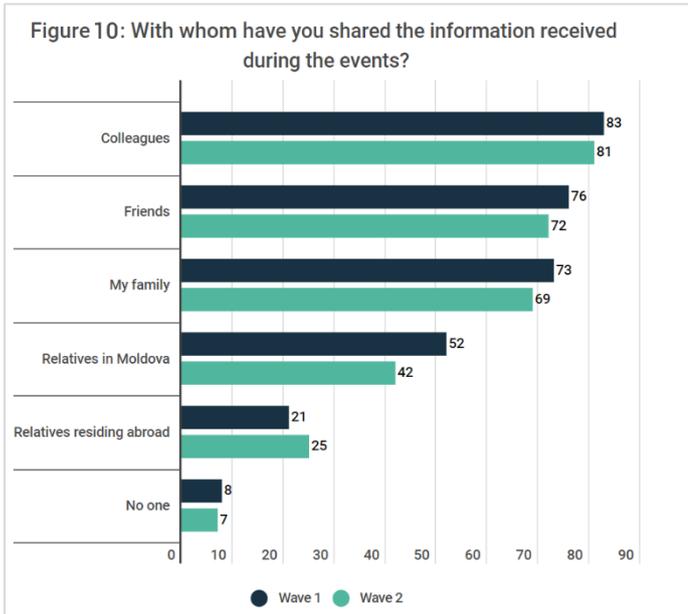

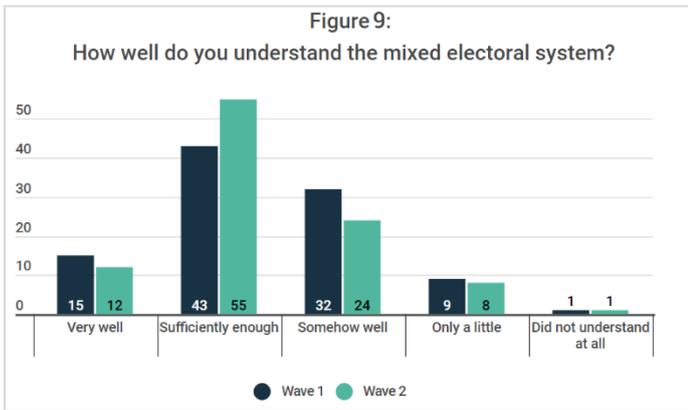

The most efficient electoral information materials were (Figure 11):

- 1) *Video-spots and videographics*, appreciated by women, young people and residents from the Southern region;
- 2) *Presentations*, appreciated mostly by men, residents from Southern region and respondents with high-level of education; and
- 3) *Brochures and Guides* appreciated mostly by women and respondents with a medium or high-level of education.

Also, the *Posters on mixed electoral system* were mostly appreciated by young people, specifically first-time voters.

Three thirds (3/4) of the respondents, both Waves, expressed their interest to participate in other activities organized by the Central Electoral Commission. The willingness to participate was expressed more by women and young people, including first-time voters (Figure 12). The respondents expressed their interest to get involved in the electoral process as volunteers (approximately 60%) and observers (approximately 50%). The role of a volunteer is more attractive for the first-time voters, women and residents from the rural areas. From the gender perspective, women would rather become observers or volunteers, whereas men see themselves more often as electoral candidates. The role of an electoral official is considered *less attractive* (Figure 13).

90% vs 88% of the respondents were certain that continuous electoral training can contribute to a more active involvement of citizens in elections (Figure 14).

More than 70% (Wave I) versus 50% (Wave II) know about the possibility to check the personal data in electoral lists (online on the CEC website and at polling stations) (Figure 15).

The assessment revealed that the information sessions (bus-campaigns/ “Elections on Road”, mobile caravans) contributed to an increased level of knowledge about the electoral process, role and responsibilities of the election management bodies. These events increased the number of indirect beneficiaries through the information sharing with close friends, family, relatives inside and outside of country. The respondents confirmed that the ongoing electoral training and civic engagement activities can contribute to a more active involvement of citizens in the electoral process.

As recommendations, the assessment highlighted the need of continuing the general electoral information efforts; of expanding the information events, with a particular focus on disadvantaged groups and people from rural regions; and of promoting the electoral information and events considering the most popular sources of information and adequate attention to the specifics of different groups of voters.

### **CIVIC EDUCATION EFFORTS FOR THE 2019 BASHKAN ELECTIONS (ATU GAGAUZIA)**

Based on the experience and results achieved in 2018 through the [extensive civic education and voter information campaign](#) organized in ATU Gagauzia involving 63,642 direct beneficiaries, including 30,416 women, as well as on strong networks established with the regional civil society organizations, in 2019 the Project supported a distinct campaign pertaining to the 2019 Bashkan Elections organized on June 30<sup>th</sup>. For two months (April – May 2019), the Gagauz Central Electoral Commission was helped in conducting its first-ever mobile bus-campaign “Elections on Road” in 15 localities. More than 630 people, including 297 women, have participated in the meetings where they have been informed about electoral processes pertaining to the Bashkan Elections and received electoral materials produced in both Russian and Gagauz languages.

Since education through gaming proved to be an effective and innovative tool to [increase the interest of young people in elections](#), the Project, in close collaboration with the Gagauz Electoral Commission, also conducted a series of election simulation games for the first-time voters in the premises of the educational institutions. In total, 263 young people, including 157 young women, actively participated in the [simulation games](#) being interested to learn, exercise, and play different roles (electoral officials, candidates, observers).

The support provided by the Project team to the Gagauz electoral management body for the 2019 Bashkan Elections contributed to a large share of electoral materials and knowledge, reaching 893 direct beneficiaries, including 454 women and around 1,900 indirect beneficiaries from 16 localities. These activities have also been promoted in social networks through photo and video testimonials.

## SUPPORT TO CREATE AND STRENGTHEN EDUCATION AND INFORMATION NETWORKS

During the Project implementation, the team supported the Central Electoral Commission and the Center for Continuous Electoral Training to consolidate the already existing networks established during 2012 – 2017 years (within the UNDP Democracy Programme/Electoral Component), as well as to set-up new partnerships and networks with several national and local partners. A specific attention was given to the creation of strong links with different stakeholders to transform them in active promoters of the electoral education – through E-Hub Platforms, librarians' training (CCET Focal Points), mass-media training and teachers' training (Teachers – Promoters of electoral education).

**The Platform for electoral talks (Electoral Hub, 2017 – 2018).** The Platform was piloted in 2017 in a format to allow the participants to express their opinions, share their knowledge and set a constructive dialogue between electoral actors and civil society representatives, mass-media and citizens interested in electoral area. The activity was planned to perform functions such as: a) **social** – strengthen the community of people interested in the electoral field; b) **educational** – to contribute to a better understanding of elections; c) **participatory** – the generated ideas to be translated into proposals for changes to the electoral legislation; d) **legitimation** – to enhance the public confidence in the CEC and CCET as key players in the Moldovan electoral process. During September – November 2017, five out five planned E – Hub meetings have been conducted with participation of almost 90 people (64% women) and covering topics such as election observation, electoral management, electoral trainings and evolution of the electoral legislation. More than 75% of participants rated the activity as „very good” and 97% declared they would like to be involved in other E-Hub sessions.

Table 4.21. E-Hub sessions conducted in 2017

<b>Total</b>			<b>57</b>	<b>32</b>	<b>88</b>

In 2018, the Platform continued with a new series of electoral topics, expanding the knowledge through Privesc.eu live broadcasting for a larger audience. 10 meetings out of 10 initially planned have been organized. More than 190 people, including 123 women, participated in face-to-face discussions. More than 81% of participants appreciated the 2018 platform discussions, highlighting the relevance of the topics selected and the participation of high-profile national and international experts. In total, the meetings accumulated **283,560 views**, the most popular being the session “*Transparency and digital financial reporting of the political parties, Latvian experience*” with participation of the former chairperson of the Latvian Central Electoral Commission – 74,510 views.

### CCET Focal Points: Civic education through training (2018 – 2020)

In 2018, the CCET and the Association of Librarians of the Republic of Moldova with the Project support signed a Memorandum of Understanding to implement a series of joint activities. The main purpose of the collaboration was to facilitate the library premises to become a community space/electoral information centre where all members of the community may find useful information about the electoral processes.

The first trained group consisted of 70 librarians that have benefited from extensive [BRIDGE](#) seminars being acquainted with the modern methods of electoral civic education and information to be used in their daily activities. In this way, each participant of the seminars has become a CCET Focal Point in their localities. The network being created, the librarians had the mission to design and organize civic education activities for their visitors and to promote the newly created E-Learning course „[I choose my Parliament in 60 minutes](#)”, developed with the Project support, as a new interactive way of informing voters about the 2019 Parliamentary Elections, delivering information on specifics of the mixed electoral system and on the rights and obligations of voters.

After the Parliamentary Elections, to expand the network of electoral Focal Points, the CCET trained the second group of 78 librarians (including one man) from 70 localities. The developed training curricula combined the theoretical sessions on particularities of the General Local Elections with practical exercises, including simulation games. Distinct sessions were focused on gender and human rights aspects. As a follow-up, the participants were requested to conduct a set of electoral trainings for: 1) *at least 10 librarians from their district*; 2) *at least 20 library users from their locality*; and 3) *at least 20 pupils*. More than 98% of the participants appreciated the methodology and the training approach, while 97% confirmed that such activities are very useful for strengthening their roles as community-based sources of information.

Figure 4.23. CCET Focal Points in 2018 (librarians' network)

By end of 2019, **2,310 direct beneficiaries** (librarians, library users, and children) have been trained and informed through 161 activities on electoral processes and democratic participation. [The librarians' network](#) demonstrated to be a credible web of sharing electoral knowledge and practices by reaching almost 5,000 indirect beneficiaries, including 3,388 women from 30 districts. For reporting purposes, the librarians created a group on Facebook, where all activities were described, and photos and testimonials were shared. Currently, the closed group - [„Biblio Alegeri Locale 2019”](#) has 170 active members and is used by the CCET for the upcoming training and voters' information before the 2020 Presidential Elections.

During February – March 2020, the CCET expanded the network by conducting electoral training sessions in 10 districts with participation of 192 librarians (including 2 men). The training curricula developed by CCET's experienced facilitators comprised theoretical sessions on particularities of the 2020 Presidential Elections combined with practical exercises, including simulation games. More than 97% of librarians appreciated the methodology and training approach, while 96% confirmed that such civic engagement activities are very useful. Almost all librarians highly recommended the development of electoral educational materials for different ages of library users. This time, as a follow-up, all trainees were requested to plan and conduct a set of electoral trainings in their region, namely: *a) training of at least 15 library users from their locality; b) training of at least 15 pupils/youngsters.*

In total, in 2020, 3,307 direct beneficiaries from 10 districts have been engaged in 133 activities. A good progress was registered by librarians from Drochia district who conducted 34 trainings for 471 direct beneficiaries (including 282 women). Other librarians also demonstrated high activism by organizing electoral informative sessions and simulations, as per the table below:

## Weekend Training: Media & Elections (First Edition, 2019)

As a good practice of interacting with the mass-media representatives through official and offline meetings, specifically close to elections, in 2019 the Central Electoral Commission has been supported in organizing the first edition of the *Weekend Training: Media & Elections*. The three-day session aimed at familiarizing the media representatives (18 women and 9 men) from 20 central and local media outlets with the particularities of electoral processes, electoral administration, and international experience. Among the topics were – preparations for the local elections, the role of mass media in informing citizens about electoral campaigns, professional ethics during elections, political parties financing, voting counting, and responsibilities of the electoral management body and other stakeholders linked to the electoral exercise. The national and international experts that delivered the sessions paid particular attention to the issues of **manipulation, verbal aggression, and fake news** spread by media outlets to reduce these types of cases in the forthcoming electoral race. Tips and tricks for efficient communication between the CEC and journalists have been shared and discussed. A dedicated session to the 2030 Global Agenda and SDGs and the importance of their reflection in mass-media was also part of the event.

This platform proved to be suitable for debates off the record to **deconstruct electoral myths** and deliver information about elections management from the first source. All participants evaluated the activity as very useful and expressed their interest in keeping close communication with electoral officials.

For the upcoming 2020 Presidential Elections, the Project team will adopt an appropriate approach (*considering the pandemic situation due to SARS-CoV-2*) for keeping active this network through organization of other online and offline sessions with participation of the CEC management and mass-media representatives.

## Piloting of the Teachers' Programme: Promoters of the Electoral Education (2019)

For the first time in the Republic of Moldova, teachers of Civic Education, as well as representatives of the district education divisions, attended a training on participation in electoral processes and participatory democracy. **The Teachers' Programme: Promoters of the Electoral Education** was piloted during 15 – 17 November 2019, with the participation of 40 schoolteachers (mostly women) who signed up to deepen their knowledge in the electoral field. The three-days training was conceptualized and conducted by CCET with the Project support, aiming at delivering a set of innovative and creative teaching methods for complex topics such as democratic participation and elections. Moreover, all participants received supporting video-materials (video spots, [videographics](#)), printed and electronic materials (brochures, training kits, presentations, pictures, ballot paper templates, etc.). As result, all teachers strongly confirmed they would replicate this experience in their schools. The success of this pilot was also confirmed by many requests received from other teachers from different districts to organize more similar trainings in the future.

## CIVIC EDUCATION AND VOTER INFORMATION PROGRAMMES TARGETING PUPILS AND YOUTH

In 2017, the Project provided support to the Center for Continuous Electoral Training to design and implement a civic education and voter information campaign targeting pupils and young voters. The campaign “Participate! Learn! Decide!” was focused on three important aspects of the electoral processes, such as: electoral integrity, electoral management and electoral inclusion. In 2018, the CCET was supported in the design and implementation of the second campaign “Democracy can be learned” that continued the best practices in electoral training, being scaled-up in 2019 and 2020, respectively. The campaign Concept was focused on educating voters, specifically young people, to actively participate in the democratic processes. Along with events organization, to reach all segments of the society, rural, urban, low and high-level education/income, women and men, ethnic and linguistic minorities and to establish a long term civic education /voter information programmes, the Project helped the CEC and CCET with designing, elaboration and multiplication of various educational materials (researches, brochures, guides, cartoons, videos and videographics) for different young groups (children, first-time voters, students). For three years, several pilots of civic education and voter’s information programmes have been conducted, many of them being institutionalized.

### Electoral Schools (2017 – 2018)

In 2017, the CCET in close collaboration with the Project organized a new type of electoral school – **Weekend School “Think Electoral”**. The activity had a distinct format, being conducted during two extended weekends (six days in total). The purpose was to educate a new generation of electoral actors in the spirit of a genuine electoral democracy. In total, 19 participants (12 women and 7 men), young voters, representatives of the youth political parties’ organizations and Civil Society representatives discussed and debated electoral topics, such as *electoral administration, role of electoral actors, the principles of electoral democracy, transparency in elections, accessibility of the electoral process and the gender and human rights dimensions in elections*. As part of the curriculum, the participants simulated an electoral campaign and organized an Election Day to better understand the complexity of the electoral processes. The Weekend School served as a well-shaped training laboratory for civic activists, party members, conscious voters and future CCET volunteers, trainers and promoters of democratic participation.

Two videographics targeting the [citizens with voting rights](#) and [first-time voters](#) have been designed and used during this activity. The materials explain multiple choices that a citizen and/or young person has and ways how he/she can be more involved in the decision-making processes. The video materials have been largely promoted through social networks, reaching thousands of views (14,565 and 16,855 hits), and used during other civic education and electoral events.

Figure 4.27. Videographics (2017)

In 2018, this training has been used to deliver **two additional electoral sessions** for journalists, young voters, civil society representatives and political parties' young wings (41 people, including 27 women). The main objectives were to present the particularities of the mixed electoral system and its functioning; role and place of different electoral actors in the democratic process; principles of good practices in electoral matters; importance of civic engagement and electoral behavior.

### Choose democracy – electoral training for teenagers (2018)

Based on the main principle of the CCET civic education campaign, that democracy can be learned, during April – May 2018, 854 young women and men from 20 schools benefited from an interactive and consistent training programme “Choose Democracy”. The Programme aimed at contributing to the formation of pupils in the spirit of democratic values and principles. The networking and collaboration established during these events laid the foundation for further civic education activities destined for pupils and teenagers.

## Election of the School Councils (2018 – 2019)

Since the education through gaming proven to be a great innovative mechanism to attract the interest of young people, during September – October 2018, the Project supported the **first – ever Electoral Month** in schools to help pupils to elect their School Councils based on the new mixed electoral system procedures. According to the existing [instructions](#) of the Ministry of Education, Culture and Research, all schools must have a School Council elected at the beginning of the school year (September – October) for a two-years mandate and, if previously each school applied their own electoral rules, in 2018 they were adapted to the new mixed electoral system procedures and piloted. For this, in July 2018, the Project supported a preparatory session between CCET staff and 44 representatives from 31 District Territorial Education Departments of the Ministry of Education, Culture and Research. As a result, out of 75 institutions which manifested interest to use this practice, 26 schools from 11 districts have been selected for piloting.

In a tight timeframe (20 days) each selected school had the mission to create a specialized Electoral Commission responsible to organize inclusive, accessible and transparent electoral processes, to register candidates on uninominal and parties' lists, to accredit observers, administer the [E-Day](#) and count the votes. To facilitate the process, the CCET provided an electoral handbook as an analogy for the real Electoral Code and developed a [video guide](#) which explained in detail the whole electoral process and all needed steps to be undertaken by the members of the School Electoral Commission, by the candidates and voters.

Figure 4.29. Videoguide on how to conduct elections of School Councils (left) and Practical printed Guide (right)

During the electoral campaign, the school parties and independent candidates registered to participate in elections, promoted their own school platforms and actively competed for getting a seat in the School Council. **564 pupils, including 409 young women, from 26 schools** were trained and capacitated with electoral knowledge. The absolute majority of them (95%) appreciated the quality of training sessions, the interaction with peers and innovative youth-friendly approach used by CCET trainers.

<b>Total</b>			<b>155</b>	<b>409</b>	<b>564</b>

In September 2019, a new round of the Electoral Month in Schools was organized. At this time, the number of selected schools was duplicated – **50 schools from 14 districts**. Since the previous Practical Guide was developed based on the mixed electoral system (abolished in July 2019), the CCET team elaborated a new electoral handbook as an analogy to the real Electoral Code. The material explained in detail the election preparation process, establishment of the School Electoral Commission, and organization of the E-day. In 2019, the number of trained pupils also doubled – **1124 pupils, including 753 young women**, being considered as one of the most impactful effort of the Project.

## National Youth Forum in Elections (2018 – 2019)

The three-days [National Youth Forum on Elections](#) represents another activity conducted in premiere in the Republic of Moldova by the CEC and CCET, with the Project's assistance. The objective of this activity was to familiarize the representatives of different political youth organizations with the modality to administer an electoral process based on the mixed electoral system and involve them in an election simulation exercise. In 2018, all 45 political parties have been invited to delegate representatives from their youth political organizations. **Seven parties** (*Democratic Party, Liberal-Democratic Party, Liberal Party, European People's Party, National Unity Party, SOR Party and Socialists Party*) have provided the lists of their young participants, respecting the gender balance.

In the first part of the Forum, 150 participants, including 78 women from Chisinau and different regions benefited from motivational speeches and theoretical sessions on electoral administration, role of electoral actors, the principles of electoral democracy, transparency in elections, accessibility of the electoral process and the gender and human rights dimensions in elections. Later, for the election's simulation exercise, in line with the real elections setting, the young politicians have been divided in five groups: one with the role of the *electoral management body*, one with the role of the *civil society/voters* and *three groups with the role of political parties*. Each group was trained and prepared for simulating the Parliamentary Elections. While working in the workshops, the young people were not assigned according to the parties they belong to, but randomly to exclude the political criterion from the game. Thus, the three groups of young people who represented the political parties had to form ad-hoc three parties, to establish their political platform and to campaign to get votes. The group of the participants who represented the electoral management body was responsible for the good organization of the elections and was trained in how the electoral institutions work. And finally, the group of voters learned what needs to be known during the electoral period and what civic activism means. In the end, the [E-Day simulation](#) was conducted successfully with the real electoral equipment, voters' lists and 2 ballot papers (proportional and uninominal constituencies).

A part of the event was live-broadcasted through [Privesc.eu](#) platform reaching **30,826 views** being largely promoted through social media. As a result, this type of civic education activity focused on young people demonstrated its efficiency, being recommended to be multiplied in the future.

In 2019, the second edition of the [National Youth Forum on Elections](#)<sup>13</sup> aimed at familiarizing the representatives of different political youth organizations with the modalities of the administration of an electoral process through the simulation of the General Local Elections. Similar to the previous year, all 46 political parties were invited to delegate representatives from their youth political organizations, and, at this

<sup>13</sup> Day 1 – <https://www.youtube.com/watch?v=092qAdZVTgI>

Day 2 – <https://www.youtube.com/watch?v=35nPP4FctdQ>

Day 3 – <https://www.youtube.com/watch?v=wX-E2tGrWfo>

time, **17 parties** delegated about 150 young people, including 44 women, coming from Chisinau and different regions. The participants were trained on the particularities of voting the mayor and Local Council, and simulated the [E-Day](#).

Both editions of the Forum were assessed by most participants as very useful, interactive, and practical. They mentioned that despite the political membership, the organizers managed to set a **joint equal space** conducive for getting knowledge and understanding on the role and responsibilities of the election management bodies and the complexity of the whole electoral exercise. To note that the Party of Socialists has been inspired by this experience and organized two similar simulations with their young party members. At the same time, other political parties were interested in replicating this activity with their young members.

### **Electoral Conference “Open Talks” (2017 – 2019)**

For the first time in the Republic of Moldova, a new type of electoral conference has been organized and replicated by the CCET, with the Project support, during 2017 – 2019 years, as part of the civic education and voter information campaign. Having similarity with the TEDx format, the activity aimed at bringing to the public different young speakers to deliver motivational speeches and share with their peers the success stories of being active citizens and getting involved in the decision-making processes.

The first edition of the conference took place in December 2017 and brought together around 160 young people, students and teachers, being [live streamed](#) through Privesc.eu and reaching 65,845 views. The topic of the event was “**Democracy can be learned – innovative approach**”. Eight young people: undergraduate and graduate students and professors had prepared and gave short presentations at the conference, thus sharing their ideas and experience in elections.

In 2018, guided by the topic “**Ambassadors of the electoral education**”, seven speakers shared their experience of participating in a human-centered and innovative civic education campaign. They spoke about:

- ❖ Elections of the School Councils and how these exercises impacted the young people;
- ❖ Intellectual Electoral Games as interactive method of learning;
- ❖ How the “Electoral Month” campaign implemented in schools contributed to a better understanding of the new mixed electoral system;
- ❖ Libraries as a proper community space for a continuous electoral education and information;
- ❖ Role of the mass-media in promoting transparent and credible elections;
- ❖ Accessible elections and involvement of different groups of voters, particularly vulnerable and marginalized.

The [second edition](#) was attended by 114 people (including 48 women) and was live streamed through Privesc.eu reaching 24,549 views.

The third edition of the conference had the message “[Participation – a key element of democracy](#)”. Based on the previous good feedback and high interest from the public, in 2019 the Project and the CCET improved the format of the event with a new element – **electoral research**. Two months in advance five students (two young men and three young women) from different universities have been selected to participate in a pilot – **Students ‘Research Programme**. The young people were mentored by their university teachers and CCET team in preparing their paperwork and key messages to be shared with the public during the conference:

- ❖ Youth and politics: participation vs absenteeism;
- ❖ Referendums – instruments of participatory democracy;
- ❖ Accessibility – precondition of inclusive elections;
- ❖ Mixed electoral system – influence on youth engagement;
- ❖ Civil Society Organizations – increasing civic education and electoral participation.

The event was attended by almost 100 people, being broadcasted live through [Privesc.eu](#) reaching 63,431 views. This activity has set a high standard in delivering and debating electoral issues among young people. In 2020, the CCET continues to support through scholarships other young people in their research efforts, already independently, from the state budget.

Figure 4.35. CCET Open Talks Conference, third edition, 2019

### Intellectual games - "What? Where? When?" (2017 – 2020)

In 2017, the Project supported the piloting of a new analytical and interactive methodology of learning through intellectual games. The change from an old-style information presentation to an innovative approach allowed the young participants to use the accumulated knowledge with a much broader context of democratic principles and political participation. The first activities of the Intellectual Electoral Game "What? Where? When?" were conducted in **six regions out of five initially planned** - Anenii Noi, Cimislia, Ialoveni, Hâncești, Chisinau and Drochia. In total, 346 young women and men (with 106 more than planned) from 50 schools, were capacitated and involved in the game. The method of learning by playing ensured a high interest from young people, 92% of participants mentioning that they would apply the analytical thinking more during their daily activity.

The idea of combining an intellectual game with electoral topics itself was a premiere in the Republic of Moldova, this activity being recognized as one of the most successful from the civic education campaign. The game contributed also to the creation of a network of young women and men who can analyze and debate current political developments and serve as a multiplier in the process of forming opinions.

In 2018, the Project supported the upscaling of these efforts. The curricula and games' moderation were ensured by the CCET together with highly skilled representatives of the CUC Moldova – Intellectual Games Club, with an experience of more than 18 years in conducting and organizing national and international intellectual events (games, summer schools, events, competitions). Five games were organized with participation of 181 young women and men, representing 20 pre-university institutions.

*Table 4.36. Regional Intellectual Games, 2018 edition*

Nr.	Date	District	School	Men	Women	Total
1.	26 April 2018	Ungheni	Vasile Alecsandri Lyceum, Ungheni	14	37	51
2.	2 May 2018	Orhei	Ion Luca Caragiale Lyceum, Orhei	11	18	29
3.	10 May 2018	Calarasi	High school, Sipoteni village	12	24	36
4.	11 May 2018	Criuleni	Mihail Stratulat Lyceum, Boscana village	15	23	38
5.	23 May 2018	Chisinau	Lyceum of the Academy of Sciences	8	19	27
<b>Total</b>				<b>60</b>	<b>121</b>	<b>181</b>

Additionally, in 2018, the games' methodology has been enhanced by introducing a new type of interaction – **national intellectual battle between the best teams of 2017 and 2018 editions**. 60 young people out of 527 participants (346 in 2017 and 181 in 2018) competed during three days in a final game, being challenged to use intelligence, logic, erudition and perspicacity to prove their abilities and electoral knowledge. The intellectual battle was broadcasted through [Privesc.eu](http://Privesc.eu) platform, reaching 30,896 views.

In 2019, a new set of five games at the district level has been organized with participation of 260 young women and men from 15 education institutions.

*Table 4.37. Regional Intellectual Games, 2019 edition*

Nr.	Date	District	School	Men	Women	Total
1.	25 April 2019	Anenii Noi	A. Straista Lyceum, Anenii Noi	29	67	96
2.	13 May 2019	Chisinau	Dante Alighieri Lyceum, Chisinau	19	30	49

4.	22 May 2019	Stefan Voda	Stefan Voda Lyceum, Stefan Voda	20	16	36
5.	28 May 2019	Florești	House of Culture, Florești	10	18	28
<b>Total</b>				<b>97</b>	<b>163</b>	<b>260</b>

Similar to the 2018 year, in October 2019 more than 80 young women and men from 12 teams competed during a **one-day national intellectual battle**. The interest of the public significantly increased compared to the previous edition, accumulating on Privesc.eu platform a total of 52,160 views. In this manner, the intellectual games meaningfully become part of the civic education campaign aiming at involving annually new groups of young people from different regions of the country.

Although the 2020 Action Plan foresaw a larger number of games to be carried out, due to the pandemic situation caused by the SARS-CoV-2, four activities have been conducted, out of which three remotely – through online platforms. It was a challenging premiere for the Project and CCET teams to organize civic education events using online tools, yet a good opportunity to test a different approach in delivering electoral learning and knowledge. In total, 125 participants (including 82 young women) were capacitated through gaming exercises.

Table 4.38. Regional Intellectual Games, 2020 edition

Nr.	Date	District	School	Men	Women	Total
1.	7 February	Chisinau	Republican Lyceum Aristotel	11	27	38

4.	16 June	South Region	Doina, Cahul, Causeni, Cimislia, Abaclia, Basarabeasca	4	18	22
<b>Total</b>				<b>43</b>	<b>82</b>	<b>125</b>

Figure 4.39. Regional Intellectual Games (2018 edition)

Table 4.40. Regional Intellectual Games (2019 and 2020 editions)

In conclusion, the Project supported the organization of four editions of the [Intellectual Games](#) during 2017 – 2020 years, involving 912 young women and men. It contributed to the creation and enlargement of a networking of active first-time voters with a genuine potential to become leaders and promoters of the democratic participation. The Project will continue to support the CCET in conducting more games involving pupils and students from high-schools and universities from the North, Center and South regions.

## INNOVATIVE APPROACHES TO DELIVER CIVIC EDUCATION PROGRAMMES

The Project significantly progressed in applying innovative ideas within the civic education and voter information campaigns. Having as basis the **competition elements**, along with IT Creativity Lab – InnoVoter, Intellectual Games, National Youth Forums, Elections of the School Councils, the team identified new ways of engaging citizens (particularly young people) and delivering electoral information.

### Filmmakers Camp (2019)

The Filmmakers Camp was one of the innovative approaches of the Project to create targeted video materials through a competition of ideas to expand the electoral knowledge close to the 2019 General Local Elections. The programme was a premiere in the Republic of Moldova and represented a suitable environment for creating out-of-box videospots to encourage young voters to vote and actively participate in the democratic processes. The [theoretical phase](#) consisted of two-days learning on electoral processes and skills/knowledge of filmmaking, while the practical phase focused on preparing and presenting the video products.

Figure 4.41. Filmmakers Camp – phase I – training and learning (2019)

In total, 22 young people (including 4 women) benefited from thematic sessions with well-known Moldovan producers, stage directors, and screenwriters who shared their experience, knowledge, tips and tricks to create an original product, being afterwards mentored and guided in the filming and editing processes. As a result, six (6) video products have been produced and presented during the Award Ceremony:

[Filmmakers 1st Place](#)

[Filmmakers 2nd Place](#)

[Filmmakers 3rd Place](#)

[Filmmakers 4th place](#)

[Filmmakers 5th Place](#)

[Filmmakers 6th Place](#)

Three most original and creative videospots was awarded with symbolic gifts. Though, the most important outcome of these efforts was their introduction in the CEC's voter information campaign and their large dissemination through social networks, online media and TV channels. The Ceremony was live broadcasted through Privesc.eu platform reaching 19,564 views.

The Filmmakers Camp had a good impact on participants as they mentioned a change in their perception regarding the CEC and electoral processes. They learned about the E-Day, voter turnout and preliminary results; debated on existing myths about elections; and established a good connection with the CEC and CCET teams. The participants also shared their knowledge with their families, friends and colleagues. As a suggestion for improvement, the participants mentioned the need for a longer theoretical phase (at least 3-4 days) as to have enough time to process the complex electoral information.

## VotART – creativity workshop on elections (2019)

In partnership with the CEC, in 2019, the Project organized a creative event aiming at engaging young designers, illustrators, and artists into the promotion of the democratic elections standards through art – the [VotART creativity workshop on elections](#). By concept, the VotART completes the trilogy of youth crowdsourcing events along the **InnoVoter Creativity Lab** and the **Filmmakers Camp**. For three days, 13 teams (comprised of 19 young professionals, students, and experienced graphic artists) created motivational posters on elections. All the works were innovative, with compelling messages and were crafted by using different techniques: paintings on canvas, drawings on paper, and graphic illustrations.

On International Democracy Day (September 15<sup>th</sup>, 2019), during the closing ceremony, five posters have been selected as the [VotART winning projects](#). Throughout September, the VotART posters were circulated online and were part of the public exhibition organized in the “Stefan cel Mare” Central Square.

Figure 4.42. First creativity workshop in elections – VotART (2019)

Moreover, three of the winning projects have been printed out in 2,100 copies each and distributed to all the polling stations across Moldova and abroad.

One of the winning teams proposed the development of animated series focused on the main character of their poster (the Elephant in the Room). The idea was approved by the CEC and resulted in three video stories presenting the character’s [hesitance](#), [challenges](#), and finally - [participation in elections](#).

Figure 4.43. Video series – Elephant in the Room

## Lightroom (un)conference (2018)

In November 2018, for the first time in Moldova, the psychological violence in electoral campaigns became a topic of an event called [Lightroom \(un\)conference](#). More than 150 experts, journalists, electoral officials, opinion makers, politicians, civil society representatives, including 86 women, attended the event and had the opportunity to see different types of psychological violence being, described, analyzed and interpreted by national and international experts. Other 64,210 viewers watched the Lightroom online through [Privescu.eu](#) platform. Strategic partnerships with UN Women and Internews “Media-M” Project financed by USAID have been established, to ensure participation of two international experts (both women) out of five speakers selected to deliver speeches. The topics were thoroughly selected to provide interesting details on specific multipliers and catalysts (e.g. fake news, disinformation, public shaming, trolling, etc.) of the psychological violence in elections by also revealing speakers’ personal stories in facing and mitigating such phenomena: 1) *Retrospective: evolution of the aggressiveness in electoral campaigns in Moldova*; 2) *Media space pollution through cyberbullying and trolling*; 3) *In the crosshair: Character assassination*; 4) *Echo-chambering in social media is real*; 5) *Psychological violence without filters*.

[The event aimed to raise public awareness, as well as motivate participants in the electoral race to refrain and stand against any type of aggression during electoral campaigns](#), since it affects both women and men, whether electoral candidates, electoral officials, representatives of media or civil society. The printed agenda, besides traditional information about the event, contained 16 factsheets with terms and definitions, actors, forms and effects of the psychological violence in elections, aiming at equipping participants with a proper background.

A raising awareness [video-spot](#) has been developed with several significant messages presented by different characters (an ideologist, a woman candidate, a troll, a woman journalist and a citizen). Due to organizational challenge to select the proper slogan for the video, the CEC and the Project team decided to organize a voting exercise at the end of the (un)conference and left the participants to vote one message out of three proposed. The voting results have been published next day on the event’s [Facebook page](#). The final video was largely shared via social media networks and used for the following Project’s activities.

Figure 4.44. Lightroom (un)conference. Participants cast their vote (2018)

## Electoral Education for all through informational comics and illustrations

A novelty for the Project was to support the CCET in developing a series of electoral materials customized to the needs of children and pupils. The innovative idea to deliver electoral information through **comics** to the future voters by capturing their attention on most important democratic processes was piloted and successfully upscaled. Thus, during 2017 – 2020, the Project provided support in the development of three editions of the “Democracy can be learned” brochure, designed as a set of narratives combined with drawings to explain in an easy-to-see and easy-to-read ways the electoral processes. For the first time in Moldova, the electoral education became even more accessible for children. [The first edition \(2017\)](#) of the “Democracy can be learned” was focused on topics such as: *electoral rights, electoral administration, voting system, transparency of elections, accessibility and gender dimension dimensions*. [The second edition \(2018\)](#) described *the methods of training the electoral officials, voting procedures, roles and obligations*. The materials also encouraged young readers to become electoral officials. [The third edition \(2020\)](#) explained the *particularities of the Parliamentary, Local and Presidential elections and the roles of elected candidates: MPs, local councilors, mayors and president*. All editions are available in Romanian and Russian languages, being largely used during electoral education activities for pupils and first-time voters.

Figure 4.45. Heroes of the Brochure, Ion and Maria explaining the electoral processes (2017, 2018, and 2020)

The Project helped the CCET to design an innovative brand for the electoral education dedicated for young voters and children – Arci (hedgehog). [The first edition of the comics “Arci at the polling station”](#) was finalized in November 2019 and described through narratives, cartoons and simple dialogues how to vote, what does the multiple voting and vote buying mean, and how people with special needs vote. This product is intended for children aged 7 – 10 years and aims at developing the civic spirit and familiarize the young voters with voting procedures in an accessible, innovative and interactive ways. The [launch](#) of the comics was organized with participation of 11 children and their parents during which they had the possibility to discuss more about electoral processes and even simulate a voting process. For accessibility to education purpose, the material was made available in five languages: [Romanian, Russian, Ukrainian, Gagauz and Romani](#). Around 1,000 children from more than 10 education institutions (schools and kindergartens) have been engaged in information session provided by the CCET team. In 2020, the CCET developed the [second edition of the comics](#) from their own financial resources, while the Project helped with printing and distribution. The second edition describes the preliminary registration, voting procedures in polling stations opened abroad and documents needed for voting (ID card, passports, etc.), in this manner informing and preparing the young voters for the particularities of the upcoming Presidential Elections. Similar to the previous edition, this material is also available in five languages. Due to the pandemic situation caused by COVID-19, the launch of the second edition was made online with participation of 13 children and their parents. [An online session](#) with such young citizens was both a novelty and a challenge, yet the CCET team succeeded to keep them active and interested in the comics presentation.

## HUMAN RIGHTS DIMENSION

### Assessment Study on Accessibility of the Polling Stations (2019 – 2020)

A great step towards a more accessible electoral process has been made through strong partnership between the election management body, NGOs and LPAs in conducting an extensive assessment, from accessibility perspective, of 1/3 of polling stations, throughout the country, including the entire Chisinau and Balti municipalities.

**Accessibility** is one of the core principles of the UN Convention on the Rights of Persons with Disabilities, as well as a prerequisite for enforcing other rights in different areas of life. In the Republic of Moldova, the number of people with disabilities is estimated at 180,6 thousand, of whom 170 thousand (or 5.1% of the total population) are voters. Their voting right is still hindered by the lack of free access to and inside public buildings hosting polling stations. Mobile ballot boxes, as an alternative tool for voting, cover this gap partially and are considered a temporary solution.

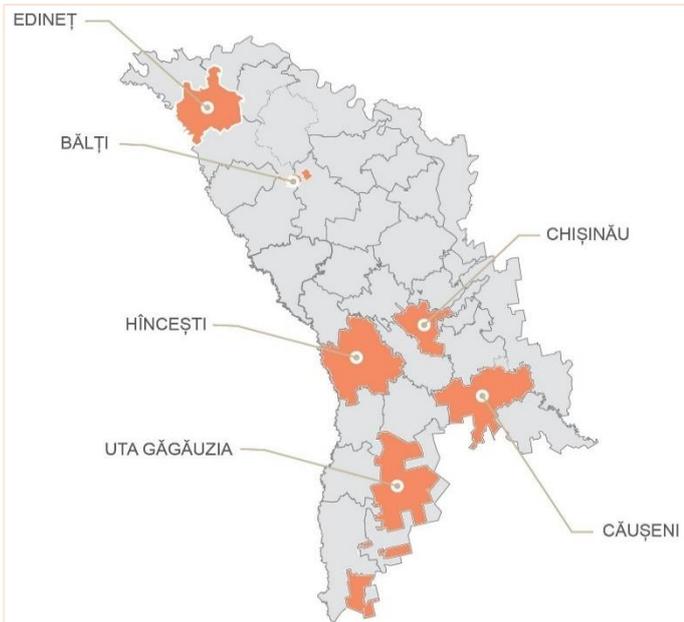

The perception that the issue of infrastructural accessibility is linked exclusively to people with disabilities is false, as it also relates to other categories of population with limited mobility, namely aged people, children, parents with small children who carry them in their arms or in strollers, pregnant women, bicyclists, people with temporary disabilities. In this sense, the number of people affected by the lack of accessibility conditions is estimative three times higher than the number of people with disabilities (**about 15% of voters**).

During April – July 2019, the Project provided support to the CEC in conducting an extensive assessment of the polling stations from an accessibility perspective. The purpose of this study was to collect substantial knowledge about the current infrastructural conditions at the polling stations, as to inform the LPAs about standards, best practices, and accessibility models and to promote the pro-active engagement of people of different types of disabilities in socio-political life by involving them in the research process.

In total, 612 polling stations (30,3% out of the total number of polling stations) have been selected from six (6) regions with a representative geographical coverage (Edinet, Hincesti, and Causeni Districts; Balti and Chisinau Municipalities, and ATU Gagauzia). The sample included buildings from 149 localities with 40% of inhabitants, 39% of which are with citizens with voting rights.

The methodology comprised a set of field visits and “user safari” exercises carried out by 36 people, including 16 with different types of disabilities (7 in wheelchairs) trained well in advance. The team members investigated the buildings based on a structured questionnaire and a specialized procedure. The main indicators in terms of accessibility were *access to the building; access ramp, including the support bars; entrance doors; indoor space; accessible WC; floor elevator (if any); window/desk; office doors; specially arranged parking*. All buildings have been assessed as **accessible, partially accessible, and inaccessible**. Following the data processing, five (5) regional events have been organized to present the

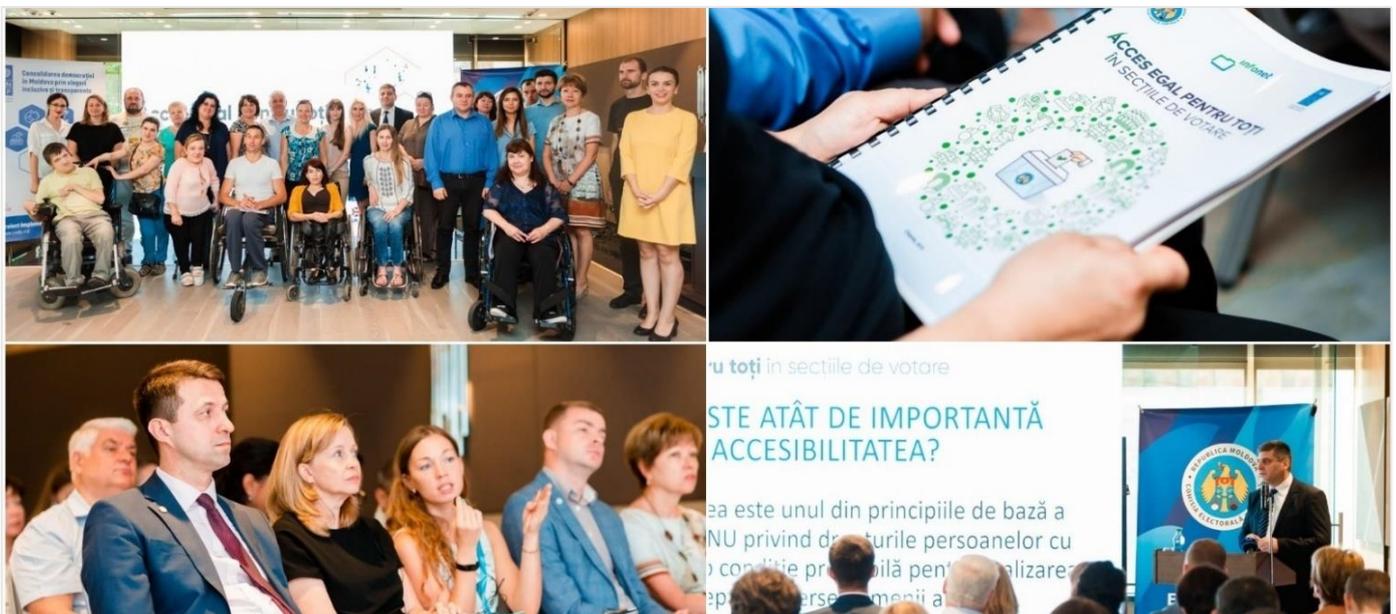

Locality	Nr. polling stations	Men	Women	Total
<a href="#">Comrat</a>	43	7	28	35
<a href="#">Causeni</a>	51	7	28	35
<a href="#">Edinet</a>	51	17	31	48
<a href="#">Balti</a>	59	20	31	51
<a href="#">Hincesti</a>	63	11	31	42

main findings. Mayors and LPA representatives, public officials, media representatives, directors of the envisaged public institutions, and representatives of the civil society have been invited to attend public events. In total, 211 people, including 149 women, attended the information sessions. The study showed that only six (6) polling stations out of 612 assessed are fully accessible (less than 1%), while 174 are partially accessible, and 432 are inaccessible. In terms of accessibility conditions, the sidewalk to the polling station is accessible only in 34% cases; the stairs and/or ramp – 11% cases; the front door – 41% cases; the corridor – 18% cases; main hall of the polling station – 33% cases and bathroom – 1% cases.

On August 2019, the CEC and the Project organized a public event in Chisinau where the main findings, conclusions, as well as recommendations for the LPA representatives, civil society, and public institutions were presented. More than 50 people attended, including 28 women, the event being also broadcasted on [Privesc.eu](#) platform and reaching 11,528 views. After the public presentation, the [Study](#) was shared electronically to all mayoralties of the Republic of Moldova, to all District Councils and regional mass-media in order to raise awareness and spread the Study results. Additionally, a [social media campaign](#) was launched on the CEC and UNDP Facebook pages to inform citizens about the accessibility assessment results per each region. Moreover, the Central Electoral Commission strongly recommended to all LPAs to better coordinate and adjust as much as feasible the opening of the polling stations for the General Local Elections, considering the accessibility aspects.

## STUDY CONCLUSIONS

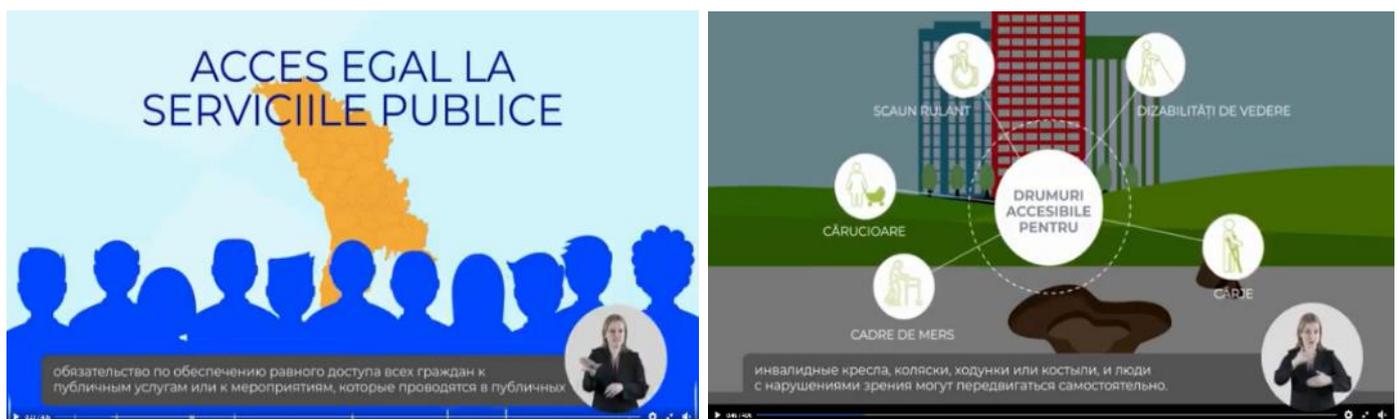

- ❖ The “accessibility” concept is less understood in the Republic of Moldova.
- ❖ There is a false perception in the society that the costs for making public buildings accessible are high.
- ❖ The LPAs and institutions hosting polling stations overestimate the efforts required to make the buildings accessible and have poor knowledge of standards on accessibility.
- ❖ There are better accessibility conditions in towns compared to villages.
- ❖ New buildings are constructed with severe violations of accessibility, neglecting the standards and rules.
- ❖ The control and monitoring actions undertaken by public authorities responsible for checking the existing buildings on compliance with the technical rules on accessibility are lacking or are ineffective.
- ❖ Public authorities fail to understand the economic advantages of the adoption of accessibility conditions.
- ❖ The expert opinions of civil society and initiative groups of people with disabilities are insufficiently engaged in the process of designing newly constructed and/or renovated facilities (user safari exercise).

In light of the new Parliamentary Elections in the Constituency nr.38 Hincesti organized in March 2020, the Project carried out a [targeted assessment](#) of 44 polling stations during January – March. The effort was initiated with an information session with participation of all LPAs representatives from Hincesti district where the CEC management highlighted the importance of ensuring an equal access to all voters to the polling stations. In June 2020, the comparative analysis of the accessibility of the polling stations in the Hincesti constituency was presented during an online session through [Privesc.eu](#) platform that reached 12,112 views. [The Study](#) revealed that: **1) qualitative changes in accessibility conditions were recorded in 8 polling stations out of 44 assessed; 2) a new additional polling stations (more accessible) was opened; 3) change of the location of two (2) polling stations (more accessible) was carried out.** Based on these, the Project concluded that a continuous communication with LPAs on accessibility and human rights aspects may lead to qualitative and quantitative changes for a more equitable electoral process in a medium and long term. For accessibility to information reasons, the complete analysis is available on the UNDP website in three languages ([Romanian, Russian and English](#)). Complementary to the assessment of the public buildings through “user-safari” mechanism, the Project achieved the following results:

- ❖ 186 electoral officials (including 157 women) were trained and better informed on accessibility and human rights aspects in electoral management;
- ❖ 90 people with hearing and visual impairments (including 40 women) were better informed on new Parliamentary Elections and their electoral rights;
- ❖ One regional TV show on accessibility to the polling stations (TV Cimislia) accompanied with sign language was broadcasted;
- ❖ 15 people (including 7 with different types of disabilities) were accredited as national observers and mandated to assess the polling stations in Hincesti constituency.

Also, in January 2020, a distinct videographic on accessibility aspects of the public buildings was developed and promoted through social media and TV channels.

Figure 4.46. Videographic on accessibility aspects of the public buildings (2020)

## Inclusive Camp for children from boarding schools (2019)

A great step towards a more inclusive civic education and voter information campaign has been made through a distinct programme for children from boarding schools [“Democracy can be learned. My Electoral Rights”](#). The activity was a premiere in the Republic of Moldova and was possible due to a good collaboration with the CEC, CCET and the Ministry of Education, Culture and Research. In total, 44 children from three boarding schools located in Ceadir-Lunga town, Carpineni village (Hincesti district) and Bender town have been capacitated with basic knowledge on democratic and electoral participation in a creative and familiar manner.

The first day was dedicated to closer acquaintance with several institutions, namely with the Central Electoral Commission, Centre for Continuous Electoral Training, United Nations in Moldova, and the Moldovan Parliament. They talked with institutions' representatives and learned more about their work and mandate. During the second day, the young participants worked in thematic groups, discussing about democratic values and electoral processes. Moreover, they simulated an Elections Day and learned by doing. The third day was dedicated to learning about human rights and ways of engaging actively in the community life, as to fit in the society more easily as responsible and informed citizens. The camp was appreciated by all participants, though the Project considers that this target group of first-time voters needs additional training and support to increase its level of belonging in the society.

## Training of newly elected Roma Local Councillors (2019)

In autumn 2018, the Roma people were engaged in voters' education campaigns with the Project support. More than 11,000 people participated in awareness-raising activities, while few local activists decided at that time to be the voice of the Roma people in their local community and stand as candidates in local elections. As a result, a record number of 12 Local Councillors managed to win enough votes and get a four-year term of office (six women and six men). In December 2019, the Project provided support in training the Roma councillors with a particular focus on effective governance and civic engagement at the local level. The two-days [training](#) was conducted jointly with the ADEPT Association and TARNA-ROM Association. The participants were capacitated to advocate for equal and active participation in democratic processes and in the decision-making at the community level.

## Practical workshops with detainees on voting procedures and electoral processes (2020)

In 2020, the Project, CEC and CCET teams continued the efforts of engaging with marginalized and vulnerable groups carried out through Small Grants Programme “Elections 2019” when 415 detainees from the closed type Penitentiary Nr.3 learned about their rights, changes in the electoral system and voting procedures. During 17 – 28 February 2020, in partnership with the National Administration of Penitentiaries, elections simulations and [practical workshops in four \(4\) additional institutions were organized](#). A total of 134 people: 50 women from penitentiary Nr.7 Rusca, 40 men from penitentiary Nr.17 Rezina, 14 persons from penitentiary nr. 9 Pruncul (therapeutic community “Catharsis”) affected by drugs and HIV/AIDS, and

30 young people from penitentiary Nr. 10 Goian, including first-time voters, have been capacitated with electoral knowledge. All participants had the opportunity to ask questions about their voting rights and voting procedures, difference between residency and domicile, role and responsibility of the Central Electoral Commission and Precinct Electoral Bureaus, particularities of the Parliamentary, Local and Presidential Elections, as well as Referendums. Moreover, women from Rusca penitentiary benefited from details about their participation to the new Parliamentary Elections conducted in Hincesti Constituency in March 2020.

Complementary to the electoral printed materials, the Project contributed with a set of artistic books and motivational literature to enrich the institutions’ libraries.

For more than eight years, UNDP supports the inclusiveness of the electoral process in Moldova. Previously, UNDP helped the CEC in equipping all polling stations with ballot sleeves allowing people with visual impairments to vote independently (2016); in developing video products accompanied with sign-language (since 2014); and providing sign-language translation at several polling stations where voters with hearing disabilities were registered (2014). Within the current Project, the support for a more inclusive electoral process continued and expanded. It significantly contributed with development and dissemination of electoral materials adapted to people with different types of disabilities (sign-language, easy-to-read and easy-to-understand materials, guides in braille, audio books) and those from minority and vulnerable groups (multilingual electoral materials). It also contributed to a [stronger voice](#) of the people with disabilities to face accessibility barriers and become more active during elections as observers and electoral officials.

## GENDER EQUALITY DIMENSION

During 2017 – 2020, UNDP continued to support the CEC and CCET in advancing a strong gender perspective in the electoral process through advocacy, gender-sensitive electoral education and communication. Being the leader in promoting the gender and human rights aspects among public institutions of the Republic of Moldova, three years in a row the CEC was actively involved in the **16 Days Campaign to end violence against women and girls** as to show its solid commitment to a world free from violence for all women and girls around the world.

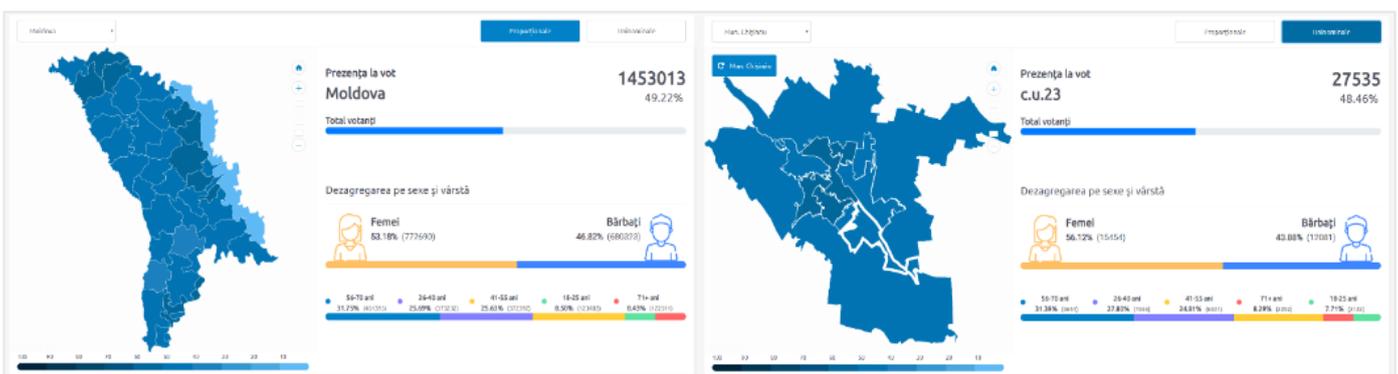

In December 2017, the Project supported the launch of the [Guide “Preventing Violence against women in elections”](#) developed by UNDP and UN Women. The Guide represents a useful resource for practitioners, including international organizations and those providing programming support on electoral assistance, women’s political participation, human rights monitoring and ending-violence against women. It is also a resource for members of political parties, particularly leadership of those parties, electoral management bodies, civil society organizations, women’s groups and gender equality activists. The Guide was launched **in premiere worldwide**, the Republic of Moldova being the first country where the material has been translated into national language and launched officially. The [launch event](#) was attended by 33 people, representatives of civil society and mass media (8 men and 25 women) being live streamed through Privesc.eu platform reaching 26,255 views.

In 2018, UNDP supported the CEC and CCET in the development of a Concept and Action Plan on Civic Education for the Promotion of Gender Equality in Electoral Processes and Gender Mainstreaming in Electoral Management and in the implementation of dedicated initiatives. Also, equal opportunities in electoral processes was ensured through streamlining the topic of gender equality in most public events and activities. The inclusive and gender-sensitive electoral education reached thousands of women (first-time voters, librarians, teachers, political parties’ representatives, women from vulnerable and Gagauz and [Roma minority groups](#)) being internationally recognized and [praised](#). In 2018, 2,231 women from vulnerable groups, particularly survivors of violence, women at risk of violence and /or trafficking, women affected and/or infected with HIV/AIDS, single mothers, women from low-income families of different age categories, including elderly, have been capacitated in actively exercising their electoral rights. These women, some of whom [haven’t participated in elections before](#), due to lack of interest on basis of hardship, and/or restrictions imposed by abusive partners, benefited from electoral counselling and skills and knowledge to take active part in the democratic processes in the country.

Likewise, in 2019 thousands of people directly participated in awareness raising activities, while few local women Roma activists decided to participate as [candidates in local elections](#). As a result, a record number six women out of 12 Roma elected councilors was registered.

During both 2019 national elections, the State Automated Information System “Elections” has proven an exemplary functionality in and outside the country, providing in real-time a full spectrum of data, including on gender. More than 2.7 mln users benefited from its [gender-sensitive web interface](#) developed based on the crowdsourced idea from InnoVoter Creativity Lab.

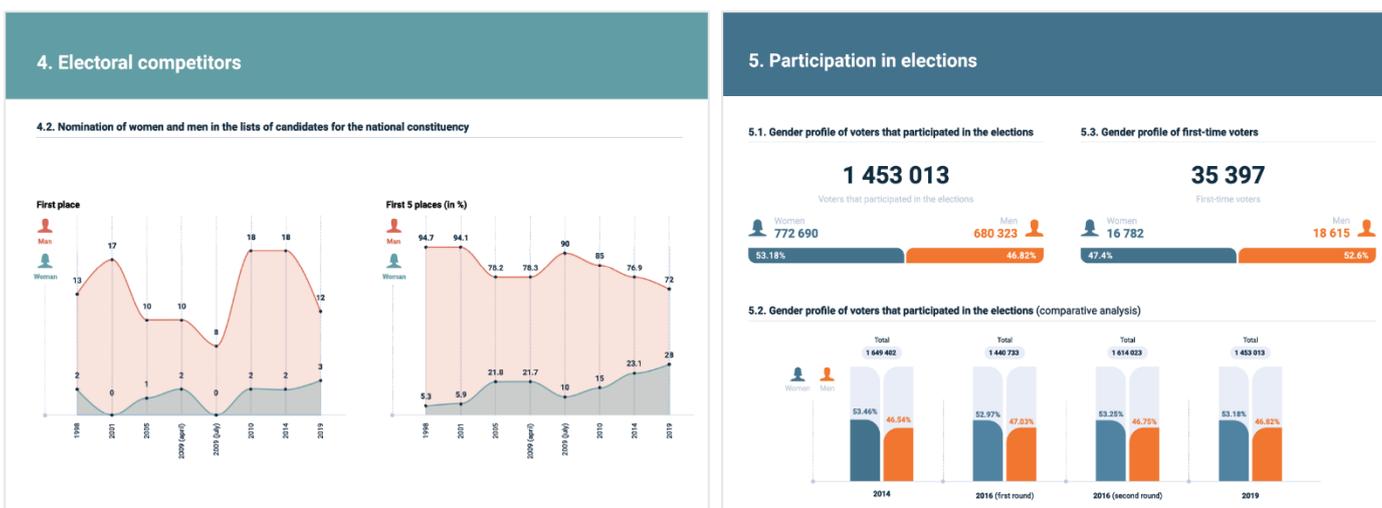

Figure 4.47. Instant display of voter turnout information during E-Day (Parliamentary and Local Elections)

In line with the Project's strategic objective of mainstreaming gender equality, in May 2019, the Central Electoral Commission and UNDP Moldova presented the analysis - [2019 Parliamentary Elections through a gender lens](#). The publication contained a series of user-friendly and comprehensive infographics on the participation of women and men in Parliamentary Elections, as administrators, beneficiaries of electoral training, voters, candidates, and elected officials. These infographics continued the good practice in fostering gender conscience and presenting gender-disaggregated data on elections similar to [2015](#) and [2016](#) editions. The [gender analysis](#) showed that all political parties respected the mandatory 40% quota in nominating the candidates for the national constituency (264 women out of 632 candidates), while for the single – district constituencies, there were only 21% out of 322 candidates. Among the independent candidates, only 14% out of 57 competitors were women. Compared with previous elections, the District Electoral Councils have involved more women at all levels. Also, out of 6,500 electoral officials trained by the Center for Continuous Electoral Training, 80% were women.

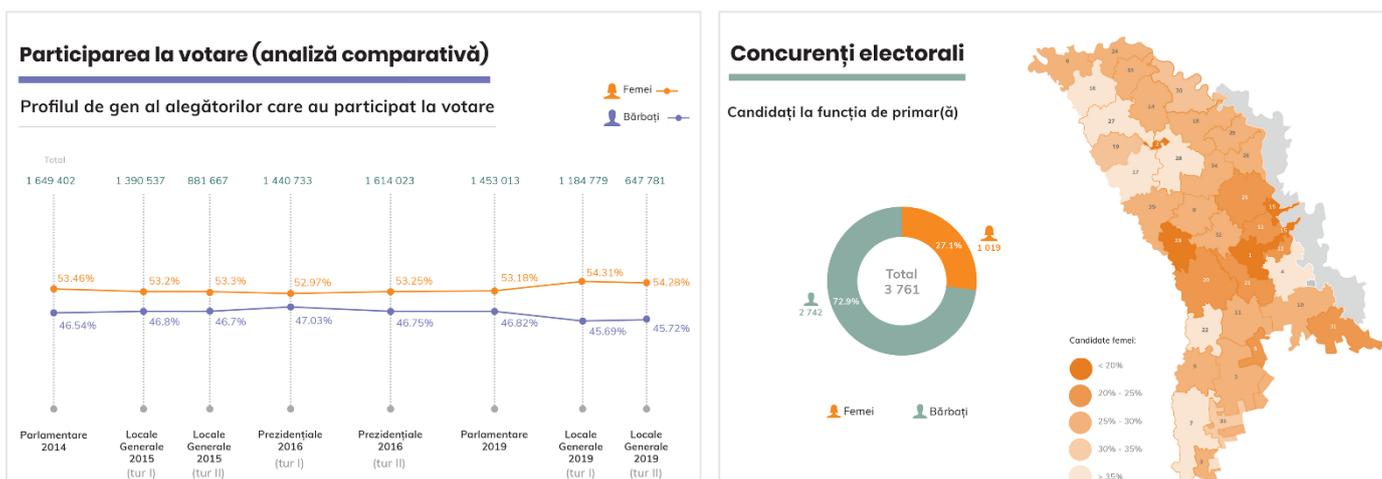

The [public presentation](#) of the analysis was attended by around 50 people (representatives of civil society, mass-media, political parties, national and international partners) and was live broadcasted through Privesc.eu platform reaching 22,023 views.

Figure 4.48. 2019 Parliamentary Elections through a Gender lens – extracts

In January 2020, the CEC and UNDP launched the bi-lingual [Gender Profile of the 2019 Local General Elections](#). The Study revealed that the amendments to the Electoral Code made in the summer of 2019 concerning the placement quota in the lists (at least three candidates for every ten seats shall represent one of the sexes) showed positive trends in women elected to local bodies (for mayors from 20,6% to 21,8%, for local councilors from 30% to 36,5%, and for district councilors from 18,5% to 27,8%). Similar to 2019 year, the [public presentation](#) was attended by around 50 people and was live broadcasted through Privesc.eu platform, this time reaching **double number of views** – 44,680.

Figure 4.49. 2019 Local General Elections through a Gender Lens – extracts

## Online workshops: Women in Elections (2020)

The initially designed series of face-to-face topic-based workshops on women's participation in elections were adjusted to the new reality imposed by the COVID-19 pandemic situation in Moldova. The whole civic education programme targeting young women from political parties, women activists and those interested to get involved in the decision-making process, took place online through online workshops and social networks, being a novelty for the Project, as well as a challenge.

During March – June 2020, the Project re-designed the programme and prepared four (4) workshops, carefully selecting the topics and identifying motivational speakers. In this manner, the public had the opportunity to connect and learn from experience of the experts, all events being live streamed through Privesc.eu platform and largely promoted through Facebook pages.

### 4.50. Online workshops: Women in Elections (2020)

Nr.	Date	School	Link	Views
1.	18 May 2020	Session 1: Why your involvement is needed now? (personal perspective) <ul style="list-style-type: none"><li>- What stops you to get involved?</li><li>- Invest in your personal development</li></ul>	<a href="#">link</a>	56,683
2.	25 May 2020	Session 2: Do you really care? Then, get involved! (gender perspective) <ul style="list-style-type: none"><li>- Gender quota in elections</li><li>- Stereotypes and biased behaviors</li></ul>	<a href="#">link</a>	19,956
3.	8 June 2020	Session 3: The power of courage to run for elections (political perspective) <ul style="list-style-type: none"><li>- What would be your motivation to run for elections?</li><li>- Your election campaign plan: Do's and Don'ts.</li></ul>	<a href="#">link</a>	11,968
4.	15 June 2020	Session 4: Mass media and new media. How do you make them your allies in the election campaign? (communication perspective) <ul style="list-style-type: none"><li>- How a computer or a phone can make you win the elections?</li><li>- How to become a political brand?</li></ul>	<a href="#">link</a>	18,345

To ensure the sustainability of these efforts, a distinct Facebook closed group has been created – **Women in Elections**. It represents the initial women's community interested to become more active and benefit from experts' guidance in this endeavor. Within the group, all participants have the possibility to interact with speakers and ask for advice. By now, the group has 148 active members and will be used by the Project for further civic engagement activities.

The global public health crisis caused by the COVID-19 continued to impact the society in unprecedented way, also disproportionately affecting women. After the workshops, the women mentioned that they became too busy working or taking care of their families to participate and stay-up to date with civic engagement and leadership/self-development initiatives, being hard to find time to get involved while juggling their other responsibilities. Confidence in their own political knowledge was also a barrier mentioned by the participants. During such stressful time, however, it becomes even more important to engage women in different initiatives, strengthening their will to vote, to be part of the electoral process as observers, electoral officials, supporters of electoral candidates or electoral candidates themselves. As almost all events tend to move online, the Project will continue to analyze potential ways to make women's voices and interests heard, as well as to ensure a gender balanced approach while implementing the upcoming civic education and voter information campaigns.

# ASSESSMENT OF THE CIVIC EDUCATION CAMPAIGNS' IMPACT AND VOTERS' PERCEPTIONS

During March–May 2019, the first representative survey at the national level was carried out on a sample of 1,418 respondents. The assessment covered all regions of the country and population with the right to vote aged 18 and beyond, from rural and urban localities. The second survey was carried out after the General Local Elections (November – December 2019) based on a similar methodology.

The purpose of these surveys was to track the impact of the planned civic education and voter information campaigns targeting changes in public perceptions regarding the work of the Central Electoral Commission and Center for Continuous Electoral Training.

According to the survey results, the absolute majority of voters (95%) are convinced that it is important for each citizen to participate in elections.

However, only 64% of respondents admit that they go to vote each time. More active are people from rural localities compared to those from cities. Out of those interviewed, 83% participated in the Parliamentary Elections and 82% in the General Local Elections.

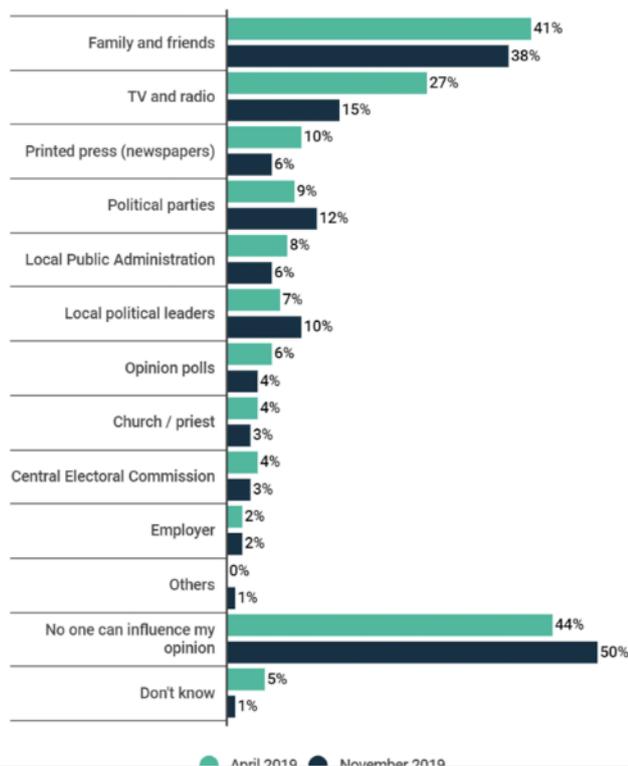

Half of respondents considers that no one could influence his/her decision to vote, while 40% admits that his/her decision could greatly be influenced by family members and by TV and radio (27% - first survey and 15% - second survey).

The top 3 sources of information about elections remain to be the TV news and shows, TV commercials, and Internet for the Parliamentary Elections. For the General Local Elections, the top 3 sources consist of friends, neighbors, and relatives. The least popular sources of information were phone calls and hotlines, TV commercials in supermarkets, and public transportation commercials. Only 1/3 of people interviewed had sought information about voting procedures before both elections.

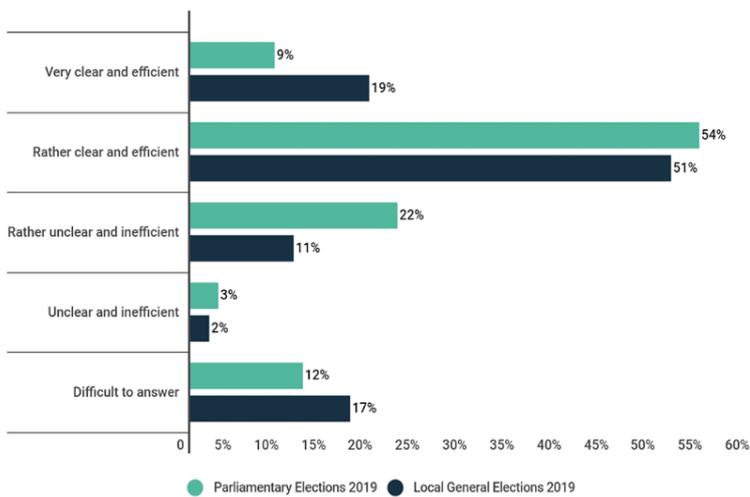

98% heard/saw general information about elections. More than half of respondents (58%) knew about the possibility to check the personal data in the electoral lists at the polling stations, 27% - online on the CEC website, and a novelty for the General Local Elections was through payment terminals (10%). The interest about the election results was very high among voters. Almost 2/3 of respondents learned about the preliminary results of the Parliamentary Elections from TV news and only 2% by accessing the official CEC webpage directly.

## THE OPINIONS OF WHICH OF THE PERSONS OR INSTITUTIONS LISTED BELOW MATTER THE MOST FOR YOUR DECISION TO VOTE OR NOT?

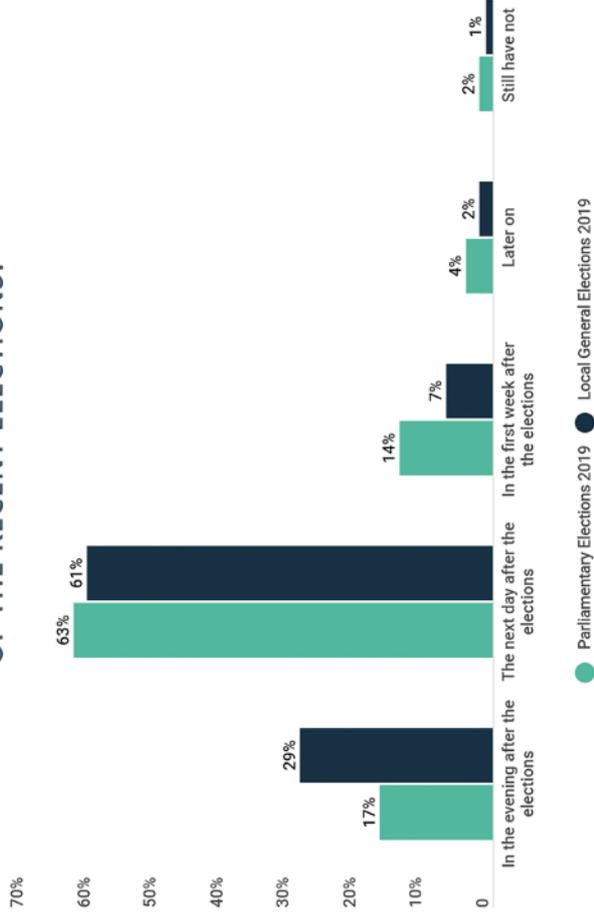

(CUMULATIVE QUESTION)

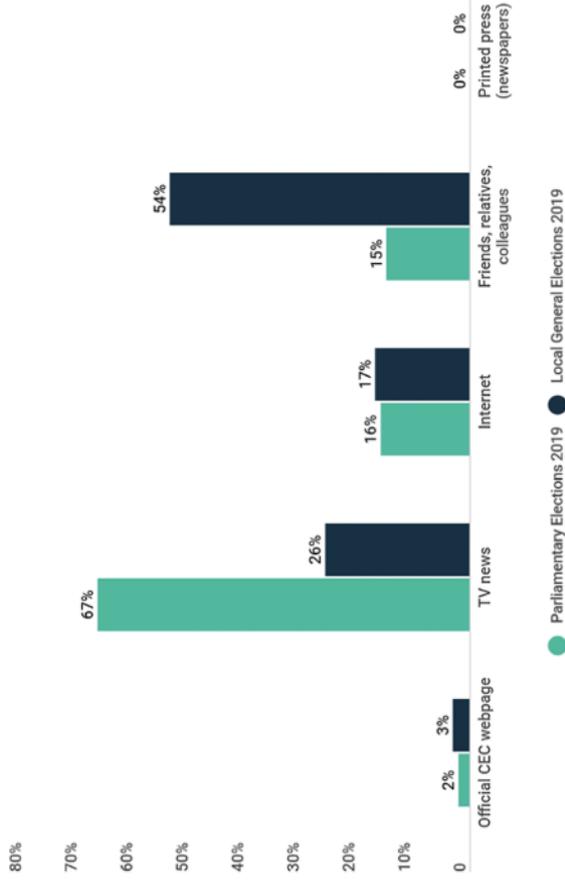

## WHAT DID YOU THINK OF THE REAL-TIME PRESENTATION BY CEC OF THE VOTING ATTENDANCE AND PRELIMINARY VOTING RESULTS?

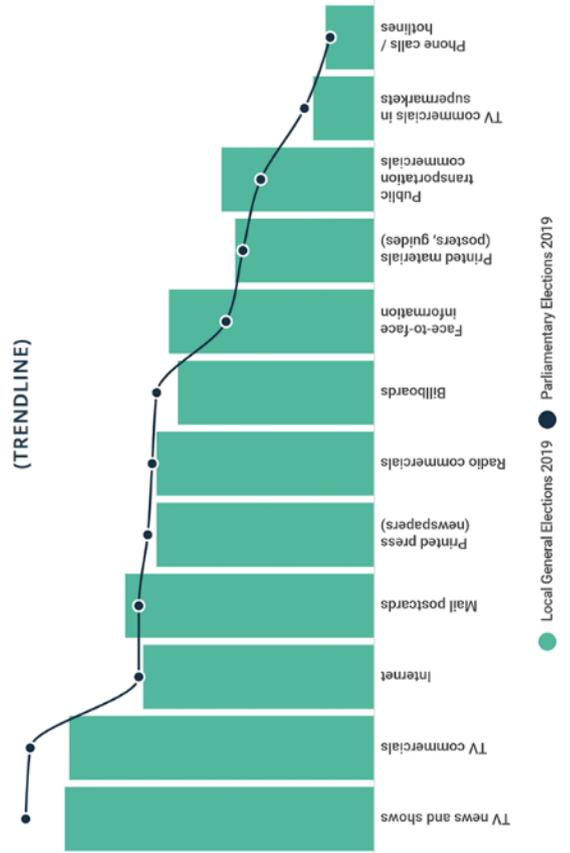

### WHEN DID YOU LEARN OF THE PRELIMINARY RESULTS OF THE RECENT ELECTIONS?

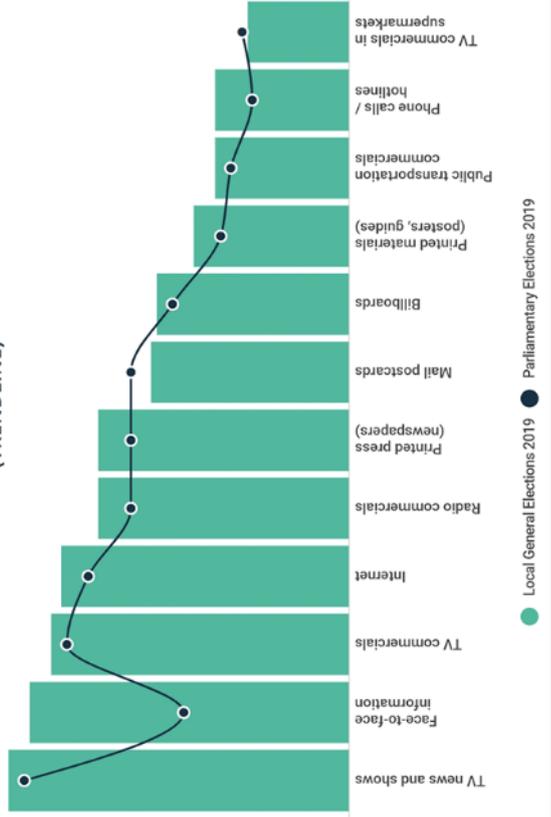

### FROM WHERE OR FROM WHOM DID YOU LEARN ABOUT THE RESULTS OF THE RECENT ELECTIONS?

### WHAT SOURCES OF INFORMATION ON ELECTIONS DID YOU USE? (TRENDLINE)

### HOW SUITABLE DO YOU FIND THE FOLLOWING INFORMATION MECHANISMS? (TRENDLINE)

As for the General Local Elections, the interest was significantly higher since **90% of voters found about the results no later than the day after elections**, mainly from friends, neighbours, and relatives.

The newly implemented visual infographics developed as a result of the [InnoVoter Creativity Lab](#), organized with the Project support, have been assessed as **clear and prompt** by a large majority of respondents, mostly by young people and voters from urban areas. **Two-thirds of voters (7% more as compared to the first survey) appreciated the manner and format of the CEC's data presented in real-time on voter turnout and preliminary election results.**

**The absolute majority of voters who participated in the elections remained satisfied almost with all aspects of organizing the voting process at the polling station level.** The respondents appreciated the waiting time in the polling stations, operation of the polling station members, and the orientation inside the building.

**Every third voter considers that General Local Elections were better organized and conducted than the Parliamentary Elections.**

**The presence of video cameras brought less satisfaction and more confusion during the election days among voters.**

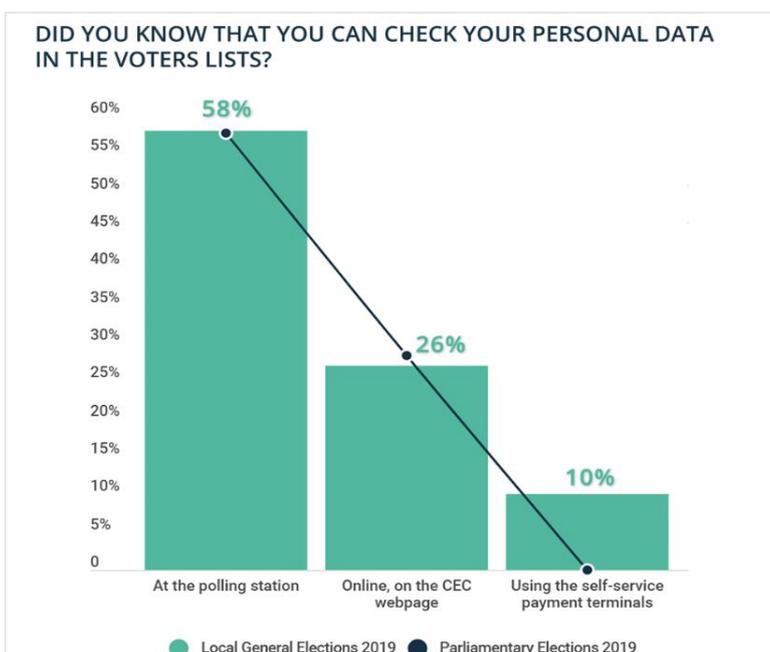

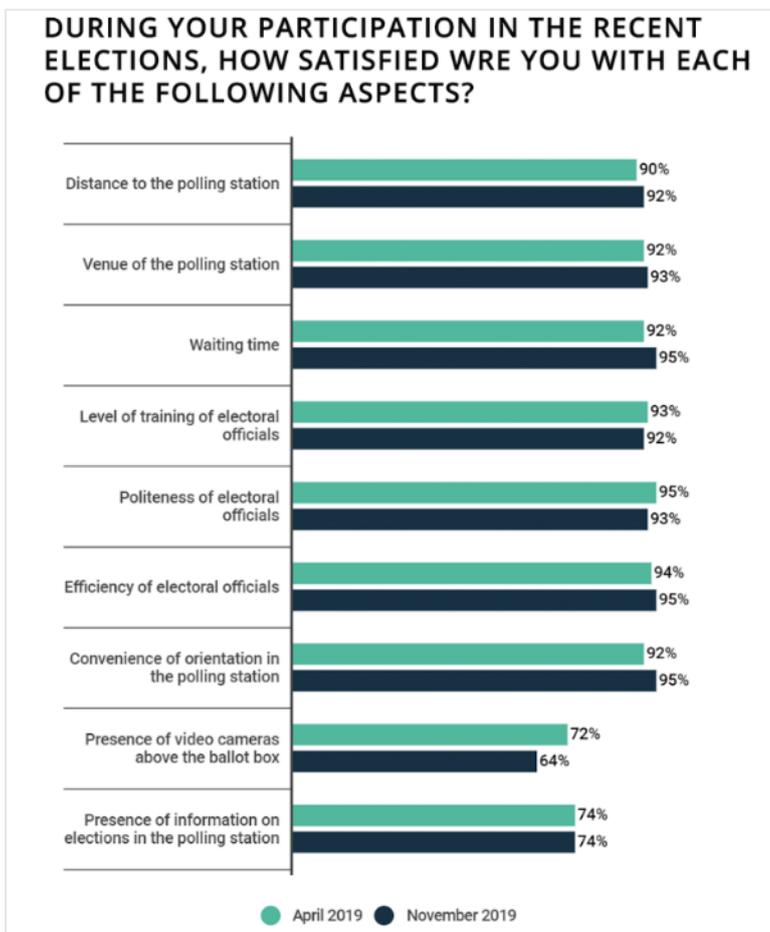

Most polling stations were not equipped with access ramps since **only 23% of voters confirmed the existence of ramps during the Parliamentary Elections and 28 % during the General Local Elections.**

The notoriety of the CEC has not changed and remains quite high at the national level: **8 out of 10 voters have heard about the CEC**, while CCET's notoriety continues to be significantly lower - only 25% have heard about this institution.

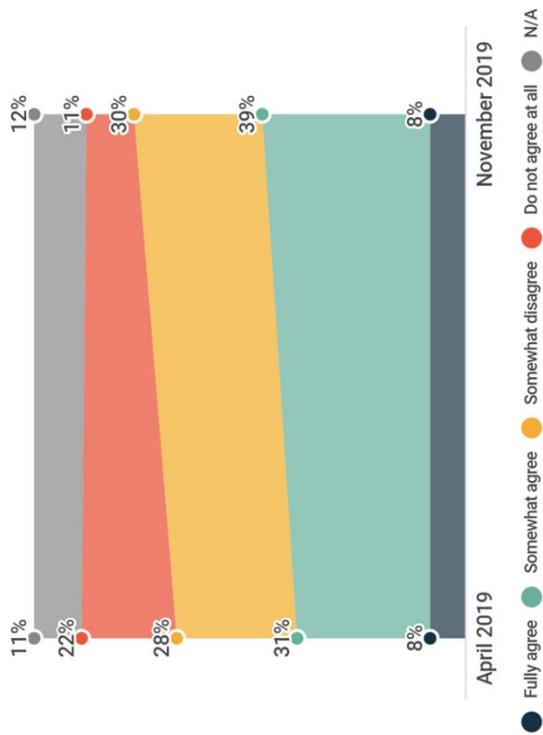

**None of the CEC's core responsibilities are known by all voters.** Yet, the level of general knowledge about the CEC slightly increased from the first study to the second one.

An important increase in the **level of confidence both in the professionalism of the CEC** (from 36% to 46%) and in **the transparency of the CEC's activities** (from 28% to 36%) was registered.

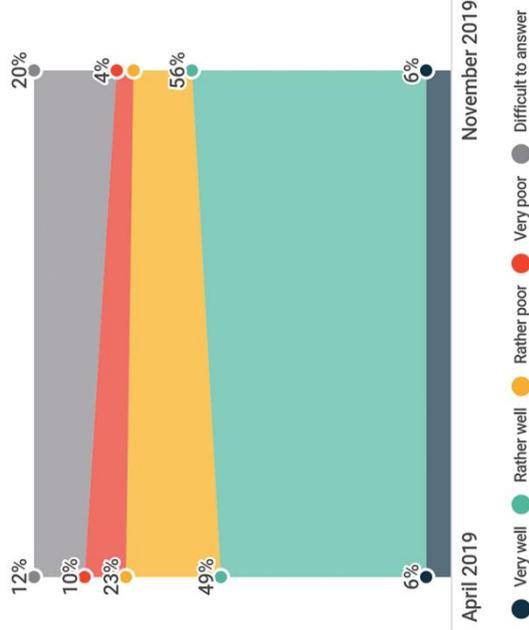

**More than half of respondents (55% first study and 62% second study) believe the institution performs its functions very well or rather well.** More confident in the adequate functions of the CEC are respondents who have been exposed to the information campaigns and those who have participated in elections.

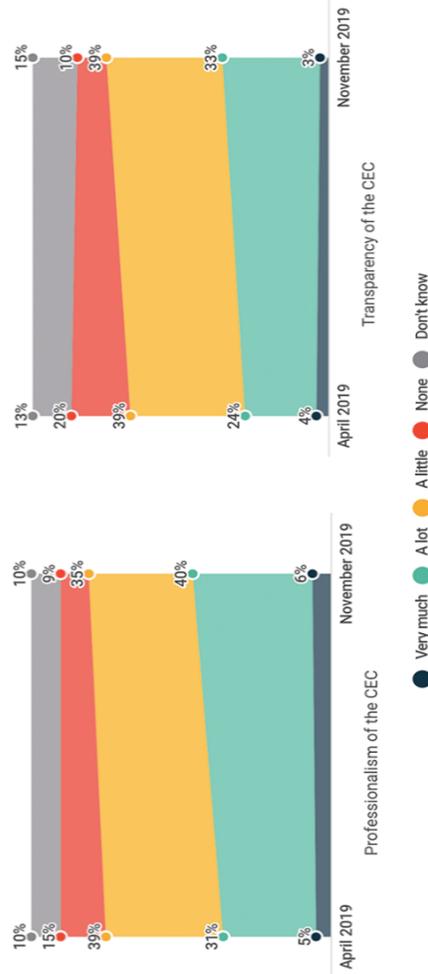

### DO YOU THINK THAT THE CENTRAL ELECTORAL COMMISSION IS AN INDEPENDENT AND IMPARTIAL INSTITUTION?

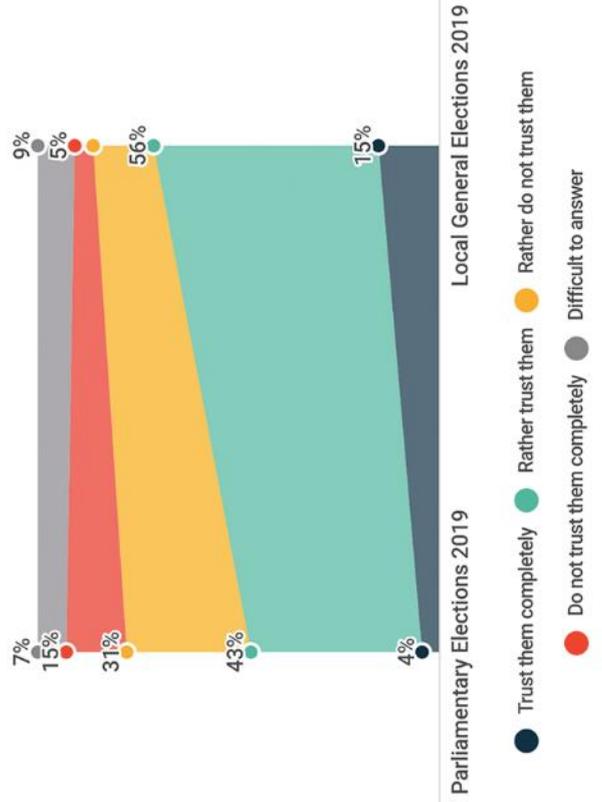

### HOW WELL DO YOU THINK THE CENTRAL ELECTORAL COMMISSION FULFILLS ITS DUTIES?

### GENERALLY, HOW MUCH DO YOU TRUST THE...

### HOW MUCH DO YOU TRUST THE RESULTS OF THE RECENT ELECTIONS?

Regarding the independence of the CEC - a slight increase in voter's opinion has registered. **Almost half of respondents (47%)** from the second survey compared to those from the first survey (39%) **consider that the CEC is a neutral and independent institution in its activity.** More trust in the CEC's independence have young people, voters from Center region, ethnic minorities, people who participated in elections and those who were exposed to the information campaigns.

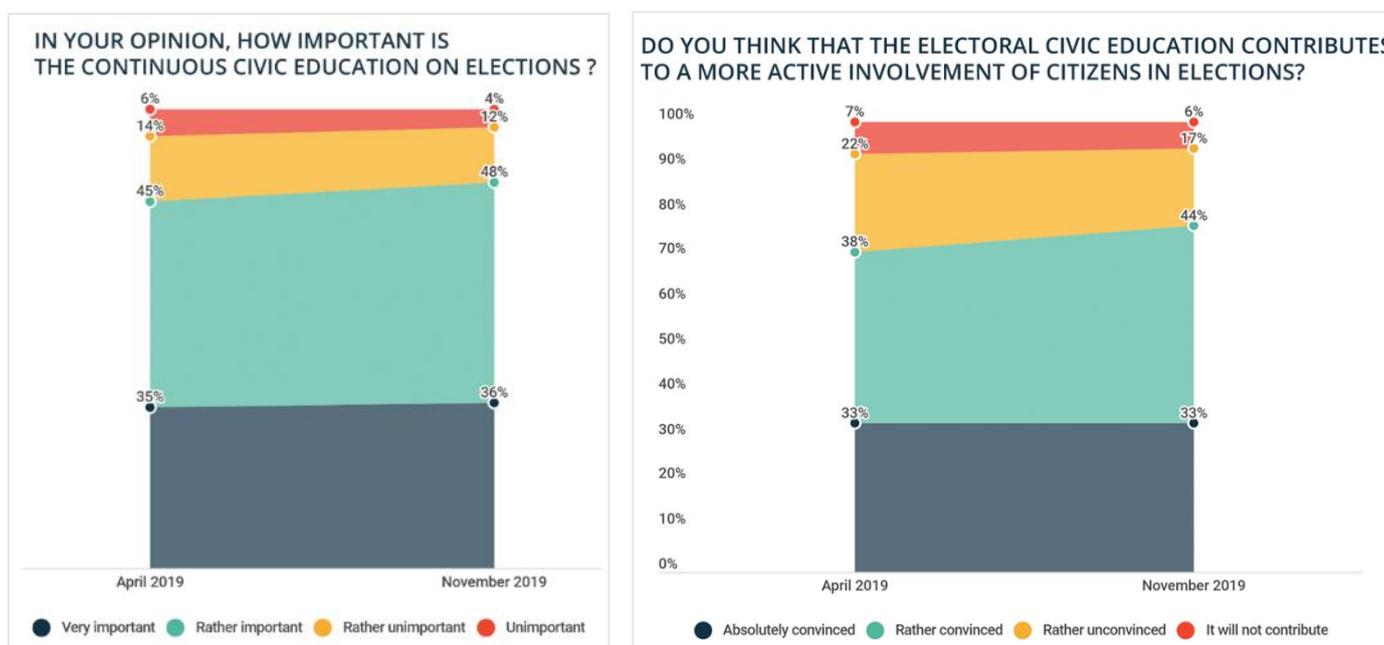

**The level of confidence in the independence and neutrality of the CEC is directly linked to the level of confidence in the election results.** People tend to trust more in General Local Elections results (71%) compared to those from Parliamentary Elections (47%). More confident in the election results are respondents from minority ethnic group (80%), residents from South and North regions (74 – 76%) and people who participated in elections (75%).

Both analyses showed that **a critical attitude toward CEC is more pronounced in the group of men, people with lower level of education, representatives of the ethnic majority, those who do not participate in elections and who were not exposed to the information campaigns.**

**Around 80% of respondents argue that continuous civic education in the electoral field is important.** Most of them are from ethnic majority, voters with a high level of education, and those who have been exposed to the information campaign.

**Almost 95% of respondents think that each citizen should participate in elections.**

**77% of respondents from the second survey (6% more compared to the first survey) are confident that continuous education in the electoral field can contribute to the more active involvement of citizens in electoral processes.** The degree of conviction is significantly higher among respondents with a high level of education (82%) and those who were exposed to the information campaign (79%).

At the same time, **only 23% manifested interest to be actively engaged** in electoral events and mainly as observers (24%), volunteers (17%), electoral officials (15%), and electoral candidates (6%).

In conclusion, both surveys showed that there is a good level of interest of citizens in elections. The respondents strongly believe that the ongoing electoral training and civic engagement activities can contribute to the more active involvement of citizens in electoral processes. TV shows and advertising, as well as the Internet, continue to be the main sources of information about elections. However, in the case of local elections, voters prefer to be informed through face-to-face events. CEC has significantly improved its image among voters, with a confidence increase of 9% in the professionalism, transparency, and independence of the institution. This automatically impacts the credibility of the election results, as shown by an increased level of confidence in the Local Elections results compared with those from Parliamentary Elections.

# CONCLUSIONS, LESSONS LEARNED AND WAY FORWARD

## CONCLUSIONS

- Despite continuous uncertainties in the Project environment caused by the change of the electoral system, series of political crisis, restructuring and merging of the partner public institutions and the unexpected change of the CEC's leadership, EDMITE has reached its main objectives using an Agile approach, continuously prioritizing activities and planning in advance to mitigate major external risks.
- The Civil Status Acts and Address Registers have been developed within the Project timeframe, with adaptative maintenance activities to be undertaken in the systems' warranty period.
- Capitalizing on the implementation of the Civil Status Acts and Address Registers, in the upcoming period it is of utmost importance the Public Services Agency to initiate the adjustment of the State Register of Population, that merges these two primary sources before delivering data to the State Register of Voters through the adopted by the public institutions MConnect platform. The support to adjust the State Register of Population could be further discussed with PSA and potential donors as an additional activity of the EDMITE Project in its second phase of implementation.
- While the primary sources of data relevant for the electoral process are already connected, the adoption of the MConnect platform by all public institutions and its usage to full capacity is ongoing.
- All activities with zero-limit tolerance and of highest relevance for the electoral processes, including the adjustments of the SAISE, have been timely implemented.
- The Project offered the required technical assistance for ensuring the optimal and stable performance of the SAISE during Parliamentary and Local Elections, as confirmed by national and international observers.
- The effective expansion of the SAISE brought noteworthy improvements in the election process. Moldovan citizens, the civil society and political parties appreciated the availability of the real-time information on the voter turnout, of the preliminary election results in 3-4 hours after the closure of the polling stations, the access to the online verification of voters' data prior to the elections, and minimum errors in the SRV, and expect that the CEC continuously offers these services. To respond to the demand, further IT support to the SAISE is required.
- Considering the continuously unstable political environment, strengthening of the national electoral standards towards their better compliance with the recommendations of the international election observation missions is of utmost importance.
- Regardless of changes in the electoral legal framework governing political parties' financial reporting, the "Financial Control" module of the SAISE has been implemented on time. At the same time, the political parties' adoption of the online reporting method required multiple adjustments and training sessions that have been extended and repeated over the period of more than 12 months, although these efforts have not ensured the 100% compliance with the requirement to submit the financial reports on-line. The demonstrated opposition of some political parties to on-line financial reporting attests for the need to further develop the knowledge and capacities for the effective use of the tool
- The civic education interventions tailored to the needs of specific target groups (women, youth, ethnic and linguistic minorities, people with disabilities, those underrepresented and marginalized) created an enabling environment for voters to make informed decisions during the Elections Day. Overall, the Project supported the implementation of 1,130 activities and electoral events. These efforts directly involved 345,004 people (including 193,526 women). Additionally, thousands of voters have been reached indirectly, through TV, social media, public exhibitions, opinion polls, and web-based applications. The usefulness of the civic education and voter information activities carried out by the Project had been attested by the high interest to participate in the events, but also proven through the ex-post-ante surveys.
- The Project significantly progressed in enhancing the inclusiveness of the electoral processes by providing electoral education materials adapted to people with different types of disabilities (sign-language, guides in Braille, audio books, etc.) and those from minority and vulnerable groups (materials for elderly people, materials in Romani and Gagauz languages). The information materials produced for

voters with psycho-social and intellectual disabilities and tested in the tailored for these groups learning and simulation events, proved that these people can exercise their right to vote independently<sup>14</sup>. The Project activities contributed to a higher rate of participation in elections of people with intellectual disabilities, as confirmed by the 2019 Parliamentary Elections report of IDOM<sup>15</sup>.

- Attractive, innovative, and creative instruments were designed by the Project (Filmmakers Camp, VotART, InnoVoter, Election Intellectual Games) and proved to be efficient in increasing the interest of young people to participate in democratic processes. Practical electoral simulations (National Youth Forum, School Councils' elections) contributed to an enhanced trust of young people in the electoral processes.
- The issue of the access to vote (and in general access to public services) for people with disabilities was brought to the attention of the central and local authorities backed by the evidence collected through the Accessibility Assessment of 1/3 of polling stations (otherwise public buildings – schools, kindergartens, Mayor's offices or Community Centers). Around 36 people, including 16 with different types of disabilities conducted "user safari" exercises and felt more engaged in their community life, while a woman from this group ran for local elections and became a local councilor. The local authorities subject to the study received detailed recommendations on how to improve the accessibility of the public buildings, and the improvements started, though slower than it should be.

## LESSONS LEARNED

- The implementation of the complex IT platforms, such as the Civil Status Acts and Address Registers require considerably more time than was initially estimated. More time shall be factored when planning such tasks, as their complexity increases during development and the path might be slowed down by the overall government-led e-Transformation process, as well as by other external factors (the restructuring of the relevant public institutions in the case of this Project).
- The availability of the "Financial Control" module in the SAISE does not necessarily mean that the CEC is fully equipped to effectively perform the political finance oversight function. The CEC requires additional support and capacities to perform its political finance oversight function (oversee, determine violations and sanction violators) and mitigate potential credibility risk.
- The issues of money in politics are highly sensitive in Moldova, while the public's assumptions that political corruption is high, affects the overall trust in governance institutions, in this case the CEC that is mandated with for the oversight over the political party finance function.
- The current elections legislation still contains many inconsistencies and ambiguities that allow for decisions not accepted by the CSOs and citizens. A comprehensive review of the electoral legal framework is necessary to enhance the quality of the electoral processes, to strengthen public trust in the elections results, and therefore, to counteract the increasing civic apathy and to provide incentives to people to vote.
- The capacity to administer the electoral process in a professional manner within a volatile political context does not necessarily lead to the positive perception of citizens about the credibility of elections results or to an enhanced trust of citizens in the overall integrity of the electoral process. Such factors like mass-media manipulation (e.g. biased and fake news), misinformation, limited capacities of the CEC to effectively communicate the reasons for certain decisions and the insufficient understanding of the electoral process by large groups of citizens are strong hindrances for public trust in elections. In this context, it is vitally important the CEC to further improve its direct interaction with stakeholders throughout the electoral cycle, in one hand, and the citizens to be supported to assess information and processes enabling the men and women to have an informed opinion and hold institutions to account, in another hand.

---

<sup>14</sup> On October 11<sup>th</sup>, 2018, the Constitutional Court of Moldova delivered a judgment that declared unconstitutional Article 13 paragraph (1) letter b) of the Electoral Code that was imposing a ban on voting in elections for persons with mental disabilities.

<http://www.constcourt.md/libview.php?l=en&idc=7&id=1302>

<sup>15</sup> During the 2019 Parliamentary Elections, 36.44% of the persons from mental health institutions exercised their right to vote, a considerable increase from previous years (in 2016 – 23.31% and 27.57%; in 2014 – 33.62%; in 2011 – 6.9%; in 2009 – 11.42%). [https://idom.md/wp-content/uploads/2019/08/IDOM\\_Raport-parlamentare-2019.pdf](https://idom.md/wp-content/uploads/2019/08/IDOM_Raport-parlamentare-2019.pdf)

- To create a mentality shift and to build a strong civic participation culture requires more time and cannot be achieved during one electoral cycle, by the efforts of an election management authority, or by several sporadic civic education activities. To enhance citizens' democratic participation and to strengthen their ability to interact with the CEC in a constructive manner, concerted, long term and joint multi-actor efforts are needed.
- For establishing a meaningful connection between public authorities and citizens, as well as building trust in democratic processes and institutions, it is important to enhance the direct communication between state authorities and citizens at the local level. Grassroot initiatives (e.g. implemented by CSOs via the Small Grants Programme), as well as the institutional collaboration between central and local public authorities will ensure a targeted outreach and higher impact of the civic education and voter information campaigns, thus a better informed opinion of Moldovan men and women, including from minority and vulnerable groups.
- The establishment of partnerships with the professional groups that have an extended presence on the ground and continuously communicate with people at the community level serving often as the primary source of information (librarians, teachers), capacitating these professionals as civic and electoral education promoters proved to be an essential factor for the Project in reaching out at the ordinary people in the countryside that often lack the information. The established networks of these professionals shall be maintained and expanded.
- A strategic coordination with other relevant initiatives - UNDP Projects, NGOs, as well as other donor-funded Projects shall be maintained to avoid overlapping and to seek synergies and joint implementation of relevant activities, as necessary, for achieving higher efficiency and value for money.
- The Project shall be allowed for certain flexibility to be able to stay relevant and respond to the changing context, while progressing towards the agreed objectives by applying alternative methods of implementation. This requirement was demonstrated during the pandemic situation caused by the SARS CoV-2, when the Project has undertaken prompt actions and applied alternative methods to deliver activities.

## WAY FORWARD

### ENHANCEMENT OF THE IT STRUCTURES AND PROCESSES FOR AN IMPROVED GOVERNANCE AND INDEPENDENCE OF THE ELECTORAL ADMINISTRATION

The Project shall continue to support the CEC in the implementation of the SAISE Development Roadmap, leading to a complete IT architecture that is sustainable across all electoral cycles and fully compliant with international standards. Improvements to the performance and cybersecurity of the SAISE and new modules to submit online complaints or to access electoral data for research purposes by stakeholders are of a high importance to enhance the accessibility and transparency of the electoral process and to enable citizens to scrutinize the performance of the electoral administration.

### FURTHER TECHNICAL ASSISTANCE TO CONSOLIDATE THE CAPACITIES OF THE CEC TO PERFORM OVERSIGHT ON POLITICAL PARTY FINANCING

The Project will support the CEC in implementing its political party finance oversight function to address political corruption and to strengthen the integrity of the electoral process. The Project will provide support in the gap analysis, in the identification of the actions that would lead to the proper implementation of the oversight role by the CEC, and in their implementation. CSOs and investigative journalists will be engaged to provide an independent monitoring of the CEC's performance on this function and to hold the CEC accountable for lack of action with regards to sanctioning of the parties that break the rules.

### UPSCALE OF CIVIC AND VOTER EDUCATION TO ENHANCE CITIZENS' KNOWLEDGE OF ELECTORAL AND WIDER DEMOCRATIC PROCESSES AND TO STRENGTHEN THEIR ABILITY TO HOLD THE RESPONSIBLE INSTITUTIONS TO ACCOUNT

Building on the efficient methods used during 2017-2020, the Project will continue its civic and voter education programs. In line with the ODIHR and Project evaluations' recommendations, the Project will continue to support the CEC/CCET in implementing extensive civic education and voter information programs in accordance with their strategic documents: 2020 – 2023 CEC Strategic Development Plan and the 2020 – 2023 CCET Strategic Development Plan. These interventions will include the institutionalization

and scaling-up of programs dedicated to the teachers as electoral education promoters and school councils' elections as a tool to promote greater civil understanding and participation. Moreover, the Project will continue its partnership with the Ministry of Education, Culture and Research to develop a dedicated curriculum/program on voter education for high-schools and universities.

Also, partnerships with CSOs will be strengthened and expanded for reaching out to particular groups of citizens with voting rights of all ages, sex, social and educational background to enable them to cast their vote more consciously.

#### IMPROVEMENT OF THE LEGAL AND REGULATORY FRAMEWORK TO RESPOND TO THE EOM RECOMMENDATIONS

Based on the CEC Development Strategy (2020 – 2023) and Election Observation Missions' reports, the Project will provide targeted support to improve the necessary electoral legal and regulatory framework to address loopholes or contradictions in the legal provisions.

The Project will provide highly skilled expertise for address the legal issues related, but not limited to, the campaign financing, complaints process (including for the Diaspora), and electoral dispute resolution. Also, the Project will support the creation of a consultative mechanism involving national and international partners and relevant stakeholders to support the implementation of the electoral recommendations, with a particular focus on gender and human rights dimensions, to ensure a more transparent and credible electoral process. Strategic election advisory support to the CEC management to better respond to the national and international requirements will be also offered.

## PROGRESS TOWARDS PROGRAMME OUTPUTS

### **Intended Outcome as stated in the UNDAF/Country Programme Results and Resource Framework:**

Moldova Partnership Framework 2013-2017 “Towards Unity in Action”: “Increased transparency, accountability and efficiency of central and local public authorities”

UNDAF 2018-2022: “The people of Moldova, in particular the most vulnerable, demand and benefit from democratic, transparent and accountable governance, gender-sensitive, human rights-and evidence-based public policies, equitable services, and efficient, effective and responsive public institutions.”

### **Outcome indicators as stated in the Country Programme Results and Resources Framework, including baseline and targets:**

#### **Country Programme Results and Resource Framework Outcome: (2013-2017)**

- Institutional Strengthening: Increased transparency, accountability and efficiency of central and local public authorities;
- Human Rights, Empowerment of Women and Anti-discrimination: state bodies and other actors effectively promote and protect human rights, gender equality and non-discrimination, with particular attention to the marginalized and the vulnerable.

#### **Outcome Indicator:**

- 1.1 Level of confidence in public institutions;
- 1.2 Women representation in decision-making positions.

#### **Outcome Baseline:**

- 1.1 In 2015, the level of confidence in Parliament is 6%.
- 1.2 In 2015, percentage of women representation in the Parliament of the Republic of Moldova is 21%.

#### **Outcome Target:**

- 1.1 An increase of the level of confidence in public institutions to 30% by 2018 and approximately 40% by 2019.
- 1.2 An increase to 30% of women representation in the Parliament of the Republic of Moldova.

#### **Country Programme Results and Resource Framework Outputs: (2017-2022)**

**OUTPUT 1.1: Enhanced legislative, oversight and representation functions of Parliament responsive to the needs of the under-represented and marginalized groups through the meaningful engagement of the latest**

**Indicator 1.1.3.** State Register of Voters contains minimum error through the interoperability with the main registers of population

**Baseline 2016:** No

**Target 2022:** Yes

**Means of verification:** Central Electoral Commission Reports

**Applicable Output(s) from the UNDP Strategic Plan:** 2, 4

**Project title and Atlas Project Number:** Enhancing democracy in Moldova through inclusive and transparent elections, 00094503

EXPECTED OUTPUTS	OUTPUT INDICATORS	DATA SOURCE	BASELINE		TARGETS (by frequency of data collection)				DATA COLLECTION METHODS & RISKS	PROGRESS TOWARDS THE OUTPUT
			Value	Year	Year 1	Year 2	Year 3	FINAL		
<b>Output 1</b> Credibility of the State Register of Voters enhanced  <b>Means of Verification</b> The Voters List for 2018 and 2019 Elections	1.1 Timeframe of data transfer improved and data exchange over MConnect Platform operational on a daily base	PSA	Up to 34 days	2016	n/a	Technical development of the Civil Status Acts Register finalized (CSA)	CSA connected to MConnect	CSA is operational and ensures same-day data transfer	Monitoring of the system implementation; Official CSA usage reports provided by the PSA.  Risks: The adjustment of the PSA's infrastructure (SGAR) is not completed within the expected timeframe	<b>IT Civil Status Acts Register development completed.</b>  Adjustment of the CSA to the SGAR platform of the CSA ongoing.
	1.2.1 New Address Register Informational System (ARIS) available, connected to M-Connect and accessible for the SRV	PSA	Current version of the IT system available	2017	n/a	New version of ARIS developed	New version of ARIS available, connected to MConnect and accessible for the SRV	All geographical locations within the Republic of Moldova are available through the new Address Register in the new format	Monitoring of the system implementation; Official ARIS usage reports provided by the PSA  Risks: ARIS testing period is extended due to system complexity and delays the implementation phase	<b>ARIS development and data migration completed.</b>  ARIS adaptive maintenance ongoing.
	1.2.2 Number of voters on the supplementary lists in 2018 and 2019 reduced by 2% - normal voter movement parameter reached (excluding the Transnistrian voters from this percentage)	CEC	3.5% of the voters in the 2016 elections in country				Less than 2% of voters on the supplementary voters list in country	1.5% of voters on the supplementary voters list in country	Less than 1.5% of voters on the supplementary voters	Official CEC reports on election results
	1.3 Interoperable connections with the relevant stakeholders for the electoral process operational	EGA	No connections	2017	n/a	PSA	Other line ministries and agencies relevant to the process	All relevant stakeholders are connected to MConnect sharing relevant data for the electoral process	Annual report of the e-Governance Agency. GAP analysis of the digital infrastructure of the e-Governance framework  Risks: Delays in the adoption of the interoperability framework and connection of public institutions' data registers to MConnect	23 major public institutions (including the PSA, CEC and 6 ministries) are connected to the MConnect  Connection of ARIS and CSA systems to MConnect pending upon implementation.

<p><b>Output 4</b></p> <p>Civic Education and Voter Information systems strengthened</p> <p><b>Means of Verification 4:</b></p> <p>Survey to be conducted following the 2019 Elections</p>	4.1 Increase in the awareness among the citizens about the work of the CEC/CCET and the electoral system and process (control group 50% women and 50% men)	CEC/ CCET	53% of the interviewees in the 2016 survey did not feel informed about the whole electoral process	2016	n/a	n/a	25% increase against 2016 in the group of people that feel informed	Less than 25% of the people interviewed in the 2019 post electoral survey will feel uninformed about the work of the CEC and the electoral processes	Periodic general population surveys	<p><b>Target achieved for the 2019 Parliamentary elections</b></p> <p><b>Target achieved for 2019 General Local elections</b></p>	
	4.2 Selected educational institutions supported in civic education events	CEC/ CCET	Electoral education is not provided in education facilities	2016	20 schools	30 schools	30 schools	80 schools will receive civic education support	CCET reports (including HACT)	Data provided by partner network of educational facilities	<b>Innovative electoral learning activity implemented in more than 100 schools</b>

## PROJECT RISKS AND ISSUES

Description	Date Identified	Type	Impact & Probability 1 (low) 5 (high)	Countermeasures / Mngt response	Owner	Submitted updated by	Last Update	Status
<b>Rapid changes in the environmental context and in the national priorities due to COVID-19 pandemic.</b>	July 2020	Social and Environmental	I = 5 P = 5 Changes of priorities at the national level may divert in delays in the proper Project implementation.	Virtual and remote methods and safeguarding procedures for monitoring, stakeholder engagement, on-line capacity building events, etc. will be used. Weekly risk monitoring and assessment of changing context will be performed by the Project Team, as well as a By-weekly updates to the donors in case the COVID continues.	Government National Partners UNDP	UNDP	July 2020	VALID
<b>Potential diversion or delays of funding sources due to COVID-19 response.</b>	July 2020	Financial	I = 4 P = 5 Might significantly affect the implementation of the Project.	UNDP will allocate own resources to fill the critical finance gaps (such as for the staff retention) and will continue resource mobilization efforts.	Development Partners UNDP	UNDP	July 2020	VALID
<b>Postponement or cancellation of the 2020 planned Presidential Elections.</b>	July 2020	Political	I = 1 P = 2 Elections might be postponed in case the COVID-19 pandemic continues.	The Project Workplan will be adjusted to postpone activities planned as support to the CEC in conducting the elections - IT support and voter information to the new date of elections	Parliament National Partners	UNDP	July 2020	VALID
<b>Government impasse and/or deterioration of the political situation leading to unplanned electoral events.</b>	July 2020	Political	I = 3 P = 4 May divert attention from strategic development goals of CEC. Might lead to delays in the Project implementation.	The Project Workplan will be adjusted and discussed by the Project Board to provide effective assistance to CEC/CCET in the organisation of the snap elections (IT support, voter information).	Government Parliament	UNDP	July 2020	VALID
<b>Change of the Electoral System</b>	July 2020	Political	P = 1 I = 4	The Project Board will be informed and advised on options for the adjustments in the Project Workplan.	Parliament	UNDP	July 2020	VALID
<b>Lack of political will to continue the electoral law reform.</b>	July 2020	Political	I = 3 P = 3 If the electoral law reform is not continued, the credibility of the elections results might weaken, while new electoral processes will not be possible.	The Project will engage in high level advocacy, also calling on international resources like ODIHR and International IDEA, as well as international development partners within Moldova.	Government	UNDP	July 2020	VALID

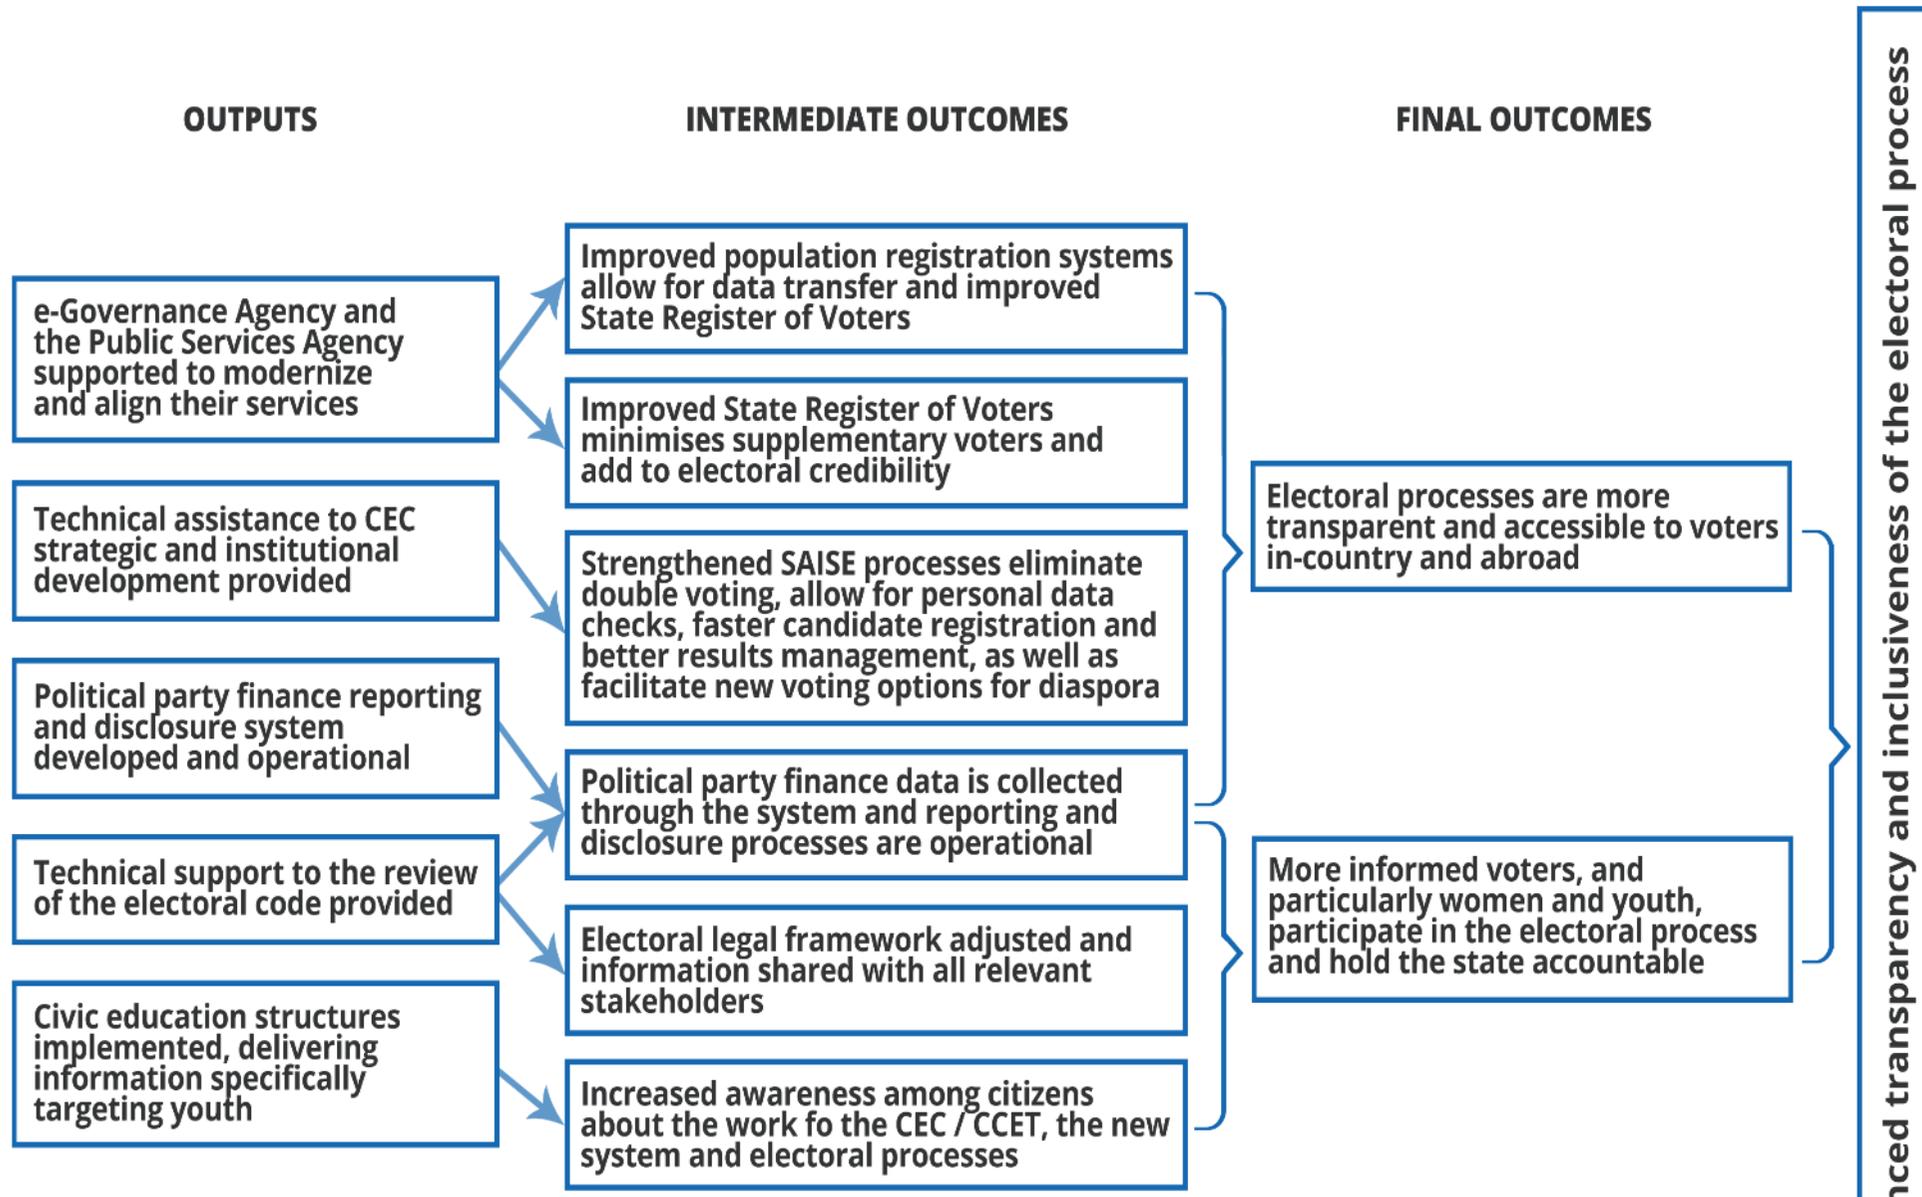

<b>Unwillingness of the Development Partners to support the Government due to inconsistencies and/or deterioration of the political situation.</b>	July 2020	Financial Operational	I = 5 P = 2 Might lead to stopping the Project, putting it on hold or decrease of the budget.	The Project's open phases will be finalized, previous commitments fulfilled. The Project Board will decide on the actions to be taken.	Development Partners	UNDP	July 2020	VALID
<b>Changing of the CEC's priorities might not be in line with the Project's objectives and plan.</b>	July 2020	Political	P = 3 I = 3 Might slowdown the Project implementation or require re-design or cancellation of some activities.	The Project will need to engage a short-term international elections expert to advise the CEC's leadership on the appropriate course of action and will engage the partners into the policy dialogue with the CEC if a critical need appears.	CEC	UNDP Partners	July 2020	VALID
<b>Worsening of the CEC reputation due to politically biased decisions, lack of understanding of the CEC's role and mandate, or misinformation of the public.</b>	July 2020	Political	P = 4 I = 5 Might affect the reputation of the Development Partners and UNDP.	The Project will have the full-time Public Outreach and Communication expert capacity to advise the CEC on effective communication with citizens, mass-media, political parties and other stakeholders.	CEC	UNDP	July 2020	VALID
<b>High staff turnover in the national partners institutions</b>	July 2020	Organizational	P = 2 I = 2 Might slow down the Project implementation and would require additional capacity building activities with the new staff.	The Project will provide non-material incentives for staff to stay (training and other capacity development activities) and will ensure the availability of guidance and SOPs and other project deliverables to all staff, as well as will build group capacities on specific issues.	UNDP National Partners	UNDP	July 2020	VALID
<b>Lack of absorption capacity</b>	July 2020	Organizational	P = 2 I = 2 Might slowdown the Project implementation.	The Project will prioritize the activities in consultation with the Project partners and will agree upon an accelerated implementation plan.	UNDP National Partners	UNDP	July 2020	VALID
<b>Uncertainties or constraints around planned M&amp;E activities due to restricted movement and safety measures (COVID-19)</b>	July 2020	Organizational Monitoring	P = 3 I = 3	The Project will adjust the M&E Plan to the existing environmental and social context and will apply remote methods and safeguarding procedures.	Project Executive	UNDP	July 2020	VALID
<b>Inadequate Management of the Project</b>	July 2020	Operational Internal Control	P = 1 I = 1	UNDP holds adequate management and organizational capacity to effectively and efficiently achieve the set targets and objectives.	Project executive	UNDP	July 2020	VALID
<b>Inadequate Monitoring and Reporting on results</b>	July 2020	Operational Internal Control	P = 1 I = 1	The Project includes financing of Project Manager and costs for quality assurance from the UNDP Country Office staff.	Project executive	UNDP	July 2020	VALID

<b>Inadequate Procurement Processes</b>	July 2020	Operational Internal Control	P = 1 I = 1	UNDP has international standards capacity and skills, well established business processes for procurement. Procurements will be done by UN rules in a transparent manner.			July 2020	
<b>Delays in procurement procedures due to lack of qualified or affordable offers - limited markets</b>	July 2020	Operational Internal Control	P = 3 I = 4 Might slowdown the Project implementation.	The Project will adjust the procurement requirements and will access the international markets, if needed.	Project executive	UNDP	July 2020	VALID
<b>Risk of corruption</b>	July 2020	Operational Internal Control	P = 1 I = 1	UNDP has international standards rules and procedures to ensure maximum impartiality, transparency and accountability, as well as report on and curb any form of possible corruption.	Project executive	Project executive	July 2020	VALID
<b>Inadequate audit processes and financial control</b>	July 2020	Operational Internal Control	P = 1 I = 1	UNDP has adequate local and corporate auditing and financial control capacities. Internal (corporate) audit from 2018, showed "internal controls, governance and risk management processes are adequately established and functioning well".	Project executive	Project executive	July 2020	VALID

## PROJECT EXPENSES PER DONORS AND YEARS (2017 – 2020)

Guide "Democracy Matters – Participate!"  
RO, RU, Gagauz, Braille, Audio versions

**Elections Guide**  
 – easy to read  
 and easy to understand  
 version  
 RO, RU, ENG  
 languages

**Democracy can be learned, first edition in RO, RU and Braille languages**

**Democracy can be learned, second edition in RO, RU**

**Post Cards on Gender Equality in Electoral Processes RO, RU**

**CEC PROMOVEAZĂ EGALITATEA DE GEN ÎN PROCESELE ELECTORALE**

Comisia Electorală Centrală încurajează respectarea principiului **egalității între femei și bărbați în domeniul electoral** pentru o reprezentare echilibrată în pozițiile decizionale.

**CEC AMINTEȘTE**

Partidele politice sunt **OBLIGATE** să asigure egalitatea de drepturi și de șanse între membrii săi, femeii și bărbații prin respectarea cotei minime de reprezentare de 40% pentru ambele sexe la:

- reprezentarea în **organele de conducere** ale partidelor;
- întocmirea/modificarea **listelor de candidați** pentru alegerile parlamentare și locale.

**CEC ATENȚIONEAZĂ**

Nerespectarea acestor condiții duce la **refuzul înregistrării listelor de candidați** de instituția electorală.

**ЦИК ПОощряет РАВЕНСТВО ПОЛОВ в ИЗБИРАТЕЛЬНЫХ ПРОЦЕССАХ**

Центральная Избирательная Комиссия поощряет соблюдение принципа равенства между женщинами и мужчинами в **избирательной сфере** с целью их равного представительства на руководящих должностях.

**ЦИК напоминает**

Политические партии **ОБЯЗАНЫ** обеспечить равные права и возможности для своих членов, женщин и мужчин, соблюдая **минимальное представительство на уровне 40 процентов для обоих полов** при:

- представлении в **руководящих органах** партии;
- составлении/внесении изменений в **списки кандидатов** на парламентские и местные выборы.

**ЦИК предупреждает**

Несоблюдение этих условий ведет к **отказу в регистрации списков кандидатов** избирательным ведомством.

**A2 Posters about the mixed electoral system in RO, RU, Gagauz, Romani languages**

**Post Cards for first time voters**
