Obtainable Score for TP) x 100</p> <p><u>Rating the Financial Proposal (FP):</u></p> <p style="text-align: center;">FP Rating = (Lowest Priced Offer / Price of the Offer Being Reviewed) x 100</p> <p><u>Total Combined Score:</u></p> <p>Combined Score = (TP Rating) x (Weight of TP, e.g. 70%) + (FP Rating) x (Weight of FP, e.g., 30%)</p> </div>
<p>31. Due Diligence</p>	<p>31.1 UNDP reserves the right to undertake a due diligence exercise, also called post qualification, aimed at determining to its satisfaction, the validity of the information provided by the Bidder. <p>32. Clarification of Proposals</p>	<p>32.1 To assist in the examination, evaluation and comparison of Proposals, UNDP may, at its discretion, ask any Bidder for a clarification of its Proposal.</p> <p>32.2 UNDP's request for clarification and the response shall be in writing and no change in the prices or substance of the Proposal shall be sought, offered, or permitted,</p>

	<p>except to provide clarification, and confirm the correction of any arithmetic errors discovered by UNDP in the evaluation of the Proposals, in accordance with RFP.</p> <p>32.3 Any unsolicited clarification submitted by a Bidder in respect to its Proposal, which is not a response to a request by UNDP, shall not be considered during the review and evaluation of the Proposals.</p>
33. Responsiveness of Proposal	<p>33.1 UNDP's determination of a Proposal's responsiveness will be based on the contents of the Proposal itself. A substantially responsive Proposal is one that conforms to all the terms, conditions, TOR and other requirements of the RFP without material deviation, reservation, or omission.</p> <p>33.2 If a Proposal is not substantially responsive, it shall be rejected by UNDP and may not subsequently be made responsive by the Bidder by correction of the material deviation, reservation, or omission.</p>
34. Nonconformities, Repairable Errors and Omissions	<p>34.1 Provided that a Proposal is substantially responsive, UNDP may waive any non-conformities or omissions in the Proposal that, in the opinion of UNDP, do not constitute a material deviation.</p> <p>34.2 UNDP may request the Bidder to submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities or omissions in the Proposal related to documentation requirements. Such omission shall not be related to any aspect of the price of the Proposal. Failure of the Bidder to comply with the request may result in the rejection of its Proposal.</p> <p>34.3 For Financial Proposal that has been opened, UNDP shall check and correct arithmetical errors as follows:</p> <ul style="list-style-type: none"> a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of UNDP there is an obvious misplacement of the decimal point in the unit price; in which case the line item total as quoted shall govern and the unit price shall be corrected; b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail. <p>34.4 If the Bidder does not accept the correction of errors made by UNDP, its Proposal shall be rejected.</p>

Payment will be effected by bank transfer in the currency of contract.
45. Vendor Protest	45.1 UNDP's vendor protest procedure provides an opportunity for appeal to those persons or firms not awarded a contract through a competitive procurement process. In the event that a Bidder believes that it was not treated fairly, the following link provides further details regarding UNDP vendor protest procedures: http://www.undp.org/content/undp/en/home/operations/procurement/business/protest-and-sanctions.html

Consultancy Services for Establishment of a Biodiversity fund to support the sustainable financing of Papua New Guinea's Protected Area Network

Location:	Port Moresby, Papua New Guinea
Type of contract:	Request for Proposals
Project:	Sustainable Financing for PNG's Protected Area Network
Languages Required:	English
Starting Date:	1 st June, 2020
Duration of Initial Contract:	Approximately 580 working days (as a total for all consultants) for the period of 12 months from the date of contract signing

1. Project Background

Papua New Guinea is endowed with exceptional natural wealth. It contains more than 293 species of mammals (of which 80% are endemic), 813 bird species (more than 50% endemism) and 346 species of reptiles and 371 species of amphibians. The country comprises of the third largest tropical forest in the world, covering 280,000km², over 2.4million km² of ocean including over 7,000km² of coral reefs and 4,200km² of diverse mangrove forest. The coral reefs are of global significance. They lie at the epicenter of the Coral Triangle. These reefs are home to over 1500 species of coral reef fish and at least 514 species of coral. Nevertheless, the IUCN Red List for PNG includes 33 critically endangered species, 56 endangered, 373 vulnerable and 289 near threatened.

The terrestrial environment underpins the country's productive sectors and supports the livelihoods of 80% of PNG's population who live in rural areas. The coastal and marine environment provides food security, important sources of protein, protection from coastal erosion, and livelihoods in tourism and fisheries. Furthermore, the forests as well as islands and reefs provide significant spiritual and cultural importance to the people of Papua New Guineans.

However, the country's natural environment is under threat. Over 50% (or 140,000km²) of PNG's forests lie within the 298 logging concessions. In coastal areas, population growth, with more than 50% under the age of 24, places increased strain on marine resources. Impacts of development activities (in coastal and upstream areas) including increased runoff and habitat fragmentation and degradation; pollution, especially related to runoff from inland mining activities and poor land management practices, and debris and sewage; and impacts of climate change on coastal erosion all pose immediate and dramatic threats to local communities and the natural environment.

Strengthening biodiversity conservation efforts will improve the country's resilience to the impacts of climate change as well as the emerging threats. It will enhance the long-term growth of existing productive sectors, support the growth of new economic opportunity based on sustainable national resource stewardship, transforming the growth path of the country. There is a need for the natural capital wealth to be placed at the center of the country's economic policy in order to achieve the objectives in the PNG Protected Area Policy; the Medium-term Development Plan; Vision 2050; the Sustainable Resource Strategy; the Climate Change Act; and the Conservation and Environment Protection Authority Act.

Protected areas across the country neither have sufficient nor reliable funding. With a few notable exceptions, there is no revenue being generated by protected areas for on-the-ground conservation management. These exceptions include the Kokoda Historical Reserve and the Yus Conservation Area, but both are highly dependent on donor funding. A national assessment of the management effectiveness of the protected areas across the country noted that 83% of protected areas stated that their current budget was an issue and 91% stated that there was no budget security. This is corroborated with the data collected by UNDP which noted that 40 of a total of 59 protected areas are known not to receive any budget.

A similar lack of investment exists for climate change initiatives. A recent estimate for implementing the National REDD+ Strategy calculated that nearly US\$ 100m per annum is required to deliver the strategy over the next 10 years.

The project, **Sustainable Financing of Papua New Guinea's Protected Area Network**, will extend the Government of PNG's ability to fulfil its protected area mandate and implement the Protected Area Policy to: (i) secure stable and long-term financial resources for the management of protected areas across the country; (ii) ensure that these financial resources are allocated to contribute to improving effectiveness of the management of the protected areas across the country; and (iii) ensure that they are managed cost-effectively and efficiently with respect to their conservation and other complementary development objectives. In recognition of this need, the project will assist with the development of a diversified mix of conventional and innovative funding sources and consolidate revenues to finance the ongoing costs of establishing and managing protected areas, and assist the Government to establish a Biodiversity Fund – that will be built on a secure, accountable and transparent financial mechanism, for receiving, administering and disbursing funds. The project will, therefore, result in a system that will provide catalytic and long-term financial support that will lead to stable ecosystems (both within and outside of protected areas), coupled with the social transformations to make that happen (including transforming institutions to become supporters/facilitators of that process, and the establishment of long-term partnerships).

There is a strong demand for a national-level financing mechanism that is able to attract, disburse and report against financial support to critical locations that protect the unique biodiversity and the natural wealth of the country. PNG's approach to conservation is based on the premise of 'doing conservation differently' and placing people at the heart of conservation, incentivising business models that have a net benefit to the environment, are transformative and demonstrate that conservation and economic development are not conflicting but complementary. The establishment of a national Fund is an ideal vehicle to attract and manage a diversified portfolio of finance streams to provide financial support to PAs in perpetuity as well as seed-finance for conservation-based business models. The project has committed to provide financial and technical support to the establishment and operationalisation of the Fund over the next six years.

2. Objective

The project requires the service of a reputable company to support the establishment of the national Biodiversity Fund to provide a sustainable flow of capital towards PNG's protected area system. The overall objectives of the consultancy are to:

- Clarify the mission, strategy, mandate and operational scope of the Fund;
- Align key stakeholder and decision-makers, establish communication and decision-making modalities, and create a framework for building commitment and support;
- Develop options for the governance, mandate and operational model of the Fund based on international best practice and in consultation with national level stakeholders in PNG and finalize the model.
- Develop the legal and operational documentation required to establish, launch and manage the Fund; and,
- Devise a strategic plan, and business plan, including proposed financing mechanisms and a fund-raising strategy, an investment strategy, as well as support initial implementation efforts to mobilise resources and build support among key constituencies.

In order to achieve the objectives of the consultancy, the following points should be taken into consideration:

- It is expected that this consultancy will provide remote support to the project, meaning that it is not necessary to travel to Papua New Guinea. If the international travel restrictions change in the future, the workplan may be revisited and negotiated with the successful bidder.
- The support required from the project include: (i) leading discussions with national stakeholders, (ii) developing knowledge resources and outputs to guide the process to establish the Fund, following global best practice such as the Practice Standards for Conservation Funds; and (iii) providing on-going advice to the project team on the operationalization and fund raising process.
- It is expected that at the end of the consultancy all the documentation will be in place to allow for the formal approval and establishment of the Fund.
- Finally, the successful bidder is expected to propose the methods of consultation and review, considering the challenges of international travel at the present time.

3. Scope of consultancy

The main tasks of the assignment consist of the following:

1. Participate in an inception meeting with UNDP and Conservation and Environment Protection Authority (CEPA) to clarify the objectives of the consultancy, methodological approach, tasks, deadlines and logistical schedule. The results of the meeting should be captured in an inception report, which should be formally approved by UNDP and CEPA before proceeding.
2. Conduct a synopsis review of international best practice of environmental funds in order to develop a series of proposals on the governance, operational, administrative, reporting, asset management and resource mobilisation, in the context of PNG's goals and objectives. The review is expected to establish the business case for a Biodiversity/Environment Fund for PNG.
3. Identify 2-3 relevant conservation funds in the region and facilitate actual (or virtual if current travel restrictions remain) fact-finding missions for key PNG stakeholders to learn from other Funds.
4. Develop a concept note for a national advisory committee to advise on the establishment of a national Biodiversity/Environment Fund for PNG. The UNDP PNG team will then support the process and logistics to establish this committee. It is expected that the consultants prepare the relevant documentation/presentations in advance for decisions during meetings. This technical committee

- will provide advice on the establishment of the Fund, review technical documents developed and ensure communication between institutions during these initiation stages.
5. Conduct a review of the legal options available for establishing a Fund under the current legislative framework in the country, as well as under alternative structures (i.e. registration in countries with conducive legislation for biodiversity funds), in order to determine its most appropriate and effective legal structure. This task may require the support of a local or regional legal firm with experience of Trust Fund law in PNG.
 6. Clarify the mandate of the Fund with other Government authorities in the environmental sector to determine the value of a Biodiversity versus a broader Environment and Conservation Fund.
 7. Review and recommend revisions to the national Biodiversity Trust Fund bill, which was drafted in 2018;
 8. Based on feedback from the above tasks, develop the governing document (e.g. Charter, Bill/Act, Deed or other foundational document) for the Fund, for review and approval by relevant authorities. The type of primary governance document type will depend on the legal requirements determined as part of the assessment.
 9. Develop other related documents to support operations of the Fund, including its by-laws, operational manual (structure – including board, grants and finance committee terms of reference and their decision-making/authorities, finance and administration manuals, information technology, human resources, communications), grant-making guidelines, environmental and social safeguards, risk management policy, conflict of interest policy, gift acceptance policy and investment policy.
 10. Develop a Strategic Plan for the Fund over the next decade, including its accompanying financial structure, capitalization, and resource mobilization strategy (inc. investment options). This should include a cost structure for the Secretariat to ensure sufficient budget to fulfill its functions.
 11. Develop a business plan to demonstrate the Fund’s purpose and viability, set priorities and financial plans for a three to five-year period, and be used as a communication tool to build donor and stakeholder support.
 12. Develop an organisational structure for the Secretariat of the Fund that reflects the strategy and capitalization ambitions.
 13. Support the process to formally register the Fund and consultation to ensure its tax-exempt status.
 14. Develop a series of communication materials including:
 - a. A briefing note on the objectives, structure and operationalization of the Fund to be presented to the National Executive Council;
 - b. Powerpoint presentation and Fund prospectus for potential donor organisations;
 - c. Infographics on the objectives and strategy of the Fund;
 - d. Five newspaper or online articles documenting the results/progress of the Fund;
 - e. Provide an agreed name of the Fund which best suits the Fund and in PNG or global context; and,
 - f. A logo, website and brand guidelines for the Fund.
 15. Develop five feasibility assessments and implementation plans for the most prioritised finance solutions.
 16. Facilitate individual meetings with at least 10 different organisations that could financially support the achievement of the resource mobilisation strategy. Further transaction support would be subject to additional contracts.
