- 10.2 UNDP shall endeavor to provide such responses to clarifications in an expeditious manner, but any delay in such response shall not cause an obligation on the part of UNDP to extend the submission date of the Proposals, unless UNDP deems that such an extension is justified and necessary.

11. Amendment of Proposals

- 11.1 At any time prior to the deadline of Proposal submission, UNDP may for any reason, such as in response to a clarification requested by a Proposer, modify the RFP in the form of a Supplemental Information to the RFP. All prospective Proposers will be notified in writing of all changes/amendments and additional instructions through Supplemental Information to the RFP and through the method specified in the **Data Sheet** (DS No. 18).
- 11.2 In order to afford prospective Proposers reasonable time to consider the amendments in preparing their Proposals, UNDP may, at its discretion, extend the deadline for submission of Proposals, if the nature of the amendment to the RFP justifies such an extension.

C. PREPARATION OF PROPOSALS

12. Cost

The Proposer shall bear any and all costs related to the preparation and/or submission of the Proposal, regardless of whether its Proposal was selected or not. UNDP shall in no case be responsible or liable for those costs, regardless of the conduct or outcome of the procurement process.

13. Language

The Proposal, as well as any and all related correspondence exchanged by the Proposer and UNDP, shall be written in the language (s) specified in the **Data Sheet** (DS No 4). Any printed literature furnished by the Proposer written in a language other than the language indicated in the **Data Sheet**, must be accompanied by a translation in the preferred language indicated in the **Data Sheet**. For purposes of interpretation of the Proposal, and in the event of discrepancy or inconsistency in meaning, the version translated into the preferred language shall govern. Upon conclusion of a contract, the language of the contract shall govern the relationship between the contractor and UNDP.

14. Proposal Submission Form

The Proposer shall submit the Proposal Submission Form using the form provided in Section 4 of this RFP.

15. Technical Proposal Format and Content

Unless otherwise stated in the **Data Sheet** (DS no. 28), the Proposer shall structure the Technical Proposal as follows:

- 15.1 Expertise of Firm/Organization – this section should provide details regarding management structure of the organization, organizational capability/resources, and experience of organization/firm, the list of projects/contracts (both completed and on-going, both domestic and international) which are related or similar in nature to the requirements of the RFP, and proof of financial stability and adequacy of resources to complete the services required by the RFP (see RFP clause 18 and DS No. 26 for further details). The same shall apply to any other entity participating in the RFP as a Joint Venture or Consortium.
- 15.2 Proposed Methodology, Approach and Implementation Plan – this section should demonstrate the Proposer’s response to the Terms of Reference by identifying the specific components proposed, how the requirements shall be addressed, as specified, point by point; providing a detailed description of the essential performance characteristics proposed; identifying the works/portions of the work that will be subcontracted; and demonstrating how the proposed methodology meets or exceeds the specifications, while ensuring appropriateness of the approach to the local conditions and the rest of the project operating environment. This methodology must be laid out in an implementation timetable that is within the duration of the contract as specified in the **Data Sheet** (DS nos. 29 and 30).

Proposers must be fully aware that the products or services that UNDP requires may be transferred, immediately or eventually, by UNDP to the Government partners, or to an entity nominated by the latter, in accordance with UNDP’s policies and procedures. All proposers are therefore required to submit the following in their proposals :

- a) A statement of whether any import or export licences are required in respect of the goods to be purchased or services to be rendered, including any restrictions in the country of origin, use or dual use nature of the goods or services, including any disposition to end users; and
 - b) Confirmation that the Proposer has obtained license of this nature in the past, and have an expectation of obtaining all the necessary licenses, should their Proposal be rendered the most responsive.
- 15.3 Management Structure and Key Personnel – This section should include the comprehensive curriculum vitae (CVs) of key personnel that will be assigned to support the implementation of the proposed methodology, clearly defining the roles and responsibilities vis-à-vis the proposed methodology. CVs should establish competence and demonstrate qualifications in areas relevant to the TOR.

In complying with this section, the Proposer assures and confirms to UNDP that the personnel being nominated are available for the Contract on the dates proposed. If any of the key personnel later becomes unavailable, except for unavoidable reasons such as death or medical incapacity, among other possibilities, UNDP reserves the right to consider the proposal non-responsive. Any deliberate substitution arising from unavoidable reasons, including delay in the implementation of the project of programme through no fault of the Proposer shall be made only with UNDP's acceptance of the justification for substitution, and UNDP's approval of the qualification of the replacement who shall be either of equal or superior credentials as the one being replaced.

15.4 Where the **Data Sheet** requires the submission of the Proposal Security, the Proposal Security shall be included along with the Technical Proposal. The Proposal Security may be forfeited by UNDP, and reject the Proposal, in the event of any or any combination of the following conditions:

- a) If the Proposer withdraws its offer during the period of the Proposal Validity specified in the **Data Sheet** (DS no. 11), or;
- b) If the Proposal Security amount is found to be less than what is required by UNDP as indicated in the **Data Sheet** (DS no. 9), or;
- c) In the case the successful Proposer fails:
 - i. to sign the Contract after UNDP has awarded it;
 - ii. to comply with UNDP's variation of requirement, as per RFP clause 35; or
 - iii. to furnish Performance Security, insurances, or other documents that UNDP may require as a condition to rendering the effectivity of the contract that may be awarded to the Proposer.

16. Financial Proposals

The Financial Proposal shall be prepared using the attached standard form (Section 7). It shall list all major cost components associated with the services, and the detailed breakdown of such costs. All outputs and activities described in the Technical Proposal must be priced separately on a one-to-one correspondence. Any output and activities described in the Technical Proposal but not priced in the Financial Proposal, shall be assumed to be included in the prices of other activities or items, as well as in the final total price.

17. Currencies

All prices shall be quoted in the currency indicated in the **Data Sheet** (DS no. 15). However, where Proposals are quoted in different currencies, for the purposes of comparison of all Proposals:

- a) UNDP will convert the currency quoted in the Proposal into the UNDP preferred currency, in accordance with the prevailing UN operational rate of exchange on the last day of submission of Proposals; and
- b) In the event that the proposal found to be the most responsive to the RFP requirement is quoted in another currency different from the preferred currency as per **Data Sheet** (DS no. 15), then UNDP shall reserve the right to award the contract in the currency of UNDP's

preference, using the conversion method specified above.

Proposals submitted by two (2) or more Proposers shall all be rejected if they are found to have any of the following :

- a) they have at least one controlling partner, director or shareholder in common; or
- b) any one of them receive or have received any direct or indirect subsidy from the other/s; or
- c) they have the same legal representative for purposes of this RFP; or
- d) they have a relationship with each other, directly or through common third parties, that puts them in a position to have access to information about, or influence on the Proposal of, another Proposer regarding this RFP process;
- e) they are subcontractors to each other's Proposal, or a subcontractor to one Proposal also submits another Proposal under its name as lead Proposer; or
- f) an expert proposed to be in the team of one Proposer participates in more than one Proposal received for this RFP process. This condition does not apply to subcontractors being included in more than one Proposal.

18. Documents Establishing the Eligibility and Qualifications of the Proposer

The Proposer shall furnish documentary evidence of its status as an eligible and qualified vendor, using the forms provided under Section 5, Proposer Information Forms. In order to award a contract to a Proposer, its qualifications must be documented to UNDP's satisfaction. These include, but are not limited to, the following:

- a) That, in the case of a Proposer offering to supply goods under the Contract which the Proposer did not manufacture or otherwise produce, the Proposer has been duly authorized by the goods' manufacturer or producer to supply the goods in the country of final destination;
- b) That the Proposer has the financial, technical, and production capability necessary to perform the Contract; and
- c) That, to the best of the Proposer's knowledge, it is not included in the UN 1267/1989 List or the UN Ineligibility List, nor in any and all of UNDP's list of suspended and removed vendors.

19. Joint Venture, Consortium or Association

If the Proposer is a group of legal entities that will form or have formed a joint venture, consortium or association at the time of the submission of the Proposal, they shall confirm in their Proposal that : (i) they have designated one party to act as a lead entity, duly vested with authority to legally bind the members of the joint venture jointly and severally, and this shall be duly evidenced by a duly notarized Agreement among the legal entities, which shall be submitted along with the Proposal; and (ii) if they are awarded the contract, the contract shall be entered into, by and between UNDP and the designated lead entity, who shall be acting for and on behalf of all the member entities comprising the joint venture.

After the Proposal has been submitted to UNDP, the lead entity identified to represent the joint venture shall not be altered without the prior written consent of UNDP. Furthermore, neither the lead entity nor the member entities of the joint venture can:

- a) Submit another proposal, either in its own capacity; nor

- b) As a lead entity or a member entity for another joint venture submitting another Proposal.

The description of the organization of the joint venture/consortium/association must clearly define the expected role of each of the entity in the joint venture in delivering the requirements of the RFP, both in the Proposal and the Joint Venture Agreement. All entities that comprise the joint venture shall be subject to the eligibility and qualification assessment by UNDP.

Where a joint venture is presenting its track record and experience in a similar undertaking as those required in the RFP, it should present such information in the following manner:

- a) Those that were undertaken together by the joint venture; and
- b) Those that were undertaken by the individual entities of the joint venture expected to be involved in the performance of the services defined in the RFP.

Previous contracts completed by individual experts working privately but who are permanently or were temporarily associated with any of the member firms cannot be claimed as the experience of the joint venture or those of its members, but should only be claimed by the individual experts themselves in their presentation of their individual credentials.

If a joint venture's Proposal is determined by UNDP as the most responsive Proposal that offers the best value for money, UNDP shall award the contract to the joint venture, in the name of its designated lead entity. The lead entity shall sign the contract for and on behalf of all other member entities.

20. Alternative Proposals

Unless otherwise specified in the **Data Sheet** (DS nos. 5 and 6), alternative proposals shall not be considered. Where the conditions for its acceptance are met, or justifications are clearly established, UNDP reserves the right to award a contract based on an alternative proposal.

21. Validity Period

Proposals shall remain valid for the period specified in the **Data Sheet** (DS no. 8), commencing on the submission deadline date also indicated in the **Data Sheet** (DS no. 21). A Proposal valid for a shorter period shall be immediately rejected by UNDP and rendered non-responsive.

In exceptional circumstances, prior to the expiration of the proposal validity period, UNDP may request Proposers to extend the period of validity of their Proposals. The request and the responses shall be made in writing, and shall be considered integral to the Proposal.

22. Proposer's Conference

When appropriate, a proposer's conference will be conducted at the date, time and location specified in the **Data Sheet** (DS no. 7). All Proposers are encouraged to attend. Non-attendance, however, shall not result in disqualification of an interested Proposer. Minutes of the proposer's conference will be either posted on the UNDP website, or disseminated to the individual firms who have registered or expressed interest with the contract, whether or not they attended the conference. No verbal statement made during the conference shall modify the terms and

conditions of the RFP unless such statement is specifically written in the Minutes of the Conference, or issued/posted as an amendment in the form of a Supplemental Information to the RFP.

D. SUBMISSION AND OPENING OF PROPOSALS

23. Submission

- 23.1 The Financial Proposal and the Technical Proposal Envelopes MUST BE COMPLETELY SEPARATE and each of them must be submitted sealed individually and clearly marked on the outside as either “TECHNICAL PROPOSAL” or “FINANCIAL PROPOSAL”, as appropriate. Each envelope MUST clearly indicate the name of the Proposer. - 23.2 Proposers must submit their Proposals in the manner specified in the **Data Sheet** (DS nos. 22 and 23). When the Proposals are expected to be in transit for more than 24 hours, the Proposer must ensure that sufficient lead time has been provided in order to comply with UNDP’s deadline for submission. UNDP shall indicate for its record that the official date and time of receiving the Proposal is the actual date and time when the said Proposal has physically arrived at the UNDP premises indicated in the **Data Sheet** (DS no. 20).
- 23.3 Proposers submitting Proposals by mail or by hand shall enclose the original and each copy of the Proposal, in separate sealed envelopes, duly marking each of the envelopes as “Original Proposal” and “Copy of Proposal” as appropriate. The 2 envelopes shall then be sealed in an outer envelope. The number of copies required shall be as specified in the **Data Sheet** (DS No. 19). In the event of any discrepancy between the contents of the “Original Proposal” and the “Copy of Proposal”, the contents of the original shall govern. The original version of the Proposal shall be signed or initialed by the Proposer or person(s) duly authorized to commit the Proposer on every page. The authorization shall be communicated through a document evidencing such authorization issued by the highest official of the firm, or a Power of Attorney, accompanying the Proposal.
- 23.4 Proposers must be aware that the mere act of submission of a Proposal, in and of itself, implies that the Proposer accepts the General Contract Terms and Conditions of UNDP as attached hereto as Section 11.

24. Deadline for Submission of Proposals and Late Proposals

Proposals must be received by UNDP at the address and no later than the date and time specified in the **Data Sheet** (DS nos. 20 and 21).

UNDP shall not consider any Proposal that arrives after the deadline for submission of Proposals.

Any Proposal received by UNDP after the deadline for submission of Proposals shall be declared late, rejected, and returned unopened to the Proposer.

25. Withdrawal, Substitution, and Modification of Proposals

- 25.1 Proposers are expected to have sole responsibility for taking steps to carefully examine in detail the full consistency of its Proposals to the requirements of the RFP, keeping in mind that material deficiencies in providing information requested by UNDP, or lack clarity in the description of services to be provided, may result in the rejection of the Proposal. The Proposer shall assume the responsibility regarding erroneous interpretations or conclusions made by the Proposer in the course of understanding the RFP out of the set of information furnished by UNDP.
- 25.2 A Proposer may withdraw, substitute or modify its Proposal after it has been submitted by sending a written notice in accordance with Clause 23.1, duly signed by an authorized representative, and shall include a copy of the authorization (or a Power of Attorney). The corresponding substitution or modification of the Proposal must accompany the respective written notice. All notices must be received by UNDP prior to the deadline for submission and submitted in accordance with RFP Clause 23.1 (except that withdrawal notices do not require copies). The respective envelopes shall be clearly marked "WITHDRAWAL," "SUBSTITUTION," or "MODIFICATION".
- 25.3 Proposals requested to be withdrawn shall be returned unopened to the Proposers.
- 25.4 No Proposal may be withdrawn, substituted, or modified in the interval between the deadline for submission of Proposals and the expiration of the period of proposal validity specified by the Proposer on the Proposal Submission Form or any extension thereof.

26. Proposal Opening

UNDP will open the Proposals in the presence of an ad-hoc committee formed by UNDP of at least two (2) members. If electronic submission is permitted, any specific electronic proposal opening procedures shall be as specified in the **Data Sheet** (DS no. 23).

The Proposers' names, modifications, withdrawals, the condition of the envelope labels/seals, the number of folders/files and all other such other details as UNDP may consider appropriate, will be announced at the opening. No Proposal shall be rejected at the opening stage, except for late submission, for which the Proposal shall be returned unopened to the Proposer.

27. Confidentiality

Information relating to the examination, evaluation, and comparison of Proposals, and the recommendation of contract award, shall not be disclosed to Proposers or any other persons not officially concerned with such process, even after publication of the contract award.

Any effort by a Proposer to influence UNDP in the examination, evaluation and comparison of the Proposals or contract award decisions may, at UNDP's decision, result in the rejection of its Proposal.

In the event that a Proposer is unsuccessful, the Proposer may seek a meeting with UNDP for a debriefing. The purpose of the debriefing is discussing the strengths and weaknesses of the Proposer's submission, in order to assist the Proposer in improving the proposals presented to UNDP. The content of other proposals and how they compare to the Proposer's submission shall not be discussed.

E. EVALUATION OF PROPOSALS

28. Preliminary Examination of Proposals

UNDP shall examine the Proposals to determine whether they are complete with respect to minimum documentary requirements, whether the documents have been properly signed, whether or not the Proposer is in the UN Security Council 1267/1989 Committee's list of terrorists and terrorist financiers, and in UNDP's list of suspended and removed vendors, and whether the Proposals are generally in order, among other indicators that may be used at this stage. UNDP may reject any Proposal at this stage.

29. Evaluation of Proposals

29.1 UNDP shall examine the Proposal to confirm that all terms and conditions under the UNDP General Terms and Conditions and Special Conditions have been accepted by the Proposer without any deviation or reservation.

29.2 The evaluation team shall review and evaluate the Technical Proposals on the basis of their responsiveness to the Terms of Reference and other documentation provided, applying the evaluation criteria, sub-criteria, and point system specified in the **Data Sheet** (DS no. 32). Each responsive Proposal will be given a technical score. A Proposal shall be rendered non-responsive at this stage if it does not substantially respond to the RFP particularly the demands of the Terms of Reference, which also means that it fails to achieve the minimum technical score indicated in the **Data Sheet** (DS no. 25). Absolutely no changes may be made by UNDP in the criteria, sub-criteria and point system indicated in the **Data Sheet** (DS no. 32) after all Proposals have been received.

29.3 In the second stage, only the Financial Proposals of those Proposers who achieve the minimum technical score will be opened for evaluation for comparison and review. The Financial Proposal Envelopes corresponding to Proposals that did not meet the minimum passing technical score shall be returned to the Proposer unopened. The overall evaluation score will be based either on a combination of the technical score and the financial offer, or the lowest evaluated financial proposal of the technically qualified Proposers. The evaluation method that applies for this RFP shall be as indicated in the **Data Sheet** (DS No. 25).

When the Data Sheet specifies a combined scoring method, the formula for the rating of the Proposals will be as follows:

--

Rating the Technical Proposal (TP):

$$\text{TP Rating} = (\text{Total Score Obtained by the Offer} / \text{Max. Obtainable Score for TP}) \times 100$$

Rating the Financial Proposal (FP):

$$\text{FP Rating} = (\text{Lowest Priced Offer} / \text{Price of the Offer Being Reviewed}) \times 100$$

Total Combined Score:

$$(\text{TP Rating}) \times (\text{Weight of TP, e.g. 70\%})$$

$$+ (\text{FP Rating}) \times (\text{Weight of FP, e.g., 30\%})$$

Total Combined and Final Rating of the Proposal

29.4 UNDP reserves the right to undertake a post-qualification exercise aimed at determining, to its satisfaction the validity of the information provided by the Proposer. Such post-qualification shall be fully documented and, among those that may be listed in the **Data Sheet** (DS No.33), may include, but need not be limited to, all or any combination of the following :

- a) Verification of accuracy, correctness and authenticity of information provided by the Proposer on the legal, technical and financial documents submitted;
- b) Validation of extent of compliance to the RFP requirements and evaluation criteria based on what has so far been found by the evaluation team;
- c) Inquiry and reference checking with Government entities with jurisdiction on the Proposer, or any other entity that may have done business with the Proposer;
- d) Inquiry and reference checking with other previous clients on the quality of performance on ongoing or previous contracts completed;
- e) Physical inspection of the Proposer's offices, branches or other places where business transpires, with or without notice to the Proposer;
- f) Quality assessment of ongoing and completed outputs, works and activities similar to the requirements of UNDP, where available; and
- g) Other means that UNDP may deem appropriate, at any stage within the selection process, prior to awarding the contract.

30. Clarification of Proposals

To assist in the examination, evaluation and comparison of Proposals, UNDP may, at its discretion, ask any Proposer for a clarification of its Proposal.

UNDP's request for clarification and the response shall be in writing. Notwithstanding the written communication, no change in the prices or substance of the Proposal shall be sought, offered, or permitted, except to provide clarification, and confirm the correction of any arithmetic errors discovered by UNDP in the evaluation of the Proposals, in accordance with RFP Clause 32.

Any unsolicited clarification submitted by a Proposer in respect to its Proposal, which is not a response to a request by UNDP, shall not be considered during the review and evaluation of the Proposals.

31. Responsiveness of Proposal

UNDP's determination of a Proposal's responsiveness will be based on the contents of the Proposal itself.

A substantially responsive Proposal is one that conforms to all the terms, conditions, TOR and other requirements of the RFP without material deviation, reservation, or omission.

If a Proposal is not substantially responsive, it shall be rejected by UNDP and may not subsequently be made responsive by the Proposer by correction of the material deviation, reservation, or omission.

32. Nonconformities, Repairable Errors and Omissions

Provided that a Proposal is substantially responsive, UNDP may waive any non-conformities or omissions in the Proposal that, in the opinion of UNDP, do not constitute a material deviation.

Provided that a Proposal is substantially responsive, UNDP may request the Proposer to submit the necessary information or documentation, within a reasonable period of time, to rectify nonmaterial nonconformities or omissions in the Proposal related to documentation requirements. Such omission shall not be related to any aspect of the price of the Proposal. Failure of the Proposer to comply with the request may result in the rejection of its Proposal.

Provided that the Proposal is substantially responsive, UNDP shall correct arithmetical errors as follows:

- a) if there is a discrepancy between the unit price and the line item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line item total shall be corrected, unless in the opinion of UNDP there is an obvious misplacement of the decimal point in the unit price, in which case the line item total as quoted shall govern and the unit price shall be corrected;
- b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail and the total shall be corrected; and
- c) if there is a discrepancy between words and figures, the amount in words shall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail subject to the above.

If the Proposer does not accept the correction of errors made by UNDP, its Proposal shall be rejected.

F. AWARD OF CONTRACT

33. Right to Accept, Reject, or Render Non-Responsive Any or All Proposals

UNDP reserves the right to accept or reject any Proposal, to render any or all of the Proposals as non-responsive, and to reject all Proposals at any time prior to award of contract, without incurring any liability, or obligation to inform the affected Proposer(s) of the grounds for UNDP's action. Furthermore, UNDP shall not be obliged to award the contract to the lowest price offer.

UNDP shall also verify, and immediately reject their respective Proposal, if the Proposers are found to appear in the UN's Consolidated List of Individuals and Entities with Association to Terrorist Organizations, in the List of Vendors Suspended or Removed from the UN Secretariat Procurement Division Vendor Roster, the UN Ineligibility List, and other such lists that as may be established or recognized by UNDP policy on Vendor Sanctions. (See <http://www.undp.org/content/undp/en/home/operations/procurement/protestandsanctions/> for details)

34. Award Criteria

Prior to expiration of the period of proposal validity, UNDP shall award the contract to the qualified Proposer with the highest total score based on the evaluation method indicated in the **Data Sheet** (DS nos. 25 and 32).

35. Right to Vary Requirements at the Time of Award

At the time of award of Contract, UNDP reserves the right to vary the quantity of services and/or goods, by up to a maximum twenty five per cent (25%) of the total offer, without any change in the unit price or other terms and conditions.

36. Contract Signature

Within fifteen (15) days from the date of receipt of the Contract, the successful Proposer shall sign and date the Contract and return it to UNDP.

Failure of the successful Proposer to comply with the requirement of RFP Clause 35 and this provision shall constitute sufficient grounds for the annulment of the award, and forfeiture of the Proposal Security if any, and on which event, UNDP may award the Contract to the Proposer with the second highest rated Proposal, or call for new Proposals.

37. Performance Security

A performance security, if required, shall be provided in the amount and form provided in Section 9 and by the deadline indicated in the **Data Sheet** (DS no. 14), as applicable. Where a Performance Security will be required, the submission of the said document, and the confirmation of its acceptance by UNDP, shall be a condition for the effectivity of the Contract that will be signed by and between the successful Proposer and UNDP.

38. Bank Guarantee for Advanced Payment

Except when the interests of UNDP so require, it is the UNDP's preference to make no advanced payment(s) on contracts (i.e., payments without having received any outputs). In the event that

the Proposer requires an advanced payment upon contract signature, and if such request is duly accepted by UNDP, and the said advanced payment exceeds 20% of the total proposal price, or exceed the amount of USD 30,000, UNDP shall require the Proposer to submit a Bank Guarantee in the same amount as the advanced payment. A bank guarantee for advanced payment shall be furnished in the form provided in Section 10.

39. Vendor Protest

UNDP's vendor protest procedure provides an opportunity for appeal to those persons or firms not awarded a purchase order or contract through a competitive procurement process. In the event that a Proposer believes that it was not treated fairly, the following link provides further details regarding UNDP vendor protest procedures:

II. Country Context

Rwanda has long been considered a pioneering country in the Global South in terms of public health, having achieved laudable progress in recent decades in health outcomes through effective policies as well as strong emphasis on local capacity building and technological innovations. The country is considered a leader in providing nearly universal access to health insurance with at least 90% of the population able to access healthcare services, primarily through the national Community-Based Health Insurance program (CBHI), at minimal cost. To support this position and strengthen health outcomes and impacts Rwanda has undertaken several studies and developed a significant number of national strategies at sector level that are relevant to ensuring universal health coverage and expansion of the national footprint of primary health care facilities. These are summarized in the following: National Health Policy, Health Sector Strategic Plan IV, Health Post Expansion Plan, Health Sector Financing Strategy. Further, there have been studies and policies relevant to electrification of health facilities. These are summarized in the following: National Energy Policy, Energy Sector Strategic Plan, National Electrification Master Plan. These documents set the broad parameters for sector development and codify the state's endorsement of expanding innovative health finance and in particular PPP models to reach Health Post (HP) coverage nation-wide to a target of one HP in every administrative cell of the country. They additionally affirm that all health facilities shall be considered productive end-users and social infrastructure, and thus prioritized for electrification access. GoR planning targets 100% access of health facilities to electricity with Health Posts considered as "category 5" social end-users in existing planning models used by sector actors. However, although health posts are prioritized for electrification, various challenges including high pressure on public resources, limited availability in the marketplace of suitable "off the shelf" equipment options, weak coordination and integrated sectoral planning, and lack of clear technology standards applicable to rural off-grid HPs has constrained a more rapid scale-up of off-grid solar electrification in Rwanda to date.

Rwanda recognizes the importance of tapping into private sector resources for the achievement of its development vision and the SDGs. To this effect, it has implemented business enabling environment reforms that have resulted in the country being ranked 2nd in Africa on the World Bank ease of doing business index, with energy being one of its key investment priority sectors. To achieve its development targets in the medium-term, Vision 2050 is implemented through

Rwanda's first National Strategy for Transformation (NST, 2018-24). NST-1 is fully aligned to the 2030 Agenda and the 17 Sustainable Development Goals (SDGs). The ambitious and transformational development goals of Rwanda require a substantial increase in investments from around 26% to between 35% and 40% of GDP. Through blended financing approaches, existing (yet limited) financing and scarce grant and philanthropic funds could be leveraged more effectively. By integrating investments in expanding health and energy access through a coordinated investment programme for national HP coverage, GoR targets could also be reached more quickly. The proposed investment project under design would thus directly contribute to the following SDG targets as set in the 2030 Agenda for Sustainable Development:

- Target 7.1: By 2030, ensure universal access to affordable, reliable and modern energy services
- Target 13.2: Integrate climate change measures into national policies, strategies, and planning

In 2019, the Ministry of Finance and Economic Planning (MINECOFIN) entered into an agreement with the United Nations Development Programme (UNDP) to implement a five-year programme focused on Innovative Development Policy and Finance for Impact. One of the agreed objectives of this cooperation is to enhance MINECOFIN's capacity to manage, monitor and coordinate development cooperation to achieve national development objectives, and to support MINECOFIN and GOR line ministries to effectively mobilize the investments needed and provide a structure that supports coherence across government in channelling resources to the pivotal areas to achieve the SDGs, such as social infrastructure and enhancing access to universal health coverage, especially in light of the emerging needs and development financing dynamics stemming from COVID-19. MINECOFIN and the Rwandan MoH has also been collaborating with UNDP and UNFPA on blended finance mechanisms to scale up the HP footprint, including the incubation of a social impact bond for One Family Health (OFH). Both agencies have PPPs and long-term agreements with social enterprises (SFH) and private health companies such as Laerdal Global Health and Abbott to further leverage co-investment from UN funding. A feasibility study carried out by Social Finance UK in 2018-19 also quantitatively modelled the viability of OFH's model for private HP franchises and demonstrated levels for viability and scalability with additional levels of growth capital.

The COVID-19 crisis presents both a challenge and an opportunity regarding these policy aims. On the one hand, public expenditures are expected to increase, yet projected reduced revenue from lower economic activity is expected to exert pressure on Government resources and fiscal space. On the other hand, the Government of Rwanda has developed an Economic Recovery Plan (ERP) to steer the country towards sustained economic recovery from the economic impacts of COVID-19. Among its priority measures include strengthening the health response capable of responding to COVID-19 and future health emergencies whilst providing continued essential services to most at risk population groups, strengthening the health system more generally to ensure greater resilience and sustainability, supporting businesses to protect jobs, and promoting more coordinated multi-sectoral responses to boost economic activity. These new policy priorities are very well aligned to the objectives and potential benefits of the proposed investment programme for which seed funding is obtained.

Preliminary evidence from Rwanda and other Sub-Saharan Africa countries has shown evidence that access to increased and reliable energy through solar electrification systems can make a strong contribution to improved health outcomes, especially impacts to reduce stunting and improve maternal and child health. Further, evidence indicates that energy solutions can be enable the electronic collection of health-related information and record keeping and e-billing and claiming processes can also make a material contribution to improving the financial viability of privately operated HPs. Given the extraordinary burden that COVID-19 is placing on health systems, the need to ensure continued care for reproductive, maternal, nutrition, and child health

and to provide other primary care services closer to the population to reduce existing disparities is more critical than ever.

There is additional evidence showing that that effective PPP and blended financing approaches that would be catalyzed by the project would create a self-sustaining business model and result in cost savings generated to the MoH and RSSB from avoided wages to public staff, and efficiencies gained from community-based point of service delivery and accelerated delivery of health insurance receivables. To date, out of an estimated 885 HPs, around 150 have been established by MoH partners. Yet the resource requirements to reach full coverage requires a level of investment in five years for which public budget resources are inadequate. An evaluation (USAID, 2015) in the health sector identified “inadequate resources for effective private sector engagement and PPP development”, and insufficient “risk pooling” and concessional credit mechanisms, as key opportunities for strategic inventions to ensure a full national footprint of HPs and increased delivery efficiencies.

Similarly, while the national health insurance system (including Mutuelle de Santé) has made significant strides towards universal coverage, and TA from UN partners is envisioned to be provided to further accelerate digitization of processes, long delays in the execution of claims reimbursement processes threaten the viability and bankability of existing PPP models. Payment cycles for invoices can stretch to four months on average. Further evidence from existing pilot programmes indicates inadequate or inconsistent cash flow in privately operated HPs to be one of the most material challenges to the financial viability and scale-up of HPs under such models.

Under a One-UN Joint Programme “**1000 Health Posts in the Land of a Thousand Hills**”, which is currently under development and in the active pipeline of the UN SDG Fund, it is expected that the UN will structure and co-finance using grant resources new and innovative financing mechanism(s) for primary health facilities to enable their financial sustainability and rapid upscaling. The mechanisms to be put in place would serve to de-risk existing investment barriers and help crowd in additional private investment, ensure the continuation of critical existing private lending support to the sector, and promote broader market uptake or replication of a product offer. UNDP/Rwanda has been actively engaged in partnership with the Government of Rwanda to support its strategies and plan to increase the footprint, capacity, and sustainability of Health Posts throughout the country. This initiative directly supports several important Sustainable Development Goal (SDG) priorities in the country including more equitable universal health coverage (SDG3), sustainable energy for all (SDG7), and promoting gender equalities and quality jobs particularly for women (SDG5). For each primary health care facility, more than 8,300 Rwandans are currently served, and the Government has a target through the Health Post Expansion plan to increase coverage to reduce that number to 5,000 by 2035 and to support increased access to services that is barrier to improved health outcomes.

Against this background, UNDP Rwanda, in association with MINECOFIN and MININFRA, is looking for a consultancy firm to undertake the following mutually reinforcing activities:

- 1) Design and refine the financing structure for a performance-based solar electrification scheme for health posts as part of a broader investment programme and full proposal to the Joint SDG Fund.
- 2) Develop a business plan and a workable financial scheme to fund start-up financing and working capital of rural Health Posts.
- 3) Ensure that the key findings are integrated into a full project proposal to be submitted to the UN SDG Fund Secretariat and an investment prospectus to attract additional funders

III. Functions / Key Results Expected

Summary of key functions: Component 1: Refine, Design the Financial Structuring of a Solar Energy Lending Facility

Under the proposed One-UN Joint Programme “1000 Health Posts in the Land of a Thousand Hills” it is expected that the UN SDG Fund will support the scale up of existing business models and technologies for the electrification of health facilities using solar photovoltaic systems if shown to be viable. This consultancy seeks an experienced firm to refine the structure and design of a financing facility that will attract donors/investors’ interest as part of the team working on the final project feasibility and investment proposal. The firm will bring two sets of competencies:

- (1) Proven understanding of planning tools and business models for the installation and management of solar photovoltaic energy systems, especially in off-grid rural contexts and for productive end-uses, and
- (2) Proven understanding of commercial and financial models and risks associated with the development of large-scale solar energy projects in Rwanda.

The main objectives of the consultancy under component 1 are:

1. To refine the structure of a facility to support the financing and technical assurance for off-grid solar electrification of health posts, whose pre-feasibility was outlined in the first phase of project development.
2. To produce a business plan that outlines clear and viable implementation and financing arrangements between UNDP, the GoR, partner financial institutions, and solar energy companies.

Summary of key deliverables:

1. GIS-based planning tool:

In order to finalize the business model, a clear baseline and more transparent planning for the future siting of HPs is required. Therefore, the first deliverable comprises the updating and refinement of an existing GIS-based electrification planning tool that was developed under the first phase of project development. The tool is designed to facilitate more integrated planning of HP expansion by all stakeholders, including the most appropriate and/or optimal siting of future posts requiring solar electrification. The GIS-tool may also be pivotal to streamlining future verification of performance-based financing of solar systems to be installed. The tool takes the form of easily updatable Excel-based spreadsheets and a GIS-based management information system in QGIS software, complemented by a manual for users.

Tasks involved include:

- (i) Survey, compile, and synthesize all existing data including existing baseline assessments and feasibility studies to create a final planning tool that provides the baseline information (scope and scale) for solar electrification in health posts.
- (ii) Work with MININFRA, EUCL/REG, MOH and its implementation partners to validate the existing data particularly in relation to mapping of villages targeted for off-grid electrification, or where existing HPs do not have functioning electricity connections, and update key data fields as new information is made available.
- (iii) Ensure awareness and understanding of the utility of the tool and participate in initial outreach and sensitization workshop.

2. Business Plan:

The second deliverable is an indicative business plan incorporating revised financial models and structures for the solar electrification component, that would be cohesive within the larger investment programme. The suggested elements of the Plan include:

1. Background and rationale
2. Mission
3. Legal requirements, including proposed legal status
4. Governance and organizational structure (Steering Committee composition, management arrangements, etc.)
5. Business model:
 - Business case: summary of market and client needs; revenue projection models, and scenario modelling and/or sensitivity analysis of clean energy output expected, and investment required (building on past Technical Report and Deliverable 1).
 - Presentation of financial products, including justification of the need for a capital subsidy and optimal approach of a results-based funding approach with reduced subsidization over time.
 - Investment strategy and criteria.
 - Operations, operating budget, and financial planning, based on conducting financial modeling and development of detailed operational plan for roll-out of proposed financing. This would include designing maximum flexibility and competitive-based outcomes for private sector responsiveness. The operational plan should incorporate Pay-As-You-Go (PAYG) options, optimal schedule for ensuring adequate maintenance and reliability of systems to be installed, and cost effective, modular upgrading of system capacities as required in conjunction with future scheduled battery replacements.
 - Impact framework, inclusive of stakeholders' engagement and safeguards.
 - Risk assessment and mitigation including technical, data management, and business requirements necessary to mitigate risks to effective systems performance, and to enable installed systems to function and be maintained with minimal effort on the part of operators of HPs.
 - Plan for sustainable disposal or recycling of equipment including used batteries.
 - Resource mobilization/capitalization plan, inclusive of co-financing commitments.
 - Key terms of participation agreements with on-lending institutions.
 - Capacity/Training Plan: scheme for HP operators.

6. Roadmap and milestones

Strongly building on the past technical report prepared, lessons learned and stakeholder interviews, and new analyses, the Plan would validate or revise the recommended financing scheme and business model (i.e., a performance-based subsidy scheme linked to existing concessional debt financing instruments). It would fill information gap(s) to ensure energy project components and technology solutions are feasible, scalable, and sustainable in the country's current market and regulatory environment. The analysis should provide the GoR and PPP stakeholders with a validation of already outlined technical specifications for level of service and quality required for solar electrification required (e.g., cycle life, warranty period, ISO certifications, etc.) considering existing technologies such as solar PV panels, batteries, and other accessories. The consulting firm shall validate a realistic demand load profile (i.e., total and peak kWh) for HPs based on current and projected levels of access, differing services being performed in different HP configurations, sources of electricity, reliability of current services, and pace of electrification rates. The potential for use of solar-optimized IT and health equipment (e.g., medical-grade refrigerators and clavicles) that could increase service capabilities at Health Post level shall also be considered in the business plan and demand load.

3. Final project proposal and investment prospectus:

The firm will support UNDP and its partners in the negotiation and confirmation of public support/co-funding from MININFRA and MINECOFIN for the intended financing scheme and provide advisory and technical backstopping in investor outreach. Specifically, this shall include packaging a project proposal for the Renewable Energy Fund managed by BRD and ensuring the proposal conforms to Fund’s investment criteria. The consultants will develop present the key findings at a validation workshop of all key stakeholders, and ensure they are integrated into final investment prospectus/full project proposal to be submitted to the UN Joint SDG Fund Secretariat that will be prepared by a separate independent consultant. - (c) Validation of scenarios and key factors and financing bottlenecks outlined in the pre-feasibility stage to achieve financial sustainability, including minimum throughput for HP services and client ability to pay.

- (d) Confirm required level of financial subsidy to support HPs at various levels/configurations to be financially sustainable based on estimate of demand, invoice throughput, market growth, and interest rate scenarios.

2. Draft SPV Business Plan & Processes

The firm will conduct legal due diligence to ensure proposed structure for SPV operationalization or alternative financial intermediary is viable in the Rwandan context, including but not limited to its license to operate. The consultant shall work with financial regulators and interested implementers to define acceptable structure, modalities of operation, and acceptable administration/management costs to be recovered from the fund. In this process, assess the potential of a combining solar electrification results-based funding component into the overall HP impact fund/SPV structure and advise on merits of inclusion or separation of funding processes. The Plan should define RSSB actions and commitments and outline a long-term exit strategy. Finally, the consultant shall support the UN coordination team in the process to secure co-financing commitments and letters demonstrating investors' interest and shall liaise with an additional consultant developing and investment prospectus.

The suggested format and elements to be captured in the Plan include:
