Part I

Mainstream SDGs in **OWN** goals

Guess What!

Many people see global goals, continental goals, and even national goals distant from our own. People never take time to think and connect their own personal goals with the global, continental or national goals.

Because we are citizens, of our countries, our continents and our world, what happens can affect us positively or negatively. We should think of how to leverage the opportunities presented by these goals, which seem distant from us to achieve our own personal goals.

That is not all, many of us have an idea of our personal goals that we want to achieve in the future, but we rarely write them down.

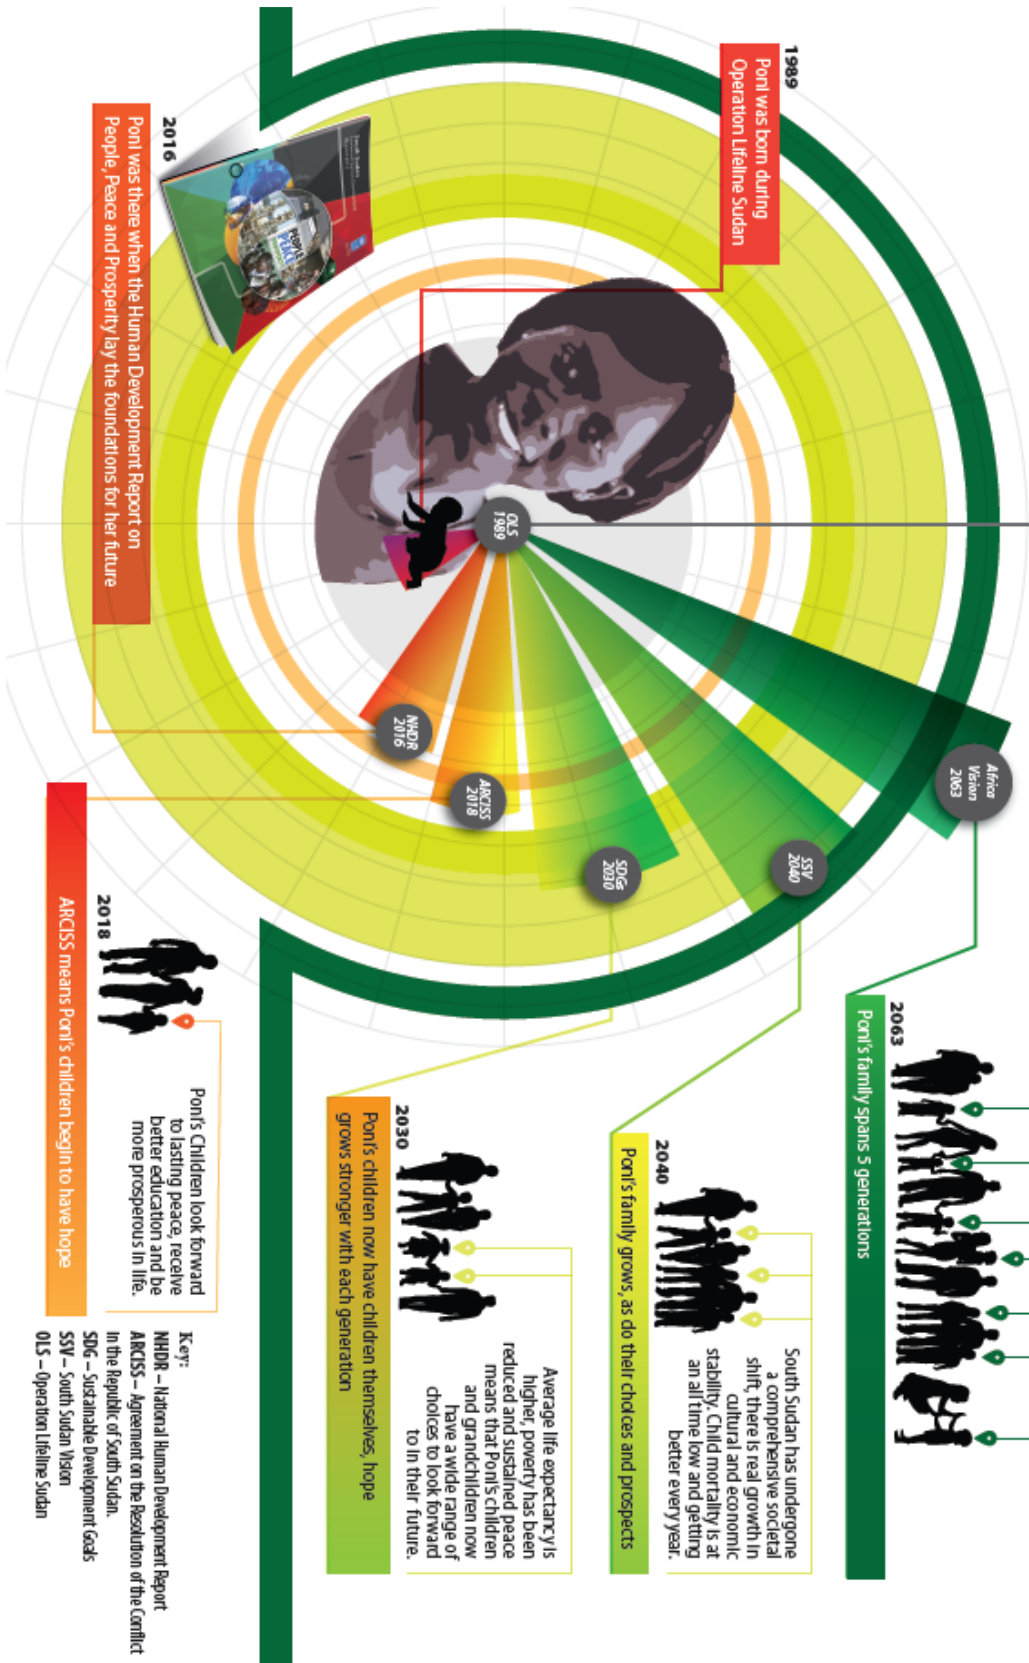

*If you have written your long-term personal goals, you are one of the very few ~
congratulations.*

Guess what, research shows that people that write their goals are more likely to achieve them. So you are on the right track.

1. Do you have any personal long term goals that you want to achieve by the year 2030? Tick your response.
 - 1-Yes, written down,
 - 2-Yes, not written down,
 - 3-No

We want you to meet Poni (on the next page). Poni took a deliberate effort to map out her life through the years. She pictures her life through the different development strategies to which South Sudan is a signatory. Take 5 minutes and study what she sees as her transformation through generations.
