Million People
used e-Consulate
system and saved
precious time from
their lives
(e-Consulate)

475 refugees trained on access to legal aid (UNJP)

Demining

Landmines are placed during conflict times and once the conflict ends, the area is left as is, posing great threat to people and animals living nearby. With Socioeconomic Development Through Demining Project, we are supporting Turkey to remove those mines while creating new job opportunities.

Integrated Border Management

With modern times come modern needs. This also goes for the management of the borders and with the Integrated Border Management Project, Turkey can now integrate the state-of-the-art equipment and model trainings for her border protection.

e-Consulate

Getting a government work done doesn't necessarily mean producing paper waste anymore. With e-Consulate project, the Turkish citizens abroad can access most consulate services online and even get appointments to prevent the long lines we were used to while saving paper.

UNJP on Enhancing Access to Justice and Legal Aid for Refugees in Turkey (UNJP?)

On board UNJP, along with UNHCR, we support trainings, workshops and documentation to lawyers on how to support refugees better and to refugees on how to react when in need of legal support.

Ethics, Transparency and Trust

Being a milestone in global justice system with the İstanbul Declaration on 2018, Ethics Project aims at how to improve the established legal system in a philosophical way. Publishing the internationally recommended declaration, we can say this project is an invaluable investment to the future.

Local Administration Reform

Would you like to live in a dream city? From improving peoples' lives to supporting them accessing their specific needs, Local Administration Reform is supporting municipalities all over Turkey, helping them help their residents.

Civilian Oversight

Isn't it nice to feel safe? With 9 previously established cities and 10 new pilot cities, Civilian Oversight project supports the democratic and human centric approach of the internal security forces in local, regional and national levels.

Legal Aid

Zero tolerance to violence! This is our motto and with numerous bar associations and attorneys, we are supporting this idea all over Turkey. All in all, nonviolence is a powerful and legitimate weapon. It cuts without injuries and make the person who uses it noble.

NHREI

We believe in the importance of equity and public supervision. With NHREI project, we aim at supporting improvement of human rights standards as well as their supervision. With the increased capacities of National Human Rights and Equity Institute (NHREI) as well as Ombudsman, human rights standards are in a steady incline since 2018
