## TABLE

## NOTES

- † Denotes indicators used to calculate the human poverty index (HPI-1). For further details, see Technical note 1: [www.hdr.undp.org/en/statistics/tn1](http://www.hdr.undp.org/en/statistics/tn1)
- a** Data refer to the probability at birth of not surviving to age 40, multiplied by 100.
- b** Data refer to national illiteracy estimates from censuses or surveys conducted between 1999 and 2007, unless otherwise specified. Due to differences in methodology and timeliness of underlying data, comparisons across countries and over time should be made with caution. For more details, see <http://www.uis.unesco.org/>.
- c** Data refer to the most recent year available during the period specified.
- d** Income poverty refers to the share of the population living on less than \$1.25 a day. All countries with an income poverty rate of less than 2% were given equal rank. The rankings are based on countries for which data are available for both indicators. A positive figure indicates that the country performs better in income poverty than in human poverty, a negative the opposite.
- e** For the purposes of calculating the HPI-1 a value of 1% was assumed.
- f** Estimates cover urban areas only.
- g** Data refer to an earlier year outside the range of years specified.
- h** Data are from a national household survey.
- i** UNESCO Institute for Statistics estimates based on its Global Age-specific Literacy Projections model, April 2009.
- j** Data refer to an earlier year than that specified.
- k** In the absence of recent data, estimates for 2005 from UNESCO Institute for Statistics (2003), based on outdated census or survey information, were used and should be interpreted with caution: Bahamas 4.2, Barbados 0.3, Djibouti 29.7, Fiji 5.6, Gambia 57.5, Guyana 1.0 and Hong Kong, China (SAR) 5.4.
- l** National estimate.
- m** UNICEF (2005b).
- n** Data are from a national census of population.
- o** Data are from the Secretariat of the Organization of Eastern Caribbean States, based on national sources.
- p** Data refer to Serbia and Montenegro prior to its separation into two independent states in June 2006. Data exclude Kosovo.
- q** Data are from the Secretariat of the Caribbean Community, based on national sources.
- r** Data are from UNICEF's Multiple Indicator Cluster Survey.
- s** UNICEF (2004).
- t** Estimates are weighted averages of urban and rural values.
- u** Estimates have been adjusted for arsenic contamination levels based on national surveys conducted and approved by the government.
- v** Estimates are adjusted by spatial consumer price index information.
- w** Data refer to North Sudan only.
- x** UNDP (2006b).

## SOURCES

- Column 1:** determined on the basis of HPI-1 values.
- Column 2:** calculated on the basis of data in columns 3–6.
- Column 3:** UN (2009e).
- Column 4:** UNESCO Institute for Statistics (2009a).
- Columns 5 and 6:** UN (2009a) based on a joint effort by UNICEF and WHO.
- Columns 7–9:** World Bank (2009d).
- Column 10:** calculated based on HPI-1 values and the income poverty measures.
